Cascade Locks	Harrisburg	Summerville
Columbia City	Helix	Umatilla
Cornelius	Hines	

The Engineer advised that all of these cities and towns have satisfactorily complied with the legal requirements and that the plans for each of the proposed improvements have been checked and found satisfactory. He recommended approval of the plans. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Amity	$ 761.77
Banks	345.24
Carlton	1,207.65
Cascade Locks	982.62
Columbia City	457.06
Cornelius	890.37
Donald	229.23
Fossil	743.60
Grants Pass	8,425.62
Harrisburg	869.40
Helix	169.13
Hines	946.28
Myrtle Creek	616.41
Paisley	331.27
Scio	490.61
Summerville	111.82
Umatilla	517.17

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Amity - Woodson Street, Oak Street, Sherman Street

Banks - Wilkes Avenue, Parmeley Street, Woodman Street

Carlton - E. Polk Street, W. Grant Street, E. Monroe Street, W. Monroe Street, W. Madison Street, W. Jefferson Street, W. Johnson Street, W. Lincoln Street, N. 4th Street, S. 3rd Street, N. 2nd Street, N. 1st Street, N. 3rd Street, S. Park Avenue, N. Kutch Street, S. Kutch Street, N. Howe Street, N. Scott Street

Cascade Locks - Moody Avenue, Third Street, Fifth Street, and alley from Prospect Avenue

Columbia City - "L" Street, 2nd Street, "E" Street, "I" Street, 1st Street, Mattie Street, "M" Street, 4th Street, "G" Street

Cornelius - Park Street

Donald - Mathius Road, Williams Avenue, Ehlen Street, Oak Street, Crissell Street, Feller Street, Cone Avenue, Rees Street

Fossil - Adams Street, Main Street, Jay Street, Rutledge Street, Chase Street, 6th Street, 5th Street, 3rd Street, Broadway, "B" Street

Grants Pass - West "A" Street, East "A" Street, East "D" Street, East "F" Street, East Mill Street, 2nd Street, N. 3rd Street, Booth Street, Foundry Street, S. 7th Street, "N" Street, Dimmick Street, Highland Avenue, Midland Avenue

Harrisburg - Third Street, Kesling Street, and junction of Sixth and La Salle Streets

Helix - Aurora Street, Vesper Street, Cleveland Street, Solar Street, Concord Street, Main Street

Hines - Barnes Avenue, also other streets requiring maintenance and repair

Myrtle Creek - 1st Street, 2nd Street, 3rd Street, Division Street, Oak Street

Paisley - Main Street

Scio - Plum Street, 5th Street, South Mill, Main Street, North Street, Mill Street, Smith Street

Summerville - Main Street, Patton Street, Jefferson Street, First Street, Second Street, Third Street, Fourth Street

Umatilla - Water Street, 1st Street, "C" Street, "I" Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

5. This resolution shall be entered in the minutes and records of this Commission as of the 25th day of February, 1946.

The Commission discussed a request from the City of Gresham for state cooperation in connection with the improvement of Powell Valley Road (Mt. Hood Highway), including construction of a storm sewer, through this town. The Engineer explained details in connection therewith; however, the Commission deferred action in the matter until the following day when a delegation from Gresham will be present for discussion of the matter. (See ahead for additional paragraph concerning this matter).

A communication was presented from the State Soil Conservation Committee of Oregon enclosing an official ballot with reference to the creation of a proposed West Umatilla Soil Conservation District and the election of three supervisors for said district. The question arose whether or not the State Highway Commission should vote in the matter. The Commission's Chief Counsel gave as his opinion that the Commission should not exercise the voting privilege, whereupon the Commission voted unanimously not to cast a ballot.

The Commission discussed with the Engineer the bids received at

2:00 p.m. for the construction of state highway projects and for the purchase of concession privileges at Silver Creek Falls State Park and took the following action thereon:

The contract for placing new timbers in the Vine Maple Bridge over the Nehalem River on the Fishhawk Falls Secondary Highway, Clatsop County, was awarded to the low bidder, Philpott & Buckingham, Portland.

The contract for pavement resurfacing on the West Unit, Lebanon-Sweet Home Section of the Santiam Highway, Linn County, was awarded to Warren Northwest, Inc., low bidder.

Award of the contract for grading the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County, was held pending the clearing up of right of way matters. The bids were referred to the Engineer with authority to award the contract to Berke Bros., Portland, the low bidder, when this condition has been satisfied.

The Commission rejected all bids received for the construction of the North Unit, Fulton Canyon Section of the Fulton Canyon-Wasco Secondary Highway, in Sherman County.

The award of the contract for regrading, surfacing, and oiling the Weston Mountain-McDougal Section of the Weston-Elgin Secondary Highway, Umatilla County, was deferred pending clearance by the Public Roads Administration, inasmuch as Federal funds are involved. The bids were referred to the Engineer with authority to award the contract to the low bidder, E. C. Hall Company, Portland, when approval of the Public Roads Administration has been obtained.

The Commission awarded to Porter W. Yett, Portland, the low bidder, the contract for regrading, surfacing, and oiling the Campbell Bridge-Hazeldale Section of the Farmington Highway, in Washington County, on the basis of using tar.

The Commission referred to the Engineer and the Chief Counsel all bids received for the purchase of concession privileges at Silver Creek Falls State Park with instructions to investigate the several bidders and to report their findings to the Commission over the telephone, when further instructions will be given.

The Commission had under discussion the date for its next regular meeting for the receiving of bids and decided unanimously to change the date previously set, April 2 and 3, 1946, to Thursday and Friday, April 4 and 5, 1946. The Secretary was instructed to make the usual arrangements to hold the meeting in the Auditorium of the Public Service Building, Portland.

The Commission considered the following matters of unfinished business:

1. Proposed exchange of roads in Benton and Polk Counties in connection with the termination of agreements covering state maintenance of the Independence-Granger County Road: The Engineer advised that he would report on this matter at the next meeting.

2. Termination of agreements with Clatsop County and the cities of Warrenton and Hammond covering state maintenance of the Fort Stevens-Camp Clatsop County Road and the Warrenton-Fort Stevens County Road: The Commission voted unanimously to terminate as of April 1, 1946, the agreement covering the Fort Stevens-Camp Clatsop Road but agreed to maintain the Warrenton-Fort Stevens Road at state expense until January 1, 1947. The Commission will inspect this road in person in the meantime and will decide then whether or not to extend state maintenance of this road for a longer period. The Secretary was instructed to inform the Clatsop County Court and the officials of both cities accordingly.

3. Report on cost to modernize the Siuslaw Highway over the summit of the Coast Range, Lane County: The Engineer advised that his report on this matter is not ready.

4. Report on proposed bridge over the Willamette River at Independence, Polk and Marion Counties: The Engineer and the Chief Counsel advised that their report on this subject has not been prepared.

5. Proposed exchange of properties with the Weyerheauser Timber Company at North Bend, Coos County: The Engineer advised that there is nothing to report on this matter at the present time because the company has not acted on the Commission's proposal for the exchange; however, he anticipates that someone representing the company will appear before the Commission at its next meeting to discuss the matter.

6. Claim of W. W. Purvis for damage to his property at Nelscott arising out of curb and sidewalk construction on the Oregon Coast Highway at this place: The Engineer and the Chief Counsel advised that their report on this matter is not ready but they will endeavor to have it ready for the Commission's consideration at the next meeting.

7. Request of the City of Woodburn for state cooperation in the improvement of the Hillsboro-Silverton Secondary Highway from its junction with the Pacific Highway East to the Woodburn Civic Center: The Engineer advised that his report on this subject is not ready for presentation.

8. Report on the request of the City of Lebanon for the widening of the South Santiam Highway at the south city limits: The Engineer advised that this project is rather complicated because it involves the designation of two one-way streets for highway traffic. He outlined the plan briefly. The Commission deferred action in the matter until its next meeting and instructed the Engineer to submit at that time a detailed cost report, when the Commission will make its decision.

9. Report on the request of the Board of County Commissioners of Multnomah County for a substitution of projects in the Postwar Secondary Highway Program which would allow improvement of county roads on Sauvies Island rather than construction of a bridge connecting the Island to the mainland. The Engineer advised that the Board of Commissioners has changed its attitude since making the request and now prefers the bridge construction as provided in the original plan.

The Commission discussed briefly with the Engineer matters which are to be presented by the delegations on the following day but took no action with regard to any of them.

At 5:00 p.m. Chairman Banfield announced the following awards of contracts, bids for which were received by the Commission earlier in the session:

"Place new timbers in two 105 foot spans of the Vine Maple Bridge over the Nehalem River on the Fishhawk Falls Secondary Highway, Clatsop County. The Commission received two bids for this work, the low one being that of Philpott & Buckingham, Portland, at $16,680. The other bid was that of A. D. Ford & Son, Portland, at $29,842. The Commission has awarded the contract to the low bidder, Philpott & Buckingham, at its bid price of $16,680.

"Eight miles of pavement resurfacing on the West Unit, Lebanon-Sweet Home Section of the Santiam Highway, in Linn County. Warren Northwest, Inc., Portland, submitted the low bid for this project at $83,574. Parker Schram Co., Portland, submitted the next low bid at $95,425. There were three higher bidders. The Commission has awarded the contract to the low bidder, Warren Northwest, Inc., at its bid price of $83,574.

"3.1 miles of grading on the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. The low bid for this work was submitted by Berke Bros., Portland, at $279,810. R. A. Heintz Construction Co., Portland, submitted the next low bid at $291,120. There were eight higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Berke Bros., when certain conditions have been satisfied.

"Grading, surfacing, and oiling the North Unit, Fulton Canyon Section of the Fulton Canyon-Wasco Highway, Sherman County. The Commission received four bids for this project, the low one being that of Porter W. Yett, Portland, at $34,449.50. The bids have all been rejected.

"Regrading, surfacing, and oiling the Weston Mountain-McDougal Section of the Weston-Elgin Secondary Highway, in Umatilla County. E. C. Hall Co., Portland, submitted the low bid for this work at $175,985. J. N. & M. J. Conley, Portland, submitted the next low bid in the amount of $182,749. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Regrading, surfacing, and oiling the Campbell Bridge-Hazeldale Section of the Farmington Highway, in Washington County. The low bid was submitted by Porter W. Yett, Portland, at $109,690, based on the use of tar. T. W. Thomas, Portland, submitted the next low bid at $121,323.50, also based on the use of tar. There were three higher bidders. The Commission has awarded the contract to the low bidder, Porter W. Yett, at his bid price of $109,690.

"Sale of concession privileges at Silver Creek Falls State Park. The Commission received five proposals to purchase these privileges and has referred them all to the Engineer and the Chief Counsel with authority to accept the offer deemed best for the state's interests after investigating the bidders."

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
February 26, 1946

The State Highway Commission reconvened at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, Chief Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p.m. in the same room:

CONSTRUCT NEW BRIDGE OVER COFFEY CREEK ON
TILLER-TRAIL SECONDARY HIGHWAY IN DOUGLAS COUNTY

*C. J. Eldon, Portland	$ 15,050.00
Harry I. Hamilton Co., Eugene	16,562.00
McNutt Bros., Eugene	18,929.00
Sleeper & Keyes, Bend	22,450.00

*Bidder will not accept this project alone.

MAR 5 1946

TILLER-TRAIL HIGHWAY IN DOUGLAS COUNTY
MILO-TILLER SECTION

C. J. Eldon, Portland	$150,319.50
McNutt Bros., Eugene	196,102.50
Guerin Bros., San Francisco, Calif.	201,011.00

HOOD RIVER HIGHWAY IN HOOD RIVER COUNTY
WOODWORTH ACRES-PARKDALE SECTION

Babler Bros., Portland	$ 73,359.50
C. J. Eldon, Portland	75,287.50
T. W. Thomas, Portland	77,369.30
J. N. & M. J. Conley, Portland	79,335.50
Vernie Jarl, Gresham	79,715.00
E. C. Hall Co., Portland	82,321.50

LEXINGTON-ECHO HIGHWAY IN MORROW COUNTY
LEXINGTON-SOUTH SPRINGS SECTION

*Newport, Kern & Kibbe, Portland	$ 93,625.50
*Curtis Gravel Co., Spokane, Wn.	95,568.00
*E. C. Hall Co., Portland	104,474.50
J. N. & M. J. Conley, Portland	108,909.00
R. O. Dail, Portland	123,703.00
*C. J. Eldon, Portland	127,714.50
Sound Construction & Engineering Co., Seattle, Wn.	130,433.00

*Bidder will not accept this project alone.

LEXINGTON-ECHO HIGHWAY IN MORROW COUNTY
SOUTH SPRINGS-UMATILLA COUNTY LINE SECTION

*Newport, Kern & Kibbe, Portland	$ 88,498.80
*Curtis Gravel Co., Spokane, Wn.	90,746.00
J. N. & M. J. Conley, Portland	99,098.00
*E. C. Hall Co., Portland	100,973.00
**R. O. Dail, Portland	116,851.00
***Sound Construction & Engineering Co., Seattle, Wn.	120,880.50
*C. J. Eldon, Portland	122,179.00

*Bidder will not accept this project alone.
**Reduction of $7,000 if also awarded Lexington-South Springs Sec.
***Reduction of $2,500 if also awarded Lexington-South Springs Sec.

COMBINATION BIDS FOR THE ABOVE TWO PROJECTS

	(1)	(2)	Reduc.	Comb. Bid
Newport, Kern & Kibbe	$ 93,625.50	$ 88,498.80	$ ---	$182,124.30
Curtis Gravel Co.	95,568.00	90,746.00	---	186,314.00
E. C. Hall Co.	104,474.50	100,973.00	---	205,447.50
J. N. & M. J. Conley	108,909.00	99,098.00	---	208,007.00
R. O. Dail	123,703.00	116,851.00	7,000.00	233,554.00
Sound Constr. & Engr. Co.	130,433.00	120,880.50	2,500.00	248,813.50
C. J. Eldon	127,714.50	122,179.00	---	249,893.50

Hon. Willard L. Marks headed a delegation from Albany representing the Rotary Club, which has requested permission to construct and maintain a Sea Scout Clubhouse on the shore of Waverly Lake, at Albany. Others in the group were Dr. T. W. Sahlstrom, optometrist; Harry Michelsen, Scout executive; and A. M. Epperly, furniture dealer. Mr. Marks advised that the Albany Rotary Club is sponsoring this clubhouse, which will cost about $3,000, and that it is to be the meeting place for Sea Scouts of the Albany vicinity. He further stated that it would be an attractive building and, in their estimation, would be an asset to the lake and the surrounding territory; moreover, they would guarantee to keep it painted and in good condition and would maintain the premises to the entire satisfaction of the State Highway Commission. He urged favorable consideration of the request. Chairman Banfield gave as his thought that the Commission, if it granted this request, would want the matter covered by a written agreement containing restrictions and demands for the thorough upkeep of the building so that it would not become an "eye sore" or detract in any way from the beauties of the lake and adjacent state-owned property. He stated further that if the building is kept attractive he personally would not object to its being maintained on the state's property, but not otherwise. Commissioners Schaupp and Chessman expressed themselves similarly. After further discussion the Commission voted unanimously to allow the building to be located on the state's property subject to the condition that the Albany Rotary Club will assume the responsibility to keep it in a condition satisfactory to the Highway Commission at all times. It was ordered that the matter be covered by a written agreement setting forth restrictions and the Commission's requirements. The Commission referred the matter to the Chief Counsel and the Engineer to work out the details.

Mr. Arch B. Sanders, Coos Bay, Oregon, Manager of the Oregon Coast Association, was present regarding the following:

1. Enegren Ferry Road, (Coos River Secondary Highway). Mr. Sanders advised that this road was constructed a number of years ago across private property owned by Mr. Chas. Enegren, who suffered it to remain at the present location with the understanding that it would be relocated at some future time.

This arrangement, he said, was made by the County Court of Coos County before the road was designated a state secondary highway. He further stated that the road carries a large volume of traffic and is impassible during periods of high water, for which reason the County Court and Mr. Enegren are very anxious that it be located properly and improved. He advised that he is bringing the matter to the attention of the Commission at the request of the County Court. The Commission took the matter under advisement.

2. Request for renaming state park adjacent to the Oregon Coast Highway north of Port Orford, Curry County: Mr. Sanders stated that this park is now shown on the highway maps as "Newberg Park" for no known reason. He suggested that it be renamed "Black Rock Point State Park," inasmuch as the district in which the park is located is generally known as the Black Rock District. The Commission referred the matter to the State Parks Superintendent for investigation.

3. Proposed improvement of the Oregon Coast Highway through the City of Gold Beach: Mr. Sanders read aloud a joint letter from the Curry County Court, City of Gold Beach, and the Gold Beach Chamber of Commerce urging resumption of right of way negotiations for this improvement to the end that construction may proceed at the earliest possible time. Chairman Banfield advised that the Commission has no quarrel with the people of Gold Beach but simply stopped the negotiations for the right of way because it appeared to the Commission that the people did not care to furnish the right of way on the basis of their agreement with the former Highway Commission. Insofar as the Commission was presently advised the status of the matter has not changed although the Commission's Chief Counsel has authority to resume the negotiations when the differences have reached a satisfactory adjustment. The Chief Counsel gave as his thought that the differences could be ironed out in the not distant future.

4. Mr. Sanders read aloud and presented to the Commission a letter from the Oregon Coast Association complimenting the Commission on the manner in which it has maintained the state highway system during the wartime period in the face of extreme difficulties, and for the thoroughness evidenced in the developing of its Postwar Construction Program, also expressing confidence in the members of the State Highway Commission and its staff. The Commission expressed sincere appreciation for the compliments.

A delegation representing the County Courts of Tillamook and Washington Counties appeared before the Commission in the interests of construction of the connecting link between the Wilson River Highway at Glenwood and the Sunset Highway at North Plains, Washington County. The group consisted of County Judge Harland Woods and County Commissioner A. D. Thompson, of Tillamook County; and County Judge H. D. Kirkman and County Commissioner Jim Lewis, of Washington County. County Judge Guy Boyington of Clatsop County also was present. Judge Woods headed the group and presented a resolution that was adopted jointly by the County Courts of Washington, Multnomah, and Tillamook Counties, in which the Highway Commission is "requested and urged to take all steps and proceedings that may be necessary or proper to immediately adopt a program which will provide for the immediate construction of

a highway that will connect said Wilson River Highway with said "super" highway, and that said Wilson River Highway connection be constructed and completed, as near as possible, simultaneously with the construction and completion of that part of said "super" highway which will connect and complete the Sunset Highway." The Engineer exhibited a map showing the proposed highway connection, which, he said, is about ten miles long and is estimated to cost approximately $1,000,000, such estimate being based on projected alignment rather than on an actual survey. He further stated that the project has not been included in any program that the Highway Commission has formulated to date. Chairman Banfield pointed out that the Commission's Postwar Program is now going forward and that all Federal monies provided for the same have been allocated, so there is no chance to include this highway connection. The only encouragement that the Commission can give at this time, he said, is that it will consider the project in the preparation of the next program this coming fall. The Commission, he said, has an established policy which prohibits the making of commitments or promises, in advance, for any project.

Judge Kirkman then brought up for discussion a proposed improvement of the Tualatin Valley Highway between Beaverton and Forest Grove. He advised that this is one of the heaviest-traveled highways in the state and is in need of widening to relieve traffic congestion, particularly in the cities of Hillsboro and Forest Grove where bottleneck conditions exist. The Commission expressed a sympathetic attitude but denied the request for immediate construction because of lack of funds.

A delegation from Pendleton and vicinity was present and requested the following improvements: (1) Reconstruction of a short section of the Pendleton-John Day Highway just south of Pendleton to eliminate several sharp curves. (2) Construction of a highway extending from Hermiston to the site of the proposed dam across the Columbia River near Umatilla. (3) Improvement of Court Street and Dorion Street, Pendleton, as one-way streets for state highway traffic. (4) Improvement of the county road which extends northerly from Helix to Vanslycle Station, thence westerly to the head of Juniper Canyon, and the construction of an entirely new highway down Juniper Canyon to a connection with the Columbia River Highway at the village of Juniper, to facilitate the truck hauling of wheat to the Columbia River.

Mr. Guy H. Johnson, Chairman, Highway Committee, Pendleton Chamber of Commerce, headed the group, which included County Judge Carl W. Chambers; County Commissioner Henry C. Biamont; Hon. Carl Engdahl, State Senator; James Hill, Jr., Manager, Pendleton Grain Growers Association; Jess Arnold, representing the Pendleton AAA; and the following farmers: Dale Tucker, Pendleton; Ivan La Hue, M. O. La Hue, Pete Kosmos, Merton R. Winn, and Melvin Winn, all of Helix.

Mr. Johnson spoke briefly in behalf of the first three of the above-mentioned projects. Concerning the improvement of the Pendleton-John Day Highway, he gave as their understanding that the former Highway Commission, prior to the war, authorized the reconstruction work in order to facilitate the truck hauling of logs, but the work was called off when war was

declared. He urged reconsideration of the improvement as a safety measure because of the large volume of heavy traffic the road carries. The Engineer advised that some state force work was performed on this section but at no time did the former Highway Commission authorize the contracting of the major project, so the work was never finished. The Commission took the matter under advisement.

Mr. Johnson urged the improvement of the Hermiston-Umatilla Damsite project in order to facilitate the truck hauling of wheat to the Columbia River port when the dam is built. The Engineer advised that the Highway Commission has budgeted $130,000 of the postwar funds for this improvement and that the work is scheduled to be done in the third postwar year. Mr. Johnson then inquired as to the status of the proposed traffic separation project on Court and Dorion Streets, Pendleton, and was informed by the Engineer that the project has been approved by the Highway Commission, which has also authorized the contracting of the work as soon as surveys are completed and plans and specifications prepared.

Mr. Hill spoke in behalf of the proposed Juniper Canyon project. In this connection he presented a typewritten brief supported by oral arguments. He particularly urged the improvement from the standpoint of providing highway facilities for a large new wheat-growing area and to reduce marketing costs. He alleged that the availability of this road would save the farmers about two cents per bushel per year if they obtain the advantages of water transportation. He said that they are simply asking the Commission to give the project careful consideration. Chairman Banfield pointed out that the Commission already has plans to spend about $900,000 in Umatilla County during the three year postwar period, and, in view thereof, it does not seem possible to program this project unless the people of Umatilla County prefer it to other projects now scheduled for construction and will agree to the transferring of the funds.

The Engineer advised that the Federal Secondary Highway System for Umatilla County has already been selected and approved, and it would be difficult to change it now. He estimated the cost to construct the eleven-mile section of new road down Juniper Canyon from the end of the existing road at Juniper Clubhouse, at about $400,000. It was his thought that the project should be deferred at least until the McNary Dam has been built because of changes that might be required. Chairman Banfield concluded the discussion by stating that the Commission would give the project careful consideration in the formulation of the next construction program.

Mr. Don Sterling, Member, Advisory Committee of the Highway Commission's Travel Information Department, was present and presented a Travel Budget for the year 1946 as approved by the Committee at its meeting in Portland on February 23, 1946. He was accompanied by Mr. A. B. Sanders, member of the Committee, and Mr. Arlin Cole of the advertising agency, MacWilkins, Cole and Weber, which has been selected to handle advertising matters for the Commission during the ensuing year. Mr. Sterling also presented a letter from Mr. Ralph R. Cronise, Acting Chairman of the Committee, explaining details in connection with the proposed budget, which

totals $215,664.38, including the sum of $85,000 heretofore authorized by the Commission at its meeting on December 27, 1945. He explained that it is planned to spend $40,664.38 of this total for advertising during the early months of 1947, although, if considered advisable, an even larger amount will be withheld for expenditure in 1947 if travel developments during the present year indicate the wisdom of such action. A recapitulation of those parts of the budget previously approved by the Commission and those elements now recommended for adoption by the Commission is as follows:

Basic Media (Space including production) herewith recommended	$130,664.38
Operation Budget—booklets, photography, supplies, administration, etc. (Adopted by Commission December 27, 1945)	50,000.00
Bookkeeping carry-over of $35,000 on 1945 commitments not billed or paid as of December 31, 1945. (Adopted by Commission on December 27, 1945)	35,000.00
	$215,664.38
Herewith recommended to be withheld for 1947 expenditure in space	40,664.38
Total authorized for 1946 expenditure	$175,000.00

Mr. Sterling read aloud Mr. Cronise's letter. (For details see letter directed to the Oregon State Highway Commission dated February 25, 1946, in general files). Following discussion the Commission approved the budget as recommended, the action being by unanimous vote upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

A delegation from Klamath Falls and Medford appeared before the Commission and urged construction of a new highway between Klamath Falls and Medford via Lake o' the Woods. Mr. Charles R. Stark, Secretary-Manager of the Klamath County Chamber of Commerce, headed the group, which included the following: Wally M. Hector, County Engineer, Klamath County; J. A. Dutcher, Klamath Falls, operator of the resort at Lake o' the Woods; F. J. Newman, Medford, representing the Jackson County Chamber of Commerce; T. S. Neeley, Medford; and William Perry, County Commissioner, Jackson County. Mr. James Frankland, Regional Engineer, U. S. Forest Service, was also present. Mr. Stark advised that the delegation is not asking the Highway Commission to make any changes in its present construction program but urgently requests that the Commission give their project careful consideration in the allocation of future funds. He spoke for the project from the recreational standpoint and presented a brief in support of oral arguments. Others speaking in behalf of the improvement were Messrs. Newman and Hector. Chairman Banfield advised that there is no

possible chance to secure this improvement in the Commission's present Post-war Program; however, it will be given due consideration in the preparation of future programs.

A delegation from McMinnville, consisting of Dr. W. W. Heringer, Dr. W. H. Barendrick, Dr. C. L. Williams, and Guy Schumway, was present and presented arguments in opposition to the adoption of Baker Street, McMinnville, as the permanent route of the Pacific Highway West through this city. They presented a petition signed by 278 citizens of McMinnville who "believe that the interests of McMinnville and of Oregon will be served best by your abandoning the proposed changes to make Baker Street, McMinnville, into a super highway and the development instead of a hundred-foot wide thoroughfare west of the city over the Star Mill route." Chairman Banfield advised that the State Highway Commission has already passed on this matter and has taken action to improve Baker Street as the permanent route of this highway; also, that it is the feeling of the Commission that such routing should not be changed unless the Engineer should recommend it. He added that the Commission will discuss the matter further with the Engineer and will announce its decision later.

The Commission recessed for luncheon at 12:15 p.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The following persons constituting a delegation from McMinnville was present and urged the Commission to retain and improve Baker Street as the permanent route for the Pacific Highway West through McMinnville: Hon. Eugene E. Marsh, State Representative; Hon. R. H. Windishar, Mayor of McMinnville; B. A. McPhillips, Assistant Manager, U. S. National Bank; Mr. Homer Ross, County Commissioner; Louis Courtemanche, Jr., City Councilman; Carl Vinton, auto dealer; Lee Waugaman, President, Oregon Mutual Fire Insurance Company; Frank Wortman, President, First National Bank; O. C. Yocom, City Engineer; Jack Bladine, Publisher, Telephone Register; Jack Griener, Councilman; Herman Larsen, Councilman; and Harry McMickle, automobile dealer. Mayor Windishar headed the group. He advised that, when the matter of designating Baker Street as the permanent route of this highway was first discussed, the people of McMinnville were practically unanimously in favor of such route; however, since then, opposition to such routing has developed under the sponsorship of the few people who are interested in the McMinnville Hospital, which is located on this street. He declared that the opposition does not reflect the majority of the people of McMinnville, who desire that no change be made in the routing as heretofore selected by the Commission.

Mr. Windishar also asked the Commission to make a decision with respect to the entrance of the Three Mile Lane Secondary Highway into McMinnville. He advised that Third Street, over which this highway is now routed, deadends at the parochial school near the eastern city limits, but the school authorities now are not unfavorable to the proposed improvement of the highway as it affects the school property because of the possibilities of ironing out differences. In this connection, he pointed out that three acres are available just beyond the church which would serve nicely as

school grounds in lieu of the present grounds that would be affected by the highway improvement, and gave as his thought that an arrangement might be effected for the use of this property for such purpose if action were taken soon. He urged the Commission to give the matter serious consideration while the opportunity exists because the present road, which leads to the city's airport, particularly the bridge over the river, is in a very unsatisfactory condition.

Mr. Marsh endorsed the remarks of Mr. Windishar with respect to both projects. Concerning the Baker Street matter he added that if the highway were routed as suggested by those who are opposed to the Baker Street route many valuable farms would be damaged. He pointed out that the Baker Street route passes by Linfield College, the directors of which at first objected to the routing but now have changed their attitude and are in favor of the present location. He also declared that, regardless of the route that is selected, at least 50 per cent of the traffic would use Baker Street. With reference to the petition filed by the delegation during the morning session, he stated that it contains the names of only a very few people who are property owners in McMinnville.

Mr. McPhillips stated that he is the biggest private property owner that would be affected by the routing. He endorsed the Baker Street route, notwithstanding that certain changes are to be made that would damage his holdings considerably. County Commissioner Ross and Mr. Courtemanche also spoke for the Baker Street route.

Chairman Banfield advised that the Commission's decision designating Baker Street as the route of this highway was based on the results of two public meetings conducted by the Commission in McMinnville and on reports of people whom the Commission expected and considered were acting in the best interests of the community. The Commission, he said, is endeavoring to route the highway in the best interests of all concerned and, in view of the two presentations made at this meeting, will reconsider the selection and take definite action later. This concluded the conference.

Following departure of the group the matter was again discussed by the Commission, and, as a result thereof, the Commission confirmed its previous decision by unanimous vote and instructed the Engineer to proceed with the improvement of Baker Street as originally planned.

The Commission discussed with the Engineer the bids received at the morning session and took the following action with regard thereto:

Construction of a bridge over Coffey Creek on the Tiller-Trail Secondary Highway, Douglas County: The Commission considered the low bid submitted by C. J. Eldon, Portland, to be satisfactory, however, Mr. Eldon qualified his bid by saying he would not accept the award of this contract unless also awarded the contract for the grading, surfacing, and oiling of the Milo-Tiller Section of this highway. Due to the fact that the award of the contract for the latter-mentioned project cannot be awarded until certain conditions have been satisfied the Commission referred the bids for

the bridge construction to the Engineer with authority to award the contract to Mr. Eldon when the conditions have been satisfied.

The Commission also referred to the Engineer the bids received for the grading, surfacing, and oiling of the Milo-Tiller Section of the Tiller-Trail Highway with authority to award the contract to C. J. Eldon, the low bidder, when certain conditions have been satisfied .

The Commission awarded to Babler Bros., the low bidder, the contract for grading, surfacing, and oiling the Woodworth Acres-Parkdale Section of the Hood River Secondary Highway, Hood River County.

The Commission awarded to Newport, Kern & Kibbe the contract for the regrading, surfacing, and oiling of the Lexington-South Springs Section of the Lexington-Echo Secondary Highway, in Morrow County, and also the contract for the regrading, surfacing, and oiling of the South Spring-Umatilla County Line Section of the Lexington-Echo Secondary Highway, in Morrow County, this contractor being the low bidder on both projects and the award being made on the basis of its combination bid.

At 2:30 p.m. Chairman Banfield announced the awards publicly, as follows:

"Construction of a bridge over Coffey Creek on the Tiller-Trail Secondary Highway, Douglas County. C. J. Eldon, Portland, submitted the low bid for this job at $15,050. He qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for the Milo-Tiller grading, surfacing, and oiling project. Harry I. Hamilton Co., Eugene, submitted the next low bid at $16,562. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. J. Eldon, when certain conditions have been satisfied.

"Grading, surfacing, and oiling the Milo-Tiller Section of the Tiller-Trail Secondary Highway, in Douglas County. C. J. Eldon, Portland, submitted the low bid for this job at $150,319.50. McNutt Bros., Eugene, submitted the next low bid at $196,102.50. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, C. J. Eldon, when certain conditions have been satisfied.

"Grading, surfacing, and oiling Woodworth Acres-Parkdale Section of the Hood River Highway, in Hood River County. The Commission received six bids for this job, that of Babler Bros., Portland, being low at $73,359.50. The bid of C. J. Eldon, Portland, at $75,287.50 was the next low bid. The Commission has awarded the contract to the low bidder, Babler Bros., at their bid price of $73,359.50.

"Regrading, surfacing, and oiling the Lexington-South Springs Section of the Lexington-Echo Secondary Highway, in Morrow County. The low bid was submitted by Newport, Kern & Kibbe, Portland, at $93,625.50.

This contractor stated refusal to accept the award unless also awarded the contract for the South Springs-Umatilla County Line Section of the Lexington-Echo Secondary Highway, for which he was also the low bidder. Curtis Gravel Co., Spokane, Washington, was the second low bidder at $95,568. There were five higher bids. The Commission has awarded this contract to the low bidder, Newport, Kern & Kibbe on the basis of its combination bid for both projects.

"Regrading, surfacing, and oiling the South Springs-Umatilla County Line Section of the Lexington-Echo Secondary Highway, in Morrow County. Newport, Kern & Kibbe, Portland, submitted the low bid at $88,498.80. Curtis Gravel Co., Spokane, Washington, was the second low bidder at $90,746. Both of these contractors qualified their bids by stating that they would not accept the award of this contract unless also awarded the contract for the Lexington-South Springs Section. The Commission has awarded the contract to the low bidder, Newport, Kern & Kibbe, on the basis of its combination bid for both jobs."

A delegation from Harney County, consisting of County Judge Nelson B. Higgs; J. L. McCulloch, Burns, City Councilman; and Ellis B. Bennett, representing the Burns Chamber of Commerce, came before the Commission regarding the improvement of the Burns-Crane Highway and the improvement of the road leading to the Burns Airport and the state experiment station, which connects with the Burns-Crane Highway. Judge Higgs was spokesman. He urged the contracting of the Burns-Crane project at the earliest possible time and asked the Commission to include in such contract provision for the improvement of the airport road. The Engineer advised that the Burns-Crane Highway improvement is scheduled for construction in the first year Postwar Program and he anticipates that bids will be received therefor at the April meeting of the Commission; however, no provision has been made for the airport road. Chairman Banfield advised that the Commission has no unobligated funds to allocate to the airport road construction at the present time, but the Commission will be pleased to consider it in the formulation of its next program, which will be discussed some time this fall. In the meantime, he said, the Commission expects to canvass the state in order to get the ideas of the people in the various communities with respect to the projects that should be given preference in such program. This concluded the conference.

A delegation representing the Gresham City Council and including R. L. Burton, Eugene Welling, and Guy Matthews, Councilmen; and C. C. Meisel, City Engineer, came before the Commission and requested state aid in the widening, and otherwise improving, of the Powell Valley Road (Mt. Hood Highway) through their city. Mr. Meisel was spokesman. He advised that the city has a street improvement program which includes the paving of a number of streets that intersect the Powell Valley Highway, and the construction of curbs, sidewalks, and storm sewers. Due to the fact that Powell Valley Road is a state highway they are requesting state assistance in the improvement of that street to conform with the improvement of the intersecting streets. He asked for construction of curbs on both sides of Powell Valley Road, widening and paving the full width between curbs, and the installation of a storm drain to take care of water that comes from side streets. He suggested the use of

Federal monies to finance the work. The Commission deferred a decision in the matter pending additional information and referred it to the Engineer with instructions to ascertain just what the city has in mind and how much the state's share would cost.

A delegation representing the Sullivan's Gulch Highway Committee, Portland, and including Hon. Robert A. Bennett, State Representative; H. E. Carlson, Secretary; and George Claussen, Assistant Secretary, came before the Commission regarding the proposed state highway along Sullivan's Gulch, Portland. Mr. Bennett headed the group and presented a petition urging the survey of the route at the earliest possible time. He was informed by Chairman Banfield that the survey is now under way, having been authorized by the Commission some time ago on the basis of an agreement with the Portland City Council that it would not grant permits for the development of industrial sites along the proposed route for the time being. Such survey authorization, he said, does not carry with it any commitment whatsoever as to construction, which shall depend upon the feasibility of the project from economic and other standpoints.

Mr. Asa W. Battles, County Judge of Crook County, headed a delegation which included J. C. Minson, County Commissioner; E. E. Goodrich, County Assessor; C. C. Vice, rancher; and Paul H. Spillman, rancher, all of Prineville, which asked the Commission to change its program of Federal Aid Secondary Highway projects by eliminating from the Federal Aid Secondary System the Prineville-Upper McKay Creek County Road, and the substitution therefor of the county road which extends westerly from Prineville about six and one-half miles, thence south to a connection with the Ochoco Highway near Powell Butte Store. Mr. Minson gave figures on the tonnage hauled over this road in support of their request. The Engineer advised that, while the Prineville-Upper McKay Creek County Road is on the Federal Aid Highway System, no money has been set up for construction. He gave as his thought that a switch in the projects could be made later on, if the change is still desired when money becomes available to finance the work. Chairman Banfield advised that the Commission would hold off this project for the time being and consider the change when the job can be financed. He assured the delegation that nothing further would be done about the matter without first discussing it with the County Court.

The County Court of Deschutes County, represented by County Judge C. L. Allen and County Commissioners E. E. Varco and A. E. Stevens, was present in the interests of the county road which extends easterly from a connection with the Powell Butte Secondary Highway, about four miles east of Bend, a distance of 9.4 miles to a place known as Alfalfa. Judge Allen advised that this road is badly in need of improvement and that the people were assured by the Court that it would be given first consideration after the war. He pointed out that the road has been tentatively designated a Federal Aid Secondary Highway but is not scheduled for improvement in the Postwar Program, so they are coming to the Highway Commission at this time in an endeavor to obtain state aid in financing the work. Judge Allen referred to an agreement between the County Court and the former Highway Commission regarding the improvement of the Lower Bridge-Terrebonne County Road (see Agreement No. 621,

dated July 18, 1941, as ammended by Agreement No. 674, dated May 19, 1942, in the Miscellaneous Contracts and Agreements File) wherein the state was obligated to do certain things and the county was obligated to do certain things. The county, he said, has fulfilled its obligation, but the state still owes the county the sum of $5,422.45, which, according to the agreement, was to be spent for the improvement of some other county road. The Engineer verified Judge Allen's statement and explained the arrangement in detail. Judge Allen asked the Commission to apply this amount on the oiling of the Alfalfa County Road and to augment the same with additional state monies. The county, he said, will do the necessary grading and surfacing work and will repair the bridge structures at county expense. The Engineer estimated the cost of the grading and surfacing at approximately $55,000 and the cost of the oiling work at about $35,000. He recommended favorable consideration of this request. The Commission took the matter under advisement.

Judge Allen then advised that the County Court wishes to repair the bridge structures before the irrigation season starts and inquired into the possibilities of securing the services of an engineer of the State Highway Department to set the grade stakes. The Engineer was instructed to perform such service for the county. This concluded the conference.

Following departure of the delegation the matter was given further consideration by the Commission. As a result of discussion, the Commission, by unanimous vote, authorized the oiling of this road as a state-financed project, the work to be contracted as soon as plans and specifications can be prepared.

Messrs. Fred T. Fowler, Traffic Engineer for the City of Portland; E. Gary Spencer, Vice Chairman, Transportation Planning Commission; and W. J. Weller, Transportation Engineer and Secretary-Director of the Transportation Planning Commission, came before the Commission regarding the use of the park area between Harbor Drive and Front Avenue, Portland, and extending from S. W. Washington Street to S. W. Pine Street, for the parking of automobiles during the present emergency. Mr. Fowler headed the group. He advised that the automobile parking problem in Portland at the present time is serious and urged the Commission to allow the use of the above-described area for the parking of cars until such time as a comparable area has been provided. He suggested such use for at least one and one-half years and the postponement of the Highway Commission's landscaping project until the Harbor Drive Project has been completed. Chairman Banfield advised that the Commission has given this matter considerable thought and is reluctant to permit the use of the property for the purpose suggested because of complications that would result from such use. He asked Mr. Fowler whether or not, in his estimation, the Portland City Council would ask the Highway Commission, in writing, to delay the landscaping project that is planned for this area so that the property could be used as a parking lot. It was Mr. Fowler's thought that the City Council would make such a request in writing. The Commission thereupon instructed the Chief Counsel and the Engineer to prepare an appropriate letter and an agreement in conformity with the Commission's ideas on the subject. A definite decision in the matter was deferred by the Commission pending satisfactory conclusion of the negotiations.

The Engineer requested authority to advertise for bids for a number of construction projects to be financed with state funds. He presented a list of eligible projects, from which the Commission selected the following for immediate construction:

COUNTY	HIGHWAY	SECTION AND KIND OF WORK	ESTIMATED COST
Benton	Eddyville-Blodgett	20 miles Resurfacing	$ 150,000
Coos	Coos Bay-Roseburg	South of Myrtle Pt., Line change	15,000
Deschutes	Alfalfa Co. Rd.	10 miles Oiling	35,000
Gilliam	Wasco-Heppner	Hay Creek Section, 4 mi. Grad. & Surf.	150,000
Lake	Warner Valley	Burns-Lakeview Hwy. to Mud Creek, Resurfacing	110,000
Multnomah	Pacific	Interstate Bridge, Lighting	11,000
Multnomah	Columbia River	Slide east of Multnomah Falls	100,000
Sherman	Shaniko-Fossil	Sherars Bridge Section	75,000
		Total	$ 646,000

In the discussion of the above-selected projects, the Commission also considered the resurfacing of the Oregon City-Canby Section of the Pacific Highway East, in Clackamas County, which the Engineer estimated would cost about $250,000. It was the thought of the Commission that this section of highway should be widened as well as resurfaced in order to eliminate the excessive curvature that now obtains. The Engineer was instructed to investigate the matter further and to report the cost to straighten this road. The Commission also discussed matters pertaining to the Postwar Program and instructed the Engineer to submit a map showing the location of the projects approved in the original program, together with those approved subsequent thereto, and additional projects which he suggests for construction.

The Chief Counsel reported receipt of an offer from Mr. J. E. Niemi to purchase certain state-owned property in Astoria located at the intersection of Astor Street with the Oregon Coast Highway. It appears that the property is triangular in shape and that Mr. Niemi wishes to operate a service station at this point; also, that Mr. Niemi is willing to accept a deed with the usual restrictions as to highway access. Following discussion, the Commission referred the matter to Commissioner Chessman, the Chief Counsel, and the Engineer with authority to sell the property if that is considered advisable.

The Commission discussed the matter of calling for bids for the operation of a state-owned ferry across the Columbia River between Astoria, Oregon, and Megler, Washington, being a resumption of the discussion of the previous day. As a result thereof, motion was made by Commissioner Chessman that the Commission advertise this operation for bids to be received at its next regular meeting based on the Commission's expressed intention of operating such a ferry. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Engineer reported briefly that the Federal Housing Authority is formulating plans for the discontinuance of the housing project adjacent to the Pacific Highway East between Portland and Milwaukie in connection with which it appears a plan for the future use of the land must be outlined. He advised that the tentative plan of the local authorities is to establish a state park between the highway and Johnson Creek and to sell the land on the opposite side of the highway for industrial development, reserving a strip parallel to the highway for a roadway to serve the industries, with access to the highway being limited to two points in order to eliminate traffic hazards. The question arose whether or not each property owner could demand access to the highway. The Chief Counsel advised that each would be entitled to such a convenience. The Commission indicated a favorable attitude toward the project but deferred a decision until the plans are further advanced. The Chief Counsel and the Engineer were authorized to ascertain the possibilities of securing clearances from the property owners if the plan materializes.

The Engineer requested authority for Mr. Harold B. Say, Director of the Travel and Information Department, to go to Seattle, Washington, on March 6 and 7, 1946, for a joint conference with the British Columbia Travel Bureau and the Washington Development Commission. He advised that this is a two-day meeting and that Mr. Say's expenses would not exceed $30. The Commission approved the request unanimously.

The Commission discussed the proposed improvement of the Oregon Coast Highway at Hebo, Tillamook County. The Engineer advised that the present bridge over Three Rivers at this place is in bad condition and should be replaced with a new structure; also, that when the new bridge is built it should be constructed on permanent alignment, a short distance west of the present location. He estimated the cost of the bridge at $25,000 and the cost of the needed right of way at $10,000. The Commission deferred a decision in the matter for the time being because of possible complications.

A request was presented from Mr. Howard Hinsdale, Reedsport, for permission to maintain a "guy wire" over the Oregon Coast Highway at a point near the outlet of Lake Tahkenitch, Douglas County. It appears that the guy wire is needed to support a spar tree which is used by Mr. Hinsdale in logging operations. The matter was referred to the Engineer for investigation with authority to approve the installation if he considers it advisable.

The Commission considered and signed agreements, etc., as follows:

Agreement with Kathryn Mayberry covering grade change in front of Lot 3, Block 132, Caruthers Addition to Portland.

Agreement with Kathryn Mayberry covering grade change in front of Lot 4, Block 132, Caruthers Addition to Portland.

Agreement with M. Tolpalar and Helen Tolpalar covering grade change in front of Lot 1, Block 132, Caruthers Addition to Portland.

Agreement with Jos. F. Fracasso et ux covering grade change in front of Lot 1, Block 150, Caruthers Addition to Portland.

Agreement with S. P. Company re easement for a grade crossing in the City of Newberg.

Agreement with Southern Pacific Company covering encroachments on railroad property between Gates and Niagara, Marion County.

Agreement with Hood River County regarding relocation and abandonment of a section of the Hood River Secondary State Highway No. 281, Hood River County.

Agreement with Leonard & Slate covering slide removal operations on the Upper Columbia River Highway near Multnomah Falls.

Tentative agreement with the U. S. War Department, covering the survey and preparation of plans, specifications and estimates necessary for the relocation of the Willamette Highway near Lowell, required by proposed dam construction.

Agreement with Pacific Telephone & Telegraph Company re removal and relocation of poles on Mazama Junction-Lobert Section of The Dalles-California Highway.

Field agreements with Grazing Service of the U. S. Department of Interior covering acquisition of juniper strips along the Central Oregon Highway between Bend and Horse Ridge; McKenzie Highway between Sisters and Redmond, and along the Ochoco Highway between Redmond and Prineville.

Rental agreement with Mercer and Ashenfelter covering property being used for maintenance headquarters purposes at John Day.

Agreement with MacWilkins, Cole and Weber, a corporation, authorizing compilation and publishing of information and data re places of interest in the State of Oregon.

Agreement with Ray B. William et ux re conveying to the state real property located in Lane County and the removal of partially constructed house therefrom.

Agreement with Everett Stoaks and Mildred Stoaks to correct certain defects in the title to real property located in Block 6 in the Town of Niagara, purchased by State Highway Commission.

Bargain and Sale Deed covering property lying outside R. W. in Sec. 21, T. 8 N., R. 9 W., Clatsop County, to Adolph A. Nurnberg.

Quitclaim Deed conveying property to Odette Hall and George R. Hall to lands laying in North half of Sec. 16, T. 15 S., R. 4 W., Lane County.

Pipe line easement in favor of U. S. Bureau of Reclamation on the John Day Highway and the Vale Project.

26 1946

Permit to Crane Mills authorizing truck hauling of logs across the Klamath Falls-Lakeview Highway at M. P. 52.80, near Bly.

Application for purchase of electric service from Lapine Electric Corporation.

License to State of Oregon for stockpile site on lands of U. S. A. acquisition for reclamation purposes, Owyhee Project.

Contract with O. C. Yocom for grading and surfacing of Buell and Salt Creek-Dolph Corner Sections of the Dallas-Const Secondary Highway, in Polk County.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 p.m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1946	Subject
12932	Apr. 4	Bids received on the following projects:
		Burns-Lawen Sec.
		Mill Creek-Miller Flat Sec.
12933		Mazama Junction-Spring Creek Hill Sec.
		Waldport Rock Prod. Proj.
		Bridge over Mill Creek
		Construct spans over Trask River
		Vadis Overcrossing
		Viaduct over Sunset Hwy. (Mountaindale County Road)
12934		Ferry service, Astoria-Megler Crossing, Columbia River
		Parks Supt. reports on following:
		Short Sand Beach Park. Purchase of 42.22 acres approved.
		Coos County. Myrtle tree groves, Coos Bay-Roseburg Hwy. Preservation approved. Agreements signed.
		Douglas County. Loon Lake. Proposed park site. Petition to Dept. of Interior approved.
		Williamson State Park. W.H. Kuhn. Rental of residence.
12935		Extension of lease approved.
		Curry County. Newburgh State Park. Renaming. Newburgh to be retained.
		Real Property. Resolution authorizing acquisition adopted.
12961		Right of way acquisition. Options on following discussed:
		Klamath County. Klamath Falls, Balsiger Motor Co. Purchase of standard-width right of way approved. Chief Counsel to condem if necessary
12962		Lincoln County. Oregon Coast Hwy. Spencer Creek-Agate Beach Sec., I.M. and Mary B. Hayes. Condemnation approved
		Lincoln County. Oregon Coast Hwy. Ocean Lake-Delake Sec. Leo F. Denzel and Z.K. Smith. Settlement ordered.
		Klamath County. The Dalles-California Hwy. Mazama Junction-Lobert Sec., John Zbinden. Condemnation authorized.
		Coos County. North Bend maintenance site. L.F. and Cloe Ashworth. Condemn if deal with Weyerhaeuser Tmbr. Co. is consummated.
		Condemnation. Offers approved. Resolutions adopted.
12973		Condemnation. Lincoln County. Oregon Coast Hwy. Spencer Creek-Agate Beach Sec. Controversy with Charlotte Thomas. No action.
		Yamhill County. Willamina. Pacific Plywood Corp. private roadway request granted.
		Sale of buildings. Offer of C.C. Tucker to pay $100 for buildings
12974		on Gates-Niagara Sec., North Santiam Hwy. rejected.
		Sale of land. Cannon Beach. Bids rejected. To be readvertised.
		Sale of land. Troutdale. Offer of Troutdale Vegetable Growers Assoc. accepted. Assoc. to build new road.
		Jackson County. Pacific Hwy., Ashland. $43,500 to be paid Mr. H.L. Claycomb.
		Jackson County. Ashland. Pacific Hwy. Plaza Section. Geo. W. Knox request as to start of construction.

Page	Date 1946	Subject
12975	Apr. 4	Astoria-Megler Ferry. Acquisition and agreement discussed. Action deferred.
		Multnomah County. Crown Point. H.A. Dryer. Cancellation of lease approved. State to pay Mr. Dryer $50.
		Sale of building. Tiller-Trail Secondary Hwy., sale of building to Phillip H. Hart for $25 approved.
		Polk County. Pacific Hwy. West. Monmouth. Oregon College of Education. Use of property adjacent to highway approved.
12976		Lane County. Pacific Hwy. McVeigh Viewpoint improvement urged. Parks Supt. to report.
		Wayside stips. Clackamas County. Pacific Hwy. East. Oregon City-Canby Sec. Acquisition urged. No action.
		Clackamas County. Pacific Hwy. East. Oregon City-Canby Sec. Authority to make survey for straightening confirmed.
		Recess at 12 noon to reconvene at 2:00 p.m.
		Minutes of Feburary 25 and 26, 1946 approved.
		Coos County. Oregon Coast Hwy. Coos Bay. Santa Cruz Cement Co. property. Acquisition by condemnation. Chief Counsel to negotiate.
		Multnomah County. City of Portland. Seawall. Alteration
12977		of agreement approved. Resolutions adopted.
12978		Claim. Great Northern Rwy. Co. Reimbursement for re-
12979		moving asphalt at Bend approved.
		Indian land. Purchase certificates. Secretary to sign.
		Sale of land. Property on McLaughlin Blvd., Portland. Proposal guaranty of A.P. Bocci to be returned.
		Columbia County. St. Helens. Equipment storage headquarters. Payment of $18 a month approved.
		Traffic accidents. Report of Engineer approved. Engineer
12980		to make special study.
		Signs. Railroad crossing stop signs. Removal of three signs approved.
		Bids received at morning session discussed.
12981		Federal Aid Highway Projects. O.P.A. control of contract awards.
		Engineer to notify county courts.
		Awards. Chairman Benfield announces awards of contracts.
12983		Astoria-Megler ferry. Bid for operation discussed. Agreement signed.
		McKenzie Hwy.. Removal of snow to "Hand Lake Ski Ground"
12984		requested. Action deferred
		Sherman County. Columbia River Hwy. Maryhill Ferry. Request for state construction of new approach road denied.

Page	Date 1943	Subject
12984	Apr. 4	Cove Park. Loss of building by fire. Settlement approved.
		Silver Creek Falls Park. Lease of concession to Walter S. Taylor confirmed.
		Lane County. Siuslaw Hwy. Modernization over Low Pass. Report of Engineer filed.
		Linn County. Santiam Hwy. Lebanon. Improvement in city
12985		requested. Cost survey authorized.
		Multnomah County. Mt. Hood Hwy. Gresham. Improvement in city by state approved.
		Klamath County. The Dalles-California Hwy. Beaver Marsh. Use of highway for airplane take-off. Referred to State Board of Aeronautics.
		Benton and Lincoln Counties. Eddyville-Blodgett Secondary Hwy. improvement requested. Funds previously set up.
12986		Lincoln County. Newport street maintenance. Request for state aid denied.
		Clatsop County. Gearhart street maintenance. Request for state aid denied.
		Douglas County. Riddle street maintenance. Request for state aid denied.
		City street maintenance. Chairman Banfield states policy regarding streets damaged by log-hauling operations.
		Umatilla County. Pendleton-John Day Highway. Improvement south of Pendleton requested. Consider in next program.
12987		Awards. Commission confirms Engineer's awards: Spencer Creek-Agate Beach Sec., Berke Bros. Weston Mountain-McDougal Sec., E. C. Hall Co. Coffey Creek Bridge, C. J. Eldon Milo-Tiller Sec., C. J. Eldon
		State Tax Street Funds. Plans for certain cities and towns approved. Resolution adopted.
12989		State Tax Street Funds. Plans for certain cities and towns approved. Resolution adopted.
12992		Surveys. Traffic origin and destination. Portland. Project approved. State to contribute funds.
		Linn County. Pacific Hwy. E. Albany. Service road at Waverly
12993		Lake. Construction approved.
		Cabins. Construction for maintenance forces approved.
		Extensions of time approved as follows: Contracts Nos. 2707 and 2736.
12994		Contracts completed and accepted as follows: No. 2670
		Multnomah County. Portland. Area between Front Ave. and Harbor Drive. Use for parking authorized.
		Permit. Albany "Timber Carnival". One trip log load from
12995		Albany to Portland and back approved.
		Signals. Clackamas County. Traffic light at junction of Courtney Road with Pacific Hwy. E. Engineer to investigate.
		Signals. Marion County. Salem. Traffic light installation at three intersections on Center St. approved.

	* See letter concerning insurance			

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Proposed addition to Short Sand Beach State Park: Mr. Boardman inquired as to the attitude of the Commission with respect to the offer of the E. S. Collins Estate to sell its property, which consists of 42.22 acres, for the sum of $14,800. He advised that this is a key tract and that its acquisition is essential in order to fill out this park. Chairman Banfield advised that he has given this matter attention and it appears that the owners will not reduce the amount of their offer, in view of which he recommended purchase of the tract at the quoted rate. The recommendation was approved by the Commission by unanimous vote.

2. Preservation of myrtle tree groves along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point: The Parks Superintendent presented agreements with a number of the property owners covering such preservation and recommended approval of the same by the State Highway Commission. The Commission approved the agreements with the understanding that they conform with the Commission's requirements as previously expressed. The agreements were signed by the Commission on the following day.

3. Acquisition of recreational area near Loon Lake, in Douglas County: The Parks Superintendent requested authority to petition the U. S. Department of Interior for a park site located at the outlet of Loon Lake on the Mill Creek County Road consisting of portions of Secs. 14 and 15, T. 23 S., R. 10 W., W. M., containing 80 acres. The Commission approved the request by unanimous vote.

4. Rental of residence building in Williamson State Park: The Parks Superintendent recommended approval of, and the Commission by unanimous

vote approved, a request from Mr. W. H. Kuhn for an extension of time from April 1, 1946, to October 31, 1946, of his lease of this property on the present rental basis. An agreement covering the matter was signed by the Commission on the following day.

5. Proposed renaming of Newburgh State Park adjacent to the Oregon Coast Highway near Port Orford, Curry County: The Parks Superintendent recommended retention of the present name in view of the fact that this property, which consists of some 1,400 acres of land, was presented to the state as a gift by Mr. Henry Newburgh, of San Francisco, subject to the condition that the state clear the title. The Commission approved the recommendation unanimously.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of the properties, together with the offers that he recommended in connection with each parcel. After careful consideration, the Commission approved the request and the offers and thereupon adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Footnotes:

* Concerning Item No. 12659, acquisition of a rock quarry from Caroline Krueger and Raymond J. and Leona J. Krueger, for the Gardiner Ranch-Barnes Road Section of the Sunset Highway, the Commission approved the rate of $150 per acre but left it with the Engineer to ascertain the exact acreage required.

** Items 12628 and 12627 covering a new maintenance headquarters site which it is proposed to acquire in North Bend, from the City of North Bend and Coos County, as a substitute for an existing site which the Weyerhaeuser Timber Company desires to acquire in connection with its operation: The Commission approved the amounts contained in the options for both sites but ordered that the acquisition of the two properties be deferred until the consummation of the deal with Weyerhaeuser Timber Company. (See ahead for discussion of this matter with representatives of the Company who were present on the following day)

***Item No. 6782-A, exchange of stockpile sites with Frank Graves on the Picture Rock Pass-Hunter Hill Section of the Fremont Highway, Lake County: This exchange of stockpile sites was approved by the Commission on the condition that Mr. Graves would furnish the new site at no cost to the state and would transfer the materials now stored on the present site to the new site at his sole expense and to the satisfaction of the Engineer.

Commissioner Schaupp arrived at this juncture.

The Assistant Counsel brought up for discussion options obtained from the following people for acquisition of property needed as right of way:

1. Balsiger Motor Company, Klamath Falls, right of way for the City Limits-USRS Canal Section of the Klamath Falls-Lakeview Highway. (File No. 9767)

2. I. M. and Mary B. Hays for right of way needed for the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. (File No. 12601)

3. Leo F. Denzel and Z. K. Smith for right of way on the Ocean Lake-Delake Section of the Oregon Coast Highway, in Lincoln County. (File No. 12532)

4. John Zbinden for right of way for the Mazama Junction-Lobert Section of The Dalles-California Highway, in Klamath County. (File No. 11906)

5. L. R. Ashworth and Cloe Ashworth for maintenance site at North Bend. (File No. 12629)

Concerning the right of way needed from the Balsiger Motor Company, at Klamath Falls, the Assistant Counsel advised that an option has been obtained from the Company containing two alternate propositions, one of which limits acquisition of right of way on the widening of South Sixth Street, the route of the Klamath Falls-Lakeview Highway, and the other includes acquisition of right of way for proposed highway which intersects South Sixth Street on the west side of the USRS Canal. He said that the Company is asking 15 cents per square foot for its property along South Sixth Street, and involving a total cost of $8,901.60, which, in his estimation, is exhorbitant, but will sell this tract and the right of way for the other highway, which contains an additional 11.46 acres, for a total of $37,500, including a 15 room house which is valued at $17,000. The Engineer advised that the area being considered for the proposed highway, which would intersect the South Sixth Street project, includes sufficient land for the future construction of a traffic separation structure. He suggested that considerable expense could be saved if the area needed for such purpose were reduced by confining the purchase to a standard width right of way, which would eliminate the necessity of acquiring the expensive building at this time. The matter was discussed at considerable length, but a decision was deferred until the following day. (As a result of discussion on the next day, the Commission authorized negotiations to acquire the right of way in conformity with the Engineer's suggestion. In the event the property cannot be acquired at a reasonable figure, the negotiations shall be limited to acquiring right of way as may be needed for the South Sixth Street improvement. The Chief Counsel is authorized to condemn such right of way, if necessary, it appearing to the Commission that the price demanded by the Balsiger Motor Company is exhorbitant)

The Assistant Counsel advised that Mr. and Mrs. Hays are demanding the price of $3,200 per acre for one-half acre of their land on the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. He considered such sum exhorbitant, although, he said, land values along the coast have increased greatly since the end of the war. The Commission ordered condemnation of the property.

Concerning the option secured from Messrs. Z. K. Smith and Leo F. Denzel for right of way for the Ocean Lake-Delake Section of the Oregon Coast Highway, the Assistant Counsel advised that the owners are demanding 20 cents per square foot or a total of $1,019.30 for their property, notwithstanding the Commission's requirement that the right of way be furnished free of cost to the state. He further stated that these gentlemen are the only ones asking paymnt for land taken for this project. The Commission deferred a decision in the matter pending investigation of the bids for the Ocean Lake Project, which are to be opened the following day. (A satisfactory bid was received for the construction of the Ocean Lake Project, but the award of the award of the contract was deferred by the Commission pending satisfactory settlement of the right of way matter with Z. K. Smith and Leo F. Denzel, it being understood that if such a satisfactory arrangement cannot be effected, then the bids for the project will be rejected.)

Concerning the right of way being acquired from Mr. John Zbinden, the Assistant Counsel advised that Mr. Zbinden gave the state an option to purchase this property, but it now develops that he does not own it, so it is going to be necessary to institute condemnation proceedings to acquire it. He recommended an offer of $10 as a condemnation offer. The Commission approved the recommendation.

In connection with securing the property from Mr. and Mrs. L. R. Ashworth for an alternate maintenance site at North Bend, which property will be needed along with abutting property owned by the City of North Bend and Coos County if the deal for an exchange of properties with the Weyerhaeuser Timber Company is consummated, the Assistant Counsel advised that the Ashworths are demanding an excessive amount for their property. He recommended condemnation proceedings to acquire it, if necessary, with an offer of $400 for the same. The Commission approved the recommendation subject to the condition that the condemnation proceedings shall not be started unless the deal with the Weyerhaeuser Timber Company is completed.

The Assistant Counsel also requested authority to condemn certain parcels of real property that are required for highway improvements. He submitted a list of such properties together with the offers that he recommended for condemnation, as follows:

After careful consideration, the Commission approved the request and the offers, and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places,

APR 4 1946

auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Joe M. Drew, et al., which property is located in Sections 22, 11, 2, 1, and 12, all in Township 14 South, Range 18 East, W. M., Crook County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1, 2, and 3, and is further identified in the records of the Highway Commission as file R 11881, which property is being acquired for right of way purposes in connection with the Ochoco Highway; (*)

Real property owned by the Ochoco Lumber Company, which property is located in Section 1, Township 14 South, Range 18 East; Section 36, Township 13 South, Range 18 East; and in Section 30, Township 13 South, Range 19 East, W. M., Crook County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4 and 5, and is further identified in the records of the Highway Commission as file R 11883, which property is being acquired for right of way purposes in connection with the Ochoco Highway; (*)

Real property owned by Raymond Calavan, which property is located in Sections 22, 15, and 14, all in Township 14 South, Range 18 East, W. M., Crook County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7, and is further identified in the records of the Highway Commission as file R 11882, which property is being acquired for right of way purposes in connection with the Ochoco Highway: (*)

Real property owned by F. L. Weaver, et ux., which property is located in Block 204, Mills Second Addition to the City of Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 9607, which property is being acquired for right of way pruposes in connection with the Klamath Falls-Lakeview Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowerered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the

State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Footnote:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 60, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by T. Allen Jones and Ruth A. Jones, husband and wife, which property is located in the northwest quarter (NW¼) of the northeast quarter (NE¼) of Section 16, Township 23 South, Range 31 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 12403, which property is being acquired for the purpose of securing road-building materials therefrom in connection with the Burns-Crane Highway; (*)

Real property owned by J. M. Sweek & Company, which property is located in the west one-half (W½) of the southeast quarter (SE¼) and Lots 6 and 7 of Section 4, Township 24 South, Range 32 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 12420, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by the Earle C. Miller Estate, which property is located in the northwest quarter (NW¼) of the southeast quarter (SE¼) and in the west one-half (W½) of the southeast quarter (SE¼) of the southeast quarter (SE¼) of the southeast quarter (SE¼) of Section 10, Township 24 South, Range 32 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4, and is further identified in the records of the Highway Commission as file R 12425, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by Mabel A. Miller, which property is located in the southwest quarter (SW¼) of the northeast quarter (NE¼) of the southeast quarter (SE¼) of Section 10, Township 24 South, Range 32 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 12427, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

APR 1 1946

Real property owned by Albert Ward Walter, which property is located in the north one-half ($N\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) and in the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 14, Township 24 South, Range 32 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7, and is further identified in the records of the Highway Commission as file R 12433, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by Edith E. Prettyman, which property is located in Lot 4 ($SE\frac{1}{4}$ of $SW\frac{1}{4}$) of Section 19, Township 24 South, Range $32\frac{1}{2}$ East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 12441, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by R. O. Richards, et al., which property is located in Lots 1 and 2 and the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 30, Township 24 South, Range $32\frac{1}{2}$ East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as file R 12442, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by Vera Betty Loraine Gay, which property is located in the west one-half ($W\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 32, Township 24 South, Range $32\frac{1}{2}$ East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10, and is further identified in the records of the Highway Commission as file R 12445, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway; (*)

Real property owned by Mrs. Mary H. Brown, et al., which property is located in the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 30, Township 24 South, Range $32\frac{1}{2}$ East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11, and is further identified in the records of the Highway Commission as file R 12444, which property is being acquired for right of way purposes in connection with the Burns-Crane Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove

set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Footnote:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 61, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

APR 4 1946

12971

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary f or the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Fred Lorentzen, Jr., et ux., which property is located in the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 3, Township 35 South, Range 1 West, W. M., Jackson County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 12461A, which property is being acquired for right of way purposes in connection with the Crater Lake Highway; (*)

APR 4 1946

Real property owned by L. R. Ashworth, et ux., which property is located in Block 17 of the Original Plat of North Bend, Coos County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 12629, which property is being acquired for maintenance quarters to be used in connection with highway maintenance. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or either of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

APR 4 1946

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Footnote:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 62, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Chief Counsel reported briefly on the controversy with Mrs. Charlotte Thomas concerning right of way that is being acquired from her for the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. He advised that Mrs. Thomas's property is being condemned because she is asking an exhorbitant amount for the same; also, that Mrs. Thomas contends that the property is worth the amount she is asking for it and in support thereof has presented a number of letters from people throughout the state praising her "set up." The Commission took no action in the matter.

The Chief Counsel also brought up for discussion a request from the Pacific Plywood Corporation, Willamina, to construct a roadway along a strip of land 25 feet wide on the north side of state owned property described as Lots 1 and 2 of Block 3, Kershaw's Addition to Willamina, in connection with the operation of its plant. He recommended granting this privilege for a period of 10 years. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously. An agreement covering the matter was signed by the Commission on the following day.

The Commission considered bids, as follows, received in Salem on April 1, 1946, for the purchase of buildings on the Gates-Niagara Section of the North Santiam Highway, Marion County, and for the purchase of a tract of land at Cannon Beach:

PURCHASE OF BUILDINGS ON THE NORTH SANTIAM HIGHWAY
GATES-NIAGARA SECTION

C. C. Tucker, Lyons	$ 100.00

PURCHASE OF A TRACT OF LAND AT CANNON BEACH

Vernon Williams, Portland	$ 750.00
H. F. Travis, Portland	150.00
Mrs. S. E. Sawyer, Cannon Beach	100.00

APR 1 1946

The Assistant Counsel recommended rejection of the bids received for the buildings at Niagara as being too low and requested authority to sell the buildings privately, if possible; otherwise, he recommended that the contractor for the highway improvement be authorized to wreck them. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

As to the sale of the property at Cannon Beach, the Assistant Counsel and the Engineer recommended that the bids be rejected and that the lots be readvertised for sale individually. The recommendation was approved by the Commission by unanimous vote.

The Assistant Counsel brought up for discussion the application of the Troutdale Vegetable Growers Association to purchase additional state-owned land at Troutdale, being a tract approximately 50 feet by 100 feet in dimension situate immediately south of the state-owned tract heretofore sold to the Association. He advised that the Association wants to use this area as an automobile parking area for its employees, and if the state will sell the property, the Association will pay for it at the same rate it paid for the other property; moreover, the Association will construct a roadway extending from the present Columbia River Highway to the state owned public automobile parking area just east of its plant in lieu of the present roadway across the land they wish to acquire. He further advised that the property is not particularly needed for state purposes and recommended that it be sold to the Association. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote subject to the condition that the Association will construct a new road to the state's parking area as a substitute for the existing road.

The Commission discussed a proposed settlement with Mr. H. L. Claycomb, Ashland, for the reconstruction of his garage building necessitated by the proposed improvement of the Plaza Section of the Pacific Highway in that city. The Assistant Counsel recalled that the Commission received bids some time ago for reconstruction of Mr. Claycomb's building, the low bid being in the amount of $43,625, which was rejected as being too high. Mr. Claycomb, he says, is very anxious to consummate this matter and has now stated a willingness to accept $43,500 in cash, and he will do the work himself. The Engineer recited the history of this case and gave as his opinion, because of existing economic conditions, that it would not be possible to have the work done at less expense. He recommended settlement with Mr. Claycomb on the basis of his present offer. Chairman Banfield expressed himself in favor of such settlement so as not to hold up the civic developments in the City of Ashland. Following discussion, motion was made by Commissioner Chessman that the present offer of Mr. Claycomb be accepted. The motion was seconded by Commissioner Schaupp and was carried by the unanimous vote of the Commission.

In this connection a letter was presented from Mr. George W. Knox, Ashland, inquring when the Commission expects to place the Plaza Project under contract. The Secretary was instructed to inform Mr. Knox that it is the intention of the Commission to advertise the project for bids when the

right of way has been cleared.

The Commission's Chief Counsel, Mr. J. M. Devers, brought up for discussion the proposed agreement with the Astoria North Beach Ferry Company, Columbia Transportation Company, Clatsop County, Oregon, City of Astoria, and Pacific County, Washington, concerning the purchase of the Columbia River ferry properties and facilities at Astoria. He advised that this agreement has been signed by all of the parties thereto except the State Highway Commission and suggested that perhaps the Commission would wish to dispose of the matter at this time in view of the fact that bids for the operation of the ferry as a state operation were received at this meeting. The Commission expressed a desire to study the bids before signing the agreement; hence, deferred action in the matter until the afternoon session. (The Commission signed the agreements later following discussion with Mr. James L. Hope, Attorney, and Captain F. S. Elfving, who represented the property owners. See ahead for detailed minute entry)

The Assistant Counsel brought up for discussion the cancellation of the Commission's agreement with H. A. Dryer for the lease of certain state-owned property adjacent to the Columbia River Highway at Crown Point. It appears that Mr. Dryer's lease does not expire until May 19, 1946, and that he is paying an annual rental of $100 for the use of the property for pasturage purposes, further, that the state now desires the use of the property in connection with highway construction work which necessitates cancellation of the lease as of March 15, 1946. The Assistant Counsel advised that Mr. Dryer is willing to give up the use of the property on March 15, 1946, for a consideration of $50. He recommended acceptance of the offer. The Commission approved the recommendation unanimously, thus confirming an agreement covering the matter which was signed by Commissioners Schaupp and Chessman on March 28, 1946.

The Assistant Counsel requested instructions relative to the disposition of a building located on property purchased from Phillip H. Hart as right of way for the Fate Grade-Tiller Section of the Tiller-Trail Secondary Highway. He advised that the building is of no value whatsoever and is so situated that it cannot be moved, so it will have to be wrecked. Mr. Hart, he said, does not particularly care for the building, but he would like to purchase the plumbing therein. He estimated the value of the plumbing at $25 and recommended sale of the same to Mr. Hart for such amount. The Commission approved the recommendation.

A letter was presented from Dr. C. A. Howard, President, Oregon College of Education, Monmouth, requesting the use of a tract of state-owned property situate adjacent to the Pacific Highway West near the southern city limits of Monmouth as a site on which to maintain about 150 housing units to accommodate veterans who are attending or who will attend Oregon College of Education. The Engineer advised that the property is not needed for state highway purposes and recommended that it be leased to the College for a definite period of time, without cost, as an accommodation. The Commission approved the recommendation with the understanding that the lease shall be for a period of three years.

The Secretary presented two letters from the Recreational Resources Committee of the Portland Chamber of Commerce, in one of which the Committee urges the immediate development of plans for the improvement of McVeigh Viewpoint adjacent to the Pacific Highway just south of Eugene, and the other urging acquisition of wayside strips along the Oregon City-Canby Section of U. S. 99E. The Engineer advised that, according to the Federal Aid Act, a certain amount of Federal funds must be spent for landscaping purposes, and he suggested that perhaps McVeigh Viewpoint would qualify. The State Parks Superintendent, Mr. S. H. Boardman, was present and advised that he has discussed this matter with certain prominent citizens in Eugene and gathered that the city and the county are very much interested and might provide funds to finance the improvement that the Portland Recreational Committee has in mind. He said that he has the matter under advisement and expects to have a report ready to give to the Commission at its next regular meeting.

Concerning the request for the acquisition of the wayside strip between Oregon City and Canby on U. S. 99E, the Engineer advised there is nothing to report at this time, but the Committee is scheduled to appear before the Commission on the following day, and it is likely this is one of the subjects it will bring up for discussion. The Commission took no action in the matter; however, confirmed the authority granted the Engineer at the previous meeting to conduct a survey of the Oregon City-Canby Section with the view in mind of straightening out some of the curves.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with all Commissioners, the State Highway Engineer, the Assistant State Highway Engineer, the Chief Counsel, and the Secretary present.

The Commission, by unanimous vote, approved the minutes of the meeting held on February 25 and 26, 1946.

The Chief Counsel requested instructions relative to the acquisition by condemnation of land in the City of Coos Bay that is needed as right of way for the improvement of the Oregon Coast Highway in this city. He advised that he has in mind particularly one parcel owned by the Santa Cruz Cement Company along the water front which the Company wants to sell and for which they are asking the sum of $25 per front foot. He pointed out that the Commission has not yet officially adopted the route of the highway at this location, so if the Commission wants him to condemn the right of way, it first should take official action with respect to the adoption of the route. In view thereof, the Commission deferred action with respect to authorizing condemnation, however, instructed the Chief Counsel to negotiate a price with the owners and report his findings at the next meeting of the Commission.

The Chief Counsel reported that the City of Portland proposes to amend two city ordinances by which permits have been issued for the use of a part of the sea wall in Portland in connection with the mooring and repair of ships. He advised that the city and the state are now receiving a rental of $50 per day for the actual days the privilege is being exercised, but it appears that the lessee is unable to compete with others in the same business

and has requested that the rental rate be reduced to $25 per day, straight, whether or not the sea wall is actually used. He further advised that the Portland City Council is in sympathy with such change, as evidenced by two city ordinances that have been prepared and will be adopted by the Council if there are no objections on the part of the State Highway Commission. Following discussion, the Commission approved such alteration in the terms of the agreement and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, the City of Portland heretofore adopted Ordinance No. 78444 as amended by Ordinance No. 79850, which was approved by the Highway Commission, and by which a revocable permit was given to the United States Maritime Commission to utilize a portion of the space along the west side of the Willamette River to moor, repair and service ships; and

WHEREAS, in response to a request made by said permittee the City now proposes, with the consent of the Highway Commission, to amend said Ordinance No. 78444, as amended by Ordinance No. 79850, and has submitted to the Commission for consideration and approval a copy of the proposed amendment; and

WHEREAS, after examination of said proposed amendment, it was the judgment of the Commission that the interests of the State and the City will be served by its adoption;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby approve and consent to the amendment of Ordinance No. 78444, as amended by Ordinance No. 79850, which proposed amendment shall be in accordance with the copy of the proposed ordinance attached hereto and by this reference made a part hereof. (*)

2. That except as changed and modified by said proposed ordinance the understandings and agreements existing by and between the City and the State with respect to rentals accruing by virtue of properties in which the City and the State are jointly interested shall be deemed to remain in full force and effect.

3. That this resolution be entered in the minutes and records of the Commission as of April 4, 1946, and a correct copy thereof delivered to William A. Bowes, Commissioner of Public Works of the City of Portland.

WHEREAS, the City of Portland heretofore adopted an ordinance which was approved by the Highway Commission and by which ordinance a revocable permit was given the Northwest Marine Iron Works to moor,

repair, and service ships on the west side of the Willamette River along the sea-wall from the south line of S. W. Washington Street to the south line of West Burnside Street, which permit is identified as Article 45 as amended of the War Code; and

WHEREAS, in response to a request made by said permittee the City now proposes, with the consent of the Highway Commission, to amend said Article 45, as amended, and has submitted to the Commission for consideration and approval a copy of the proposed amendment; and

WHEREAS, after examination of said proposed amendment it is the judgment of the Commission that the interests of the State and the City will be served by its adoption;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby approve and consent to the amendment of Article 45 as amended in accordance with the copy of the proposed ordinance hereto attached and by this reference made a part hereof. (*)

2. That except as changed and modified by said proposed ordinance the understanding and agreements existing by and between the City and the State with respect to rentals accruing by virtue of properties in which the City and the State are jointly interested shall be deemed to remain in full force and effect.

3. That this resolution be entered in the minutes and records of the Commission as of April fourth, 1946, and a correct copy thereof delivered to William A. Bowes, Commissioner of Public Works of the City of Portland.

(*) Footnote:

The City of Portland Ordinances mentioned in these resolutions are attached to the original resolutions on file in the office of the State Highway Commission, Salem, being Resolutions No. 8 under the heading "Special Matters" and said Ordinances by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Chief Counsel presented a bill from the Great Northern Railway Company for reimbursement for the cost of removing some oil that escaped from one of the Company's tank cars on a siding at Bend, the bill being in the amount of approximately $400. He recalled that the Commission at one

time agreed to pay 50 per cent of the cost involved if the City of Bend would assume payment of the balance; however, the city did not accept the proposition, and in order to dispose of the matter, the railway company did the work and now seeks reimbursement. He suggested, in view of the fact that the Commission at one time agreed to join with the city in this undertaking on a 50-50 basis, that it might now join with the railroad company on the same basis in order to dispose of the matter for all time. The Commission approved the suggestion and so ordered.

The Commission had under discussion the advisability of authorizing the Secretary to sign certificates on behalf of the Commission in connection with purchases of Indian land. The Chief Counsel advised that occasions frequently arise where such certificates are required, and it is simply his thought that, inasmuch as the signing of the certificate is a routine matter, the Commission might feel inclined to delegate that authority to the Secretary in order to relieve the Commission of this detail. The Commission approved the Secretary signing such certificates if the Commission is given proper clearance.

The Commission discussed a report from the Chief Counsel with respect to the offer of Mr. A. P. Bocci, Portland, to purchase state-owned property on McLaughlin Boulevard, Portland, as the result of competitive bidding on February 18, 1946. The Chief Counsel advised that Mr. Bocci now alleges that his offer was based on the presumption that he would be able to use the property for business purposes; however, since he made his offer, he has ascertained that the property is located in a residence zone, in view of which it is of no value to him for the purpose intended. Mr. Bocci, he said, is asking the return of his proposal guaranty if the Commission cannot deliver the property free and clear of restrictions. It was the feeling of the Commission that Mr. Bocci should not be penalized for the mistake, and accordingly, the Secretary was instructed to return his proposal guaranty to him.

The Chief Counsel requested instructions regarding the rental to be paid to a Mr. Walter Larsen for the lease of land at St. Helens as equipment storage headquarters. It appears that the state's lease of the property expired on November 30, 1945, and has not been extended although provision is made in the agreement for such an extension of the lease period at the same rental basis, which was then fixed at $12 per month, payable quarter-annually. The Chief Counsel stated that in discussing the matter of extending the lease with the Larsens they demanded more rental for their property, and he agreed to recommend to the Commission payment of $18 per month; however, the lease was not renewed because the state vacated the premises. The Larsens, he said, are now requesting payment of $18 a month for the time that the state used their property following the expiration of the previous agreement. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission discussed a report from the Engineer dated March 29, 1946, on traffic accidents, and safety measures to prevent them. The Engineer summarized the report orally and particularly pointed out his recommendations for safety measures that should be given immediate attention. (See

report in general files for details) During the discussion of this matter, the Commission's Chief Counsel explained the legal obligations of the Commission with respect to such matters and gave as his opion that the Commission would not be liable for accidents that occur on state highways unless, perhaps, such liability might obtain in the case of a series of accidents occurring at the same point. He suggested a special study of accidents to determine their cause. The Engineer requested authority to make such studies where there is a large accident record to determine, by analysis, what is necessary to eliminate the cause. He suggested that it would be advisable to call the seriousness of the matter to the attention of the law enforcement officers of the state, the counties, and the cities, and to urge them to increase their officer personnel. Following discussion, the Commission decided not to bring the law enforcement departments into the picture, however, authorized the Engineer to make the studies and report his findings to the Commission, the expense thereof to be paid out of the funds budgeted for purposes of this nature.

In conformity with orders from the Commission at its previous meeting, the Engineer reported on the matter of removal of railroad stop crossing signs which have been maintained at highway railroad grade crossings during the wartime period at the instance of the Oregon Railroad Association. He advised that investigation reveals there are only three crossings where such stop signs should be removed, two of them being on the Oregon-Washington Highway where this highway crosses the Union Pacific Railroad tracks at Highway Mile Post 15.66 south of Athena, and at Highway Mile Post 26.63 near Blue Mountain Station, the other being on the Athena-Holman Secondary Highway where this highway crosses the Union Pacific Railroad at Highway Mile Post 17.40 on Main Street in Athena. He gave as his opinion that there is much greater potential hazard of rear end collisions between automobiles if traffic is required to stop at these points, than there is of a railroad crossing accident, in view of the fact that there are but two trains daily over this railroad. He recommended the removal of the signs at these points. The Commission approved the recommendation by unanimous vote and so ordered.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and for the operation of ferry service across the Columbia River at Astoria. The following action was taken by the Commission by unanimous vote:

The Commission referred to the Engineer the bids received for construction of the Burns-Lawen Section of the Burns-Crane Highway, in Harney County, with authority to award the contract to the low bidder when certain conditions have been satisfied.

The contract for grading on the Mill Creek-Miller Flat Section of the Warm Springs Highway, in Jefferson and Wasco Counties, was awarded to Adler Construction Company, Seattle, low bidder.

The contract for the Waldport Rock Production Project on the Oregon Coast and Alsea Highways, in Lincoln County, was awarded to C. J. Eldon, Portland, the only bidder for this work.

The Commission referred to the Engineer the bids received for grading the Mazama Junction-Spring Creek Hill Section of The Dalles-California Highway, in Klamath County, with authority to award the contract to McNutt Brothers, Eugene, the low bidder, when certain conditions have been satisfied.

The Commission rejected all bids received for the reconstruction of the Mill Creek Bridge on the Dallas-Coast Secondary Highway near Buell, Polk County.

The bids received for construction of a bridge over Trask River on the Netarts Secondary Highway near Tillamook, Tillamook County, were rejected.

The Commission referred to the Engineer the bids received for the Vadis Overcrossing on the Sunset Highway near North Plains, Washington County, and the bids received for the construction of the Mountaindale County Road Grade Separation project on the Sunset Highway near North Plains, Washington County, with authority to award both contracts to the low bidder in each instance when certain conditions have been satisfied.

Action on the bids received for the operation of ferry service across the Columbia River at Astoria was deferred pending further study.

The Engineer reported a communication from Mr. Thomas H. McDonald, Commissioner, Public Roads Administration, to the effect that the Office of Price Administration (OPA), in an endeavor to combat inflationary tendencies, is exercising, through the Public Roads Administration, certain control over the award of contracts for Federal Aid Highway Projects, which control, briefly, is that, if prices bid on major items exceed by more than 35 per cent the price received in 1940 for work of a comparable nature, the bid is subject to review by the OPA and the PRA, and the award of the contract will be permitted only if a detailed analysis of the prices shows ample justification for the indicated increases. He explained that this control may have some adverse effect on the contracting of Federal Aid Projects contained in the Commission's three year Postwar Program, and it is possible that some of the bids will be rejected, which will prevent the contracting of the work for several months. This is principally true, he said, in connection with the projects involving bridges and other structures of wood, steel, or concrete, as bids for structures are at present running considerably higher, proportionately, than bids for grading and surfacing. As the result of discussion, the Commission ordered that the situation be brought to the attention of the several Oregon counties because of their interest in the Commission's Postwar Program, there being a possibility that the Commission will be forced to deviate from the program as presently adopted. The Engineer was instructed to notify the County Courts by appropriate letter.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows:

"Regrading, surfacing, and oiling the Burns-Lawen Section of the Burns-Crane Highway, in Harney County. K. F. Jacobsen Co., Inc.

& J. R. Taggart, Portland, submitted the low bid for this job, in the amount of $293,049.50. Leonard & Slate, Portland, submitted the next low bid, in the amount of $302,225. There were five higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading the Mill Creek-Miller Flat Section of the Warm Springs Highway, in Jefferson and Wasco Counties. Adler Construction Company, Seattle, submitted the low bid at $109,767. Leonard & Slate, Portland, submitted the next low bid at $124,340. There were two higher bidders. The Commission has awarded this contract to the low bidder, Adler Construction Company.

"Grading on the Mazama Junction-Spring Creek Hill Section of The Dalles-California Highway, in Klamath County. The low bid was submitted by McNutt Brothers, Eugene, at $243,501.50. Leonard & Slate, Portland, submitted the next low bid at $250,465. There were five higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Waldport Rock Production Project on the Oregon Coast and Alsea Highways, in Lincoln County. The Commission received only one bid for this job, being that of C. J. Eldon, Portland, in the amount of $34,220. The Commission has accepted this bid and has awarded the contract to Mr. Eldon at his bid price.

"Reconstruction of the existing bridge over Mill Creek on the Dallas-Coast Secondary Highway near Buell, in Polk County. Only one bid was received by the Commission for this job, being that of Archie R. Averill, Portland, at $36,090. The Commission has rejected the bid.

"Construction of a bridge over the Trask River on the Netarts Secondary Highway near Tillamook, Tillamook County. C. J. Eldon, Portland, submitted the only bid for this work, in the amount of $98,119. The bid has been rejected.

"Construction of the Vadis Overcrossing on the Sunset Highway near North Plains, Washington County. The low bidder for this work was A. D. Ford & Son, Portland, at $74,002. The bidder stated that he would not accept the award of this contract unless also awarded the contract for construction of the Mountaindale County Road Grade Separation Project. The next low bidder was Lockyear & White, Seattle, at $81,836.20. Lindstrom Bros., Portland, submitted the only other bid, in the amount of $83,708.

"A. D. Ford & Son also submitted the low bid for the Mountaindale County Road Grade Separation Project, in the amount of $15,006.50. The contractor qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for construction

of the Vadis Overcrossing. Lockyear & White, Seattle, submitted the next low bid, in the amount of $17,427.50. There were two higher bidders. The Commission has referred the bids for both projects to the Engineer with authority to award both contracts to the low bidder, A. D. Ford & Son, when certain conditions have been satisfied."

The Commission discussed the bids received for the operation of a state-owned ferry across the Columbia River at Astoria. It appeared to the Commission that the low bid of Babbidge & Holt, Inc. is not entirely satisfactory, in view of which the Engineer was instructed to confer with the low bidder relative to a reduction in the bid price. The question of a specific time for taking over the ferry as a state operation was also discussed, and it was decided to ask the owners to agree to the deferment of such an undertaking until July 1, 1946, rather than May 1. Messrs. James L. Hope and F. S. Elfving, representing the ferry operators, were called into conference. Chairman Banfield explained that the Commission has agreed to take over this ferry operation but would like to make the effective date July 1, 1946, rather than May 1, so as to allow sufficient time to analyze the bids received today and to complete the arrangements for state operation, including the adjustment of toll rates and such as are necessary if the operation is to be conducted by state forces rather than by contract. Mr. Hope stated that they prefer that the arrangements be completed by May 1 in conformity with the original intention. Mr. Elfving explained that the ferry schedule is arranged on that basis, and that such arrangements provide for the operation of an extra ferry boat starting on June 15. It would be inconvenient, he said, to change the schedule now just to cover the 15 day operation of the extra ferry boat, between June 15 and July 1. Commissioner Chessman explained that it is the intention of the Commission to purchase the ferry facilities and to operate the service as a state operation, but there are certain details that must be adjusted before the state can take over the operation, which may take until July 1st although it might be possible to clear the matter up by June 1, and the Commission will do so if possible. As the result of further discussion, it was mutually agreed that the state would take over the ferry facilities not later than June 15, 1946. The Commission thereupon signed the agreement covering the matter that was presented by the Chief Counsel at the morning session. The Chief Counsel was instructed to notify the other parties to the agreement as to the action taken and to secure from Pacific County, Washington, lease of the county road approach to the ferry landing on the Washington side of the river. (See ahead for additional paragraph on this subject)

A letter was presented from the McKenzie River Protective and Development Association requesting that serious consideration be given to the possibility of removing snow on the McKenzie Highway up to the place known as "Hand Lake Ski Ground" for the benefit of ski enthusiasts and others who are interested in winter sports. The Engineer advised that during the past winter season the highway has been kept open up to "White Branch Ski Ramp," about six miles above Belknap Springs, and were the Commission to approve the present request it would necessitate extending the work an additional ten miles, which would be costly, and requires the purchase of additional snow fighting equipment. The Commission expressed disapproval of purchasing

additional equipment for this operation, however, deferred a definite action in the matter until later in view of the fact that the winter sports season is practically over.

A letter was presented from Captain C. T. Smith, owner of The Dalles Ferry Company, requesting construction of a new road extending from the Columbia River Highway to a new landing that he proposes to construct for the Maryhill Ferry. Mr. Smith alleges that the approach to the present ferry landing is too steep and narrow for safe operation, for which reason he wants to move it about one-quarter mile farther west from the present location, where a much better grade can be secured. The Engineer advised that the road leading from the highway to the present ferry landing was constructed by the state under the former Highway Commission but is being maintained by Sherman County. He pointed out that because of the proximity of the railroad it would not be possible to construct a new roadway without introducing a considerable hazard to traffic. In view thereof, he recommended that Mr. Smith's request be denied but that he be allowed to extend the present road from the existing ferry landing to the new one if he wants to and will pay the costs involved. The Commission approved the recommendation.

The Engineer reported a settlement with the Fire Companies Adjustment Bureau, Inc. for the total loss of the residence building in The Cove State Park, which was destroyed by fire on September 9, 1945. He advised that the company has agreed to pay the state the sum of $3,739.23 as settlement in full on this account and recommended acceptance of the same as being a very fair adjustment. The Commission approved such settlement by unanimous vote and authorized the Engineer to sign the proofs of loss in behalf of the Commission.

The Engineer reported the results of the investigations of the several bidders for the concession privileges at Silver Creek Falls State Park, bids for which were received by the Commission at its meeting on February 25, 1946. He advised that after careful consideration it was decided to accept the offer of Mr. W. S. Taylor, Portland, on the basis of payment to the state of six per cent of gross sales, and that, acting under authority previously granted by the Commission, Mr. Taylor has been notified of the award. He asked the Commission to confirm the action. The Commission approved the award of this contract to Mr. Taylor as reported.

The Engineer reported briefly on the cost to construct a modern highway on the Low Pass Section of the Siuslaw Highway, in Lane County, as previously ordered by the Commission. He estimated the cost to construct such a highway, including right of way, grading, surfacing, and pavement, at approximately $450,000. The Commission ordered the report filed.

The Engineer also reported on the proposed improvement of the Santiam Highway in the City of Lebanon as previously requested by the City. He advised that this project involves the designation of two one-way streets and the improvement of the same, which, according to preliminary investigations, is estimated to cost about $111,000. In this connection a letter was presented from the City Council, dated March 26, 1946, renewing its request

APR 4 1946

for the improvement, as outlined by the Engineer, on a cooperative basis, the City to provide an 80 foot right of way along Main Street (present route of the Santiam Highway) from Oak Street to the south city limits and a 60 foot right of way on East Oak Street between Main Street and Park Street. The city also agrees to adopt appropriate resolutions as may be necessary to effect the one-way traffic designations. The Engineer requested authority to make a detailed survey of the improvement to determine the costs involved. The Commission approved the request by unanimous vote.

The Engineer reported the results of investigations relative to the request of the City of Gresham for the widening of the pavement on Powell Boulevard (Mt. Hood Highway) through this city and the construction of a storm sewer along this thoroughfare to determine whether or not the state has any responsibility with respect to the drainage feature. He gave as his opinion that the state is responsible for the proper disposition of flood waters on this street, particularly in view of the fact that the street was a county road before it was taken over by the state and has never been considered a city street. It was his thought that the state, in assuming control of the street as a state highway, also assumed the obligation to properly drain it. He estimated that the drainage work would cost about $13,000 and that to widen the existing pavement, construct curbs, etc. between the west city limits and West Ava Avenue would cost an additional $39,000, or a total cost of approximately $52,000. He recommended the expenditure. The Commission approved the recommendation unanimously subject to the condition that the city constructs its proposed street improvement program. The Secretary was instructed to inform the city that when it is ready to proceed with its improvement the State Highway Commission will synchronize its work with the city's.

The Commission discussed a report from the Engineer on the unauthorized use of a section of The Dalles-California Highway at Beaver Marsh, Klamath County, by an airplane pilot as a take-off runway for his plane. It appears that the pilot landed his plane on a snowy runway at Beaver Marsh, from which he was unable to take off, and that he made use of the highway for this purpose without permission and without proper highway traffic safeguards. The Engineer was instructed to bring this matter to the attention of the State Board of Aeronautics, giving the Board the number of the plane so that the pilot may be given a proper reprimand. The Commission indicated that it would not have objected to the use of the highway for this purpose in the emergency had proper precautions been taken to protect highway traffic from danger, which precautions were not taken in this particular instance.

A petition was presented from residents and taxpayers of Benton and Lincoln County for the improvement of the Eddyville-Blodgett Secondary State Highway. The Engineer advised that the Commission has already approved an expenditure of $150,000 of state funds for the resurfacing of about 18.9 miles of this highway and that the work is tentatively scheduled for construction some time during this coming summer. The Secretary was instructed to so inform the petitioners.

The Engineer reported another communication from the City of Newport

requesting reconsideration by the Commission of its decision denying state aid in the maintenance of city streets that are being used by log haulers. He advised that the latest information is to the effect that the city intends to prohibit entirely the transportation of logs over certain city streets under City Ordinance No. 288, adopted by the Council in September 1941, because the city does not have funds for the proper repair and maintenance of said streets. Further investigation of the streets in question, he said, reveals that they are not in such condition that it is beyond the ability of the city to finance necessary repairs with funds received by the city under the State Tax Street Fund Law; moreover, investigation reveals that there is practically no log hauling over these streets at the present time. He recommended confirmation of the Commission's previous decision denying the request for additional state funds. The Commission approved the recommendation.

A request was presented from the City of Gearhart for state help in maintaining certain city streets. The Engineer advised that investigation reveals the streets are in very good condition, and, while a few holes have developed, there is no serious deterioration due to heavy truck traffic. He further stated that, in his estimation, the city of Gearhart does not qualify for the special state funds the Commission authorized to aid cities and towns in maintaining city streets, because no logs are transported over the streets in this town. He recommended that the city's request be denied. The Commission approved the recommendation.

The Commission also denied a request from the City of Riddle for state aid in maintaining certain city streets over which logs are transported, it appearing from investigation that the city's main reason for requesting state aid is to secure the oiling of these streets in order to remove the dust nuisance and to improve the appearance of the streets. It also appeared that their streets are not being severely damaged, and it is within the ability of the city to finance needed repairs with funds that the city receives under the State Tax Street Fund Law.

In this connection, Chairman Banfield gave as his understanding that the Commission's proposition to the cities was that the state would pay the excess cost of maintaining city streets which are being damaged by log hauling operations over and above the ability of the city to finance such work. Such understanding was confirmed by Commissioners Schaupp and Chessman, and it was decided to continue on such basis.

The Commission discussed a letter from the Pendleton Chamber of Commerce, supported by letters from the Harris Pine Mills, Inc. and the Pendleton Lumber Company, in which the Commission was requested to improve a section of the Pendleton-John Day Highway over the hill south of the City of Pendleton by straightening so as to eliminate excessive curvature which is hazardous for log hauling traffic. The Engineer was instructed to bring this project to the Commission's attention when the next construction program is discussed.

The Engineer reported that, in conformity with authority previously

granted him by the Commission, he has awarded the following contracts, bids for which were received by the Commission at its meeting on February 25 and 26, the conditions of the awards having been satisfied:

(1) Construction of the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County. Bids were received on February 25, contract awarded to Berke Bros., the low bidder, on March 25.

(2) Construction of the Weston Mountain-McDougal Section of the Weston-Elgin Secondary Highway, Umatilla County. Bids were received on February 25, contract awarded on March 8 to E. C. Hall Company, Portland, the low bidder.

(3) Construction of a bridge over Coffey Creek on the Tiller-Trail Secondary Highway, in Douglas County. Bids were received on February 26, contract awarded on March 12 to C. J. Eldon, the low bidder.

(4) Grading, surfacing, and oiling the Milo-Tiller Section of the Tiller-Trail Secondary Highway, in Douglas County. Bids were received February 26, contract awarded to low bidder, C. J. Eldon, on March 12.

The Commission confirmed the awards as reported.

The Engineer reported that the following cities and towns have satisfied the requirements of the State Tax Street Fund Law with respect to the monies they received in 1945 from 1944 State Highway revenues:

Aumsville	Lonerock	Prairie City
Coburg	Monmouth	Turner
Halsey	Philomath	Wheeler

He recommended, in view thereof, approval of the street improvements that are planned for the funds available. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Aumsville	$ 243.21
Coburg	637.37
Halsey	426.31
Lonerock	64.30
Monmouth	1,348.83
Philomath	1,196.47

(Con't)

(Con't)

Prairie City - - - - - - - - - - - - -	$ 904.34
Turner - - - - - - - - - - - - - - - -	578.67
Wheeler - - - - - - - - - - - - - - -	362.01

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Aumsville - All streets of city

Coburg - Van Duyn Street, Harrison Street, Locust Street, Diamond Street, Mill Street, McKenzie Street, Delaney Street, Dixon Street, Coleman Street, Miller Street

Halsey - 5th Street, "C" Street, 4th Street, "F" Street, 3rd Street, "I" Street, "G" Street, "H" Street, 1st Street, "D" Street

Lonerock - 4th Street, "C" Street

Monmouth - Church Street, Powell Street, Jackson Street, Main Street, Clay Street, South Street, Bentley Street, Ackerman Street, McDonald Lane, Guin Street, S. Craven Street, N. Craven Street, High Street, Cattron Street, Echols Street, Broad Street, Knox Street, Warren Street, Monmouth Avenue, College Street, Whitman Street, West Street

Philomath - "F" Street, "G" Street, "H" Street, "I" Street, College Street

Prairie City - Bridge Street, Main Street

Turner - 5th Street, 3rd Street, "D" Street, "A" Street, "B" Street

Wheeler - Street intersection between Gregory and Rorvick Streets and extending back 150 feet from State Highway

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Lonerock and approved by the State Highway Commission on August 31, 1945 shall be canceled, in accordance with the request of the City of Lonerock on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of this Commission as of the 4th day of April, 1946.

The Commission also adopted the following resolution approving the plans of the cities of Adams, Antelope, Banks, Fairview, Gervais, Helix, Jefferson, Lonerock, Monmouth, Moro, Pilot Rock, and Yoncalla for expenditure of State Tax Street Funds that they received in 1946 from 1945 State Highway revenues, the Engineer having advised that these cities and towns have fulfilled the legal requirements and that the plans meet with his approval:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respecitve cities or towns:

Adams	$ 253.84
Antelope	135.18
Banks	371.00
Fairview	458.11
Gervais	498.67
Helix	181.74
Jefferson	719.46
Lonerock	69.09
Monmouth	1,610.15
Moro	464.12
Pilot Rock	717.96
Yoncalla	567.76

APR 1 1946

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Adams - Wade Street, Hale Street

Antelope - College Street

Banks - Wilkes Avenue, Parmley Street, Woodman Street

Fairview - Maintenance of all city streets

Gervais - "B" Street, "A" Street, "E" Street, "J" Street, 1st Street, 3rd Street, 4th Street, 6th Street, 7th Street

Helix - Aurora Street, Vesper Street, Main Street, Solar Street, Cleveland Street, Thurman Street, Concord Street

Jefferson - 3rd Street, Union Street

Lonerock - 4th Street, "C" Street

Monmouth - Church Street, Powell Street, Jackson Street, Main Street, Clay Street, South Street, Bentley Street, Ackerman Street, McDonald Lane, Guin Street, S. Craven Street, N. Craven Street, High Street, Cattron Street, Echols Street, Broad Street, Knox Street, Warren Street, Monmouth Avenue, West Street, College Street, Whitman Street

Moro - Bidwell Street, Scott Street, 1st Street

Pilot Rock - Old county road from Birch Street to Sumac Street, Winthrop Drive, Bud Parks Avenue, Union Avenue, West Willow Street, Birch Street, Alley between Willow & Birch Streets from Main to Bluff Street, Alder Street, South Sumac Street to Highway and Alley from South Sumac Street to Highway

Yoncalla - 1st Street, 2nd Street, Applegate Avenue, 3rd Street, 4th Street, 5th Street, "A" Street, "B" Street, "C" Street, "D" Street, also un-named street from 1st Street north to city limits

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respecitve cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of this Commission as of the 4th day of April, 1946.

The following resolution approving the plans of the City of Vale for the expenditure of State Tax Street Funds that the city received in 1944 from 1943 State Highway revenues was adopted by the Commission by unanimous vote on the recommendation of the Engineer, who advised that the city has fulfilled the legal requirements and that the plans are satisfactory:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by this Commission apportioned to the city hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the sum or amount set opposite the name of said city:

Vale - - - - - - - - - - - - - - - - - - - $1,487.43

AND, WHEREAS, said city has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

APR 4 1946

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named city:

Vale - W. Main Street, West Street, Cottage Street, Holland Street, Bryant Street, Court Street, Main Street, Longfellow Street, Glenn Street, "B" Street, Washington Street

2. That the type, plan and character of improvement proposed in the resolution filed with this Commission by the above named city hereby are approved.

3. That the action taken by said city as evidenced by appropriate resolution adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city so as to qualify said city to receive and use the funds apportioned to said city.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in said city a duly certified copy of the resolution adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of this Commission as of the 4th day of April, 1946.

The Commission discussed a resolution from the Portland City Council with respect to contributing funds toward the cost of conducting a traffic origin and destination survey in order to provide information on which to base future procedure with respect to relieving traffic congestion in the City of Portland. According to this resolution, the City of Portland will contribute a sum not to exceed $10,000 to aid in financing such a survey which is estimated to cost $40,000, provided the State Highway Commission and the Public Roads Administration decide to participate in this undertaking. The Engineer advised that it is mandatory upon the State Highway Commission to spend a certain amount of Federal money for this purpose and that there is available therefor at the present time Federal funds in the amount of $29,472. He also said that the Public Roads Administration would participate and will assign one of its engineers to assist in the necessary arrangements. He recommended approval of the project and the expenditure of the funds available. The Commission approved the recommendation unanimously.

The Engineer reported a request from a property owner to construct a service roadway along the east side of the Pacific Highway East at Albany opposite Waverly Lake for the full length of his property, which fronts on the highway for a distance of about one-quarter mile. It appears that this

man plans to sub-divide his property into lots for residence purposes, which, under ordinary circumstances, would require construction of a private road entrance to each lot from the highway, the expense of which would be paid partially by the state. The owner, he said, prefers the service roadway to the numerous driveways so as to eliminate access to the highway except at the north and south ends of his property. The Engineer advised that the plan proposed by the property owner is identical to that of the former owner, Senator Charles Childs, of Albany, who discussed the matter with the former Highway Commission in January, 1943. At that time, he said, the Highway Commission agreed to contribute the sum of approximately $1,750 for the purpose, being the approximate cost to construct its portion of the separate driveways, if the service roadway were not built. He estimated the present-day cost at about $2,500 and recommended approval of the project as a safety measure on the same basis that the former Highway Commission agreed to cooperate with Senator Childs. The Commission approved the recommendation by unanimous vote.

The Engineer requested authority to construct, with state forces, a number of cabins as living quarters for maintenance forces at a number of points throughout the state. He said that five of the cabins are urgently needed at the present time, each of which would cost between $1,300 and $1,500, using old, salvaged lumber now on hand augmented by some new lumber, making a total expenditure of about $7,500. The Commission approved the request unanimously upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

Skelton and Wiecks, Contract No. 2707, for the Elsie-Sunset Camp-Vernonia Rock Production Project on four state highways, in Clatsop, Tillamook, Columbia, and Washington Counties, requested an additional extension of time, from February 15, 1946, to April 10, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the necessity of changing the source of materials. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Lindstrom Bros., Contract No. 2736, for construction of the Jefferson Junction Overcrossing on the Pacific Highway East, in Linn County, requested an extension of time of 45 days, from March 31, 1946, to May 15, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing materials and labor. The Engineer advised that the contractor had a great deal of difficulty in obtaining material for this project, especially lumber, and there also has been a great shortage of labor. He recommended, in view thereof, that the extension of time requested be granted without penalty. A

letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contract No. 2670 with Chester T. Lackey for the furnishing of crushed materials in stockpile for the Juntura-Hope Section of the Central Oregon Highway, in Malheur County, was completed by the contractor on November 1, 1945, in conformity with the provisions of the contract and modifications thereof. He recommended acceptance of the contract by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that State Highway Contract No. 2670 for furnishing crushed material in stockpile on the Juntura-Hope Section of the Central Oregon Highway in Malheur County was completed on November 1, 1945, according to the terms and provisions of the contract and that the said job is now ready for acceptance:

THEREFORE, BE IT RESOLVED that the work covered by said State Highway Contract for the furnishing of said crushed materials in stockpile be declared completed according to the terms of the contract and that said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Secretary presented a copy of Resolution No. 22735, adopted by the Portland City Council on March 7, 1946, in which the Council expresses the attitude that the public will best be served by the use of the center strip between S. W. Front Avenue and S. W. Harbor Drive from S. W. Alder Street to S. W. Pine Street in the City of Portland for off-street parking for the temporary period of 18 months, or until the "Front Avenue Project" is fully completed by the State Highway Commission, except for landscaping such area, whichever period is longer. The Commission considered that such resolution satisfies its requirements as expressed to representatives of the City Council at the previous meeting and it thereupon authorized use of the area described for off-street parking of automobiles during the present emergency. The Chief Counsel advised that he has prepared a tentative form of agreement between the City and the State Highway Commission covering such use of the property which has been presented to the City Council for consideration. The Commission took no action on the agreement.

A letter was presented from Henry L. Green in behalf of the Albany "Timber Carnival" requesting permission to transport a load of large logs over the Pacific Highway East from Albany to Portland and return one day during the latter part of June, as a publicity stunt in connection with the carnival that is to be held at Waverly Lake, Albany, during the Fourth of July holidays. The Commission authorized such a movement provided the overall length of the load does not exceed 60 feet, that the gross and axle

weights on the equipment will not exceed the weights allowed by law, including tolerances allowed by the State Highway Commission, and provided the state is properly protected in the event of accidents occurring.

A petition was presented from numerous residents and inhabitants of Clackamas County residing in the vicinity of the Courtney Road Junction with the Pacific Highway East in which the Commission is requested to install a traffic light at this intersection as an accident prevention measure. The petitioners allege that during the hours of peak traffic it is extremely hazardous for south-bound traffic on Highway 99E to negotiate a left hand turn across the north-bound traffic lane onto Courtney Road because highway traffic is not controlled at this intersection. The Engineer was instructed to make a study of traffic at this intersection in conformity with the ideas previously expressed by the Commission at this meeting.

The Engineer presented the following requests for traffic light installations:

(1) Request of the City of Salem for installation of traffic lights at three intersections on Center Street, route of the Salem-Dallas Highway.

(2) Request of the City of Canby for the installation of a stop and go signal at the intersection of "A" Street and Railroad Avenue (U. S. 99E) in Canby.

(3) Request of the City of Hillsboro for installation of traffic signals on the Tualatin Valley Highway at several street intersections in Hillsboro.

(4) Request of the City of Harrisburg for installation of a traffic signal on U. S. 99E at the intersection of Third and Smith Streets.

The Ergineer presented plans for signal installation at the three intersections on Center Street, Salem, viz: at Commercial Street, Liberty Street, and at High Street. He estimated the total cost of the installation at $4,800 and recommended approval of the city's request on the condition that the City will pay 50 per cent of the costs involved and will furnish the electric energy to operate the signals. The Commission approved the recommendation by unanimous vote.

Concerning the signalization of the intersection of "A" Street with Railroad Avenue in Canby, the Engineer advised that the accident experience at this point is not as severe as it is at many other places over the state that are higher up on the priority list. He pointed out that speed signs are now in place to control highway traffic entering the cultured area, supplemented by two flashing beacons, which, in his estimation, amply serve the needs insofar as conditions can be controlled through engineering and traffic control facilities. He recommended that the request be denied. The Commission approved the recommendation unanimously.

Concerning the request of the City of Hillsboro for the installation of traffic signals on the Tualatin Valley Highway, the Engineer advised that the former Highway Commission approved this project subject to the condition that the city would pay half the cost and would furnish electrical energy to operate the signals, but the work was not completed because of the war. He estimated the cost for installations at First, Second, and Third Streets at approximately $5,000 and recommended approval of the project on the basis of the former Commission's approval. The Commission approved the recommendation unanimously.

Concerning the request of the City of Harrisburg, the Engineer advised that the accident record at this intersection indicates that the problem is one of speed enforcement rather than other means of control. He pointed out that the intersection is now posted for a 25 mile per hour speed limit and recommended that the request be denied. The Commission approved the recommendation.

A letter was presented from Hon. Charles A. Trowbridge, Mayor of the City of John Day, requesting permission to suspend and maintain a neon sign with the wording "Entering John Day", over the John Day Highway at the east city limits of this town. The Commission ordered that this matter be handled in the same manner that a similar matter was handled in the City of Grants Pass, in which case the Commission disclaimed jurisdiction, and the city was informed that if it wished to permit such a sign to be maintained over the highway, it would have to assume full responsibility for any accidents that might result therefrom.

The Commission had under discussion the matter of abandoning a section of the Wasco-Heppner Secondary Highway between Highway Engineer's Station 553+30 and Highway Engineer's Station 562+50 of the relocated line of said highway in the SE¼ of Sec. 36, T.3 S., R. 23 E., W.M., when the new highway between these points has been constructed. The Engineer advised that the old highway between these points will be of no further value for state highway purposes when the new highway has been built. He recommended that the old right of way be abandoned as a part of said highway and allowed to revert to the owners of the abutting land. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, the Highway Commission has found it necessary and desirable to relocate a section of the Wasco-Heppner Highway, Secondary Highway No. 300, in Morrow County; and
>
> WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway as originally located will be eliminated and will no longer be needed for highway purposes for the service of people living thereon or communities served thereby; and
>
> WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the unit or section of the right of way of

said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That as soon as the section of the Wasco-Heppner Highway, Secondary Highway No. 300, which begins at Highway Engineer's Station 0+00 at the Gilliam County line, Mile Post No. 61.27 on the new route, and ends at Highway Engineer's Station 365+55 at Eight Mile, at Mile Post 72.83 of the new route, is completed and made available for travel, the section of the old route herein defined and described as Unit A shall no longer be part of the route of the Wasco-Heppner Highway, but shall be eliminated therefrom.

2. The section of the old route of said secondary highway which is identified as Unit A and more particularly described as follows:

Unit A:

Beginning at Highway Engineer's Station 553+30 of the relocated Wasco-Heppner Highway in the Southeast quarter of the Southeast quarter of Section 36, Township 3 South, Range 23 East, W. M.; thence westerly via the former route of the Wasco-Heppner Highway to Highway Engineer's Station 562+50 of the relocated Wasco-Heppner Highway in the Southwest quarter of the Southeast quarter of Section 36, Township 3 South, Range 23 East, W. M.,

shall, when said new route is completed and thrown open to travel, be abandoned as a part of said highway, and thereafter all right, title and interest which the State has in said right of way shall be permitted to revert to the owners of the abutting land.

3. Until the highway over the new route has been constructed and made available for public travel the section of the old route herein designated as Unit A shall be maintained by the State.

4. There is attached hereto and made a part hereof a print or sketch map on which is shown colored in brown the section of the old route of said secondary highway designated as Unit A, and there is likewise shown on said print colored in yellow the route of the highway as relocated. (*)

5. That this resolution be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court of Morrow County.

(*) Footnote:

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 138, under the heading "Right of Way Abandonment and Retention Resolutions," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission also had under consideration the abandonment and retention of portions of the old right of way of the Boswell Ranch-Cold Canyon Section of the Wallowa Lake Highway, in Union County, as may be necessary by reason of the reconstruction of this highway on another alignment. The Engineer presented a map showing the portions of the old highway that no longer are of value from the state highway standpoint and also showing the portions of the old right of way that should be retained for highway purposes. He recommended retention and abandonment of the several portions as indicated thereon. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Wallowa Lake Highway known as the Boswell Ranch-Cold Canyon Section in Union County, the westerly terminus of which is at highway engineer's station 1635+00 of the reconstructed line and approximately at highway engineer's station 1643+80 of the old highway, and the easterly terminus of which is at highway engineer's station 1875+00 of the reconstructed line and approximately opposite to highway engineer's station 1925+50 of the old highway; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway or other public purposes, while other portions or sections are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The areas of land within the limits of the old right of way which lie between engineer's station 1655+00 and engineer's station 1673+00 of the old highway, and also between engineer's stations 1757+00 and engineer's station 1808+00 of the old highway, and also

between engineer's stations 1827+50 and engineer's station 1838+00 of the old highway, and which areas are shown colored in brown on the map attached hereto, which map is marked Exhibit "A", and by this reference is made a part of this resolution, are no longer needed for highway or other public purposes and, therefore, all of said area colored in brown is eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said real property is hereby permitted to revert to the owners of the real properties abutting directly upon the said area colored in brown.

2. That the portion of the old right of way, which by reason of the relocation of the said highway is no longer within the boundaries of the new right of way, and which portion lies between highway engineer's station 1808 and highway engineer's station 1827+50 of the old highway, and which area is identified and shown colored in yellow on said map attached hereto, is to be retained by the State and possession thereof and title thereto shall continue to remain in the State of Oregon for use in connection with the construction, maintenance and operation of said highway and for such other public uses as said areas may serve. (*)

3. That the sections or areas of the old right of way which lie between highway engineer's station 1673+00 and highway engineer's station 1719+00 of the old highway, and also between highway engineer's station 1735+50, and highway engineer's station 1757 of the old highway, and are otherwise shown and identified colored in red on said Exhibit "A" are hereby abandoned as any part of the right of way of the said state highway, but all of said abandoned sections of the right of way of said highway are to remain and be maintained as a public highway, but the Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road may be assumed and exercised by the County Court of Union County, and said road shall thereafter be maintained by the County for public use.

4. That the area shown colored in green on said Exhibit "A" includes right of way acquired for the relocation and reconstruction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit "A" shall be retained and held by the State and shall not be permitted to revert to or become the property of abutting owners.

5. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary

monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission and the Secretary hereby is directed to mail to the County Court of Union County a duly certified copy thereof, and shall file with the Clerk of Union County a like certified copy; and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked Exhibit "A" and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. (*)

(*) Footnote

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 139, under the heading "Right of Way Abandonment and Retention Resolutions," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission discussed the assignment given by Ostrander Railway and Timber Company to the Crown-Zellerbach Corporation of its interests in a permit granted the company by the State Highway Commission authorizing the truck hauling of logs across two secondary state highways at grade near Molalla, Clackamas County. The Chief Counsel advised that he has examined and approved the form of assignment. He recommended acceptance of the same by the State Highway Commission. The Engineer advised that, in conformity with instructions given him by the Commission at the previous meeting, he has examined the provisions of the permit granted to the Ostrander Railway and Timber Company and the Weyerheauser Timber Company and, in his estimation, no alterations are required at this time. He also recommended acceptance of the form of assignment as submitted. The Commission approved the recommendations unanimously.

The Commission discussed a claim submitted by Minerva Mendenhall, Echo, Oregon, for damage to her property which she states resulted from flood waters of the Umatilla River on December 29, 1945. Mrs. Mendenhall alleges that her property was flooded because of construction of a highway embankment, and she demands compensation in the amount of $580.20 for her losses. The Engineer advised that this matter has been thoroughly investigated and it appears that the state is liable for this expense. He recommended payment of the claim. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer reported that the Eddyville-Blodgett State Secondary

Highway from Nashville westerly about four miles is in bad condition due to the truck hauling of logs and should be posted for a reduced load limit so as to preserve it for ordinary traffic. He recommended adoption of an order by the Commission reducing the weight of loads that could be moved over this section to 50 per cent of that allowed under the statute. The Commission approved the recommendation and thereupon adopted the following resolution with regard thereto:

WHEREAS, the following road or highway has been duly designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY NO. 180

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and in order to protect said highway against such damage and injury it is deemed and is the judgment of the Highway Commission, and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has after due investigation determined and found, and it is the judgment of the Commission, that the maximum weights which shall be permitted upon the said road shall be reduced and fixed as in this order provided.

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having as a result of due investigation found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road, and by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road, and the Commission having found upon due investigation that it will be for the best interest of the said state highway that the maximum total weight of load and vehicle which shall be permitted upon said road shall be reduced so as to conform to the requirements fixed in this order.

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY NO. 180 from Mile Post 07.6, near the "old Edwards' place," to Mile Post 11.7, at Nashville, in Lincoln County.

APR 1 1946

shall be as follows: The combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread on the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Sec. 115-394 O.C.L.A., shall be in full force and effect from this date until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named highway and at important cross-roads on said highway, so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the county clerk of Lincoln County, and that a certified copy of this order be furnished to the Superintendent of the Department of State Police for his information.

Dated this fourth day of April, 1946.

The Secretary presented a resolution from the County Court of Marion County requesting designation as a state secondary highway of the newly-located route of the North Santiam Highway between Niagara and Detroit. The Engineer recommended approval of the request. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto, subject to the condition that the state will not assume the obligation to maintain both roads:

WHEREAS, under the provisions of Sec. 100-115, O.C.L.A., the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

13003

WHEREAS, the State Highway Commission, by mutual agreement with the Marion County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Marion County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the North Santiam Secondary State Highway No. 162, Niagara to Detroit:

Beginning near Niagara on the section line between Sections 28 and 29, T. 9 S., R. 4 E., W. M., approximately 870 feet south of the ¼ section corner between Sections 28 and 29; thence easterly along the proposed center line of the relocated highway between Niagara and Detroit, through Sections 28, 27, 26, 35 and 36, T. 9 S., R. 4 E., W. M. to the section line between Section 1, T. 10 S., R. 4 E. and Section 36, T. 9 S., R. 4 E., W. M. at a point approximately 840 feet east of the section corners common to Sections 35 and 36 T. 9 S., R. 4 E. and Sections 1 and 2, T. 10 S., R. 4 E., W. M.; thence continuing through T. 10 S., R. 4 E. through Section 1, and through T. 10 S., R. 5 E., W. M. through Sections 6, 7, 18, 17, 20, 16, 15, 9, 10, 3, 2, 1 and 12 to the section line between Section 12, T. 10 S., R. 5 E. and Section 7, T. 10 S., R. 6 E. at a point on the section line between said sections approximately 1,200 feet northerly from the ¼ section corner between Section 7, T. 10 S., R. 6 E. and Section 12, T. 10 S., R. 5 E., W . M.; thence continuing through Sections 7, 18, and 17 to a point in Section 17, T. 10 S., R. 6 E., W. M. approximately 1,170 feet north and 1,340 feet east of the ¼ section corner common to Sections 17 and 18, T. 10 S., R. 6 E., W. M., being a point on the heretofore constructed and designated North Santiam Secondary State Highway; a distance of approximately 15.74 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Sec. 100-115, O.C.L.A.

APR 1 1946

The Engineer requested authority for Mr. W. W. Stiffler, Assistant Maintenance Engineer to attend a meeting of the Intermountain Logging Conference in Spokane, Washington, on April 4 and 5, 1946, at state expense. He estimated that such expense would not exceed $45. The Commission approved the request.

The Commission also approved the request of the Engineer for authority for Mr. C. E. Paulsen, Cost Analyst, to go to Boise, Idaho, at state expense on April 17, 18, and 19 in order to check the records of the Morrison-Knudsen Co. with respect to its costs in connection with the construction of two state highway projects at Jordan Valley, Malheur County. He estimated that this expense would not exceed $24.

A letter was presented from the Federation of Community Clubs, Portland, inquiring whether the program for construction of the "Foothills Highway" is sufficiently far advanced that it would be possible to institute condemnation proceedings to acquire right of way across a city-owned tract of land at Jefferson and Chapman Streets recently sold by the city to private parties, and if so, stating that the Federation would adopt a resolution directed to the Highway Commission requesting action to that end in order to forestall future damages that are now apparent. The Engineer advised that he has already informed the City Council concerning the desirability of the tract in connection with this proposed highway, so, in his estimation, no particular good would be accomplished by instituting condemnation proceedings at this time. The Commission concurred in the Engineer's viewpoint and ordered the communication filed.

The Commission had under discussion the setting of a date for its next regular meeting for the reception of bids for highway construction and decided tentatively to hold such meeting on Wednesday and Thursday, May 15 and 16, 1946.

Consideration was given by the Commission to the following matters of unfinished business, action on which was deferred from previous meetings:

1. Request of Linn County and the City of Albany for redesignation as state highways of certain city streets and county roads in North Albany. The Engineer advised that there is nothing to report on this matter at the present time and, in his estimation, it is a "dead issue" unless revived by the county and the city. The Commission ordered that the matter be deleted from future agendas.

2. Similar action was taken by the Commission on the request of the City of Albany for the rerouting of logging trucks over certain city streets.

3. Request for the establishment of a 35 miles per hour speed limit on the Oregon-Washington Highway between Freewater and the Washington state line, in Umatilla County. The Engineer advised that, as instructed by the Commission at the previous meeting, the Washington State Highway Department has been consulted with respect to this matter, but reply has not as yet been received, so there is no report to render.

4. Report on proposed designation of a "no parking" zone on the state highway in the City of McMinnville. The Engineer advised that the report on this matter is not yet ready to present although investigation is being made.

5. Termination as of April 1, 1946, of agreements with Polk County and Benton County and the City of Independence providing for the maintenance of the Independence-Granger County Road. The Engineer advised that the City of Independence has unqualifiedly agreed to the termination of its agreement insofar as the road is situated within the city limits, but nothing definite has been received from either of the County Courts. In view thereof, the Commission decided to terminate the agreements as of April 1, 1946, in conformity with action previously taken in the matter. The Secretary was instructed to so inform the County Courts.

6. Report concerning the proposed bridge across the Willamette River at Independence. The Engineer and the Chief Counsel advised that they have nothing to report at this time.

7. Request of the City of Woodburn for state aid in the improvement of the Hillsboro-Silverton Secondary Highway from its junction with U. S. 99E to the Woodburn Civic Center. The Engineer advised that there is nothing to report at this time, but he has listed the project for future consideration.

8. Request of Coos County Court for improvement of the Enegren Ferry Road across the lands of Mr. Charles Enegren. The Engineer advised that this matter is in the category similar to that of the proposed imrpovement of the Hillsboro-Silverton Secondary Highway at Woodburn.

The Engineer requested instructions relative to renewing the private insurance that the Commission has been carrying on highway department buildings during the wartime period. He advised that during the past three years the Commission has paid the sum of $27,025.90 in premiums for such insurance and has recovered losses in the amount of $10,695. He pointed out that the Commission also pays, annually, into the State Restoration Fund the sum of approximately $13,000, which is for the purpose of securing reimbursement for losses of 100 per cent except in those cases where the Commission decides not to rebuild the structure. He recommended discontinuance of the private policies, which would effect a saving of about $9,000 annually for insurance premiums. The Commission approved the recommendation unanimously.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

APR 1 1946

Portland, Oregon
April 5, 1946

The Commission reconvened at 9:00 a.m. in the Auditorium of the Public Service Building, with all Commissioners, the State Highway Engineer, the Assistant State Highway Engineer, the Chief Counsel, and the Secretary present.

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room:

CRATER LAKE HIGHWAY IN JACKSON COUNTY -
REESE CREEK-ANTELOPE CREEK SECTION

McNutt Bros., Eugene	$ 492,280.00
Warren Northwest, Inc., Portland	506,400.00

WIDEN EXISTING BRIDGE OVER ALTAMONT CANAL AT
KLAMATH FALLS IN KLAMATH COUNTY

Angelo Doveri, Klamath Falls	$ 14,835.00

WASHBURNE WAY-ALTAMONT DRIVE LIGHTING PROJECT IN
KLAMATH FALLS IN KLAMATH COUNTY

*Mark Smith & Co., Klamath Falls	$ 8,904.70
East Side Electric Co., Klamath Falls	9,765.70
Trowbridge & Flynn Electric Co., Medford	10,522.20

*Bidder proposes to reduce bid $406.50 if Highway Commission will protect him against material price increase.

KLAMATH FALLS-LAKEVIEW HIGHWAY IN KLAMATH COUNTY
KLAMATH FALLS-USRS CANAL SECTION

Warren Northwest, Inc., Portland	$ 361,811.00
J. C. Compton, McMinnville	377,315.00

THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY
SPRING CREEK HILL SECTION

Strong & MacDonald, Tacoma, Washington	$ 160,958.50
Colonial Construction Co., Spokane, Washington	165,263.50
Leonard & Slate, Portland **	166,891.00
K. L. Goulter & Co., Seattle, Washington ***	179,345.00
McNutt Bros., Eugene ****	222,012.50
Samuel Bergstrom, Auburn, Washington	233,442.00

(Con't)

APR 5 1946

THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY
SPRING CREEK HILL SECTION (Con't)

E. C. Hall Co., Portland	$ 242,539.00
J. C. Papin, Sandy	309,500.00
J. A. Terteling & Sons, Inc., Boise, Idaho *	311,113.40

* Bidder will not accept this project alone.
** Lump sum reduction of $10,000 if also awarded Spring Creek Hill-Lobert Project.
*** Lump sum reduction of $5,000 if also awarded Spring Creek Hill-Lobert Project.
**** Lump sum reduction of $7,500 if also awarded Spring Creek Hill-Lobert Project.

THE DALLES-CALIFORNIA HIGHWAY IN KLAMATH COUNTY
SPRING CREEK HILL-LOBERT SECTION

R. A. Heintz Construction Co., Portland	$ 208,473.00
McNutt Bros., Eugene	225,422.50
Leonard & Slate, Portland	233,720.00
E. C. Hall Co., Portland	245,084.00
K. L. Goulter & Co., Seattle, Washington	267,089.00
*J. A. Terteling & Sons, Inc., Boise, Idaho	300,743.00
M. L. O'Neil & Son, Eugene	351,821.00

*Bidder will not accept this project alone.

OREGON COAST HIGHWAY IN LINCOLN COUNTY
OCEANLAKE SECTION

	Using Asphalt	Using Tar
T. W. Thomas, Portland	---	$ 132,810.00
E. C. Hall Co., Portland	---	141,485.00

OREGON COAST HIGHWAY NEAR NEWPORT IN LINCOLN COUNTY
CONSTRUCT VIADUCT OVER SPENCER CREEK

Lockyear and White, Inc., Seattle, Washington	$ 44,360.00

PACIFIC HIGHWAY AT PORTLAND IN MULTNOMAH COUNTY
FURNISH AND INSTALL LIGHTING SYSTEM ON INTERSTATE BRIDGE

W. R. Grasle Co., Portland	$ 6,177.00

FULTON CANYON-WASCO HIGHWAY IN SHERMAN COUNTY
NORTH UNIT, FULTON CANYON SECTION

*Curtis Gravel Co., Spokane, Washington	$ 38,880.00

*Bidder will not accept this project alone.

APR 5 1946

CONSTRUCT FRAME MAINTENANCE BUILDING AT
ELGIN IN UNION COUNTY

G. C. Gorsuch, La Grande	$ 15,195.00

MILL CREEK COUNTY ROAD IN WASCO COUNTY
MILL CREEK FORKS-THE DALLES SECTION

Curtis Gravel Co., Spokane, Washington	$ 156,123.00
E. C. Hall Co., Portland	179,584.65
Babler Bros., Portland	185,948.00

The Recreational Resources Committee of the Portland Chamber of Commerce, represented by Messrs. Arthur Kirkham, Chairman; John Carter, Vice-Chairman; and Marshall Dana, member, appeared before the Commission concerning the following matters:

(1) Logging of timber adjacent to the Sunset Highway. Mr. Kirkham gave as his understanding that a Mr. Frier, of Hillsboro, is desirous of cutting some of the timber along this highway. He recommended against the granting of such privilege because, in his estimation, the aesthetic features of this highway would be adversely affected. He was informed that no permits whatsoever for cutting timber on this highway have been issued and that applications for such privilege would be denied.

(2) Mr. Kirkham then brought up for discussion the matter of preserving the waysides along the Oregon City-Canby Section of the Pacific Highway East. It is the thought of the Recreational Resources Committee, he said, that the state should acquire such wayside strips in order to preserve the natural scenery and to eliminate the possibility of the area being cluttered up with advertising signs. He was informed by Chairman Banfield that the Commission discussed this matter on the previous day but took no action; however, the matter would be referred to the Engineer and the Parks Superintendent for investigation and report when the Commission considers the time propitious.

(3) Development of McVeigh Viewpoint on the Pacific Highway just south of Eugene. Mr. Kirkham inquired as to the Commission's attitude with respect to such matter and was informed that it has been referred to the Parks Superintendent for report as to possibilities of securing financial assistance from the Roadside Council at Eugene, which is very much interested. There followed a general discussion of matters of a similar nature.

Messrs. A. L. Greenwalt, President, and Walter Meacham, Secretary, of the American Pioneer Trails Association, came before the Commission relative to the erection of historical markers and signs along the Old Oregon Trail and other historic trails of the state, particularly the Applegate Trail and the Barlow Trail, which were used by pioneers. Mr. Meacham re-

called that before the recent war the Highway Commission approved some 40 locations for historical markers along the Old Oregon Trail and erected 10 of them. He asked the Commission to authorize erection of the remaining markers this year. The Commission took the matter under advisement.

Mr. Meacham then advised that 1946 is the centennial year of the blazing of the Applegate Trail and of the building of the Barlow Trail around Mt. Hood. He expressed a desire that these two trails be appropriately marked by small signs spaced at convenient points for general public information and offered to erect the signs if the Highway Commission would furnish them. He estimated that about 46 small wood markers would be required for the Applegate Trail and about 20 would be required for the Barlow Trail. The Engineer estimated the cost of such markers at approximately $2,500. Following discussion the Commission approved the furnishing of the small signs as requested, it being understood that such approval does not extend to the erection of additional historical markers on the Old Oregon Trail. The question arose as to the inscription to be placed on the sign in view of the contention of some people that the real name of the Applegate Trail is "Old Oregon Trail, Southern Route." The Commission decided that such a description would be confusing and ordered that the signs for this trail bear the inscription "Applegate Trail" and the signs for the other trail bear the inscription "Barlow Trail." The matter was referred to the Engineer to work up the design and construct the signs.

Mr. Charles H. Ingram, General Manager, and Mr. Robert P. Conklin, Engineer, were present in behalf of the Weyerhaeuser Timber Company regarding the proposed exchange of State and Company properties in the City of North Bend, which matter was previously discussed by the Commission. The Assistant Counsel presented the following appraisals of the properties involved:

STATE PROPERTY, MAINTENANCE SITE

Cost

W. T. Culver, 1500 sq. ft. at 20¢	300.00
Coos County, 44,867 sq. ft. at 1.67¢	750.00
Engr. (surveys, etc.)	150.00
Miscellaneous costs, negotiations, etc.	50.00
	$1,250.00

Appraisal

24,300 sq. ft. plus El. 10 at 15¢	3,465.00
20,567 sq. ft. minus El. 10 at 01¢	205.67
	$3,670.67

CHOAT PROPERTY, EAST OF HIGHWAY

Appraisal

22,110 sq. ft. at 25¢	5,527.50
(Cost, 22,110 sq. ft. at 15¢, $3316.50)	

APR 5 1946

(Con't)

SIMPSON PARK AND FERRY SLIP (Cost, $500.00)

2.5 acres tideland at 100.00	250.00	
2.5 acres upland at 2,000.00	5,000.00	
	$5,250.00	
(218 ft. dock frontage at 25.00, $5,450.00)		
Total cost, state lands		$ 5,066.50
Total appraisal, state lands		14,487.10

WEYERHAEUSER TIDE LANDS

Appraisal, 139.06 acres at 100.00	$13,906.00

Mr. Ingram advised that his Company wants to keep its land on the downstream side of the old North Bend ferry landing for future development but is not particularly interested in acquiring additional dock frontage on the bay. He declared that it is essential to his Company's operation that it acquire the state's present maintenance site of 1.05 acres on the east side of Railroad Avenue at the end of Delaware Avenue and to acquire, in addition thereto, a small triangular-shaped tract situate on the west side of Railroad Avenue north of Delaware Avenue, being the area which lies between Railroad Avenue and the right of way obtained for the new location of the Oregon Coast Highway at this point. The question of exchange of properties was discussed at length, but a decision was deferred until later in the day.

The Commission resumed the discussion following the departure of Messrs. Ingram and Conklin, and at that time decided definitely to sell the maintenance site to the Weyerhaeuser Timber Company at the appraised value of $3,670.67. The Commission decided not to sell at this time the triangular strip on the west side of Railroad Avenue; however, such sale will be considered later when the new highway has been constructed, and the Commission at that time will authorize negotiations for the sale if that is considered advisable. This action was taken without any commitment or promise as to the eventual disposition of the matter. The Commission also decided not to dispose of any portion of Simpson State Park and/or the old ferry slip, nor to acquire the Weyerhaeuser Timber Company's tide lands.

Messrs. W. H. Lynch, Division Engineer, and F. E. Andrews, Principal Assistant Engineer, of the Public Roads Administration, were present and asked the Highway Commission's concurrence in the transfer of $350,000 of Forest Highway Funds heretofore approved for construction of the Oregon Coast Highway south of Port Orford, to the North Santiam Forest Highway project between Niagara and Detroit. Mr. Lynch advised that bids received recently for construction of the Port Orford-South project have been rejected as being too high under present Federal regulations, and it does not appear, under present economic conditions, that a reduction in prices could be obtained. The Port Orford-South project, he said, is not as important as the North Santiam project, construction of which must be expedited to enable construction

on the proposed dam across the North Santiam River by the U. S. Army Engineers. He recalled that an amount of $405,000 was originally allotted for the Port Orford-South project, so the transfer of $350,000 of such amount would leave a balance of $55,000 for the financing and the construction of major culverts on this job, which work can be accomplished within one season without interference with the existing road. The State Highway Engineer recommended approval of such transfer of funds on the condition that the Port Orford project will be revived later. The Commission approved the recommendation by unanimous vote and thereupon signed the following letter directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington, D. C.:

486 Oregon General April 5, 1946

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sir:

Under Oregon Forest Highway Program Letter for the fiscal years 1942 and 1943, recommended November 14, 1944 and approved by the Secretary on March 28, 1945, there was approved for construction, Oregon Forest Highway Project 10-D1,E, Oregon Coast Highway, 2.32 miles Grading, Surfacing and Bituminous Surfacing, financed as follows:

By program for Fiscal Year 1941 funds Approved by the Secretary Aug. 16, 1941	$170,000
By program for Fiscal Years 1942-43 funds Approved by the Secretary March 28, 1945	235,000
Total funds approved	$405,000

In order to enable wider competition by effecting a single season operation on this project and to make immediately available additional Federal funds for the financing of Oregon Forest Highway Project 24-A2, North Santiam Highway, which project must necessarily be expedited to enable construction on the Detroit Dam by the U. S. Army Engineers, it is now proposed to reduce the present allotment to Project 10-D1,E to $55,000 and to transfer the balance of the $405,000, or $350,000, to Project 24-A2, North Santiam Highway.

It is therefore recommended that the program as approved March 28, 1945 be revised and new projects be introduced as follows:

APP 5 1946

Project	Previous Authorization	Recommended Reduction or Increase	Revised or Recommended Authorization
Oregon 10-D1,E Oregon Coast Highway 2.32 Miles Grading, Surf. & Bit. Surf.	$405,000	- $350,000	$55,000
Oregon 24-A2 North Santiam Hwy. 4.6 Miles Grading and Viaducts	-	+ 350,000	350,000

Oregon Coast Forest Highway Project 10-D1,E ($55,000) as now proposed will accomplish the clearing and construction of major culverts over the 2.32 miles included under the original project. This construction can be accomplished within one season without interference with the existing road and will advance the future grading and surfacing.

The North Santiam Forest Highway Project 24-A2 is a part of proposed reconstruction of a portion of that route to accomodate the proposed construction of the Detroit Dam, scheduled for construction in the immediate future by the U. S. Army Engineers.

The proposed $350,000 allocation to Project 24-A2 will make immediately available sufficient funds, when combined with the cash being deposited by the Corps of Engineers ($740,000), the Oregon State Highway Commission ($100,000) and the allocation under Forest Highway program approved October 30, 1945 of $300,000 of first postwar year forest highway funds, to permit the advertising of Sections A2 and A3 and access will thus be provided to the dam site so that the Corps of Engineers may initiate work on that project. The allocation will have the further effect of now substituting 1942-43 fiscal year funds for a like total of allocations that were contemplated to be recommended from the second and third postwar years programs as provided in the proposed agreement between the above-mentioned agencies and the Forest Service.

Very truly yours,

OREGON STATE HIGHWAY COMMISSION

By (SGD.) T. H. BANFIELD
Chairman

By (SGD.) A. W. SCHAUPP
Commissioner

By (SGD.) M. R. CHESSMAN
Commissioner

W. H. LYNCH
Division Engineer

U. S. FOREST SERVICE

By (SGD.) JAMES FRANKLAND
Acting Regional Forester

APR 5 1946

Hon. J. L. McCulloch, Mayor of Burns, Oregon, was present and asked the Commission to include in its contract for the construction of the Burns-Lawen Section of the Burns-Crane Highway provision for paving full width between curbs for three blocks on Monroe Street, between Broadway Street and the crossing of the Oregon & Northwestern Railroad tracks, which, according to the present plan as the city understands it, is now to be rock-surfaced only. Mr. McCulloch presented a resolution from the Burns Chamber of Commerce urging such improvement. The Commission referred the matter to the Engineer for investigation and report. He was instructed to inform Mayor McCulloch when a decision has been reached.

Mr. Herbert Gordon, Ocean Lake, was present in behalf of the people of that town who previously have objected to the plans of the Commission to construct a median strip on the pavement in connection with the proposed improvement of the Oregon Coast Highway between Ocean Lake and Dorchester House, bids for which were received at this meeting. Mr. Gordon advised that the people have now withdrawn their objections to such median strip, so the Commission is free to proceed with the improvement as planned insofar as the people of Ocean Lake are concerned. In this connection, the Engineer recalled the agreement between the Commission and the people of Ocean Lake whereby the owners of the property fronting on the highway were to deed the right of way, free of cost, to the state. It now appears, he said, that one of the property owners is demanding the sum of $1,000 for right of way needed across his property. Chairman Banfield advised that the Commission cannot award the contract until this matter has been clarified in conformity with the agreement. Mr. Gordon agreed to take care of the matter immediately.

Messrs. Lew Russell, President, and Paul Follette, representing Babbidge and Holt, the firm that submitted the low bid for the proposed Astoria-Megler ferry operation, were present and conferred with the Commission regarding their offer. The Engineer explained the results of a conference held on the previous evening during which, he said, Mr. Russell stated that the ferry operation as conducted in the past was undermanned; also, that the Maritime Union, which will make the bargaining contract, is demanding a larger operating crew, including a master pilot and two additional crewmen, and the payment of higher wages. Considering the matter from that standpoint, the Engineer said the bid submitted by Babbidge and Holt appears to be satisfactory. The wage, he said, is the main question, the differences concerning insurance, fuel oil, etc. being of slight consequence.

Mr. Russell explained that the master pilot is required on the job at all times as a port captain to replace any man at any time in an emergency.

Chairman Banfield pointed out that the bids received at this meeting are based on an operation of two years' duration. He suggested, in view of the Engineer's report, that it would be advisable to limit the operation to a period of one year, which would give the Commission an opportunity to make adjustments which experience deems advisable in order that the state may not be obligated with a long-time contract that is out of proportion.

Mr. Russell expressed a reluctance to accept such a modification unless the Commission will guarantee them against losses. The Chief Counsel suggested a contract of one year's duration with provision for extending it for a longer period upon mutual agreement. The Engineer concurred in the suggestion, which was also approved by Mr. Russell and all members of the Commission. The Engineer and the Chief Counsel were thereupon authorized and instructed to prepare an agreement with Babbidge and Holt on such basis.

There followed a general discussion of the matter during which Chairman Banfield advised that the cost of the ferry operation to the state, based on the bid of Babbidge and Holt, is going to be more than the Commission anticipated, but, he said, if it proves to be a satisfactory operation from the state's standpoint after a year's trial period, then it can be continued; otherwise, the agreement can be terminated definitely, and the Commission can either advertise the operation for new bids or operate the ferry with state forces. Mr. Russell advised that Babbidge and Holt would be pleased to let the State Highway Department examine their books at any time to ascertain how much it is costing the Company to operate the ferry. This concluded the conference.

Following the departure of Messrs. Russell and Follette, the Commission resumed discussion of the matter at which time it confirmed its instructions to the Engineer and the Chief Counsel to prepare a form of agreement with Babbidge and Holt. The agreement is to be presented to the Commission with the recommendation of the Engineer and the Chief Counsel, the understanding being that if the agreement appears to be satisfactory, the Commission will approve it and will then award the contract to Babbidge and Holt on the basis thereof.

Messrs. L. G. English, Newport, and John C. Kendall, Portland, attorneys representing the Port of Newport, came before the Commission regarding the acquisition of a parcel of state-owned land at the site of the old ferry landing on the south side of Yaquina Bay. They advised that the U. S. Government, through its Board of Army Engineers, has approved a project for the dredging of a channel and turning basin in Yaquina Bay to accommodate ocean-going ships, the channel and turning basin to be along the south shore of the Bay, and in connection therewith it is incumbent on the Port of Newport to provide dock facilities and a disposal area for dredged materials. To enable the Port of Newport to fulfill its obligation, they said, it would be necessary for the Port to acquire the state-owned property that was formerly used as a ferry landing on the south side of the Bay. They explained that the Port of Newport now owns the tide lands upstream and downstream from the ferry landing and will accept a conveyance from the state of the ferry landing property subject to the right of the public to have access to the water at this point. The Engineer advised that the area is of no particular value for any highway purpose other than to give the public right of access to the Bay. He recommended, in view thereof, that the property be sold to the Port of Newport for the amount the state paid for it, subject to such public access use.

The State Parks Superintendent, who was present, stated his approval of the sale provided the deed of conveyance contained provision for perpetual public access to the water at this point. The Engineer then brought up the matter of maintenance of the old highway leading to the ferry landing. He

advised that the road has been abandoned as a state highway and he is without authority to maintain it unless it is replaced on the state highway system. Following discussion the Commission stated its willingness to sell the area to the Port of Newport subject to an agreement for protection of the state's interests. The matter was thereupon referred by the Commission to the Engineer and the Chief Counsel to prepare such an agreement.

The Engineer brought up for discussion the log hauling violations of Mr. Forrest Meacham, Eugene. He advised that, in conformity with the Commission's instructions at the previous meeting, the Secretary notified Mr. Meacham that the Commission expects him to pay the fines that have been assessed against his operations or the Commission would cancel his permit. As a result of this notification, he said, Mr. Meacham called at his (Mr. Baldock's) office and evidenced a desire to cooperate and was to have appeared before the Commission at this meeting, but he has not done so. He recommended, in view thereof, the immediate cancellation of Mr. Meacham's permit. The Commission approved the recommendation and so ordered.

Mr. Floyd Cook, Highway Representative, Pacific Northwest Loggers Association, was present with regard to the log hauling operations of the Prouty Lumber and Box Company over the Necanicum Highway. He advised that this Company has stated a willingness to comply fully with the State Highway Commission's requirements for the transportation of logs over this highway and will assume the entire responsibility of furnishing and paying for flagmen as may be required until such time as the Highway Commission has completed contemplated widening work to accommodate the transportation of 58 foot logs over this route without encroachment in the opposing lane of travel. In view of this information, the Commission authorized the Engineer to proceed with the widening work, estimated to cost $10,000, which was authorized conditionally at the previous meeting.

The Engineer brought up for discussion the question of changing the regulation adopted by the Public Utilities Commissioner which requires that operators of all log trucks consent to the inspection and weighing of their loads on state-owned scales when requested by weighmasters in the employ of the State Highway Commission. He said the present regulation requires that signs be maintained at the scale sites requesting logging trucks to stop at the scales for weighing which requirement is satisfactory when the weighing is done on the stationary platform scales, but has not proved satisfactory when portable scales are used, due to the fact that, in many instances, the operator passes the scales before the signs can be placed. It was his thought that the matter could be corrected by deleting from the present regulation the requirement that signs shall be maintained at the weighing point. The Chief Counsel advised that weighmasters do not have authority to stop the logging trucks, regardless of whether or not signs are maintained. In view thereof, the Commission decided not to change the regulation at this time.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission had under discussion the appointment of someone to replace Mr. Palmer Hoyt as a member of its Advisory Committee on travel and informational matters, Mr. Hoyt having resigned because of taking up his residence in another state. Commissioner Chessman suggested the name of Mr. Arden X. Pangborn, of The Oregonian, Portland, and moved that Mr. Pangborn be selected to fill this vacancy. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

Mr. O. K. Perkins, Seal Rock, came before the Commission with respect to his application to use the ocean beach about seven miles south of Newport as an aircraft landing field. Following discussion, the Commission denied the request as a public safety measure and to avoid the establishment of an undesirable precedent. It was pointed out to Mr. Perkins, however, that there is nothing in the law that would prevent emergency use of the beach area for this purpose.

A delegation from Seaside, consisting of W. B. Hollenbeck, Mayor; Jens Lerbach and George S. Gray, Councilmen, was present in the interests of rerouting the Oregon Coast Highway along Roosevelt Drive through this town, particularly from the Neawanna Creek bridge to a point just south of Seaside, a distance of about one and one-half miles. Also present were G. M. White, St. Helens, representing St. Helens Pulp and Paper Company, and George W. Russell, Milwaukie, Oregon, owner of the Drive-In Grocery in Seaside. They advised that there are possibilities that the S. P. & S. Railroad Company will abandon its service to Seaside, and in that event, the railroad right of way may be obtained for highway purposes. They declared that they have waited a long time for this improvement, which they think is now justified, and urged that the matter be given the Commission's immediate attention.

The Engineer advised that a location survey of the proposed route was made several years ago and some of the right of way acquired, but negotiations were discontinued when war was declared. The plan as outlined, he said, would make a fine set up for the City of Seaside, inasmuch as it will route traffic away from the congested district. Following discussion, Chairman Banfield advised that this is an entirely new matter to the present Highway Commission, which would like to study it before making an answer. He asked the delegation to present its request in writing, giving details, and advised that the matter will then be referred to the Engineer and the Chief Counsel for analysis and report to the Commission. The delegation agreed to comply with the request.

A delegation from Milwaukie, consisting of Messrs. J. Earl Jones, Chairman of the Clackamas County Planning Commission; J. W. Jones, member of the Commission; and Louis D. Kelsey, City Manager, was present regarding the construction of a proposed service road along the east side of U.S. Highway 99E between the City of Milwaukie and Ochoco Street, Portland, where this highway passes through the Federal Housing Project known as the Kellogg Housing Area. Mr. J. Earl Jones headed the group. He advised that the Federal Housing Authority contemplates declaring as "surplus" the land now contained in the Kellogg Housing Area and has requested a recommendation from the local authorities with respect to the disposition thereof, which

recommendation, he said, very likely will be accepted and approved if the Highway Commission will join in it. Mr. Jones read aloud a letter directed to the Federal Housing Authority by the City of Milwaukie in which was outlined a plan for the future use of the area, which includes establishment of an industrial area on the east side of the highway with a roadway extending the full length of the highway frontage to serve the industries that develop, thus eliminating the necessity for numerous private roadway connections with the highway and the possibility of traffic accidents occurring at such points. The plan also provides, he said, for establishment of a residential section and a public park on the west side of the highway to be served by S. E. 17th Street, Portland, so as to avoid highway connections. The proposed service road, he explained, would connect with the highway at only two points, one of which is in the town of Milwaukie and the other on Ochoco Street in Portland. He anticipated that the right of way for this road would be donated by the Federal Housing Authority and that such authority would also donate an additional strip of land twenty feet wide between this road and the highway for landscaping purposes and to screen off the industrial section. He asked the Commission to direct a letter to the Housing Authority approving the plans and to authorize construction of the service road as a state project. He pointed out that an early decision is required inasmuch as the time limit for submission of the local authorities's recommendation will soon expire.

The Engineer exhibited a map showing the location of the proposed service road and explained the plan from the highway standpoint. He estimated the cost to build the road, which is about one mile in length, at about $40,000, including the improvement of Ochoco Street as a highway connection. Additional expense for channelized traffic control, etc., he said, would amount to between $25,000 and $30,000. The matter was discussed at some length, but the Commission deferred a decision until its next meeting. The delegation was requested, in the meantime to submit its request in writing and to secure, if possible, an extension of time within which to file its recommendation with the Federal Housing Authority. The Engineer was instructed to prepare a report on the subject for consideration by the Commission at its next meeting, when final action will be taken.

The Commission discussed with the Engineer the bids received at the morning session for highway contract work and reached the following decision with respect thereto:

Bids received for the following projects were referred to the Engineer with authority to award the contract to the low bidder in each instance when certain conditions have been satisfied:

Grading and paving, Reese Creek-Antelope Creek Section, Crater Lake Highway, Jackson County.

Widening of an existing bridge over Altamont Canal, Klamath Falls.

Grading and paving Klamath Falls-USRS Canal Section, Klamath Falls-Lakeview Highway, Klamath County.

APP 5 1946

Grading Spring Creek Hill Section, the Dalles-California Highway, Klamath County

Grading Spring Creek Hill-Lobert Section, The Dalles-California Highway, Klamath County.

Grading and bituminous macadam surfacing the Ocean Lake Section, Oregon Coast Highway, Lincoln County.

Furnishing and installing a roadway lighting system on Interstate Bridge on Pacific Highway, Portland, Multnomah County.

The Commission referred to the Engineer and the Chief Counsel the bids received for the Washburn Way-Altamont Drive Lighting Project in Klamath Falls with authority to award the contract to the low bidder when certain conditions have been satisfied.

The Commission awarded to Curtis Gravel Company, the low bidder, the contract for grading, surfacing, and oiling the Middle Creek Forks-The Dalles Section of the Mill Creek County Road, in Wasco County.

The Commission rejected all bids received for the following projects:

Construction of a concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport, Lincoln County.

Regrading, surfacing, and oiling the North Unit, Fulton Canyon Section of the Fulton Canyon-Wasco Secondary Highway, Sherman County.

Construction of a maintenance building at Elgin, Union County.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Grading and paving the Reese Creek-Antelope Creek Section of the Crater Lake Highway, in Jackson County. The Commission received two bids for this work, the low one being that of McNutt Bros., Eugene, at $492,280. The other was submitted by Warren Northwest, Inc., Portland, at $506,400. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, McNutt Bros., when certain conditions have been satisfied.

"Widening the existing bridge over Altamont Canal at Klamath Falls. The Commission received only one bid for this job, being that of Angelo Doveri, Klamath Falls, at $14,835. The bid has been referred to the Engineer with authority to award the contract to Mr. Doveri when certain conditions have been satisfied.

"Washburn Way-Altamont Drive Lighting Project, Klamath Falls. Mark Smith & Co., Klamath Falls, submitted the low bid for this work at $8,904.70. East Side Electric Co., Klamath Falls, submitted the next low bid, in the amount of $9,765.70. Only one other bid was received, being that of Trowbridge and Flynn Co., Medford, at $10,522.20. The bids have been referred to the Engineer and the Chief Counsel with authority to award the contract to the low bidder, Mark Smith & Co., when certain conditions have been satisfied.

"Grading and paving on the Klamath Falls-USRS Canal Section of the Klamath Falls-Lakeview Highway, in Klamath County. Only two bids were received by the Commission for this project, the low one being that of Warren Northwest, Inc., Portland, at $361,811. J. C. Compton, McMinnville, submitted the other bid at $377,315. The Commission has referred the bids to the Engineer with authority to award the contract to Warren Northwest, Inc., the low bidder, when certain conditions have been satisfied.

"Grading the Spring Creek Hill Section of The Dalles-California Highway, Klamath County. Strong & Macdonald, Tacoma, submitted the low bid for this job in the amount of $160,958.50. Colonial Construction Co., Spokane, submitted the second low bid at $165,263.50. There were seven higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Spring Creek Hill-Lobert Section of The Dalles-California Highway, in Klamath County. The low bid for this project was submitted by R. A. Heintz Construction Co., Portland, at $208,473. McNutt Bros., Eugene, submitted the next low bid in the amount of $225,422.50. There were five higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and bituminous macadam surfacing the Oceanlake Section of the Oregon Coast Highway, in Lincoln County. The Commission received only two bids for this project. T. W. Thomas, Portland, submitted the low bid in the amount of $132,810. The other bid was submitted by E. C. Hall Co., Portland, at $141,485. The bids have been referred to the Engineer with authority to award the contract to the low bidder, T. W. Thomas, when certain conditions have been satisfied.

"Construct 182' reinforced concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport. Only one bid was received for this job, being that of Lockyear and White, Inc., Seattle, in the amount of $44,360. The Commission has rejected this bid as being too high.

"Furnish and install roadway lighting system on the Interstate Bridge on the Pacific Highway at Portland, Multnomah County. W. R. Grasle Co., Portland, submitted the only bid for this job in the amount

of $6,177. The Commission has referred the bid to the Engineer with authority to award the contract to W. R. Grasle Co. when certain conditions have been satisfied.

"North Unit, Fulton Canyon Section of the Fulton Canyon-Wasco Highway, in Sherman County. 1.30 miles regrading, surfacing and oiling. The Commission received only one bid for this project, being that of Curtis Gravel Co., Spokane, at $38,830. The bid has been rejected.

"Construct a frame maintenance building at Elgin, Union County. G. C. Gorsuch, La Grande, submitted the only bid for this work at $15,195. The Commission has rejected the bid.

"Mill Creek Forks-The Dalles Section of the Mill Creek County Road, in Wasco County. Curtis Gravel Co., Spokane, submitted the low bid for this job in the amount of $156,123. E. C. Hall Co., Portland, submitted the second low bid at $179,584.65. Babler Bros., Portland, submitted the only other bid in the amount of $185,948. The Commission has awarded this contract to Curtis Gravel Company, the low bidder, at their bid price."

The Assistant Counsel requested instructions concerning the lease given to Mr. Paul Mumpower to occupy certain state-owned property adjacent to the Upper Columbia River Highway and Sandy River at Troutdale. He advised that this lease expired on March 31, 1946, but Mr. Mumpower has submitted his check to cover an extension of time. He was instructed to inform Mr. Mumpower to vacate the premises in accordance with previous understanding.

Mr. A. D. Collier, President, Swan Lake Moulding Company, Klamath Falls, was present with regard to the bids received at this meeting for the installation of the lighting system on the Washburn Way-Altamont Drive Section of the Klamath Falls-Lakeview Highway, in Klamath Falls for which the Company is paying the entire cost. He advised that the offer of the low bidder, Mark Smith & Co., of Klamath Falls, in the amount of $8,904.70, meets with his approval, and he authorized award of the contract to the Company. He stated that he would send the Commission a check for the full amount of the cost involved as soon as he has been advised of the exact figure. The Engineer was thereupon authorized to award the contract when other conditions of the award have been satisfied.

Mr. Collier requested a permit to maintain and operate the lighting system on the state highway, and that such permit provide for the transfer of his rights to The California-Oregon Power Company, or to anyone else, in the event that later on he should desire to make such a transfer. The Commission approved the request by unanimous vote and instructed the Chief Counsel to include a clause to that effect in the contract agreement.

The Chief Counsel reported a request from the West Foods Company, of Salem, for permission to use the Highway Department's railroad siding at the State Highway Shops, in Salem, in connection with the unloading of produce consigned to their cannery, which is located about two miles east of

Salem, such use of the Highway Department's facilities to be of a temporary nature only pending completion of the Company's own siding that is now being constructed at its plant. The Engineer recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission had under discussion the appointment of State Highway Engineer, an Assistant State Highway Engineer, a Chief Counsel, and a Secretary, the appointments of the incumbents having expired. The following persons were appointed to fill these positions for the four year period commencing March 1, 1946, by unanimous vote of the Commission upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

In this connection the Engineer recommended salary increases for the following employees, as follows: H. B. Glaisyer, Secretary, $400 per month; S. H. Boardman, State Parks Superintendent and Landscape Engineer, $400 per month; Oscar Cutler, Staff Engineer and Acting Director, Travel and Information Department, $360 per month; F. B. Crandall, Acting Traffic Engineer, $360 per month. The Commission, by unanimous vote, approved such salary increases, which are to become effective as of April 1, 1946.

Commissioner Chessman brought up for discussion the request from Mr. J. E. Niemi, of Astoria, to purchase certain state-owned property described as Lot 2 of Block 10, McClure's Addition, on which property he wants to construct and maintain a service station, and to lease the adjoining state-owned property described as Lot 1 of Block 10, for a driveway. He advised that this property is triangular in shape and is situate at the intersection of Astor Street and Bond Street (U.S. 101); also, that he could not see any objections to granting the request, particularly in view of the fact that Mr. Niemi will assume all costs of pavement, landscaping, etc. that may be required. The Commission voted unanimously to sell Lot 2 to Mr. Niemi and to lease to him the property in Lot 1, subject to approval by the Engineer of the points of ingress and egress. The matter was referred to the Engineer to handle.

The Engineer advised that he has received an invitation to attend the President's Highway Safety Conference which is to be held in Washington, D. C., during May 8, 9, and 10, 1946. He advised that it is impossible for him to be present at this meeting and recommended that Mr. F. B. Crandall, Acting Traffic Engineer, be authorized to attend in his place because of the importance of the meeting and the benefits that will accrue to the State of Oregon. He estimated the expense would amount to about $275. The Commission approved of Mr. Crandall attending this meeting at state expense if the out-of-state travel is authorized by Governor Snell.

The Engineer also requested authority to attend a meeting of the Executive Committee of the American Association of State Highway Officials which is to be held in St. Paul, Minnesota, on June 20 and 21. The Commission approved the request subject to confirmation by Governor Snell.

APR 5 1946

The Engineer reported that the 1946 Minor Betterment Budget contains an item of $21,850 for the installation of new roadway approaches to state highways. Present indications, he said, are that this amount will be exceeded. He requested authority to increase the budget allowance. The Commission deferred action in the matter until the next meeting and instructed the Engineer to submit a complete written report for consideration at that time.

The Commission considered and signed agreements, etc., as follows:

Quitclaim deed conveying property lying in Government Lot 3, Sec. 22, T. 25 S, R. 13 W, W.M., Coos County, to the Standard Oil Company of California.

Agreement with A. T. Dolan, et ux. covering lease of an equipment storage headquarters at Seaside.

Agreement with the Pacific Power and Light Company concerning the relocation of its electric power line along the right of way of the Oregon Coast Highway (new location) between Cannon Beach Junction and Cannon Beach.

Agreement with Middle Fork Irrigation District pertaining to the relocation and reconstruction of flumes and ditches on the Woodworth Acres-Parkdale Section of the Hood River Secondary Highway, Hood River County.

Agreement with Wasco County covering construction and maintenance of the Mill Creek County Road.

Supplemental agreement with O.W.R. & N. Company and U. P. Company modifying previous agreements concerning construction of an overcrossing of the railroad at Bridal Veil.

Project statement with P.R.A. covering construction of the Forest Boundary-Enterprise Section of the Enterprise-Lewiston Highway, Wallowa County.

Permit granting to the Pacific Plywood Corporation an easement for roadway purposes across Lots 1 and 2 of Block 3, Kershaw's Addition to Willamina.

Agreement with Astoria North Beach Ferry Company, Columbia Transportation Company, Clatsop County, City of Astoria, and Pacific County, Washington, covering the purchase and operation of the ferry facilities at Astoria.

Agreements with Dal M. and E. S. King, Fred B. and Olive A. Hickok, J. H. and Sarah McCloskey, and James N. and Anna M. Jacobsen concerning the preservation of myrtle tree groves along the Coos Bay-Roseburg Highway.

Cooperative agreement with the P.R.A. and U. S. Forest Service covering future forest highway construction and maintenance on the Ochoco Highway between Marks Creek and Hamilton Creek.

APR 5 1946

Extension of lease agreement with H. W. Kuhn for use of a residence building in Williamson State Park.

Agreement with George C. Horner, Myrtle Point, covering the release of a timber cattle pass at M.P. 18.25 on the Coos Bay-Roseburg Highway, in Coos County.

Lease of road building materials from Frank T. Morgan, Administrator of the Estate of C. C. Wilson, deceased. Property located in Malheur County.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:15 p.m.

T H Banfield
Chairman

State Highway Engineer

Geo Schaupp
Commissioner

Secretary

M R Chessman
Commissioner

Portland, Oregon
May 1, 1946

The State Highway Commission met in special session at 2:00 p.m. in Room 715 (Imperial Room), Imperial Hotel, for consideration of matters pertaining to the proposed state ferry operation across the Columbia River between Astoria, Oregon, and Megler, Washington, and other matters. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
W. W. Stiffler, Assistant Maintenance Engineer
H. B. Glaisyer, Secretary

Commissioner Schaupp was excused from attending this meeting.

MAY 1 1946

The Engineer presented and read aloud two letters concerning the Astoria ferry operation. One of the letters was from the Columbia River Fishermen's Protective Union, Astoria, in which the Commission was advised that the ferry, in crossing the Columbia River, passes through a very important fishing ground where hundreds of nets are kept in the water during daylight hours and that considerable damage is caused to the nets annually by the ferry operation. The Fishermen's Union asks the Commission to give this matter careful consideration when it selects the firm or individual who is to operate the ferry and to choose an operator who has a thorough knowledge of possible difficulties with the gill net fishery in this area. The Commission took no special action on this communication.

The other letter was directed to the State Highway Commission by six men who formerly were employed on the identical ferry boats that are now being purchased by the state. These men offered to operate the ferries on either a flat sum basis of $99,150 under a one year contract, the State to pay for necessary insurance, or on a cost plus five per cent annual basis. The Engineer estimated that the insurance would cost the state about $5,000, which would make the total annual cost of the operation about $104,150, which is about $18,000 less than the low bid submitted by Babbidge & Holt, Inc. on April 4, 1946. He further advised that he discussed this matter with Commissioner Schaupp over the telephone, and it was Mr. Schaupp's thought that the Commission is morally obligated to award the contract to Babbidge & Holt if the matter of reducing the contract to a one year operation can be adjusted, with the understanding that, after one year's trial, if the contract is satisfactory it can be renewed for another year; otherwise, the operation can be readvertised for bids. The Chief Counsel, he said, advises that if the Commission wants to consider the offer of the ferry employees, it would have to cancel outright all bids received on April 4. Following considerable discussion of this matter, the Commission decided to award the contract to Babbidge and Holt, Inc., who submitted the low bid on April 4, provided the contractor agrees to reduce the contract to a one year operation and provided the corporation will permit the state to examine its books at any time to ascertain how much the operation is costing, such information to be used by the Commission in determining whether to continue the contract with Babbidge & Holt or to advertise for bids for the following year's operation. If the corporation agrees to such examination, then the state will reveal to the corporation the exact amount of the revenue that it has received from tolls. This action of the Commission was taken on the condition that Commissioner Schaupp concurs therein. Chairman Banfield thereupon explained the arrangement to Commissioner Schaupp over the telephone and advised that Commissioner Schaupp is in thorough agreement therewith. The Commission thereupon awarded the contract to Babbidge & Holt, Inc. on that basis.

The Commission instructed the Chief Counsel to prepare the contract on the basis of this decision and to forward the same to Babbidge & Holt for acceptance and execution. The Engineer was authorized and instructed to make the necessary preparations to operate the ferry starting June 1, 1946. He was further instructed to work out the details of the operation, including

the printing of tickets, etc., for the Commission's approval at the next regular meeting, at which time the Commission will also decide the question of placing the insurance that the state is required to furnish.

The Chief Counsel requested instructions relative to the securing of a lease of ferry landing facilities at Astoria, provision for which is included in the Commission's agreement with the Astoria-North Beach Ferry Company. He was instructed by the Commission to secure such lease on the previously-approved basis and also to secure from the County Court of Pacific County, Washington, the lease covering the landing facilities at Megler, Washington.

The Engineer brought up for discussion a letter from Hon. Robert S. Farrell, Jr., Secretary of State, concerning a request from the Board of County Commissioners of Multnomah County that the State Speed Control Board cause to be made an engineering and traffic investigation with respect to the designated speeds on certain roads in Multnomah County and that a definite speed be designated for such roads. The Engineer advised that since receiving this letter, a copy of which was also sent to Mr. Charles P. Pray, Superintendent of the State Police Department, who is a member of the Speed Control Board, he has received a letter from Mr. Pray advising that a year or so ago representatives of the Speed Control Board met formally, organized, and designated the speeds on certain streets within the City of Portland on the basis of an engineering and traffic investigation which was to be made by the State Highway Commission as provided by statute. Mr. Pray suggests, he said, that no final action be taken by the Speed Control Board until the investigation has been made. In view of this record, the Commission, by unanimous vote, authorized the Engineer to make the investigation, the results of which are to be reported to the Speed Control Board.

The Engineer brought up for discussion the matter of conducting an origin-destination survey of the Portland metropolitan area. He recalled that the Commission, at its meeting on April 4, authorized an expenditure of approximately $30,000 of Federal and State funds for such a survey with the understanding that the City of Portland would contribute an additional sum of $10,000 and that the Public Roads Administration would assist in the work. Since that time, he said, it has been ascertained that the work is going to cost approximately $70,000, so, if the survey is to be carried forward as planned, it will be necessary to increase the Federal and State contribution from $30,000 to $60,000. He pointed out that there are Federal and State funds available in the amount of $29,472 for engineering and economic investigations during the fiscal year 1946, and additional sums will be available for similar investigations during the fiscal year 1947. He recommended approval of the project because the information obtained will be invaluable for future highway development in this area. According to the Federal regulations, he added, it is mandatory that one and one-half per cent of Federal Aid monies be spent for purposes of this kind. During the discussion of this matter, Chairman Banfield questioned the value of the information that would be obtained from such survey; however, he stated his approval of the expenditure in order to comply with the Federal requirements. Commissioner Chessman expressed himself similarly.

The Commission discussed a request from Mr. J. D. Walling, Florence, for permission to remove approximately 10,000 cubic yards of rock from the state-controlled quarry known as the "Cape Horn Quarry" adjacent to the Siuslaw Highway near the Town of Swisshome, Lane County. The Engineer advised that the quarry is located in the Siuslaw National Forest area and is under lease to the state from the U. S. Forest Service as a source of materials for improvement of the Siuslaw Highway; also, that it contains an unlimited supply of material, so the removal of 10,000 cubic yards by Mr. Walling, would not adversely affect the use of the quarry by the state. Mr. Walling, he says, has obtained a special use permit from the U. S. Forest Service to take 10,000 cubic yards of rock for road building purposes and has paid the Forest Service a fee in connection therewith. He recommended approval of Mr. Walling's request. The Commission approved the recommendation and thereupon signed an agreement with Mr. Walling covering the matter.

The Engineer reported that on April 25, 1946, he awarded to Mark Smith & Co., Klamath Falls, the contract for the Washburne Way-Altamont Drive Lighting Project, in Klamath Falls, for which bids were received on April 5. The bids were previously referred to the Engineer by the Commission with authority to make the award when certain conditions had been satisfied. The Commission approved the award of this contract as reported.

The Engineer brought up for discussion a proposed relocation of the Oregon Coast Highway between Youngs Bay and the crossing of the Lewis and Clark River near Astoria. He exhibited a map showing the proposed location and advised that the matter of permanently locating the highway at this time has been suggested by prominent citizens of Astoria, who are of the opinion that much of the future growth of Astoria probably will take place south of Youngs Bay Bridge, and in whose opinion the right of way for the improvement should be obtained now in order to avoid complications. He requested authority to make a location survey of the project and that authority also be granted the Chief Counsel to negotiate right of way options. Commissioner Chessman advised that this location is practically the only location available for the future development of Astoria, in fact, the district is now developing rapidly. It was his thought that the survey should be made and the right of way options obtained at the earliest possible time, and he so moved. Chairman Banfield seconded the motion. (See Engineer's report to the State Highway Commission dated April 26, 1946, for details).

The Commission considered and signed agreements, etc., as follows:

Contract with Mark Smith & Co. for the Washburne Way-Altamont Drive Lighting Project, in Klamath Falls.

Revocable permit granting to Noble Willmore and Harry Downes authority to use a portion of the old right of way of the Pacific Highway in Josephine County for agricultural purposes.

Agreement with John Hardman and R. W. Murray relative to the elimination of a cattle pass on the John Day Highway at Mile Post 220.89 between Unity and Ironsides.

MAY 1 1946

Permit authorizing J. D. Walling to remove 10,000 cubic yards of rock from "Cape Horn Quarry" adjacent to the Siuslaw Highway, in Lane County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:45 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Portland, Oregon
May 15, 1946

The State Highway Commission met in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

EDDYVILLE-BLODGETT SECONDARY HIGHWAY
IN BENTON AND LINCOLN COUNTIES
EDDYVILLE-BLODGETT SECTION

J. N. & M. J. Conley, Portland	$ 156,825.00
E. C. Hall Co., Portland	163,500.00
E. H. Itchner, Molalla	164,775.00

REMOVE EXISTING TIMBER DECK FROM BRIDGE OVER
SOUTH UMPQUA RIVER ON OAK STREET
IN ROSEBURG IN DOUGLAS COUNTY

Kern & Kibbe, Portland $ 60,033.62

CONSTRUCT CONCRETE BRIDGE OVER
LITTLE BUTTE CREEK BETWEEN THIRD AND HAMILTON STREETS
IN THE TOWN OF EAGLE POINT IN JACKSON COUNTY

No bids received

WIDEN EXISTING BRIDGES OVER REESE CREEK, LITTLE BUTTE CREEK,
AND ANTELOPE CREEK ON CRATER LAKE HIGHWAY IN JACKSON COUNTY

McNutt Bros., Eugene $ 79,232.00

KLAMATH FALLS-LAKEVIEW AND
DAIRY-BONANZA HIGHWAYS IN KLAMATH COUNTY
DAIRY ROCK PRODUCTION PROJECT

Warren Northwest, Inc., Portland $ 39,960.00

KLAMATH FALLS-LAKEVIEW HIGHWAY IN KLAMATH AND LAKE COUNTIES
BLY-EAST FOREST BOUNDARY ROCK PRODUCTION PROJECT

M. C. Lininger & Sons, Medford $ 38,680.00

CONSTRUCT CONCRETE PILE TRESTLE BRIDGE ON
PACIFIC HIGHWAY AT JUNCTION CITY IN LANE COUNTY

Archie R. Averill, Portland $ 33,308.00
Lockyear & White, Seattle, Wn. 49,052.50

PACIFIC HIGHWAY WEST IN MULTNOMAH COUNTY
FRONT AVENUE (SHERIDAN STREET-BANCROFT STREET) SECTION

No bids received

WIDEN WEST END OF ROSS ISLAND BRIDGE ON
FRONT AVENUE PROJECT IN PORTLAND IN MULTNOMAH COUNTY

Birkemeier & Saremal, Portland $ 54,170.00

ENTERPRISE-LEWISTON HIGHWAY IN WALLOWA COUNTY
SOUTH UNIT, ENTERPRISE-FOREST BOUNDARY SECTION

E. C. Hall Co., Portland $ 198,601.00
Newport, Kern & Kibbe, Portland 204,093.60
Rogers Construction Co., Portland 208,280.00

The Commission, by unanimous vote, approved the minutes of the special meeting held on May 1, 1946, with one slight correction. Approval of the minutes of the regular meeting held on April 4 and 5, 1946, was deferred until the next meeting.

The State Parks Superintendent was present and reported on the following matters:

1. Additional gift of 9.85 acres of land for park purposes from former State Highway Commissioner Frank L. Tou Velle, Canyonville: The Commission accepted the gift unanimously and instructed the Parks Superintendent to express to Mr. Tou Velle the Commission's sincere appreciation.

2. Gift from Douglas County of seven acres of land for right of way and wayside purposes along the Umpqua Highway west of Scottsburg, containing 0.8 mile of river frontage: The Parks Superintendent advised that this is a narrow strip of land lying between the present highway and the Umpqua River; that a portion of it will be needed as right of way for a future revision of the highway, and the balance will serve as a wayside strip in order to preserve the scenic view along the River. He recommended acceptance of this property. The Commission approved the recommendation unanimously upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp. The Parks Superintendent was instructed to send an appropriate letter of thanks to the Douglas County Court.

3. Resolution from Mud Springs Grange No. 619, Jefferson County, requesting permission to remove cinders from the Round Top area in The Cove State Park for use in constructing roads and driveways because of unavailability of materials from other sources: The Parks Superintendent recommended denial of the request because it would detract from the appearance of the park. Following discussion, the Parks Superintendent was instructed to make an investigation to ascertain whether or not other cinder pits are available. If not, then the residents of Jefferson County are to be allowed to obtain a limited amount of cinders from the Round Top area where it will not interfere with the state's development of the recreational area of the park.

4. Sale of concession privileges in Silver Creek Falls State Park: The Commission's Chief Counsel reported on this matter on behalf of the Parks Superintendent. He advised that Mr. Walter S. Taylor, to whom the Commission sold the concession as a result of competitive bidding on February 25, 1946, is having difficulty in obtaining necessary equipment to operate the concession, and as a result thereof, cannot start operations on May 1, 1946, as required by the provisions of his contract. Notwithstanding the circumstances, he said Mr. Taylor is willing to sign the contract if he is not required to commence operating until next year. On the other hand, if the Commission prefers, he is willing that the entire arrangement be canceled. The Parks Superintendent recommended

retention of Mr. Taylor's proposal on the basis that he will start operating next spring, which will give him sufficient time to obtain the equipment and materials that he needs. Following discussion, the Commission, by unanimous vote, approved the recommendation and referred the matter to the Parks Superintendent and the Chief Counsel to handle.

5. Acquisition of Darlingtonia Park area adjacent to the Oregon Coast Highway seven miles north of Florence, Lane County: The Parks Superintendent advised that this tract contains 16.54 acres of land and that the owner, Mr. A. B. Sanders, Coos Bay, has offered to sell it to the state for $1250. He recommended purchase of the tract as a fine addition to the state parks system, and for the further reason that it contains a species of rare "bug eating" plant that is a public attraction. He further explained that this purchase is one of the items listed in the 1946 park budget. The Commission, by unanimous vote, approved the purchase of the property at the price stated upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

6. Gift of Mr. J. Ross Hutchinson, County Commissioner, Douglas County: The Parks Superintendent advised that Mr. Hutchinson has offered to deed to the state for park and wayside purposes a seven-acre tract of land that he owns along the Umpqua River and the Elkton-Sutherlin Secondary Highway about eight miles south of the town of Elkton. This strip, he said, has a one-half mile frontage on the highway and the Umpqua River. He recommended acceptance of the gift. The Commission approved the recommendation unanimously and instructed the Parks Superintendent to convey to Mr. Hutchinson the Commission's appreciation therefor.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with the amount that he recommended in payment for each parcel. After careful consideration the Commission approved the request and the recommended offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CASCADIA-BRYANT HILL SECTION, SOUTH SANTIAM HIGHWAY

9767-	Balsiger Brothers Right of Way Option expires	$	$	

(Con't)

CITY LIMITS-USRS CANAL SECTION, KLAMATH FALLS-LAKEVIEW HIGHWAY (Con't)

*9767-	Balsiger Brothers (Con't)	$	$	
	1.19 acres at $2,000.00	2,380.00		
	0.16 acre at $2,000.00	320.00		
	47 large trees at $15.00 each	705.00		
	Slope easement	95.00	3,500.00	DeSouza

Footnotes:

* Item No. 9767, purchase of right of way from Balsiger Brothers, Klamath Falls: This purchase is based on negotiations pursuant to the Commission's instructions at the previous meeting and is limited to right of way needed for the City Limits-U.S.R.S. Canal Section of the Klamath Falls-Lakeview Highway, the improvement of which is now under contract. The Commission referred back to the Right of Way Department for further negotiation the proposed acquisition of additional property needed as right of way for an intersecting state highway at this point.

** Items Nos. 11781, 12660, and 12567, being settlements reached with owners of property needed for a proposed state park at the head of Wallowa Lake: The Commission approved the purchase price as set forth in the above resolution, however, instructed the Chief Counsel not to complete the purchases until the pending condemnation suit for additional land is completed. The properties in question are not to be purchased unless the entire project is completed.

***Item 12601, purchase of right of way from I. M. Hays and Mary B. Hays. The purchase price of $1,950 was approved over the telephone by Commissioners Schaupp and Chessman on April 15, 1946. The items are carried in this resolution for confirmation.

\+ Item 12451, purchase of borrow pit from P. J. McGowan and Sons for the Tunnel Point-Bridal Veil Section of the Columbia River Highway. This involves the purchase of an island in the Columbia River. The McGowans are willing to sell the island, but if the state does not purchase it, they will demand access to the highway from the island; moreover, there is a possibility that the island will be obliterated in connection with highway construction, in which event the state might be liable for damages. The Commission decided it would be best to purchase the island along with the other property.

The Assistant Counsel also requested authority to condemn certain properties that are needed for highway improvements and concerning which he has been unable to secure satisfactory settlements by negotiation. He presented a list of such properties and the offers that he recommended for condemnation, as follows:

				Recommended Offer
Mill Gulch-Salisbury Section of the Baker-Unity Highway				
12730	John F. Hart (Right of Way)	Land, 3.7 acres at $10.00 per acre- Plus necessary fencing by State	$ 37.00	$ 40.00
12727	Wallowa Timber Co. (Right of Way)	Land, 22.01 acres at $5.00 per acre- Plus $5.00 per acre based upon the field cruises	110.05	110.00
Newport-Waldport Section of the Oregon Coast Highway				
11111	Edna Patchin (Wayside Strip)	60,348 square feet at $0.0075-	$ 452.61	$
		Buildings	2,000.00	
			2,452.61	$2,500.00

After careful consideration of each item the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real property and the specific purposes for which the same is being acquired are described as follows, to wit:

Real property owned by John F. Hart, which property is located in Lots 1, 2, 3, and 4 of Section 7, Township 11 South, Range 40 East, W. M., Baker County, Oregon, and is more particularly described on the attached sheet, and is further identified in the records of the Highway Commission as file R 12730, which property is being acquired for right of way purposes in connection with the Baker-Unity Highway. (*)

2. That the Commission does hereby find and declare that the said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said property is being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Footnote:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 63, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation, or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, in the opinion of the Highway Commission the real properties hereinafter described are scenic in character, adjoin other real property owned by the State, and possess possibilities of development as a scenic and recreational area and likewise afford opportunity for roadside development; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real properties and the development of the

same will contribute to the convenience of the general welfare and to the general welfare and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Highway Commission does hereby find and declare that the real properties hereinafter described are scenic in character and are suitable for development as a scenic area or viewpoint and for roadside development and recreation.

2. That this Commission does hereby find and declare that the acquisition of fee title to said real properties, free and clear of all interests of every kind and character, is necessary in order to make possible the preservation and development of the same for the convenience of the public and so that said area may be developed and maintained for its scenic value or public view qualities as well as for roadside development, all of which the Commission does find and declare to be for the general welfare and pleasure of the motoring public and road user.

3. That the real properties the acquisition, preservation, and development of which the Commission now finds necessary for the purposes heretofore stated are described as follows, to wit:

Parcel No. 1

All of Lots 1, 2, and 3, Block 1, Fairview Addition to Coastview Addition to Yaquina City, situated in Section 7, Township 12 South, Range 11 West, W. M., Lincoln County, Oregon, containing 15,356 square feet.

Parcel No. 2

All of Lots 1, 2, 3, 22, 23, and 24 of Block 2 and all of Lots 1, 2, and 3 of Block 3, Stewarts Addition to Coastview Addition to Yaquina City; also all that vacated portion of Alder Street lying between said Blocks 2 and 3 west of the Oregon Coast Highway; all situated in Section 7, Township 12 South, Range 11 West, W. M., Lincoln County, Oregon; containing 46,495 square feet, of which 1503 square feet lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 44,992 square feet lie outside of the existing right of way.

4. That the survey of said area heretofore made by the State Highway Engineer and the descriptions prepared hereby are approved by the Commission and the Commission does hereby order and direct that said descriptions be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, or persons in possession if there be any, with respect to the compensation to be paid for the acquisition of said properties and damage to the remaining property, if there be any remaining property, and in the event that the title to said properties cannot be acquired by agreement then it is hereby ordered that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

7. That this resolution be entered in the minutes and records of this Commission as of May 15, 1946.

The Assistant Counsel requested instructions relative to the sale of a residence building situate on property that was acquired from Mr. Ray Rauch as right of way for the Fate Grade-Tiller Section of the Tiller-Trail Highway. He advised that the house must be wrecked because of the highway improvement and that he has received an offer of $35 for the same, which he recommended for acceptance. The Commission authorized the sale of the house for such amount.

The Assistant Counsel also reported that, in conformity with authority granted him by the Commission at the previous meeting, he has sold the buildings on the North Santiam Highway right of way near Niagara to Mr. C. C. Tucker for $105, being $5 more than the amount of the offer made by Mr. Tucker as the result of competitive bidding on April 1, 1946. The Commission approved the sale.

The Chief Counsel presented a letter from Mr. S. Fred Wilson, Attorney at Law, Portland, regarding a narrow strip of land in Dunthorpe, Clackamas County, formerly used as right of way for the Oswego Highway but now of no value for such purpose inasmuch as the highway has been realigned at this point. It appears that clients of Mr. Wilson purchased the adjacent property from the Oregon Iron and Steel Company and that the Company alleges that the old highway was to be deeded back to the Company when the new highway was built, which, it stated, has not been done. It also appears that

the Oregon Iron and Steel Company is willing to deed this strip of land to the purchaser of the other property if the state will convey it to the Oregon Iron and Steel Company. The Chief Counsel advised that he discussed this matter with Mr. H. B. Van Duzer, former Highway Commissioner, who recalls that there was an understanding that the strip would be deeded to the Oregon Iron and Steel Company when the highway was realigned. He suggested, in view thereof, that the property be deeded to the Oregon Iron and Steel Company in conformity therewith so the Company can reconvey it to Mr. Wilson's clients if it so desires. The Commission approved the recommendation by unanimous vote.

The Commission discussed briefly and referred to the Engineer for investigation a petition from residents of Benton County who desire the discontinuance of a state-owned stockpile site, consisting of approximately one and one-half acres, situate adjacent to the Corvallis-Newport Highway about two miles east of Philomath.

The Engineer and the Chief Counsel requested instructions relative to the securing of options for right of way for the proposed improvement of the Columbia River Highway between Dodson and Bonneville. It appears that this district is being developed rapidly and the right of way, if not acquired now, will cost considerable more later on when developments are completed. The Engineer recommended that he be given authority to make necessary surveys and that the Chief Counsel be authorized to negotiate options. The Commission approved the recommendation by unanimous vote.

The Chief Counsel brought up for approval a settlement with Roscoe Hopper, et ux., successors in interest to George W. Slayton, et ux. who are plaintiffs in the controversy arising out of a railroad grade crossing matter on the Warm Springs Secondary Highway near Prineville. He advised that an agreement has been reached with the Hoppers whereby the railroad company is to do certain things and the state is to do certain things, including payment to the Hoppers of the sum of $4,750 in cash. He read aloud the stipulation covering the matter which is to be filed in the pending law suit. Following discussion, in which it appeared to the Commission that the settlement is fair and equitable, the Commission by unanimous vote, approved and signed the stipulation.

The Commission had under discussion a letter from the Consolidated Timber Company requesting an extension of time of two years to complete the logging of certain parcels of land adjacent to the Wilson River Highway, which land was sold by the Company to the state for park purposes a number of years ago with the understanding that the Company would be allowed to remove the timber growing or standing thereon within five years from the date of completion of construction of the Wilson River Highway fronting on this property. The Company asked for a two-year extension of this privilege, from October 14, 1946, to October 14, 1948, within which to complete its logging operations on this property. The Chief Counsel recommended approval of the request, as did also the State Parks Superintendent. The Commission approved the recommendations by unanimous vote.

The Commission considered, approved, and signed a revised permit from the U. S. Government Reclamation Service covering use of public land situate in Malheur County as a stockpile site. It appears that under a recent regulation of the Federal Government it is required that all fissionable materials in Government lands be reserved to the United States, in view of which regulation the permit previously prepared has been redrafted and an appropriate reservation incorporated therein.

The Commission also discussed, approved, and signed an agreement with the City of Portland covering the parking of automobiles on the landscape area between Harbor Drive and Front Avenue and extending from S. W. Alder Street to S. W. Pine Street, Portland.

The Engineer reported on the bids received in Salem on May 6, 1946, for the sale of three tracts of land at Cannon Beach, as follows:

PURCHASE OF THREE TRACTS OF LAND IN CANNON BEACH, OREGON

Bidder	Item 1 Portions of Lots 10 & 11	Item 2 Lot 15	Item 3 Lot 16	Total
Ralph P. Coleman	$101.00	----	$301.00	$ 402.00
J. C. Ofelt	----	----	226.00	226.00
Dorothy E. Hafner	270.00	$270.00	270.00	810.00
Miss Vashti Folker	----	250.00	250.00	500.00
Alvin Hobart	101.00	505.00	455.00	1,061.00
John T. Conchuratt	----	Lump sum bid on Lots 15 and 16		1,000.00

He recommended sale of the tract including portions of Lots 10 and 11 to Dorothy E. Hafner, the high bidder therefor, and the sale of Lots 15 and 16 to John T. Conchuratt, this combination being the high offer received for the three tracts. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission discussed a request from the Waldport Lions Club for permission to operate a "wishing well" in the small state park adjacent to the Oregon Coast Highway at the south city limits of Waldport. The Engineer recommended denial of the request because the well is a mild gambling device and he did not believe that the state should be a party to any such activity on public property. The Commission approved the recommendation unanimously.

The Commission approved and ordered filed resolutions from the County Courts of Douglas and Jackson Counties in which the Commission is requested to prepare plans and specifications and to call for competitive bids in behalf of the respective counties for two county road projects, one being for the redecking of the Oak Street Bridge on a county road in Roseburg, Douglas County; and the other being for the construction of a new bridge over Little Butte Creek on a county road in Eagle Point, Jackson County.

The Chief Counsel reported on the claim of Mr. W. W. Purvis, Nelscott, for damage to his property arising out of improvement of the Oregon Coast Highway in front of his premises at Nelscott. He advised that information received from Mr. Purvis is to the effect that because of the highway improvement he was put to the expense of $3,800 to re-establish his premises to conform with the highway improvement; moreover, the highway is improperly drained at this point, the grade of the service road which serves his property being from two and one-half feet to three feet above his establishment. Mr. Purvis, he said, will sign a statement releasing the State Highway Commission from all liability in this matter, including that which arises out of the drainage problem, if the state will pay him $1,000. He recommended acceptance of the offer as the fair thing to do under the circumstances. Following discussion, motion was made by Commissioner Chessman that settlement be made with Mr. Purvis on the basis of the Chief Counsel's report. The motion was seconded by Commissioner Schaupp and was carried by the unanimous vote of the Commission.

The Engineer reported on the cost to construct a service road along Pacific Highway East through the Kellogg Park Housing Project between Milwaukie and Portland. He estimated the cost of this road, including the improvement of Ochoco Street as a highway connection and the widening and channelization of the highway at the Ochoco Street intersection and at the intersection with the River Road in Milwaukie, at approximately $65,000. He exhibited a map showing the proposed improvement, which, he pointed out, is a desirable project in view of the fact that it would limit access to the highway to two points--at Ochoco Street, Portland, and River Road, in Milwaukie--throughout the length of the housing area, which, according to the plans of the Milwaukie Chamber of Commerce and the Milwaukie Planning Commission, is to be developed as an industrial area. The matter was discussed at some length, but a decision in the matter was deferred by the Commission until a later date.

The Engineer also reported on the cost to construct the proposed revision of the Oregon Coast Highway through the Town of Seaside following the railroad and Roosevelt Drive. He estimated the cost to provide a standard improvement at approximately $250,000 and pointed out that the project is not in an approved program and no monies are available to finance the work. In the discussion of this matter Chairman Banfield pointed out that the proposition as presented by the citizens of Seaside is very informal and that nothing can be done until the railroad company acts on the abandonment of its facilities at this place. It was his thought, in view thereof, that the Commission should not encourage the people of this town too much and lead them on to think that the project would be undertaken soon. Commissioners Schaupp

and Chessman concurred therein, whereupon the Engineer was instructed to convey such information to the proponents of the project.

A letter was presented from the Tillamook Chamber of Commerce urging construction of a cattle pass across the Oregon Coast Highway at the Robitsch Farm near Pleasant Valley south of Tillamook, as a traffic safety measure. It is alleged that at certain times of the year it is necessary that cattle be driven across the highway daily, and frequently accidents occur because of the high speed of highway traffic at this point, and it was suggested that the cattle pass would do away with such hazard. The Engineer advised that a concrete box cattle pass would cost about $2,500; however, he recalled that the Commission's long-standing policy prohibits an expenditure of state highway funds for such purpose except as a right of way consideration or to eliminate the possible greater expense of some other type of construction. Commissioner Schaupp gave as his thought that, as a general policy, the state's contribution to such facilities should be limited to the furnishing of engineering, and that the expense of constructing the cattle pass should be borne by the individuals benefited. Following a brief discussion the Commission decided to take no action in the matter until it has discussed a similar project with Mr. T. G. Montgomery, Baker, who is to appear before the Commission on the following day relative thereto. (Following discussion with Mr. Montgomery the Commission decided unanimously not to contribute toward cattle pass projects of this kind; however, the person desiring a cattle pass will be granted authority to construct it across the highway at his own expense subject to the condition that the type of construction meets with the approval of the State Highway Engineer. See ahead for minute entry regarding Mr. Montgomery's appearance.)

The Commission discussed a letter from the Oregon State Sanitary Authority regarding complaints on water pollution which may concern not only the Sanitary Authority but also the State Highway Commission, and suggesting that it would be desirable for the agencies involved to take joint action in the matter. In the discussion of this matter the question arose as to just what the Sanitary Authority has in mind when it refers to "joint action" and to what extent the State Highway Commission would be expected to cooperate. The Engineer was instructed to ascertain such information and report back to the Commission.

The Commission recessed for luncheon at 12 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Secretary presented a number of communications from people and organizations who are concerned with the naming of the southern trail used by pioneers enroute to the Oregon Country. Because of the controversy that has arisen regarding the naming of this trail the Commission decided to refer the entire matter to the Memorials Committee of the Oregon Historical Society for recommendation. The Secretary was instructed to forward copies of the communications to the Committee for its information.

The Engineer reported that, in conformity with instructions previously given him by the Commission, he has contacted the Director of Highways

DEC 16 1946

of the State of Washington relative to the establishment of a reduced speed limit on the Oregon-Washington Highway north of the town of Freewater, and that he is now in receipt of a communication from that Department to the effect that it already has ordered a 35 miles per hour speed limit for the Washington section between College Place and the state line. In view of this information, the Commission ordered a 40 miles per hour speed limit between Freewater and the state line. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Oregon - Washington

Highway number: 8 Route number: ORE 11

Location of Termini	Established Speed
M. P. 32.17 (No. Limits of Freewater) to M. P. 35.85 (Washington State Line)	40 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Engineer reported on investigations that have been made of traffic conditions along Pacific Highway West at the auction mart just north of McMinnville. He advised that, according to the Traffic Engineer, a serious traffic hazard does exist at certain times, and it is the Traffic Engineer's recommendation, in which he concurs, that the Commission prohibit the parking of vehicles along either side of the highway at this point. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Pacific Highway West, also known and designated as U. S. 99W, is one of the main traveled highways of the State over which there moves an average daily traffic of 5000 vehicles, consisting of both local and through traffic; and

WHEREAS, the section of said highway which begins at mile point 37.75 near the intersection of a county road north of McMinnville, and ends at mile point 38.02 near the north city limits of McMinnville, covering a distance of approximately 1425 feet, is a section which, because of conditions hereinafter stated, should, in the opinion of the Commission, be restricted with respect to the parking of cars and other vehicles; and

WHEREAS, the parking of cars and other vehicles for extended periods of time and in large numbers tends to inconvenience traffic, creating a potential traffic hazard and otherwise interferes with the normal flow of traffic because of the facts that:

(a) Said section of highway is constructed on a curve;

(b) The paved surface of the highway is not over 22 feet in width;

(c) The shoulders of the highway are limited to a width of 8 feet; and

(d) The promiscuous and unsupervised movement of vehicles off the traveled portion of the highway to the shoulders and the unsupervised return of such vehicles from the shoulders to the traveled section are hazards to all traffic movement; and

WHEREAS, it is the recommendation of the engineer that regulations imposing "no parking" restrictions should be maintained with respect to said section of highway; and

WHEREAS, it is the opinion of the Commission, based upon the foregoing facts and conditions, that certain parking regulations should be established and maintained with respect to said section of highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the section of the Pacific Highway West, U. S. 99W, which begins at mile point 37.75 and ends at mile point 38.02 near the north city limits of the City of McMinnville, be and said section of highway hereby is declared to be a "no parking" area, and from and after the passage and adoption of this resolution the parking of motor vehicles within said area shall be prohibited.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain at appropriate places within said defined area the approved "no parking" signs.

3. That this resolution be entered in the minutes and records of the Commission as of the fifteenth day of May, 1946, and an exact copy hereof mailed to the Mayor of the City of McMinnville and a like copy to the Superintendent of State Police.

The Engineer reported several violations committed by log haulers, as follows:

1. Refusal of W. H. Finley to allow his load to be weighed by State Weighmasters. The Engineer advised that Mr. Finley is a consistent violator, his record in the past four months showing that his average of overloads was 15 per cent, and it appears that the violations are deliberate. It was his thought that the violations justify the cancellation of Mr. Finley's permit, and he so recommended. The Commission approved the recommendation by unanimous vote.

2. Refusal of Allen George Tindall, driver of a logging truck owned by Mr. Art Johnston, Portland, to allow his loads to be weighed by State Weighmasters. The Engineer advised that Mr. Johnston is an old offender of the weight requirements, the Commission last year having canceled his permit on this account but having restored it later on after Mr. Johnston promised to abide by the rules and regulations. In the present instance, he said, Mr. Johnston was not driving his truck so may not have been aware of Mr. Tindall's refusal to allow his load to be weighed. He recommended, in view thereof, that a strong letter be written to Mr. Johnston calling his attention to the offense and advising him that his permit will be canceled for a repetition thereof. The Commission approved the recommendation.

3. Truck hauling of overlength loads of logs by Ellsworth Lloyd Dement with equipment owned by Donald Baldridge, Reedsport. The Engineer advised that Mr. Dement was arrested for transporting a load 68' 10" overall in length without permit, over a section of highway where loads are limited to 65 feet. He pointed out that Mr. Baldridge's past record is very bad, his permit having been canceled at one time for consistently violating the weight requirements. He recommended cancellation of the permit. The Commission approved the recommendation.

The Engineer reported on the cost of snow removal operations to open the following highways for general public use:

Mt. Hood Highway	13 miles in length. Estimated cost to open by June 10, starting May 20, $2,400.
McKenzie Highway	Estimated cost to open on June 15, starting on June 1, $3,200.
West Diamond Lake Secondary Highway	Length, 17 miles. Estimated cost to open by June 5, $900.
East Diamond Lake Secondary Highway	Length, 5 miles. Estimated cost to open by June 5, $300.
Crater Lake Highway	Length, 7 miles. Estimated cost to open, $500.
	Total cost $6,800.

Chairman Banfield gave as his thought that these highways should be opened now as an accommodation to the public. Commissioners Schaupp and Chessman concurred. The Engineer was thereupon authorized to proceed with the work in accordance with the above-mentioned schedule.

A letter was presented from School District No. 17, Curry County, urging early completion of the proposed improvement of the Oregon Coast Highway between the towns of Harbor and Brookings, also requesting footpath construction and a sidewalk on Chetco River Bridge for the benefit of school children. The Engineer advised that this project is not in the Commission's current program for postwar monies. The Secretary was instructed to convey such information to the School District and advise them that the project will be kept in mind for consideration in the formulation of future highway programs.

A letter was presented from Fort Klamath Grange urging improvement of the West Side Klamath Lake Secondary Highway between Klamath Falls and Fort Klamath. Also presented was a letter from the City of Klamath Falls endorsing this request. The Secretary was instructed to reply that the improvement is not scheduled in any of the Highway Commission's current

construction programs, but the Commission will bear it in mind for consideration in the formulation of future programs.

A resolution was presented from Crater Lake Post, Veterans of Foreign Wars, urging construction, as a joint railroad-highway project, of a tunnel through the Siskiyou Mountains and the further straightening of the Pacific Highway between Grants Pass and Eugene. The Commission considered that the tunnel project is one for a long time in the future, there being many projects of much more importance on which to use current funds available. The Secretary was instructed to so inform the petitioners, also to advise them that the Commission is making as rapid progress as is possible under existing circumstances in the further improvement of the Pacific Highway between the points mentioned.

A resolution was also presented from the City Council of Ontario requesting the paving of S. W. 4th Avenue, Ontario, full width between curbs from S. W. First Street to S. W. Ninth Street so as to provide a paved surface 64 feet wide. The Engineer was instructed by the Commission to check the approved construction program to ascertain whether or not this project is included and to advise the City Council as to the possibilities of securing the improvement requested.

Resolutions were presented from the City of Burns and the Burns Chamber of Commerce requesting the oiling of Monroe Street in the City of Burns full width between curbs for a distance of three blocks between Broadway and the crossing of the Northwestern Railroad tracks. The Engineer advised that Monroe Street is the route of the Burns-Crane Highway, the improvement of which was contracted a short time ago; also, that because only a limited amount of federal funds were available to finance the work, the paving now requested by the City was not included, and it now is too late to make any change in the Federal authorization. The Secretary was instructed to so inform the Chamber of Commerce and the City Council, and to further advise them that the Commission will bear the project in mind for consideration when additional Federal Aid funds are available.

The Commission discussed a letter from Mr. Alfred D. Collier, Klamath Falls, pointing out that in connection with the improvement of South Sixth Street, Klamath Falls, additional "service" roads are to be constructed by adjoining property owners and suggesting that, in order to secure a proper type of construction which will be in keeping with the highway improvement, the service roads should be built to conform to proper engineering standards, and to that end the State Highway Department should furnish the engineering that may be required. The Commission approved the suggestion by unanimous vote subject to the condition that engineering service only shall be furnished in connection therewith.

A letter was presented from the Cannon Beach Commercial Club requesting the furnishing of rest rooms for the convenience of tourists who visit Cannon Beach, present accommodations being very unsatisfactory and the city having no funds available with which to provide suitable facilities. The Engineer advised that the Commission has no program for the furnishing

of facilities of this kind except in state parks. It was the feeling of the Commission that the general public should have better accommodations than now are provided, but there was a reluctance on the part of the Commission to inaugurate a program of this kind until some way can be found to keep the places clean and sanitary; moreover, it was thought that the cities should be responsible for providing such service. The Engineer was instructed to prepare a letter to all cities and towns conveying such information to them and advising them why the Commission feels it is the cities' responsibility to take care of such matters.

The Engineer reported that the City of Gresham has met the legal requirements with respect to the expenditure of State Tax Street Funds that the city received in 1944 from 1943 State Highway revenues. He also advised that the plans of the city have been checked and found satisfactory and recommended approval of the same by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by this Commission apportioned to the city hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the sum or amount set opposite the name of said city:

Gresham - - - - - - - - - - - - - - - - - - $2,679.57

AND, WHEREAS, said city has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named city:

Gresham - 5th Street, 4th Street, 3rd Street, 2nd Street, Kelly Street, 1st Street, Florence Street, Wilson Street, Ava Street, Miller Street, 13th Street, Lawrence Street

2. That the type, plan and character of improvement proposed in the resolution filed with this Commission by the above named city hereby are approved.

3. That the action taken by said city as evidenced by appropriate resolution adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city so as to qualify said

city to receive and use the funds apportioned to said city.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in said city a duly certified copy of the resolution adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of this Commission as of the 15th day of May, 1946.

The Engineer also reported that the following cities and towns have met the legal requirements with respect to the expenditure of State Tax Street Funds received by them in 1945 from 1944 State Highway revenues:

Canby	Huntington
Drain	Madras
Grass Valley	Sumpter
Haines	Tualatin

He advised that the plans for the proposed improvements have been checked and found satisfactory and recommended approval of the same by the Commission. The Commission approved the recommendation and thereupon, upon motion of Commissioner Schaupp, unanimously adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Canby	$1,380.97
Drain	834.46
Grass Valley	285.14
Haines	526.95
Huntington	1,035.73
Madras	575.87
Sumpter	587.05
Tualatin	251.59

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Canby - Cemetery Road, Poplar Street, Weed Street, 4th Avenue, Maple Street, 4th Street, 5th Street, "D" Street, "E" Street, 6th Street, Lee Street

Drain - "B" Street (bridge)

Grass Valley - 2nd Street, Market Street

Haines - Olson Street, Robert Street, John Street, 2nd Street, 3rd Street

Huntington - 2nd Street West, 1st Street West, Lincoln Street, 1st Street East

Madras - 4th Street

Suppter - Mill Street, West High Street, Cracker Street, Granite Street, Auburn Street, Austin Street

Tualatin - Douglas Street, Grove Street, Park Street, Railroad Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Drain and approved by the State Highway Commission on August 31, 1945 shall be canceled, in accordance with the request of the City of Drain on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of this Commission as of the 15th day of May, 1946.

MAY 15 1946

The Engineer also reported that the following cities and towns have met the legal requirements with respect to the expenditure of State Tax Street Funds received by them in 1946 from 1945 State Highway revenues:

Aurora	Dundee	Oakridge
Bandon	Echo	Ontario
Barlow	Estacada	Port Orford
Boardman	Gearhart	Riddle
Brownsville	Gold Beach	Rogue River
Cove	Gresham	St. Paul
Donald	Hammond	Salem
Drain	Madras	Scio
Dufur	Maupin	

He advised that the plans for the proposed street improvements of each city have been checked and found satisfactory and recommended approval of the same by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto, upon motion of Commissioner Schaupp:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Aurora	$ 342.46
Bandon	1,508.02
Barlow	78.10
Boardman	165.22
Brownsville	1,441.93
Cove	482.14
Donald	246.33
Drain	896.70
Dufur	588.79
Dundee	313.92
Echo	681.91
Estacada	1,010.85
Gearhart	479.14
Gold Beach	854.64
Gresham	4,091.48
Hammond	633.85
Madras	618.83
Maupin	401.04
Oakridge	781.04
Ontario	5,333.64
Port Orford	1,134.02
Riddle	321.43
Rogue River	575.27
St. Paul	274.87
Salem	46,424.14
Scio	527.21

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Aurora - 2nd Street, 3rd Street, 4th Street, Bobs Avenue, Main Street, Liberty Street, unnamed street leading off from Liberty Street to east boundary of city limits

Bandon - Ogden Avenue, 7th Street West, Oregon Avenue, 4th Street West, Elmira Avenue, Fillmore Avenue, 3rd Street East, Caroline Street, Harlem Avenue, 1st Street North, June Street, Cliff Street

Barlow - Main Street, Second Street, Maple Street, First Street

Boardman - Main Street

Brownsville - Maintenance of all city streets

Cove - 2nd Street, Church Street, Orchard Street, Bryan Street, Conklin Lane, 1st Street, High Valley Road, Ash Street, Poplar Street, Caddie Street, Foster Street, Main Street, Hibbler Street, French Street, Hill Street, Water Street, Grove Street, county road

Donald - Mathias Road, Williams Avenue, Ehlen Street, Oak Street, Crissell Street, Feller Street, Rees Street, Cone Avenue

Drain - "B" Street (bridge)

Dufur - N. 1st Street, N. 2nd Street, Klinger Street, N. 4th Street, Court Street

Dundee - 10th Street

Echo - Buckley Street, Dupont Street, Bonanza Street

Estacada - Zobrist Street, Broadway Street, Sixth Street, Currin Street, Shafford Avenue

Gearhart - First Street, Sixth Street, 11th Street, 12th Street, 13th Street, Cottage Avenue, Ocean Avenue, Marion Avenue, Hager Avenue

Gold Beach - All city streets

Gresham - First Street, Second Street, Third Street, Fourth Street, Fifth Street, Thirteenth Street, Florence Street, Wilson Street, Ava Street, Miller Street, Lawrence Street, Kelly Street, Hood Street

Hammond - Jackson Street, Boone Avenue, Pacific Avenue, Park Street, Harriett Street, Serah Avenue, West 1st Street, West 2nd Street, East 1st Street, Ford Street

Madras - 8th Street, "D" Street

Maupin - Grant Avenue, Dufur Avenue, 4th Street, 5th Street, 6th Street

Oakridge - West First Street, Pine Street, West Second Street, Elder Street, Laurel Street, West Commercial Street, Beech Street, Yew Street, Willow Street, Oak Street

Ontario - Improving or oiling unoiled city streets

Port Orford - Jackson Street

Riddle - Main Street

Rogue River - First Street, Second Street, Broadway, Cedar Street, Gilmore Avenue, Fourth Street, Park Street, Gardner Street, Depot Street, School Street, Main Street

St. Paul - Repair of all city streets

Salem - South River Road, State Street, 12th Street, Hunt Street, Market Street, Chemeketa Street, S. 25th Street, Alley (Ferry to Trade) between Commercial and Liberty. As alternates: Broadway Street, Center Street, Liberty Street

Scio - Wheeler Street, Mill Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 15th day of May, 1946.

The Commission discussed briefly the adoption of a construction program for state funds as proposed by the Engineer for performance during the years 1946, 1947, and 1948. Action on the matter was deferred until the next meeting of the Commission, at which time the matter is to be given special consideration. The Engineer was instructed to scrutinize the list of projects and the costs involved and to advise the Commission at that time if it is going to be necessary to deviate from the allocations to the various districts as established by a previously-adopted formula, it being the intention of the Commission to adopt a program by appropriate resolution as was done in connection with the Postwar Program.

The Engineer reported the award of the following contracts in conformity with authority previously given him by the Commission at its meeting on April 4 and 5, 1946, the conditions of the awards being satisfied:

Regrading, surfacing, and oiling the Burns-Lawen Section of the Burns-Crane Highway, in Harney County; bids received April 4; contract awarded April 25 to K. F. Jacobsen, Inc. and J. R. Taggart, low bidders.

Grading Mazama Junction-Spring Creek Hill Section of The Dalles-California Highway, Klamath County; bids received April 4; contract awarded on April 8 to McNutt Bros., the low bidder.

Construction of Vadis Overcrossing on the Sunset Highway near North Plains, Washington County; bids received April 4; contract awarded April 23 to A. D. Ford & Son.

Mountaindale County Road Grade Separation structure on the Sunset Highway near North Plains, Washington County; bids received April 4; contract awarded April 23 to A. D. Ford & Son, low bidder.

Grading and paving Reese Creek-Antelope Creek Section of the Crater Lake Highway, in Jackson County; bids received April 5; contract awarded May 14 to McNutt Bros., the low bidder.

Widening existing bridge over Altamont Canal, Klamath Falls; bids received April 5; contract awarded April 23 to Angelo Doveri, low bidder.

Grading and paving the Klamath Falls-USRS Canal Section of the Klamath Falls-Lakeview Highway, Klamath County; bids received April 5; contract awarded April 17 to Warren Northwest, Inc., the low bidder.

Grading Spring Creek Hill Section of The Dalles-California Highway, Klamath County; bids received April 5; contract awarded April 8 to Strong & Macdonald, Inc., low bidder.

Grading Spring Creek Hill-Lobert Section of The Dalles-California Highway, Klamath County; bids received April 5; contract awarded April 15 to R. A. Heintz Construction Co., low bidder.

Grading and bituminous macadam surfacing on the Ocean Lake Section of the Oregon Coast Highway, Lincoln County; bids received April 5; contract awarded April 15 to T. W. Thomas, low bidder.

Furnish and install roadway lighting system on Interstate Bridge, Pacific Highway, Portland; bids received April 5; contract awarded April 8 to W. R. Grasle Co., low bidder.

Motion was made by Commissioner Schaupp that the contract awards as reported be approved. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Commission discussed a letter from contractor C. J. Eldon pointing out the difficulties he is encountering in securing materials needed for construction of the Coffey Creek Bridge on the Tiller-Trail Secondary Highway, Douglas County, State Highway Contract No. 2788. Mr. Eldon suggests that, in view of the uncertainty of obtaining the required materials, the contract be canceled without prejudice rather than carried over until such time as materials become available. The Commission disapproved the suggestion and instructed the Secretary to inform Mr. Eldon that the Commission expects him to proceed with the contract as rapidly as possible under existing circumstances.

The Engineer requested authority to construct two cabins at Seneca for use by maintenance forces who are unable to rent accommodations at this place because of the housing shortage. He estimated the cost involved at $1,500 each. The Commission approved the request by unanimous vote on the basis of using local materials insofar as is possible.

The Commission discussed briefly and ordered filed a letter from County Judge T. A. Power, Jefferson County, and a petition from taxpayers of the Ashwood District, Jefferson County, urging retention of the present plan for improvement as a Federal Aid Secondary project of the Trout Creek Road between Ashwood and Willowdale, notwithstanding the protest to the contrary filed previously. In this regard the Commission reaffirmed its decision to make no change in the program without first discussing the matter with the Jefferson County Court.

MAY 1946

The Engineer reported that Contracts Nos. 2720, 2734, 2746, 2758, 2761, 2762, and 2776 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2720, with E. C. Hall Co., for furnishing crushed materials in stockpiles on the Burns Section of the Central Oregon, John Day-Burns and Burns-Crane Highways in Harney County; completed November 19, 1945.

Contract No. 2734, with T. W. Thomas, for furnishing crushed gravel in stockpiles on the Youngs Ranch-Brothers Section of the Central Oregon Highway in Deschutes County; completed September 21, 1945.

Contract No. 2746, with Vernie Jarl, for furnishing crushed rock in stockpiles on the Fossil-Service Creek Section of the John Day Highway in Wheeler County; completed January 26, 1946.

Contract No. 2758, with the Pendleton Sand & Gravel Co., for furnishing sanding materials on the Mission-Meacham Section of the Old Oregon Trail in Umatilla County; completed April 2, 1946.

Contract No. 2761, with E. C. Hall Co., for furnishing crushed rock in stockpiles on the Cloverdale-Oceanlake Section of the Oregon Coast Highway in Lincoln County; completed April 6, 1946.

Contract No. 2762, with Vernie Jarl, for grading and topping 3.37 miles on the Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway in Wheeler County; completed April 30, 1946.

Contract No. 2776, with Newport, Kern & Kibbe, for furnishing crushed material in stockpiles on the Cairo Junction-Adrian Section of the Old Oregon Trail, Nyssa-Adrian and Adrian-Parma Highways in Malheur County; completed April 17, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective con-

tracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Mr. W. H. Lynch, Division Engineer, and Mr. Tom M. Davis, District Engineer, Public Roads Administration, were present and asked the Commission's approval of a change in the Forest Highway Program by reducing the amount budgeted for the proposed improvement of the Mt. Hood Highway from $295,000 to $195,000, because a recent analysis of costs on other projects indicates that the amounts budgeted for such projects will be insufficient to carry on the work. They referred particularly to the Schooner Creek Bridge project on the Oregon Coast Highway and to the Ochoco Forest Highway Project, where the shortages of funds are $30,000 and $70,000, respectively. They suggested that elimination of four bridges and approximately 0.33 mile of grading and surfacing on the Mt. Hood Highway project would provide the $100,000 necessary to finance the other two projects and recommended such revision. The State Highway Engineer concurred in the recommendation which was approved by the Commission by unanimous vote. (The following letter directed to the Chief, Forest Service, and the Commissioner of Public Roads, Washington, D. C., providing for such revision was signed on the following day:

Division 8

486 Oregon General May 16, 1946

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Dear Sirs:

Under Oregon Forest Highway Program Letter covering fiscal year 1942-43 funds and approved March 28, 1945 by the Secretary, there were approved for construction the following projects and amounts:

Project 3-B1	Oregon Coast Highway, Grad., Surf. & Bit. Surf. 2 miles	$115,000
Project 25-A7	Mt. Hood Highway, Grading, Bridges, Surfacing & Bit. Surf. 2.6 miles	295,000
Project 27-A1	Ochoco Highway, Grading & Bridges, 6 miles	300,000
	Total funds approved	$710,000

In order to effect wider competition by separating the types of work and enabling a single season operation on Project 25-A7, and to finance the increased cost as determined by recent analyses of costs on the two latter projects, it is recommended to eliminate from Project 25-A7, the four bridges, approximately .33 mile of grading and the placement of surfacing and bituminous surfacing on the .33 mile, and to transfer the $100,000 resulting from eliminations on Project 25-A7, together with $6,000 from the State Contingent to Projects 3-B1 and 27-A1 as follows:

Project	Previous Authorization	Recommended Reduction or Incr.	Revised Authorization
3-B1, Oregon Coast Hwy. Gr.,Surf. & Bit. Surf. 2 miles	$115,000	+ $36,000	$151,000
25-A7, Mt. Hood Hwy. Gr.,Surf. & Bit. Surf. 2.27 miles	295,000	- 100,000	195,000
27-A1, Ochoco Hwy. Grading & Bridges 6 miles	300,000	+ 70,000	370,000
Totals	710,000	+ 6,000	716,000

There are sufficient funds in the State Contingent to finance the additional $6,000.

Oregon Coast Highway Project 3-B1, as proposed, does not permit of shortening or elimination of any portion and recent analysis of construction trends indicates the probable cost as more than 25% above the programmed amount. It is imperative that Oregon Project 3-B2, Schooner Creek Bridge, to which project 3-B1 is directly connected, be constructed at the earliest possible date because of the unsafe condition of the existing bridge. Construction of Project 3-B1 is necessary to make the new bridge usable. The additional cost will be financed by transfer of funds from Project 25-A7.

On the Mt. Hood Highway, Project 25-A7, construction, in connection with the major grading and surfacing, of the four bridges and the grading, surfacing and bituminous surfacing of approximately one-third of a mile at the easterly end of the project will not materially advance the ultimate usage of the highway and the elimination, at this time, of the above items of construction will provide a single season project and more advantageously separate the types of work, thereby making possible a wider competition. Release of funds effected by the elimination will permit the refinancing of other projects as above outlined.

Recent analysis of the Ochoco Highway, Project 27-A1, indicates that an additional $70,000, over and above the originally approved $300,000, will be required to complete the project as designed. It is desired, in order to effect a proper scheduling of the reconstruction of approximately 18 miles, that the project not be shortened. The increased cost will be financed by the transfer of funds from Project 25-A7 and from the State Contingent.

Very truly yours,

(SGD.) W. H. LYNCH

W. H. LYNCH
Division Engineer

OREGON STATE HIGHWAY COMMISSION

By (SGD.) T. H. BANFIELD
Chairman

By (SGD.) A. W. SCHAUPP
Commissioner

By (SGD.) M. R. CHESSMAN
Commissioner

U. S. FOREST SERVICE

By (SGD.) JAMES FRANKLAND
Acting Regional Forester

O.K.
(SGD.) R. H. BALDOCK

Mr. Lynch inquired as to the status of the acquisition of right of way needed for the Ochoco Highway project. The Engineer was instructed to check into the matter and advise Mr. Lynch later.

Mr. Lynch also brought up for discussion an agreement with the U. S. War Department concerning the construction of the North Santiam Highway around the proposed dam at Niagara. He suggested that, if there are no objections, the Commission sign the agreement at this meeting. The Commission's Chief Counsel advised that the agreement is satisfactory from the legal standpoint except, that under a strict interpretation of the statutes, it should have been made out in the name of the State of Oregon rather than the State Highway Commission. This feature, he said, is not vital and can be clarified by letter. (The agreement was signed by the Commission later in the session)

The Commission discussed with the Engineer the bids received at the morning session for highway contract work and took action thereon, as follows, by unanimous vote:

The contract for surfacing the Eddyville-Blodgett Section of the Eddyville-Blodgett Secondary Highway was awarded to J. N. & M. J. Conley, Portland, the low bidder. Contract for construction of a concrete pile trestle bridge on the Pacific Highway at Junction City was awarded to the low bidder, Archie R. Averill, Portland. The Commission awarded to E. C. Hall Co., the low bidder, the contract for grading and oil mat surfacing on the South Unit, Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County.

The Commission referred to the County Court of Douglas County for handling the bid received for the redecking of the South Umpqua River Bridge on Oak Street in Roseburg, this being a county project advertised in behalf of the County Court.

The Commission rejected all bids received for the remaining projects. In this connection the Commission decided, in view of the material situation and the fact that there was a dearth of bids received for the projects offered at this letting, not to readvertise these projects until the situation improves.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows:

"Surfacing the Eddyville-Blodgett Section of the Eddyville-Blodgett Secondary Highway, in Benton and Lincoln Counties: The low bid received for this project was that submitted by J. N. & M. J. Conley, Portland at $156,825. The next low bid was submitted by E. C. Hall Co., Portland, at $163,500. There was one higher bidder. The Commission has awarded this contract to the low bidder, J. N. & M. J. Conley, at the bid price of $156,825.

"Reconstruction of a timber deck on a county bridge over the South Umpqua River on Oak Street in Roseburg. The Commission received one bid for this project, being that of Kern & Kibbe, Portland, at $60,033.62. The Commission has referred this bid to the County Court of Douglas County for its decision inasmuch as this is a county project which was advertised by the Commission simply as a courtesy to the County Court.

"Construction of a concrete bridge over Little Butte Creek between Third and Hamilton Streets in the Town of Eagle Point, Jackson County. This is a county project advertised in behalf of the County Court of Jackson County. No bids were received for this project.

"Widen existing bridges over Reese Creek, Little Butte Creek, and Antelope Creek on the Crater Lake Highway, in Jackson County. The Commission received only one bid for this project, which has been rejected.

"Dairy Rock Production Project on the Klamath Falls-Lakeview and Dairy-Bonanza Highways, in Klamath County. The Commission received one bid for this project, being that of Warren Northwest, Inc., Portland, at $39,960. The bid has been rejected.

MAY 15 1946

"Bly-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties. The Commission has rejected the bid of M. C. Lininger & Sons, Medford, at $38,680, this bid being the only one received for this job.

"Construction of a concrete pile trestle bridge on the Pacific Highway at Junction City, Lane County. The Commission received two bids for this project, the low one being that of Archie R. Averill, Portland, at $33,308. The other was submitted by Lockyear & White, Seattle, Washington, at $49,052.50. The Commission has awarded the contract to the low bidder, Archie R. Averill, at his bid price of $33,308.

"Grading and paving the Front Avenue Section (Sheridan Street-Bancroft Street) of the Pacific Highway West in Portland, Multnomah County. The Commission received no bids for this project.

"Widen west end of Ross Island Bridge on the Front Avenue Project, Portland, Multnomah County. Only one bid was received by the Commission for this job, being that of Birkemeier & Saremal, Portland, at $54,170. The Commission has rejected the bid.

"Grading and oil mat surfacing the South Unit of the Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County. E. C. Hall Co., Portland, submitted the low bid for this work at $198,601. The second low bid was submitted by Newport, Kern & Kibbe, Portland, at $204,093.60. There was one higher bidder. The Commission has awarded the contract to the low bidder, E. C. Hall Co., at its bid price of $198,601."

By way of explanation Chairman Banfield pointed out that on a number of the projects only one or two bids were received by the Commission and these the Commission considered excessively high, which is the reason why they have been rejected.

The Commission discussed matters pertaining to the proposed state ferry operation across the Columbia River between Astoria, Oregon, and Megler, Washington, as follows:

1. The Commission approved and signed a voucher in the amount of $167,008.78 in favor of the Astoria-North Beach Ferry Co. and the Columbia Transportation Co. covering the purchase of the ferry facilities.

2. Appointment of someone to sign, in behalf of the Commission, certain Marine and Customhouse Documents that are necessary to document ferry boats: The Engineer suggested that the Commission's Chief Counsel be authorized to sign such papers. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

Be It Resolved by the State Highway Commission of the State of Oregon, that J. M. Devers the Chief Counsel of the State Highway Commission, be and he is hereby delegated and appointed to sign and execute for and on behalf of said Commission all marine and custom house documents necessary and proper to properly document the ferry boats known as "North-Beach", "Tourist No. 2" and "Tourist No. 3".

---

3. Establishment of toll schedule: This matter was discussed at some length, following which motion was made by Commissioner Chessman that the Commission adopt the toll schedule now in effect with the understanding that the rates will be reduced if it is found, after trial, that the charge is too high. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have carried by the unanimous vote of the Commission. In this connection the Engineer pointed out that the present schedule does not provide a charge for passenger busses. He suggested a charge of $2 per bus and 25 cents for each of the passengers therein. The Commission approved the recommendation unanimously and authorized the inclusion of such rate in the adopted schedule.

4. Plan for the payment of tolls by Navy personnel: The Engineer reported receipt of a letter from the U. S. Naval Supply Depot, Seattle, requesting quotations for the fares of Naval officers, enlisted men, and civilian personnel as may be required during the period July 1, 1946, to June 30, 1947. He suggested a charge of $1 for an automobile and driver (either passenger car or pick-up truck) and a charge of 25 cents for each passenger for each crossing, which is the standard rate as adopted by the Commission. The Commission approved the recommendation.

5. Purchase of insurance coverage: The Engineer advised that he is not ready to make a recommendation with respect to this matter, but a conference has been arranged with representatives of several insurance companies for this evening, and he anticipates that he will be able to make a definite recommendation before adjourning on the following day. Action on this matter was thereupon deferred.

The Commission discussed a resolution from the County Court of Wasco County designating as a county market road that certain county road which extends from the Emerson-Roberts Market Road No. 5 in the NW¼ NW¼, Sec. 34, T. 1 N., R. 15 E., W. M., northwesterly to Fifteen Mile Creek, thence along said Creek to a connection with the Fifteen Mile Creek (Fairbanks) Market Road No. 18, a distance of 5.36 miles. The Engineer advised that approval of this designation by the Commission is a perfunctory matter required by law. He recommended approval of the same. The Commission approved the recommendation unanimously.

A letter was presented from the Clatsop County Chapter, American Red Cross, Astoria, requesting the use of state highway equipment for rescue or evacuation as necessity demands during times of disaster. The Engineer advised that past practice has been to allow the use of highway equipment at such times. He recommended continuance of this policy and approval of the request of the Red Cross in this instance. The Commission approved the recommendation.

The Commission discussed a letter from the Henley Memorial Committee, Klamath Falls, requesting state aid in the construction of a double tennis court on the public school grounds of Henley as a living memorial to the war dead. The Committee asked the Highway Department to pave the tennis court and agreed to reimburse the state for the expense thereof. The Engineer advised that the schedule of the paving crews will not permit performance of special work of this nature; moreover, there is a shortage of materials. He suggested that it would be possible for the Committee to have the work done by the state's contractor on the South Sixth Street Project in Klamath Falls, who is well-equipped to do it and who could probably do it cheaper than the state. The Commission approved the suggestion and instructed the Secretary to so inform the Committee.

The Engineer brought up for discussion the rescinding of a resolution adopted May 19, 1942, establishing a 35 miles per hour speed limit on the Pacific Highway East just north of Aurora. He advised that there was justification for the reduced limit when the order was made, but the Pudding River Bridge located on that section is now being reconstructed, and signs warning traffic of danger at this point are being maintained. These signs, he said, are of more value than the reduced speed limit sign, for which reason he suggested the rescinding of the Commission's previous order, particularly in view of the fact that a reduced speed will not be necessary when the bridge is reconstructed. The Commission's Chief Counsel recommended against the rescinding of the order. The Commission decided unanimously to defer the matter until the bridge work is completed.

The Engineer reported that there no longer is need for a 35 miles per hour reduced speed limit on the Sunset Highway in the vicinity of the old WPA camp near Buxton because this camp has been discontinued. He suggested the adoption of an order rescinding the order adopted in 1941 establishing this 35 miles per hour speed zone. The Commission approved the recommendation by unanimous vote and adopted the following resolution with regard thereto:

> WHEREAS, this Commission on the 17th day of November, 1941, duly and regularly adopted a resolution by which the Commission fixed a speed of 35 miles per hour as the lawful speed to govern the operation of motor vehicles on the Sunset Highway (formerly Wolf Creek Highway) between Mile Post 46.63 and Mile Post 47.29; and
>
> WHEREAS, present conditions are such as to make unnecessary a reduced speed on said highway between said points;

THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the resolution adopted on the 17th day of November, 1941, by which the Commission fixed a speed limit of 35 miles per hour applicable to the section of the Sunset Highway (formerly Wolf Creek Highway) between Mile Post 46.63 and Mile Post 47.29, be and said resolution hereby is rescinded and the speed limit fixed therein shall no longer be in effect.

2. That this resolution be entered in the minutes and records of the Commission as of the 15th day of May, 1946, and a duly certified copy thereof mailed to the Superintendent of State Police.

A letter was presented from the City of Springfield requesting the installation of a traffic signal at the intersection of the McKenzie Highway and Fifth Street in this town. The Engineer advised that the matter has been investigated by the Traffic Engineer, who recommends approval of the request. He declared his concurrence in the recommendation, subject to the condition that the city will pay 50 per cent of the cost of the installation and will furnish electric energy to operate the signal at no cost to the state. The Commission approved the recommendation.

A petition was presented from residents of the City of Portland requesting the installation of an automatic traffic control device at the intersection of Barbur Boulevard (U.S. Highway No. 99W) and S. W. 19th Avenue. The Engineer advised that a study of traffic conditions on this highway is now being made jointly with the Traffic Engineering Department of the City of Portland, and, whereas the solution of the problem probably lies in the installation of a progressive system of traffic control signals and other safety facilities, it cannot be solved by a study of only one intersection. He recommended that action on the petition be deferred until the study is completed. The Commission approved the recommendation and instructed the Engineer to so inform the petitioners.

A letter was presented from Mr. G. E. McDonald, Managing Director of the Northwest Parade of Progress Exposition, which is to be held in Seattle during the period June 8 to 16, 1946. The State of Oregon is invited to participate in the event by purchasing space for advertising the State of Oregon. It is estimated that such representation would cost the state between $5,000 and $6,000. The Engineer advised that he took up the matter with Mr. John A. Laing, Chairman of the Advisory Committee on travel and informational matters, who gave as his feeling that this expense is not justified on the basis of promotion of travel on Oregon highways and that, in his estimation, the Highway Commission's interest in promoting travel on Oregon highways can be accomplished to better advantage with the expenditure of the same amount of money in other channels. In view of this information the Commission voted unanimously not to participate in this event.

The Engineer requested authority for the Commission's Chief Counsel, the Bridge Engineer, and himself to attend, at state expense, a meeting of the Western Association of State Highway Officials which is to be held in Salt Lake City, Utah, June 10, 11, and 12, 1946. He estimated that the expense would total about $300. The Commission approved the request by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp, subject to the condition that the out-of-state travel is authorized by Governor Snell.

The Engineer also requested authority for the Personnel Director to attend, at state expense, a meeting of the Western Regional Conference of the Civil Service Assembly which is to be held in Sacramento, California, during May 20, 21, and 22, 1946. He estimated the cost involved at $65. The Commission approved the request unanimously upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Engineer also requested authority for Mr. J. A. Head, Assistant Traffic Engineer, to go to Seattle at state expense on May 27, 28 and 29 to study the methods used by the State of Washington in conducting the origin and destination survey that is now being carried on in that city, such information being of value in connection with a similar survey that the Commission has authorized for the City of Portland. He estimated the expense involved at approximately $30. The Commission approved the request by unanimous vote.

The Commission approved and signed an agreement with the City of Coos Bay covering a proposed traffic signal installation on the Oregon Coast Highway at three city street intersections.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Wednesday and Thursday, June 26 and 27, with an afternoon meeting on Tuesday, June 25, to discuss matters concerning the construction program. The Secretary was instructed to make the usual arrangements to hold the regular meeting in the Auditorium of the Public Service Building and to hold the special meeting in a private room in the Imperial Hotel.

In this connection the Commission discussed a time for its annual inspection trip of state highways and decided tentatively to make two trips, one throughout Eastern Oregon, and the other throughout Western Oregon, some time during the month of August. The Engineer was instructed to prepare an itinerary for each trip.

The Engineer reported a request from Hubach and Parkinson Motor Company, Oregon City, for permission to maintain an electric neon sign on the front of its garage building, which is located on the southerly side of the Pacific Highway East, in Oregon City. He advised that the building is constructed up to the right of way line, so the sign would extend over the right of way a distance of about nine feet; however, it will not extend over the traveled portion of the roadway nor over the sidewalk, inasmuch as the sidewalk, when constructed, will be placed next to the curb, which is 20 feet from

the property line. He recommended the granting of a revocable permit for this installation, subject to approval by the city authorities. He pointed out that the city has an ordinance authorizing such encroachments provided the sign is at least 15 feet above the level of the sidewalk. The Commission's Chief Counsel advised that if the city has such an ordinance, then it would not be necessary for the Commission to approve the installation so would not assume any responsibility in the event of an accident occurring. In view of this information the Commission decided not to take any action in the matter but to leave it to the city to grant any permit that may be required.

The Commission considered briefly unfinished business, as follows:

1. Report of the Engineer and the Chief Counsel on proposed Willamette River Bridge at Independence: The report on this matter was not ready. The Engineer advised that he expects to present it within the next three months.

2. Request of the Woodburn City Council for improvement of the Hillsboro-Silverton Secondary Highway between its junction with the Pacific Highway East and the Woodburn Civic Center: The Engineer advised that this project has been approved by the Commission for the state fund program, an amount of $30,000 having been budgeted therefor.

3. Request of Coos County Court for improvement of the Enegren Ferry Road across lands of Mr. Charles Enegren: The Engineer advised that this project is included in the list of state fund projects which will be considered by the Commission at its next meeting.

4. Request for the reconstruction of a short section of the Pendleton-John Day Highway just south of Pendleton to eliminate hazards to log haulers: The Engineer advised that this project also is included in the list of state fund projects for consideration by the Commission at its next meeting.

5. Right of way negotiations along the waterfront in the City of Coos Bay: The Chief Counsel advised that he is not yet ready to report on this subject.

6. Proposed increase in 1946 Budget to finance private road approaches to state highways: The Engineer advised that his report on this subject is not ready for presentation.

The Chief Counsel brought up for discussion the acquisition of right of way needed for the proposed improvement of the Oregon Coast Highway through the Town of Gold Beach. He advised that for the most part satisfactory options have been secured; however, the question has arisen whether or not the Commission in its order intended to include the taking of options for the approaches to the city as well as that required for the city project. He was authorized to extend the negotiations to include the approaches.

A letter was presented from the Lake County Chamber of Commerce requesting the designation and construction of a "cut-off" highway through the Fremont National Forest westerly from the Town of Silver Lake on the Fremont Highway to a connection with The Dalles-California Highway at a place known as Beaver Marsh, or at some point near Chemult. The Engineer advised that there is not sufficient traffic to justify the expense of such a "cut-off" highway; moreover, there are other projects of more importance where available monies could be expended to better advantage. He recommended that the request be denied. The Commission approved the recommendation unanimously.

A letter was presented from the Loveness Logging Company, Canby, California, requesting permission to truck-haul logs directly across the Klamath Lake Secondary Highway in the vicinity of Rocky Point using four units of equipment consisting of heavy duty three axle truck tractors and heavy duty two axle trailers with a gross carrying capacity of 60,000 pounds and 64,000 pounds, respectively. The Company advises that, other than the crossing of the highway at two points, one of which will be with loaded trucks and the other with empty trucks, the operation will be entirely on private roads. The Engineer recommended approval of this request, subject to the usual standard requirements. The Commission approved the recommendation by unanimous vote.

The Engineer reported on the oiling of driveways and sidewalks at H. M. Mallory's property located at the junction of the Klamath Falls-Lakeview and the Klamath Falls-Merrill Highway about five miles east of Klamath Falls. He estimated the cost at $1000 and recommended approval of the work as a minor betterment project. The Commission approved the recommendation.

The Commission approved and signed agreements, etc., as follows:

Agreement and stipulation in connection with the case of Roscoe Hopper, et ux, plaintiffs, vs. City of Prineville, et al.

Agreement with the City of Prineville covering construction of the Madras-Prineville Secondary Highway over the city's railroad tracks near Prineville.

Agreement with the U.S. Dept. of Interior covering removal of road-building materials from tribal lands in Warm Springs Indian Reservation.

Agreement with Deschutes County re cooperative construction of Federal Aid Secondary Highway No. 398.

Agreement with Southern Pacific Co. covering slope easement at Oswego.

Agreement with the City of Coos Bay covering installation and maintenance of traffic signals on the Oregon Coast Highway at three city street intersections.

Agreement with the City of Portland concerning the parking of automobiles on the parking strip between S. W. Front Avenue and S. W. Harbor Drive from S. W. Alder Street to S. W. Pine Street.

Petition directed to the Secretary of Interior requesting withdrawal from public entry of recreational property abutting Loon Lake, Douglas County.

Petition to vacate subdivision known as Dabney Park adjacent to the Upper Columbia River Highway and Sandy River near Troutdale, Multnomah County.

Easement agreement with R. E. Hadley, et ux, providing for the use of a detour road across the Hadley property in connection with the construction of a bridge over the Trask River, Tillamook County.

Bargain and sale deed conveying unto Weyerhaeuser Timber Company title to the old highway maintenance site in North Bend.

Bargain and sale deed conveying unto L. A. McClintock property referred to as the "Duck Pond" property adjacent to the Boardman-Stanfield Highway, in Umatilla County.

Quitclaim deed conveying unto Mr. Northern Harris fragment of old right of way of the Oregon-Washington Highway at the east entrance to Pendleton.

Agreement with the U. S. War Department, Public Roads Administration, and Department of Agriculture covering the relocation of the North Santiam Highway between Niagara and Detroit, Marion County.

Agreement with the Columbia Transportation Company providing for the lease of landing facilities at Astoria in connection with the operation of state-owned ferry service across the Columbia River at this point.

The meeting adjourned at 5:15 p.m. to reconvene the following morning in the same room.

Portland, Oregon
May 16, 1946

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p.m. in the same room:

BAKER-UNITY HIGHWAY IN BAKER COUNTY
MILL GULCH-SALISBURY SECTION

J. C. Papin, Sandy	$ 138,255.00
Leonard & Slate, Portland	171,525.00
E. C. Hall Co., Portland	247,312.50
Colonial Construction Co., Spokane, Wn.	260,961.50
Natt McDougal Co., Portland	298,145.00

PACIFIC HIGHWAY IN JACKSON COUNTY
ASHLAND-STATE LINE ROCK PRODUCTION PROJECT

M. C. Lininger & Sons, Medford	$ 24,610.00

ROGUE RIVER LOOP AND REDWOOD HIGHWAYS IN JOSEPHINE COUNTY
ROBERTSON BRIDGE-HAYES HILL-SHATTUCK CORNER OILING
AND ROCK PRODUCTION PROJECT

No bids received

THE DALLES-CALIFORNIA HIGHWAY NEAR CHILOQUIN IN KLAMATH COUNTY
CONSTRUCT TWO CONCRETE BRIDGES

Angelo A. Doveri, Klamath Falls	$ 49,960.50
Lockyear & White, Seattle, Wn.	59,151.00
R. A. Heintz Construction Co., Portland	65,540.00

PACIFIC HIGHWAY IN LANE COUNTY
JUDKINS POINT-SPRINGFIELD JUNCTION SECTION

Porter W. Yett, Portland	$ 117,930.00
Warren Northwest, Inc., Portland	119,488.00

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
ONEONTA BORROW PIT EXCAVATING AND SHAPING PROJECT

White Bros. Co., Walla Walla	$ 93,600.00

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
CONSTRUCT CONCRETE BRIDGE OVER O.W.R.R.
& N. CO. TRACKS AT BRIDAL VEIL

No bids received

WARM SPRINGS HIGHWAY IN WASCO COUNTY
CONSTRUCT 300 FT. STEEL ARCH SPAN BRIDGE WITH
120 FT. STEEL VIADUCT APPROACH AT EACH END OVER MILL CREEK

Kern & Kibbe, Portland $ 274,767.00

Chairman Banfield presented a telegram from the Highway Committee of the Eugene Chamber of Commerce advising that the Eugene Planning Commission, on February 5, authorized a spot zoning change on Franklin Boulevard (U.S. 99) at the point where southbound highway traffic enters the rock cut at Judkins Point, to accommodate an all-day-and-night drive-in eating place, and urging the Commission to protest such change in order to avoid a potential traffic hazard. The Commission approved the request and instructed the Engineer to direct a strong letter to the City Council giving reasons why the Commission is opposed to such spot zone changes.

The Commission discussed the advisability of revising the Postwar Program by advancing construction of some of the projects scheduled for the second and third postwar years in view of the few bids received at this letting. Chairman Banfield pointed out that under the present setup the Engineer is authorized to make minor adjustments in the program, but the authority does not extend to major adjustments, which appear to be necessary. The Engineer advised that nearly all of the work scheduled for construction in the first postwar year has been contracted. He suggested advancement of projects in the second and third postwar years with deferment of some of those scheduled for earlier undertaking. He pointed out that any adjustment that is made would have to be approved by the Public Roads Administration before it could be put into effect. Mr. W. H. Lynch, Division Engineer, Public Roads Administration, who was present, stated that such an adjustment appeared to him to be satisfactory. In view of existing conditions, the Commission, by unanimous vote, instructed the Engineer to prepare a revised program in accordance with his suggestion and submit the same for its approval.

A delegation from Roseburg, consisting of Mr. Percy Croft, President of the City Council, and Mr. George Frew, Street Superintendent, was present regarding the city's request for state aid in maintenance of certain city streets that are being used by log haulers. Mr. Croft advised that the city has been informed it does not qualify for state aid under the Commission's special program because the present-day population of Roseburg is more than 5,000. He asked the Commission to reconsider the matter because the city is without funds to properly maintain these streets, which are being severely damaged by the log-hauling traffic. He particularly mentioned Winchester Avenue, repairs to which are estimated to cost about $7,000. Chairman Banfield explained the Commission's policy, advising that the Commission budgeted a certain amount of money to help the small cities and towns whose streets were being damaged by log hauling and that it was not intended to extend such aid to cities having a population in excess of 5,000, so Roseburg is entirely out of the picture. The Engineer suggested the

possibility of securing aid under the Federal Secondary Highway Program, particularly monies that are to be spent within cities having a population less than 5,000. He was instructed by the Commission to look into the matter and to ascertain what, if anything, could be done for the city in that respect and report back to the Commission.

The Commission discussed the untimely death of Mr. C. B. McCullough, Assistant State Highway Engineer. Commissioner Chessman suggested that it would be fitting for the Commission to send to Mrs. McCullough and to her son, an expression of sympathy. Upon motion of Commissioner Chessman the following resolution noting his death was adopted by the Commission by unanimous vote:

> WHEREAS, years of association, comradeship and cooperation in public work with C. B. McCullough, as a member of the Oregon State Highway Department, brought experiences, cemented friendships and developed memories which have become a part of all who were privileged to share his genial presence and companionship; and
>
> WHEREAS, Mr. McCullough, Mac to all of us, invested in the road-building program of the State and the Nation a brilliance of intellect, a wealth of information, and a genius of design and accomplishment, the fruits of which will be the heritage of the State and the Nation long after we, who think these thoughts, have left the field; and
>
> WHEREAS, his death is a loss to the entire Department, to the State, and to the Nation, and is a keen sorrow and bereavement to all who knew and served with him;
>
> THEREFORE, BE IT RESOLVED BY THIS COMMISSION, that we recognize and commend the very outstanding professional ability, work and accomplishments of C. B. McCullough as an engineer and builder; that we, in this simple but sincere way, express the gratitude of the citizenry of the State of Oregon for the generous and priceless contribution made by him to the development of the State as a whole and to the purposes and plans of the Highway Department in particular, and that we pledge earnest purpose and effort toward the preservation and perpetuation of his professional and personal investment in the State's development; and that we express to Mrs. McCullough, his wife, and to John, his son, in their loss, a sympathy that is real.
>
> That this resolution be fittingly embossed, signed by the Commission, and presented to Mrs. McCullough and John.

The Secretary was instructed to deliver an embossed copy of the resolution to Mrs. McCullough and her son.

A delegation from The Dalles representing Dalles City, The Dalles Port Commission, and Wasco County, came before the Commission regarding the establishment of state-owned ferry service across the Columbia River at The

Dalles. County Judge J. B. Kirk headed the group, which also included County Commissioners J. O. Swartz and O. R. Fleming; County Engineer Chris Fauerso; Hon. George P. Stadleman, Mayor of The Dalles; and Ray F. Kelley, President of the Port Commission. Mr. C. T. Smith, owner of the present ferry, and his son Esson Smith were also present and entered into the discussion. Judge Kirk asked the Commission to make investigations as may be necessary with the view in mind of establishing a state-owned ferry at this place. He advised that the present ferry service is inadequate to take care of the volume of traffic that crosses the river at this point, and he exhibited pictures and gave statistics in support of his contentions. He particularly mentioned the approach to the ferry on the Oregon side of the river, which, he said, is conducive to accidents and should be remedied. He assured the Commission that the objections to the ferry service now rendered are in no way a personal matter with the members of the delegation, and they do not wish to say anything derogatory against the present owners, but traffic conditions are such that an improvement in the service is imperative and justified. Mr. Kelley endorsed the remarks of Judge Kirk and added that the ultimate solution, of course, is the construction of the bridge. He mentioned the long waits the traffic is required to make under present operating conditions, and particularly that the condition will be greatly aggravated as the traffic increases, as indications are that it will.

Chairman Banfield advised that the Highway Commission favors the construction of a bridge at some location above The Dalles rather than the ferry operation at The Dalles. He explained briefly the basis of the state's taking over the ferry at Astoria, pointing out that the State of Washington is unwilling to assume an obligation with respect to such an operation, and the reason the State of Oregon was able to assume it was because of the cooperation offered by Pacific County, Washington, which provided the landing facilities on the Washington side of the river; moreover, the Commission was able to purchase the ferry company's facilities at a reasonable price. The situation at The Dalles, he said, is somewhat different in that the owner of the ferry facilities at this place does not care to sell and the Highway Commission does not wish to be placed in the position of forcing him to do so and of putting him out of business. He gave as his understanding that the present operator is now operating under a franchise, and suggested, in view thereof, that Dalles City now has the authority and the power to remedy conditions if they are not satisfactory. Commissioner Chessman gave further information concerning the ferry operation at Astoria. The Commission's Chief Counsel cited the law which authorizes the state, the county, or the city to operate ferry services, either alone or in cooperation with each other. Following further discussion, Commissioner Chessman moved that the matter be referred to the Engineer and the Chief Counsel for investigation and report back to the Commission what can be done about it. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

Mr. C. T. Smith, owner of the present ferry at The Dalles, appeared at this juncture and entered into the discussion. He refuted the arguments presented by the other speakers that the present ferry service is inadequate. He alleged that The Dalles ferry is the best one on the Columbia River and

that he has on hand at all times an extra ferry boat which is available for use whenever traffic conditions require it. He was informed by Chairman Banfield that the Commission has asked the Engineer and the Chief Counsel to investigate and report the conditions.

The Recreational Resources Committee of the Portland Chamber of Commerce headed by Mr. Arthur Kirkham, Chairman, and including Alfred Loeb, Marshall Dana, and David Charlton, came before the Commission regarding the beautification of highway roadsides. Mr. Kirkham read aloud and presented a letter from the Western Forestry and Conservation Association concerning this subject and advised that the suggestions and recommendations contained therein coincide exactly with the policy of their Committee. He stressed the recommendation of the Association with respect to the preservation of timbered roadsides, which involves the securing of cooperation from the owners of standing timber through which highways are routed, and urged the Commission to take action accordingly. Following discussion, the Commission referred the matter to the Engineer with instructions to direct a letter to all companies that own timber standing adjacent to state highways requesting their cooperation in the preservation of timber strips consistent with the economics of better forest management.

Messrs. Ralph Cake, Ross B. Hammond, Bill Hammond, and Harry Freeman, all of Portland, constituted a delegation representing Commonwealth Inc., of Portland, which came before the Commission regarding the construction of a traffic interchange structure on the Sunset Highway at its intersection with Barnes Road, a short distance west of Portland. The Engineer exhibited a map showing the location of the proposed structure and explained details thereof. He advised that Commonwealth Inc. is developing a large residential district, including the construction of medium-priced homes, paved streets, water, light, and sewer systems on both sides of the Sunset Highway, at this place and that it plans to centralize stores and other business institutions in a small area near the above-mentioned intersection. In order to avoid numerous crossings of the highway, he said, the company plans to provide this one crossing only and has asked the state to join with the company in the cost of the improvement. He pointed out that the project involves the acquisition of additional right of way, which will be furnished by the company without cost to the state, insofar as the company owns the land. He estimated the extra cost to the state to provide this facility at $114,000. He suggested approval of the project and that the contract for the same be let some time this fall so that it can be built in 1947. The matter was discussed at some length, but action thereon was deferred until a later meeting, Chairman Banfield explaining that this is an entirely new matter to the Commission which must have time to study it before making its decision.

The Commission recessed for luncheon at 11:45 a.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The matter of insurance coverage on the Astoria ferry properties and ferry operations was again considered by the Commission on the report of the Engineer and the Chief Counsel, to whom the matter had previously been referred by the Commission. The Engineer advised that a conference with a number

of insurance men was held on the previous evening, the Commission's Chief Counsel, the Assistant Maintenance Engineer, Mr. H. W. Stiffler, and himself representing the Commission. The ferry contractor was also represented. The Chief Counsel explained the results of the conference, stating that two plans were considered with respect to placing the insurance, one of which provides that each party shall arrange for and carry separate policies, and the other provides for a joint policy, or policies, by which each party would share in the protection and the costs and each also would participate in the savings which will accrue if joint, rather than separate, policies are taken. The Engineer stated that under the joint-policy arrangement a saving of $780 in premiums can be realized, of which amount $550 would be credited to the state and $230 to the contractor. He recommended adoption of the joint-policy plan. The Chief Counsel concurred therein. The Commission, after due consideration, approved the recommendation by unanimous vote.

Another item of insurance considered by the Commission was coverage which the company, pursuant to its contract with the state, is required to carry. The Chief Counsel explained that under such insurance full coverage is required; however, it was represented for the company that a saving in premiums could be made if the policy contains a $50-deductable clause. The company agrees, he said, to protect the state against any loss and to reimburse the state for each $50 expenditure if permitted to take advantage of the deductable-clause policy. He recommended approval of the policy with the deductable clause under such condition. The Commission approved the recommendation unanimously.

In the further discussion of this matter Chairman Banfield pointed out that it is the desire of the Commission to obtain full insurance coverage for everything or anything that could possibly happen with respect to the ferry facilities and operation, and, if the insurance plan as outlined, provides for such full coverage, it is acceptable; on the other hand, if full coverage is not provided in the plan as outlined, then the additional insurance shall be purchased, the premium for the same to be paid by the state if it is not an obligation of the ferry contractor. Commissioners Schaupp and Chessman concurred, and it was so ordered.

Mr. T. G. Montgomery, Baker, was present and asked the Commission to construct a cattle pass under the Baker-Homestead Highway about 17 miles east of Baker for use by himself and his neighbor, a Mr. Ritter. He advised that the improvement of the highway at this point is now under contract, and, according to his understanding, the right of way is to be fenced so stock cannot be driven across the roadway; moreover, stock should not be allowed to cross the highway because of the hazard they create for highway traffic. He said that it is essential in this instance that cattle cross the highway in some manner for watering purposes. The Engineer suggested that a well could be driven to provide water for the cattle. He estimated that such a well would cost approximately $600 compared with $3,000, the estimated cost of the cattle pass. He recalled that at no time in the past has any Highway Commission authorized expenditure of state funds for private cattle passes except as a right of way consideration or to eliminate greater expense. Mr. Montgomery agreed that a well probably would serve the purpose. Following discussion of the matter the Commission decided unanimously not to construct

the cattle pass; however, Mr. Montgomery was informed that a permit would be granted him to construct his own cattle pass should he so desire and will provide a structure that meets with the approval of the State Highway Engineer. Mr. Montgomery requested the Commission's answer in writing. The Secretary was instructed to send Mr. Montgomery a letter advising him of the action taken.

The Commission reconsidered a request from the Tillamook Chamber of Commerce for construction of a cattle pass across the Oregon Coast Highway near Pleasant Valley. For reasons similar to those given to Mr. Montgomery, the Commission denied the request and instructed the Secretary to so inform the Chamber of Commerce, giving reasons for the action.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work and by unanimous vote took the following action thereon:

The Commission awarded the following contracts to the low bidder in each instance:

Grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway, Baker County.

Ashland-State Line Rock Production Project on the Pacific Highway, Jackson County.

Grading and paving the Judkins Point-Springfield Junction Section of the Pacific Highway, in Lane County.

Oneonta Borrow Pit excavating and shaping project on the Columbia River Highway, Multnomah County.

The bids received for the following projects were referred to the Engineer with authority to award the contracts to the low bidder in each instance when certain conditions have been satisfied:

Construction of two concrete bridges on The Dalles-California Highway near Chiloquin, Klamath County.

Construction of a steel arch span bridge over Mill Creek on the Warm Springs Highway, in Wasco County.

No bids were received by the Commission for the remaining projects advertised.

At 2:30 p.m. Chairman Banfield publicly announced the contract awards as follows:

"Grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway, Baker County. J. C. Papin, Sandy, submitted the low

bid for this work at $138,255. Leonard & Slate, Portland, submitted the next low bid at $171,525. There were three higher bids. The Commission has awarded the contract to the low bidder, J. C. Papin, at his bid price.

"Ashland-State Line Rock Production Project on the Pacific Highway, Jackson County. M. C. Lininger & Sons, Medford, submitted the only bid for this project in the amount of $24,610. The Commission has accepted the bid and has awarded the contract on that basis.

"Robertson Bridge-Hayes Hill-Shattuck Corner Oiling and Rock Production Project on the Rogue River Loop and Redwood Highways, Josephine County. The Commission received no bids for this work.

"Construction of two concrete bridges on The Dalles-California Highway near Chiloquin, Klamath County. Angelo A. Doveri, Klamath Falls, submitted the low bid for this work at $49,960.50. Lockyear & White, Seattle, submitted the next low bid at $59,151. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Angelo A. Doveri, at his bid price, when certain conditions have been satisfied.

"Grading and paving Judkins Point-Springfield Junction Section of the Pacific Highway, Lane County. The Commission received two bids for this work, the low one being that of Porter W. Yett, Portland, at $117,930. The other bid was submitted by Warren Northwest, Inc., Portland, at $119,488. The Commission has awarded the contract to the low bidder, Porter W. Yett, at his bid price.

"Oneonta Borrow Pit excavating and shaping project on the Columbia River Highway, Multnomah County. White Bros. Company, Walla Walla, Washington, submitted the only bid for this job in the amount of $93,600. The Commission has accepted the offer and has awarded the contract to this Company at its bid price.

"Construction of a concrete bridge over the O.W.R.R. & N.Co. tracks at Bridal Veil on the Columbia River Highway, Multnomah County. The Commission received no bids for this project.

"Construct a steel arch span bridge over Mill Creek on the Warm Springs Highway, in Wasco County. The Commission received one bid for this project, being that of Kern & Kibbe, Portland, at $274,767. The bid has been referred to the Engineer with authority to award the contract to Kern & Kibbe at their bid price when certain conditions have been satisfied."

The Chief Counsel reported difficulties in acquiring six acres of land required for park site purposes adjacent to the Columbia River Highway near Cascade Locks, Multnomah County. He advised that the tract contains a fine stand of timber which is about to be cut and recommended that the

property be acquired through condemnation proceedings. He also recommended an offer of $1,550 in connection therewith. The Commission approved the recommendations and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation, or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road user; and

WHEREAS, in the opinion of the Highway Commission the real property hereinafter described is scenic in character, adjoins other real property owned by the State, and possesses possibilities of development as a scenic and recreational area and likewise affords opportunity for roadside development; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real property and the development of the same will contribute to the convenience, the general welfare, and the enjoyment and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Highway Commission does hereby find and declare that the real property hereinafter described is scenic in character and is suitable for development as a scenic area or viewpoint and for roadside development and recreation.

2. That this Commission does hereby find and declare that the acquisition of the fee title to said real property, free and clear of all interests of every kind and character, is necessary in order to make possible the preservation and development of the same for the convenience of the public and so that said area may be developed and maintained for its scenic value or public view qualities as well as for roadside, park and recreational development, all of which the Commission does find and declare to be for the general welfare and pleasure of the motoring public and road user.

3. That the real property the acquisition, preservation, and development of which the Commission now finds necessary for the purposes heretofore stated is described as follows, to wit:

All of the northeast quarter ($NE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 3, Township 1 North, Range 6 East, W. M., lying south of the Columbia River Highway in Multnomah County, Oregon, containing 6 acres, more or less.

4. That the survey of said area heretofore made by the State Highway Engineer and the description prepared hereby are approved by the Commission and the Commission does hereby order and direct that said description be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, or persons in possession if there be any, with respect to the compensation to be paid for the acquisition of said property and damage to the remaining property, if there be any remaining property, and in the event that the title to said property cannot be acquired by agreement then it is hereby ordered that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

7. That this resolution be entered in the minutes and records of this Commission as of May 16, 1946.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:00 p.m.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Cleaveland
Commissioner

H. B. Keating
Secretary

Commissioner

1946

Portland, Oregon
June 25, 1946

The State Highway Commission met in regular session at 2:00 p.m. in Room 715 (Imperial Room) of the Imperial Hotel for discussion of a construction program to be financed with state funds. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
H. G. Smith, Construction Engineer
H. B. Glaisyer, Secretary

The Engineer presented three exhibits for the Commission's consideration, as follows:

EXHIBIT III

PROPOSED STATE CONSTRUCTION PROGRAM

For Performance During 1946, 1947 and 1948

Including State Rural Projects and State Minicipal Projects

The Engineer explained the exhibits, (see letter directed to the Commission, dated June 18, 1946, ingeneral files, for details) following which the Commission, after careful consideration, tentatively selected a number of projects for the program under discussion, it being understood that final action with respect thereto would be taken on Thursday afternoon, June 27.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the Auditorium of the Public Service Building.

Portland, Oregon
June 26, 1946

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

SANDY BOULEVARD (12th AVE.-44th AVE.) SECTION

Porter W. Yett, Portland	$ 35,735.00
Parker-Schram Co., Portland	36,875.00

The State Parks Superintendent reported on the following matters:

1. Acquisition of O. and C. lands in Douglas County comprising Camas Mountain and Elk Creek Tunnel State Parks: The Parks Superintendent advised that Douglas County is now in position to complete the transfer of title to these properties in accordance with the arrangement approved by the Commission on October 12, 1943, which involves payment to the County by the state of the sum of $5,485. He recommended payment of such sum to Douglas County in order to close the files on the subject. The Commission approved the recommendation unanimously.

2. Request of David H. Parmeter, Depoe Bay, to maintain six telescopes along the parapet wall at Depoe Bay: The Parks Superintendent recommended denial of this request because of the traffic congestion that would result. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

In this connection the Engineer advised that another problem at this place is the parking of automobiles on the Depoe Bay Bridge. He requested authority to post "no parking" signs on this bridge. The Commission approved the request unanimously.

The Engineer also reported a request from a firm known as "Tradewinds Trollers", Depoe Bay, to operate a small-boat ticket booth on the right of way of the Oregon Coast Highway at the northeast corner of this bridge involving removal of a section of the handrail and the construction of a platform on which to place the booth. He recommended denial of this request. The Commission approved the recommendation.

3. Proposal of the citizens of Waldport for the establishment of a state park adjacent to the Oregon Coast Highway about two miles north of Waldport: The Parks Superintendent advised that the proposal is that the state purchase this property, which contains 33 acres of land and is estimated to cost $15,000. He recommended against the purchase of this property because the cost is exorbitant. The Commission approved the recommendation.

4. Acquisition of a six-acre tract fronting on the Columbia River Highway and Ainsworth Park, Multnomah County: The Chief Counsel reported on this matter at the request of the State Parks Superintendent. He

advised that the property lies between Ainsworth Park and the highway and contains a fine stand of timber which was about to be cut, but arrangements have now been made to defer the cutting for the time being. He pointed out that because of the urgency of the matter the Commission at the previous meeting authorized condemnation of the property and an offer of $1,550 in connection with the proceedings. It now appears that the land and the timber must be acquired separately. In order to determine the price of the timber, he said, arrangements have been made for a joint cruise, the results of which will be reported to the Commission when completed. The Commission approved the action taken to date but ordered that hereafter matters of this kind be presented to the Commission at the same time the Commission considers acquisition of adjacent right of way or park areas, as the case may be, in order to avoid placing the Commission in a position of having to rush into action, which might prove costly and embarrassing. The Chief Counsel was instructed to continue negotiations for the purchase of the property under discussion and to report back to the Commission.

5. Scheduled meeting of the National Conference of State Parks: The Parks Superintendent advised that the National Conference of State Parks this year is to be held on the west coast and includes an inspection of state parks, According to the itinerary, he said, the parks of the State of California will be inspected first, and the group will then move on into the State of Oregon, spending three days here--September 29 and 30 and October 1, 1946--with a final meeting to be held in Seaside on October 1. The Commission took no action in the matter.

6. Charge for use of bath-house facilities at Honeyman State Park: The Parks Superintendent advised that prior to the war a charge of five cents for children and ten cents for adults was made for the use of these facilities, which partially paid for the employment of a lifeguard and two attendants for three months during the summer season. He suggested that, under the present conditions, the charge should be raised to ten cents and twenty cents, respectively. The Commission approved the suggestion by unanimous vote and so ordered.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of the properties, together with the offers that he recommended in connection with each parcel. After careful consideration, the Commission approved the request and the offers and thereupon adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

This property has been under lease, and as it is available for purchase, and will serve needs for years.

The Assistant Counsel brought up for discussion the settlement with Mr. R. B. Hadley, a house-moving contractor, concerning the moving of a building on property acquired from Mr. Stephen Sabo in connection with right of way acquisition at Klamath Falls. It appears that Mr. Hadley's offer for the moving did not include certain concrete work which is now required and which is estimated to cost $400; also, that Mr. Hadley is willing to assume payment of half of this expense and is asking the state to contribute the sum of $200 as its share. The Assistant Counsel recommended approval of such expenditure. The Commission approved the recommendation unanimously.

The Assistant Counsel reported an error in the evaluation of land that is needed as right of way for the Marks Creek-Summit Section of the Ochoco Highway across property owned by Raymond Calavan and E. H. Kelly. He advised that, because a satisfactory settlement could not be reached by negotiation for the acquisition of this property, the Commission previously authorized condemnation and an offer of $2,500 in connection therewith. Since then, he said, he personally has inspected the property and finds that a mistake was made, and, in his estimation, the property is worth considerably more than was first reported, the present appraised value being $4,537.30. He recommended that the offer previously used in the condemnation proceedings be increased to $4,500. Following discussion and careful consideration of the premises, the Commission approved the recommendation by unanimous vote.

In this connection the Engineer brought up the matter of acquiring rights of access in connection with right-of-way acquisitions. He recalled that the Commission, some time ago, authorized the purchase of rights of access along certain highways. It was his thought that the same procedure should be followed in connection with additional highways, and he so recommended. He was instructed by the Commission to report on this matter at the next meeting with full information, which is to include a map showing the highways where rights of access should be acquired and a copy of the previous resolution.

Chairman Banfield brought up the question of right of way widths. The Engineer was instructed to give this matter careful consideration hereafter in the preparation of plans for projects so there will be no need to negotiate additional right of way when right of way for a project has been acquired.

The Assistant Counsel requested instructions regarding settlement with a Mr. E. S. Dickson for right of way needed for the Little Luckiamute-

Monmouth Section of the Bridgeport-Monmouth Secondary Highway, Polk County. He advised that Mr. Dickson originally agreed to sell the property for $88 but that he now refuses to sign a deed conveying the property to the state because he alleges that his property was damaged by operations of the contractor; moreover, he is demanding construction of a driveway and compensation for a number of other small items. Mr. Dickson, he said, has stated a willingness to sign the deed and to waive all claims if he is paid the sum of $200. The Commission authorized the payment of such sum as settlement in full for the land and all claims.

The Assistant Counsel also requested instructions relative to payment of damages to Mr. D. E. Turnidge, contract purchaser from Mr. Dale Eisenman, for the loss of crop on property that was leased from him as right of way for a hauling road in connection with the construction of the Pacific Highway East on the revised alignment between the Santiam River and Albany. He explained that an option was secured from Mr. Turnidge for $50 to use his property for this purpose, but later it was found that the property was not needed so the hauling road was not used. In the meantime Mr. Turnidge lost the use of the property for crop purposes and feels that he has been damaged to the extent of $25. The Assistant Counsel recommended settlement with Mr. Turnidge on such basis. The Commission approved the recommendation unanimously.

The Assistant Counsel reported a request from County Judge Louis D. Felsheim, Coos County, that a small portion of a state-owned quarry situate in the SW¼ of Sec. 25, T. 28 S, R. 15 W, W.M., near Bandon, be deeded to a Mr. O. H. Haga, Myrtle Point, in order to clear up a property discrepancy. It appears that through an error a home which Judge Felsheim has purchased is partly on state land and also partly on land belonging to Mr. Haga and in order to straighten out the ownerships it will be necessary for Mr. Haga to secure title to a small portion of the state's property, consisting of 0.127 acre. The Assistant Counsel advised that the property is no longer of value for state purposes because the supply of materials has been exhausted; also, that Mr. Haga is willing to pay $200 for the small parcel that he needs, which is at the rate the state paid for it. He recommended acceptance of this offer. The Engineer concurred therein. The Commission approved the recommendation by unanimous vote.

The Chief Counsel brought up for discussion the proposed settlement of the case of the State Highway Commission vs. Jordan Valley Irrigation District Malheur County, involving acquisition of right of way for the I.O.N. Highway. He advised that this matter is of long standing and has not been settled heretofore because a bond foreclosure was involved and it was not known to whom the money should be paid. The rightful owners, he said, have now been ascertained and he recommended that the amount of the claim, $2,650.50, be paid into court for distribution. The Commission approved the recommendation unanimously.

The Chief Counsel requested instructions relative to continuing the private insurance coverage on the state park buildings located in Cape Arago State Park. He advised that the buildings previously have been insured for

$25,000 which is considerably under their replacement value; also, that in the event of destruction by fire recovery could not be obtained under the provisions of the State Restoration Fund Act unless the buildings were rebuilt, and it is doubtful that the Commission would approve the expenditure of the money that would be required in such case. He recommended a three-year extension of the present insurance, the premium for which would amount to $325. The Commission agreed with the viewpoint of the Chief Counsel in this matter and thereupon, by unanimous vote, authorized purchase of such insurance upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Engineer brought up for discussion the matter of completing the taking of options for acquiring standard-width right of way for the Oregon Coast Highway between Nelscott and Taft. He advised that there remains only a short section where 80 foot right of way has not been acquired, and in his estimation it would be advisable to complete the purchase now before the property is developed and prices rise. He recommended that the Right of Way Department be authorized to negotiate options. The Commission approved the recommendation unanimously.

The Commission discussed a request from Rev. DeLoss Crook, Pastor of the Church of the Open Bible, Roseburg, for permission to maintain a temporary building on state-owned property adjacent to the Highway Department Division Headquarters in Roseburg. It appears that the Church is building a permanent structure in another location and desires permission to maintain the temporary structure on the state's property for the period of six months pending completion of the permanent building. The Commission approved the request by unanimous vote and ordered that the matter be covered by appropriate agreement.

The Commission discussed the matter of consenting to the vacation of certain streets in Fahrenback's Addition to the City of Baker. The Chief Counsel explained that a Mr. Ben R. Pacatte owns all of the property in Fahrenback's Addition with the exception of that portion which is occupied by the right of way of the Old Oregon Trail; further that the streets in this subdivision have never been opened up, and Mr. Pacatte wishes them vacated so that he may continue his farming operations on the tract. The Engineer advised that there are no objections from the highway standpoint to the vacation of the streets provided the reversionary interest of the state in the streets to be vacated is not affected. Following discussion, the Commission, by unanimous vote, approved, and later signed, a "Consent to Vacation" of said streets subject to the condition that the State will not relinquish any of its reversionary interests. Mr. Pacatte's request for a quitclaim deed conveying to him the state's interest in the vacated streets was denied.

The Commission discussed a resolution from the City of Portland requesting the Commission's concurrence in the off-street parking of automobiles in the area bounded by S. W. Front Avenue, S. W. Harbor Drive, S. W. Salmon Street, and S. W. Main Street, Portland, upon relinquishment by the Navy of its lease of the premises. The Chief Counsel advised that the City of Portland has received a communication from the Navy to the effect that it no longer requires use of the premises and has surrendered possession thereof

to the permitter. In view thereof, the Commission decided to permit the use of the area for off-street parking of automobiles on the same bases that it consented to similar use of other city- state-owned property nearby, and for the same period of time. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the City of Portland, with the approval of the Commission, heretofore made available to the United States Navy for off-street parking purposes a certain area bounded by S. W. Front Avenue, S. W. Harbor Drive, S. W. Salmon Street and S. W. Main Street; and

WHEREAS, it appears that Captain L. D. Whitgrove, representing the United States Navy, has represented to the City Council of the City of Portland that said area is no longer needed by the United States Navy for parking purposes; and

WHEREAS, by resolution No. 22869, adopted by the City Council of the City of Portland on June 6, 1946, it is declared that public welfare will be best served by continuing for the time being said area for off-street parking purposes, and for such purpose the city has adopted said resolution; and

WHEREAS, it is the purpose and plan of the Highway Commission to cooperate with the City of Portland in so far as consistent with the Commission's duties and responsibilities;

NOW, THEREFORE, BE IT RESOLVED BY THE COMMISSION, All members being present and affirmatively voting:

1. That this Commission approves the action of the City Council of the City of Portland in its purpose to continue for off-street parking the area described above for the period ending January 1, 1948, or until the Front Avenue project is fully completed, except for landscaping such area, whichever period is longer.

2. That no access be permitted to Harbor Drive, and that access to Front Avenue be limited to the present entrance on the Salmon Street extension.

3. That a certified copy of this resolution be delivered by mail to Mr. Will E. Gibson, Auditor of the City of Portland.

The Commission thereupon signed a "Special Release" acknowledging satisfactory return of the premises described in the foregoing resolution and discharging the Navy from its obligation under the lease agreement.

The Engineer reported the results of the taking of bids in Salem on June 24, 1946, as follows, for the sale of a church building adjacent to the Sunset Highway at Cedar Mill, Washington County; and for the sale of a resi-

dence building and service station building adjacent to the Pacific Highway East a short distance north of Harrisburg, Linn County:

PURCHASE OF BUILDINGS NORTH OF HARRISBURG

9-Room Frame Building and Wood Shed

Sam Morford, Lebanon	$ 100.00
*Henry B. Crowell, Halsey	100.00

* Bid of Henry B. Crowell of $100.00 is for both the 9-room building and the service station.

Frame Service Station Building, Gasoline Pump and tanks

Wilber Morford, Lebanon	$ 30.00
Stephen C. Morford, Lebanon	25.00
*Henry B. Crowell, Halsey	-----

* Bid of Henry B. Crowell of $100.00 is for both the 9-room building and the service station.

PURCHASE OF CHURCH BUILDING NEAR CEDAR MILL

German Congregational Church of Cedar Mill	$ 150.00
W. A. Thompson, Portland	126.00

He recommended acceptance of the high offer in each instance. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission discussed briefly the recommendation submitted by the Memorials Committee of the Oregon Historical Society relative to the naming of the southern pioneer route to Oregon but deferred a decision thereon until the following day when Mr. A. L. Greenwalt and Mr. Walter Meacham, President and Secretary, respectively, of the Old Oregon Trail Association are to appear before the Commission for discussion of the matter.

The Engineer reported on a petition from residents of Benton County for the abandonment of a stockpile site adjacent to the Corvallis-Newport Highway between Corvallis and Philomath. (For details of report see letter dated June 1, 1946, directed to the Oregon State Highway Commission in general files). The Engineer made the following recommendations with regard thereto:

1. That the Commission retain the stockpile site for the use for which it was purchased.

2. That a laurel hedge be planted around the site as a screen.

3. That the request of the petitioners for removal of the site to another location be denied.

The Commission approved the recommendations unanimously upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Engineer also reported on the condition of the Mt. Hood Highway with reference to log hauling and in this connection read aloud a letter from the maintenance Engineer, Mr. E. A. Collier, who recommended that log hauling on this highway from Wapinitia Junction, M. P. 57.5, to Mt. Hood Lodge, M. P. 81.7, be prohibited as a safety measure and to preserve the road surface for general public use. The Engineer advised that this highway was constructed many years ago as a recreational road and was not intended to carry heavy traffic, such as logging trucks, and unless and until it is considerably reinforced it very likely will go to pieces under the strain of such traffic. He also pointed out that the alignment is very crooked, in some places the sight distance being only 100 feet, and that the paved surface is narrow, varying in width from 14 feet to 17 feet. He presented a letter from the Neal Creek Lumber Company, Hood River, requesting permission to resume log hauling operations on this road which were discontinued last fall on order of the Highway Commission, in which it appears that the Company has a contract with the U. S. Forest Service to market the timber growing along portions of this highway but is unable to complete the contract unless it is allowed to transport logs over the Mt. Hood Highway. The Engineer suggested that the U. S. Forest Service should be informed of the condition of the highway and that it should be requested not to sell any more timber adjacent thereto until the highway has been reconstructed. Commissioner Chessman gave as his thought that the state should not be required to assume the full expense of such reconstruction work and that the Forest Service should be willing to contribute toward such expense, particularly in view of the fact that the Forest Service gets the benefit of revenue derived from sale of the timber. Commissioner Schaupp expressed himself similarly. The Chief Counsel advised the Commission that, inasmuch as the Commission knows the facts in the case, it would not be good discretion on the part of the Commission to issue permits authorizing the truck hauling of logs over this highway. There followed further discussion, and as a result thereof, the Commission voted unanimously, on the basis of the Engineer's report, to prohibit all log hauling on this highway until such time as the highway has been improved to the extent that such operations can be carried on without creating a hazard to the traveling public and damaging the road surface.

The Commission discussed a letter from Porter and Company, Baker, Oregon, and a petition signed by numerous residents of Granite, Oregon, requesting an extension of the Sumpter Secondary Highway from its present terminus at the Town of Sumpter, Baker County, to the Town of Granite, in Grant County; also, requesting the improvement and maintenance of this road in a condition satisfactory for year-round travel. The Engineer advised that to rebuild the road to proper standards would cost approximately $500,000 and that it would cost an additional $10,000 annually to maintain it, exclusive of snow removal operations, which are estimated to cost an additional $10,000 annually.

He pointed out that the existing road is not on proper alignment and recommended that the request be denied because there does not appear to be justification for the expense. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Commission discussed and approved, by unanimous vote, the minutes of the Highway Commission meetings held on April 4 and 5 and on May 15 and 16, 1946, with two corrections.

The Commission recessed for luncheon at 12:00 noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Engineer presented a request from Mrs. D. J. McNeal, Dallas, Oregon, for construction of a cattle pass under the Dolph Corner-Salt Creek Section of the Dallas-Coast Secondary Highway, which is now under construction. The Engineer explained that the plans for this project provide for a concrete box for drainage purposes at this location and that the contractor has already ordered materials for this structure; moreover, settlement for the right of way has been made without any reference whatsoever to a cattle pass, and in addition thereto, it would be impossible to install a cattle pass at this point that could be drained; in fact, it would be about half filled with water most of the year unless the water were pumped out during the time that Mrs. McNeal would want to use it. He recommended in view of the circumstances and as a matter of policy, that Mrs. McNeal's request be denied. The Commission approved the recommendation unanimously.

The Commission considered a request from the Cannon Beach Commercial Club for sidewalk construction along the present route of the Oregon Coast Highway in Cannon Beach, The Engineer advised that a similar request was presented to the Commission at its meeting on June 19, 1944, and was denied by the Commission as a matter of policy. He explained, however, that investigation reveals that it would cost about $23,000 to do the work, which consists of about two miles of oil mat sidewalk four feet wide. He recommended that the request be denied because conditions have not changed since the Commission first acted on the matter. The Commission approved the recommendation unanimously on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Engineer requested authority to make a survey of the Empire-Coos Bay Secondary Highway (Central Avenue, Coos Bay) with a view to widening this street as an accident prevention measure. He explained that this street carries considerable volume of traffic and at its intersection with 10th Street numerous accidents have occurred, which prompted the City Council to erect signs requiring traffic to come to a stop before entering this intersection from each direction; however, the signs were declared illegal and have been removed. It was his thought that the widening of Central Avenue would solve the problem, and he requested authority to make a survey to determine the cost of such an improvement. He estimated that the survey would cost about $1,000. The Commission authorized a reconnaissance survey costing about $200. The city is to be informed that the Commission looks with favor on the project if it does not prove too costly.

The Engineer reported that the cities of Gold Hill, Nehalem, and Sutherlin have fulfilled the requirements with respect to the expenditure of

State Tax Street Funds received by them in 1945 from 1944 State Highway revenues and that the plans for the improvements contemplated for such funds have been examined and found satisfactory. He recommended, in view of the circumstances, approval of such plans by the Highway Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Gold Hill	$749.19
Nehalem	345.24
Sutherlin	733.82

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Gold Hill - 5th Avenue North, 1st Street West, 4th Avenue North, 7th Street West, 6th Avenue North

Nehalem - Tohls Avenue, "I" Street, 9th Street

Sutherlin - Fifth Avenue, Sixth Avenue, Ash Street, Pine Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Gold Hill and approved by the State Highway Commission on August 31, 1945, shall be canceled, in accordance with the request of the City of Gold Hill on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 26th day of June, 1946.

The Engineer also reported that the following cities and towns have met the requirements with respect to the expenditure of State Tax Street Funds that they received in 1946 from 1945 State Highway Revenues:

Bay City	Harrisburg	Nehalem	Scio
Butte Falls	John Day	North Powder	Stanfield
Corvallis	Merrill	Philomath	Sublimity
Gold Hill	Monroe	Sandy	Willamina

He advised that the plans submitted by the several cities and towns covering the work contemplated under their programs for the funds available have been examined and found satisfactory. He recommended approval of the [redacted] by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Bay City	$ 569.26
Butte Falls	509.18
Corvallis	12,604.87
Gold Hill	805.08
Harrisburg	934.25
John Day	1,063.42
Merrill	973.30
Monroe	467.12

(Con't)

JUN 26 1946

(Con't)

Nehalem	$ 371.00
North Powder	564.76
Philomath	1,315.76
Sandy	991.33
Scio	527.21
Stanfield	850.14
Sublimity	420.56
Willamina	1,130.78

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Bay City - Salmon Avenue, Spruce Avenue, McCoy Avenue, Tillamook Avenue, Union Avenue, Seattle Avenue, Portland Avenue, "D" Avenue, "A" Avenue, Trade Avenue, Main Avenue, Pacific Avenue, Ocean Avenue, 15th Street, Warren Street, Hare Street, 9th Street 6th Street, 4th Street 2nd Street

Butte Falls - Laurel Street, Oak Street, Fir Street, Cedar Street, Fee Street, Pine Street; and four alley crossings between Fee and Broad Streets on Cedar Avenue, Fir Avenue, Oak Avenue; and between Fee and Buff Streets on Fir Avenue

Corvallis - 15th Street (Bridge over Marys River)

Gold Hill - 1st Street West, 5th Avenue North, 6th Avenue North, 4th Avenue North, 7th Street West

Harrisburg - 4th Street, Territorial Street, Extension of 5th Street, also building new street

John Day - Grace Street, Canyon Street, 2nd Street, old John Day Highway, Maple Street, Hillcrest Avenue, North Canyon Street, also maintenance of present oiled streets

Merrill - Third Street, Clay Street

Monroe - Railroad Street, Main Street, Howard Street, Commercial Street

(Con't)

(Con't)

Nehalem - Tohls Avenue, 9th Street, "I" Street

North Powder - "G" Street

Philomath - "F" Street, "G" Street, "H" Street, "I" Street, College Street, also any other street for which funds are available

Sandy - Hood Avenue, Pleasant Avenue, Strauss Street, Cherry Street

Scio - Main Street, North Street, West Street, Smith Street, Wheeler Street, Mill Street

Stanfield - Barbara Street, Taft Avenue, Page Avenue

Sublimity - Broadway Street beginning at Main Street and extending to city limits

Willamina - Laurel Street, Cherry Avenue, James Street, Branson Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds tc them apportioned.

4. That Resolution Form 3 adopted by the City of Scio and approved by the State Highway Commission on May 15, 1946, shall be canceled, in accordance with the request of the City of Scio on file in the records of the Oregon State Highway Department, and Resolution Form 3 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 26th day of June, 1946.

---

26 1946

A letter was presented from White Bros. Company, to whom the Commission, on May 16, 1946, awarded the contract for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, Multnomah County, expressing their refusal to accept the award of the contract and requesting the return of their proposal bond. The Engineer advised that the contract as prepared called for the furnishing of a certain amount of insurance as protection to the railroad, but subsequent thereto, the railroad company demanded an additional $50,000 insurance, which would cost the sum of $2,300. The railroad company later withdrew its request for the extra insurance, he said, but in the meantime the contractor reinspected the project in company with an agent of his bonding company and, as a result thereof, decided that he did not wish to perform the work. The Engineer also pointed out that, as a result of the contractor's letter, the project was readvertised for bids to be received at this meeting. He recommended that the Commission refuse to release the contractor from his obligation and that the Chief Counsel be authorized to proceed under the law to collect on the contractor's bid bond, it being his thought that such procedure is fully justified in view of the fact that the contractor was advised fully of the requirements before he entered his bid. The Chief Counsel concurred in the recommendation. Following discussion, the Commission approved the recommendation unanimously and instructed the Chief Counsel to collect the amount of the bid bond. He was also instructed to demand the return of the contract forms previously sent to the contractor for execution.

A letter was presented from contractor C. J. Eldon requesting cancellation of his contract for construction of the McKay Creek Bridge on the Sunset Highway, in Washington County, Contract No. 2773, because of his inability to secure necessary materials. The Engineer advised that he has rendered Mr. Eldon considerable help in securing materials; in fact, provision has been made for all materials except nails, which he has reason to believe will be provided shortly. It was his thought that Mr. Eldon's request should be denied and that he should be required to complete the work in conformity with the contract provisions. Commissioner Schaupp moved adoption of the Engineer's recommendation. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he awarded to Angelo Doveri, Klamath Falls, on May 31, 1945, the contract for the construction of two concrete bridges on The Dalles-California Highway near Chiloquin, Klamath County, bids for which were received by the Commission on May 16, the conditions of the award having been satisfied. The Commission approved the award of this contract as reported, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

A request was presented from the City of Milwaukie for state aid in the maintenance of city streets that are being damaged by log hauling operations. The Chief Counsel read aloud a letter from the Milwaukie City Manager on this subject in which he states that the present-day population of this city is 5,146; also, in which he advised that the city intended to adopt

an ordinance closing certain city streets to log hauling traffic but was precluded from doing so by reason of a court decision covering a similar matter in the City of Hillsboro. The Engineer advised that it would not be possible to do the work requested without handicapping other state work because of a lack of time, materials, and equipment. It was the thought of Chairman Banfield that the Highway Commission should do everything possible to help the cities protect the money that they receive from the state; moreover, such information should be conveyed to the cities. The Commission took no definite action in this matter except to authorize the Engineer to make an investigation in the City of Milwaukie to see what might be done to help the city in this matter.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Skelton and Wiecks, Contract No. 2707, for rock production on the Elsie-Sunset Camp-Vernonia Section of four state highways, in Clatsop, Tillamook, Columbia, and Washington Counties, requested an additional extension of time of 20 days, from April 10 to April 30, 1946, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to labor difficulties. The Engineer pointed out that this contract was originally awarded to F. H. McEwen and Jed Wilson but was later assigned to Skelton and Wiecks, who have carried the work to completion. He advised that the reason given by the contractor for overrunning the time limit is correct; moreover, the state has incurred no extra expense for engineering supervision because of the extra time taken to complete the job. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Rogers Construction Co., Contract No. 2721, for rock production on the Chemult and Beaver Marsh Sections of The Dalles-California and East Diamond Lake Highways, requested an additional extension of time of 90 days, from April 15 to July 15, 1946 within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to adverse weather conditions, during which period it was impossible to operate their plant. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct, and he recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Lindstrom Bros., Contract No. 2736, for construction of the Jefferson Junction Overcrossing on the Pacific Highway East, in Linn County, requested an additional extension of time of 45 days within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to inability to purchase materials for painting the handrails. The Engineer advised that the contract provided that the job should be completed by March 31, 1946; however, additional time was needed and the Commission extended it to May 15, 1946.

He said all the work, with the exception of painting the handrail, was completed within the extended time limit, but there has been considerable delay in securing paint for the painting work. He recommended, in view of the circumstances, that an additional extension of time to June 15, 1946, be granted the contractor without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. R. Maginis, Contract No. 2749, for clearing the Circle Bridge-Hug Point Section of the Oregon Coast Highway, Clatsop County, requested an extension of time of 92 days, from June 30 to September 30, 1946, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: Excessive and continuous rainfall during the past winter retarded clearing operations and prevented the burning of debris; a sudden change in the weather to hot and dry necessitated the Governor proclaiming an emergency fire season, during which time all burning was suspended and since then the burning has been permitted only in a limited and restricted manner, with the result that this part of the work proceeded much more slowly than was planned. The Engineer advised that the clearing operations are along a section of entirely new highway so the state has not been inconvenienced by the contractor's delay in completing the project. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2707, 2753, 2754, 2764, 2733, and 2736 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2707, with T. F. Skelton and H. H. Wiecks, for furnishing crushed rock in stockpiles on the Elsie-Sunset Camp-Vernonia Section of various state highways in Clatsop, Columbia, Tillamook and Washington Counties; completed April 30, 1946.

Contract No. 2753, with Del R. Beebe, for furnishing crushed material in stockpiles on the Greenleaf Creek-Long Tom River Section of the Siuslaw Highway in Lane County; completed April 22, 1946.

(Con't)

(Con't)

Contract No. 2754, with Leonard & Slate Oreg. Ltd., for grading on the Troutdale-Wahkeena Creek Section of the Columbia River Highway in Multnomah County; completed May 15, 1946.

Contract No. 2764, with R. A. Heintz Construction, for grading and topping on the Jefferson County Line-Lytle Creek Section of the Madras-Prineville Secondary Highway in Crook County; completed June 14, 1946.

Contract No. 2733, with Watson and Morris, contractors, for painting of the Yaquina Bay Bridge on the Oregon Coast Highway in Lincoln County; completed May 22, 1946.

Contract No. 2736, with Lindstrom Brothers, contractors, for work on the Jefferson Junction Overcrossing on the Pacific Highway East in Linn County; completed June 15, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer requested instructions relative to renewing the State Highway Department's subscription to the Highway Research Correlation Service for the fiscal year ending June 30, 1947, amounting to $1,275, sixty per cent of which, he advised, is reimbursable with Federal funds. He recommended continuation of the project in view of its value to the State Highway Department and to the State of Oregon. The Commission approved the recommendation by unanimous vote on motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

A letter was presented from Mr. Claud Huston requesting permission to construct cattle guards at three different locations on the Heppner-Spray Secondary Highway, viz: M. P. 11.8, M. P. 12.6, and M. P. 14.1, so as to prevent stock from entering his land from adjacent open and private ranges and also to prevent his stock from drifting onto the range belonging to his neighbor, a Mr. W. W. Bechdolt. The Engineer advised that the highway is rock-surfaced along the section where Mr. Huston desires to install the cattle guards, so it would be necessary that they be constructed of timber, which would be difficult to maintain and might be the cause of accidents occurring if stock were trapped. Painted guards, he said, have worked satisfactorily in other locations but could not be used at the points under discussion because the road surface is not oiled. He recommended against the installation, notwithstanding that Mr. Huston has agreed to pay for the guards at his own expense. The Chief Counsel advised that, if it so happened that stock were

caught at the guards and an accident occurred, the responsibility would rest upon the state, it being the general ruling that where the Highway Commission undertakes to maintain a facility, then the Commission must assume the responsibility for the same and the liability in case of accidents. He also said that the Commission is not legally obligated to approve the construction of the guards. Commissioner Schaupp expressed a desire to help out a situation of this kind, if possible, without causing a hazard to the traveling public, the Commission's first concern being for the traveling public; but, he added, he would not be in favor of denying such things arbitrarily. He moved denial of the request in this particular instance. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission; however, the Engineer was instructed to study the matter and to ascertain whether or not there is some way to work out solutions for problems of this kind.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

Contract for the Unity Junction-Hill Gulch Section of the Baker-Unity Highway, in Baker County, was awarded to Rogers Construction Co., Portland, the low bidder, at $266,465. The Contract for the Unity Junction-Ironside Section of the John Day Highway, in Baker and Malheur Counties, was awarded to Rogers Construction Co., Portland, the low bidder, at $309,605.

The Commission referred to the Engineer the bids received for the construction of the Prineville Railway Undercrossing Section of the Madras-Prineville Highway, in Crook County, with authority to award the contract to the low bidder, John A. Logan, when certain conditions have been satisfied.

Contract for the Robertson Bridge-Hayes Hill-Shattuck Corner Oiling and Rock Production Project on the Rogue River Loop and Redwood Highways, in Josephine County, was awarded to the low bidder, J. S. Risley, Milwaukie, at $46,969. The Commission referred to the Engineer the bids received for construction of the Woodburn Section of the Pacific Highway East and Hillsboro-Woodburn Highways, in Marion County, with authority to award the contract to the low bidder, Warren Northwest, Inc., Portland, when certain conditions have been satisfied.

The Commission rejected all bids received for the following projects: Front Avenue (Alder Street-Sheridan Street) Section of the Pacific Highway West, in Multnomah County, furnishing and placing topsoil cover material; construction of a hydraulic-placed roadbed embankment on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County; and pavement resurfacing on the Sandy Boulevard (12th Avenue-44th Avenue) Section of the Columbia River Highway, Portland, Multnomah County.

In connection with the pavement resurfacing project on the Sandy Boulevard Section of the Columbia River Highway, the Engineer requested authority to consult with the City of Portland to ascertain whether or not it

would be possible to secure material from the city to do this job with state forces and to ascertain the cost thereof. He anticipated that the work could be done cheaper in this manner than by contract, although it would be necessary to rent a spreader in connection therewith. He was authorized by the Commission to investigate the matter and report back to the Commission. In the event the arrangement is approved, the matter is to be covered by written agreement.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Unity Junction-Mill Gulch Section of the Baker-Unity Highway, Baker County. The low bidder for this project was Rogers Construction Co., Portland, at $266,465. The next low bidder was Newport, Kern & Kibbe, Portland, at $307,233. There were three higher bidders. Both low bidders stated that they would not accept the award of this contract unless also awarded the contract for the surfacing and oiling of the Unity Junction-Ironside Section of the John Day Highway, in Baker and Malheur Counties. Rogers Construction Co., Portland, also submitted a satisfactory low bid for this latter-mentioned project, in view of which the Commission has awarded to this Company the contract for the improvement of the Unity Junction-Mill Gulch Section.

"Unity Junction-Ironside Section of the John Day Highway, in Baker and Malheur Counties. Rogers Construction Co., Portland, submitted the low bid for this job in the amount of $309,605. Curtis Gravel Co. and J. C. Compton, Spokane and McMinnville, submitted the next low bid in the amount of $330,747.50. There were four higher bidders. The Commission has awarded this contract to the low bidder, Rogers Construction Co., at its bid price of $309,605.

"Prineville Railway Undercrossing Section of the Madras-Prineville Highway, in Crook County. John A. Logan, Portland, submitted the low bid for this project in the amount of $32,611.50. Halverson Construction Co. and H. Halverson, Salem, submitted the next low bid at $48,439. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Robertson Bridge-Hayes Hill-Shattuck Corner Oiling and Rock Production Project on the Rogue River Loop and Redwood Highways, in Josephine County. The low bid was submitted by J. S. Risley, Milwaukie, at $46,969. A. H. Saxton & Son, Corvallis, submitted the next low bid in the amount of $51,310. There were two higher bidders. The Commission has awarded the contract to the low bidder, J. S. Risley, at his bid price of $46,969.

"Pavement widening on the Woodburn Section of the Pacific Highway East and Hillsboro-Silverton Secondary Highway, in Marion County. Warren Northwest, Inc., Portland, submitted the low bid for this job in the amount of $139,892.50. The next low bid was submitted by Porter W. Yett,

Portland, at $145,963. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Warren Northwest, Inc., when certain conditions have been satisfied.

"Front Avenue (Alder Street-Sheridan Street) Section of the Pacific Highway West, Portland, in Multnomah County. Two bids were received for this project, the low one being that of Edlefson Weygandt Co., Portland, in the amount of $16,840, the second low being that of John A. Logan, Portland, in the amount of $19,060. The Commission has rejected these bids.

"Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County. General Construction Co., Portland submitted the low bid for this project in the amount of $1,057,370 for Schedule "A" and the same amount for Schedule "B". The only other bidder was Franks Dredging Co., San Francisco, with a bid for Schedule "B", only, of $1,091,735. The Commission has rejected both of these bids.

"Sandy Boulevard (12th Avenue-44th Avenue) Section of the Columbia River Highway, Portland, in Multnomah County. Two bids were received for this job. The low bid was submitted by Porter W. Yett, Portland, in the amount of $35,735. The second low bid was submitted by Parker-Schram Co., Portland, in the amount of $36,875. The Commission rejected both bids."

In the discussion of the Troutdale-Wahkeena Creek Hydraulic-placed Roadbed Embankment Project, in Multnomah County, Chairman Banfield suggested that, in view of the high prices received, this project should be postponed until conditions are more stable and that the funds allocated therefore should be transferred to other projects with the understanding that the dredging project will be undertaken later when prices are right and conditions are favorable. Commissioners Schaupp and Chessman approved the suggestion, and it was so ordered.

The Commission had under consideration a request from the Chetco Rod and Gun Club, Brookings, Oregon, that the fishing public, et al. be allowed the use of the State Highway Department's hauling road, plant site, and gravel bar on the Chetco River for the parking of their automobiles and the launching of their boats in Chetco River. The Engineer advised that investigation has been made of this matter and it has been ascertained that such use of the state's property will not interfere with use of the gravel bar. He recommended that the request be approved subject to the condition that overnight camping on the area shall not be permitted. The Commission approved the recommendation unanimously. The matter is to be covered by an appropriate revokable permit.

A letter was presented from The Oregon Trail Lumber Company, Union, Oregon, requesting permission to transport loads of short logs with an overall height of 12½ feet over the Medical Springs Secondary Highway from Catherine

Creek to the Company's mill at Union, a distance of about nine miles. The Engineer recommended denial of the request because the logs are of small diameter, and when loaded to a height of 12½ feet they are not stable and will present a hazard to the traveling public. The Commission approved the recommendation unanimously and instructed the Secretary to inform the Company why the Commission cannot permit the transportation over state highways of loads of logs of that height.

Mr. Louis Birkenfield, Hood River, Oregon, came before the Commission at this time in regard to the truck hauling of logs over the Mt. Hood Highway. He advised that he has a contract with the U. S. Forest Service for timber in this locality, one million board feet of which already has been cut, but he is precluded from completing the contract because of an order from the Highway Commission closing the highway to log hauling traffic. He urged the Commission to allow him to continue his hauling operations, which, he said, would take about six weeks' time to finish. He was informed by Chairman Banfield that the Commission previously had discussed this matter at this meeting, at which time the Engineer reported that the road is narrow, that the sight distance at many points is very short, and that the road surface is weak, having been constructed by the Federal Government in the first instance as a recreational road of a light type not capable of withstanding heavy truck traffic. He advised that the Commission feels that, inasmuch as the road was constructed by the Federal Government, the state should not assume full responsibility for maintaining it, in view of which the Commission instructed the Engineer to discuss the matter with the Forest Service officials. He asserted that the Commission does not want to create a hardship on Mr. Birkenfield, but its first duty is to the general traveling public and to see that the highway is not subjected to traffic that would seriously damage the road or endanger the public. Mr. Birkenfield stated that he is hauling his logs to Hood River and would use only about three miles of the highway at that end, but, if the Commission will not permit the use of that three-mile section, he would be satisfied if allowed the use of a two-mile section at the other end of the highway. In reply thereto, Chairman Banfield stated that the Commission has referred this matter to the Engineer to discuss it with the Forest Service officials as a general proposition; with respect to the Mt. Hood Highway the Commission must make its decision for the entire road rather than for piecemeal sections. Pending the results of the Engineer's consultation with the Forest Service people, he said, the Commission cannot allow any hauling over this highway because it is of the firm belief that much damage to the road and danger to the public might result. He assured Mr. Birkenfield that the Commission would do everything possible to help him. The Engineer was thereupon instructed to consult with the Forest Service officials at the earliest opportunity to ascertain whether or not they will join with the state in repairing the highway now or later in the event log hauling is permitted. The Secretary was instructed to advise Mr. Birkenfield as soon as a decision has been reached.

The Commission had under consideration the setting of a date for its next regular meeting and decided to hold such meeting in Portland on Tuesday and Wednesday, August 6 and 7, 1946. The Secretary was instructed to make the usual arrangements for the use of the Auditorium in the Public Service Building for this purpose.

The Commission also discussed a date for its proposed trips to inspect state highways throughout the state and tentatively approved one trip starting on Monday, August 19, and another trip starting on Monday, September 9, 1946. The Engineer was instructed to prepare itineraries for both trips. The Commission decided not to hear delegations on such trips except the few people that might happen to be present during short stops for luncheon or dinner.

The Chief Counsel brought up for discussion a settlement of right of way required for the Pacific Highway between Judkins Point and Goshen, Lane County. He advised that Mr. W. H. Gonyea recently purchased considerable acreage at this place with the intention of developing it for commercial purposes, including an airplane landing field. The highway, he said extends through this man's property for a distance of about 2,000 feet, and Mr. Gonyea is asking for access to the highway from his home on one side of the highway and at two points on the opposite side. He has stated that he will not consider any other basis of settlement and will take the matter to court if necessary. The matter was discussed at considerable length, during which the Engineer gave as his thought that it might be all right to grant this request if the points of access are located at the extreme ends of Mr. Gonyea's property, but he could not state definitely until he has investigated the matter. The Commission referred the matter to the Engineer for such investigation and authorized the Chief Counsel to negotiate an option with Mr. Gonyea when the investigation is completed.

The Chief Counsel also brought up for discussion the matter of controlling pole lines along state highways. He referred to an instance along the Pacific Highway East south of the Town of Halsey where two farmers' telephone lines have been constructed, one of which occupies the location on the state highway right of way and the other being located on private property a short distance from the right of way line. It appears that the two companies were unable to reach an agreement for joint pole line construction so one of them built its line on the highway right of way, using split poles which are unsightly, and the other arranged for the use of private property for its facilities, making two pole lines on the same side of the highway, which detracts from the appearance of the roadside. It also appears that there is no legislation for the control of such situations. The Chief Counsel suggested that the law covering such matters should be modernized to meet present-day conditions and suggested the preparation of a bill to that end for presentation at the next Legislative Assembly. The Commission approved the suggestion by unanimous vote and instructed the Chief Counsel to prepare such a bill.

In this connection Chairman Banfield reported an inquiry from Mr. Ed Barry, of the Oregon Motor Transport Association, as to the attitude of the Highway Commission with respect to legislation continuing, after July 1, 1947, the law which authorizes the Commission to issue permits for movements over state highways of loads which are in excess of the legal limits as to weight and length. The Motor Transport Association, he said, has in mind to present to the 1947 Legislature a bill that will continue this authority, and Mr. Barry wants to know the attitude of the Commission with regard thereto.

Chairman Banfield stated that he informed Mr. Barry that the Commission is sympathetic but would take no part, inasmuch as the Commission feels that this is a matter that is entirely up to the Legislature. The Engineer advised that movements under the present law have proven satisfactory. Commissioner Cheeseman gave as his thought that the Commission should limit its interests to engineering facts and that it should not concern itself with legislation or with legislative policy. Following further discussion the Commission decided unanimously not to become involved in legislation policy and ordered that Mr. Barry be so informed.

The Commission discussed the following matters of unfinished business:

1. Proposed construction of a bridge over the Willamette River at Independence: The Engineer and the Chief Counsel advised that their report on this matter was not ready for presentation.

2. Request of the City of The Dalles for establishment of a state-owned ferry service across the Columbia River at The Dalles: The Engineer and the Chief Counsel advised that they have nothing new to report on this subject. The Commission discussed the matter, and, as a result thereof, went on record as definitely opposed to the establishment of such a state-owned ferry operation at this place. The Chief Counsel was instructed to so inform the City Council. He was also instructed to point out to the City Council the legal requirements for the establishment of a public-owned ferry operation and to outline a procedure to be followed by the city and the county, either jointly or separately, should they decide, in view of the Highway Commission's decision, to conduct such an operation as a local project.

3. Request of the City of Roseburg for state aid in the maintenance of certain city streets that are used by log haulers: The Engineer advised that the only way, other than by the use of strictly state funds, in which the city could be helped is to include the work in the Federal Aid Secondary Highway improvement that is proposed for the North Umpqua County Road connection with the Pacific Highway along Second Street; however, he gave as his thought that this would not entirely satisfy the city because considerable log hauling is carried on over Winchester Street, the route of the old Pacific Highway. He estimated the cost of improving Winchester Street at approximately $7,000. Following considerable discussion the Commission approved the improvement of the Second Street connection as a part of the proposed Federal Secondary Highway improvement of the North Umpqua Road if that can be arranged, however, definitely refused to contribute toward the cost of improving Winchester Street because it is not in the category of projects where such funds can be applied, and it being contrary to the Commission's policy to finance such improvements with state money in cities of this size.

4. Request of the City of Seaside for the rerouting of the Oregon Coast Highway along Roosevelt Drive: The Engineer reviewed the history of this project briefly and advised that, pursuant to the Commission's instructions, inquiry has been made of the railroad company regarding its right of way and it appears that the railroad company has fee title only to the depot grounds and that the railroad right of way is under lease, so when the railroad is abandoned the property will revert to the abutting property owners. Complete report on this project, he said, is not ready, but he will render it as soon as information has been assembled and he has had an opportunity to discuss it thoroughly with the Commission's Chief Counsel.

5. Suggestion of the State Sanitary Authority for joint action in connection with complaints on water pollution: The Secretary advised that, as instructed by the Commission, he directed a letter to the State Sanitary Authority inquiring what was meant by "joint action" and to what extent the Authority would expect the State Highway Commission to cooperate, but that he has not received a reply. The Commission approved the report.

6. The question of the action to be taken to evict tenants of a privately-owned building situate in Casey State Park: The Commission decided to view the premises when it makes its inspection trip through Southern Oregon.

7. Report of the Chief Counsel on right-of-way negotiations along the water front in the City of Coos Bay: The Chief Counsel advised that he has nothing to report at this time.

8. Proposed increase in the 1946 Minor Betterment Budget to finance construction of road approaches to state highways: The Engineer advised that his report on this subject is not ready for presentation. He was instructed to submit the report in writing.

The Engineer reported that the Keep Oregon Green Association contemplates the dedication of the first "welcome" sign, heretofore authorized by the State Highway Commission, in the near future at the Oregon end of the Longview Bridge over the Columbia River and that the Association desires that members of the Commission and he be present at the ceremonies. It was decided that Commissioner Chessman and the Engineer should represent the Commission on this occasion.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the same room.

Portland, Oregon
June 27, 1946

The State Highway Commission reconvened at 9:00 a.m. in the Auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Chief Counsel, and the Secretary present.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

CENTRAL OREGON AND LAKEVIEW-BURNS HIGHWAYS
DESCHUTES, LAKE, AND HARNEY COUNTIES
HAMPTON-SUNTEX-JUNIPER RIDGE REOILING PROJECT

Del R. Beebe, Eugene	$ 67,884.00
Babler Bros., Portland	74,790.00
J. C. Compton Co., McMinnville	78,290.00
Harr & Horton, Portland	84,350.00

KLAMATH FALLS-LAKEVIEW AND DAIRY-BONANZA HIGHWAYS IN
KLAMATH COUNTY
DAIRY ROCK PRODUCTION PROJECT

A. H. Saxton & Son, Corvallis	$ 35,532.00
Oscar E. Joelson, Eugene	36,540.00

KLAMATH FALLS-LAKEVIEW HIGHWAY IN
KLAMATH AND LAKE COUNTIES
BLY-EAST FOREST BOUNDARY ROCK PRODUCTION PROJECT

A. H. Saxton & Son, Corvallis	$ 40,670.00

CONSTRUCT 120-ft. HOWE TRUSS BRIDGE OVER
CRABTREE CREEK ON RICHARDSON GAP ROAD
NEAR BOHEMIAN HALL IN LINN COUNTY

	Schedule "A" (Concrete Piers)	Schedule "B" (Pile Piers)
Lindstrom Bros., Portland	$ 39,708.00	$ 36,618.00
Sleeper & Keyes, Portland	43,016.00	38,310.00

COLUMBIA RIVER HIGHWAY IN
MULTNOMAH COUNTY
ONEONTA BORROW PIT EXCAVATING AND SHAPING PROJECT

No bids received.

COLUMBIA RIVER HIGHWAY IN MULTNOMAH COUNTY
TROUTDALE-WAHKEENA CREEK SECTION

Project withdrawn

SUNSET (WOL. CREEK)HIGHWAY IN
WASHINGTON COUNTY
GARDNER RANCH-BERGER RANCH SECTION

Parker-Schram Co., Portland	$ 173,640.50
R. A. Heintz - Construction, Portland	220,482.50
Sound Constr. & Engr. Co., Seattle, Wn.	239,067.50

The Engineer reported information to the effect that Mr. Clarence Ringer, log hauler, Hood River, is truck hauling logs over the Mt. Hood Highway without a permit, notwithstanding that this highway has been closed to such type of traffic. He further stated that the information received indicates that Mr. Ringer was warned to discontinue his operations but was told by someone representing the U.S. Forest Service to continue and that the Forest Service would protect him. The Engineer requested authority, in view of the action previously taken by the Commission at this meeting regarding the truck hauling of logs over this highway, to call the matter to the attention of the State Police with a request that any action which may be necessary be taken to force Mr. Ringer to stop his operations. The Chief Counsel advised that the Commission has legal authority to control the situation. The Commission thereupon approved the Engineer's request.

The Engineer reported that the 35-miles-per-hour speed limit that the Commission adopted for the Oregon Coast Highway between M.P. 24, at Cannon Beach Junction with the Sunset Highway, and M.P. 36, near the Clatsop-Tillamook County line south of Arch Cape Tunnel, no longer is required in view of the fact that the war emergency no longer exists. He recommended, in view thereof, that the orders made by the Highway Commission on November 17, 1941, and November 5, 1942, be amended to restore the varying speed limits that were in force before those orders were made, such speed limits varying from 15 miles per hour, between M.P. 27 and M.P. 28, to 45 miles per hour, between M.P. 32.5 and M.P. 36. Following discussion, the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth herinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Oregon Coast Highway
Highway number: 9 Route number: US101

Location of Termini				Established Speed
M.P.	24	to M.P.	25	40 miles per hour
M.P.	25	to M.P.	26.5	30 miles per hour
M.P.	26.5	to M.P.	27	20 miles per hour
M.P.	27	to M.P.	28	15 miles per hour
M.P.	28	to M.P.	29	25 miles per hour
M.P.	29	to M.P.	32.5	35 miles per hour
M.P.	32.5	to M.P.	36	45 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Note: This resolution supersedes and rescinds resolutions adopted November 5, 1942, and November 17, 1941.

The Engineer requested instructions regarding the log-hauling operations of Alvie Forbis, John Forbis, and Earl Oglesby over the Wilson River Highway into the City of Tillamook. He advised that overlength permits have been granted to these operators and a number of other operators authorizing them to transport logs over this highway to the junction with the Trask River County Road, M.P. 2.56, from which point they are hauled over a county road to a connection with the Oregon Coast Highway about two miles south of Tillamook, thence to the Coats log dump in the Tillamook River. The operators have been taking advantage of this routing, he said, in the transportation of logs into Tillamook to deliver either to rail reloading stations or to the mills in the city so as to by-pass the Highway Department's scales that are located west of the Trask River County Road junction, notwithstanding that the route is about two miles longer than the route that leads directly into the City of Tillamook over the Wilson River Highway. He further stated that all

of the operators have been asked to discontinue this practice and to use the route which leads past the State Highway Department's scales and directly into the City, and all have complied except the three mentioned above, who have stated their refusal to do so. The Engineer recommended cancellation of the overlength permits issued to these haulers in view of their refusal to comply with the regulations. The Commission approved the recommendation unanimously.

The Engineer rendered a status report covering cities and towns that have requested assistance from the state in the maintenance of city streets that are being damaged by log haulers. The report revealed that agreements have been completed with nine cities, that agreements with two cities are under consideration, and that ten requests for assistance have been denied although these latter towns may qualify for state aid at some future time. The Commission approved the report and ordered it filed. (See letter from Mr. E.A. Collier, Maintenance Engineer, to R.H. Baldock, State Highway Engineer, dated June 22, 1946, in general files for details.)

The Engineer reported a request from the City of Sheridan for state assistance in the maintenance of two streets--Bridge Street, from Main Street to Harrison Street, and Mill Street, from Bridge Street to Second Street--which are being damaged by the truck hauling of logs. He estimated the cost of repairs at $2,500, of which the city's share would be $600, based on normal maintenance cost. He recommended approval of the work in view of the fact that the population of the City of Sheridan is less than 5,000, hence the City is eligible for state assistance under the Commission's established policy. The Commission approved the recommendation unanimously.

The Engineer also reported a request from the City of Tillamook for state aid in the maintenance of several city streets that are being used by log hauling traffic. He presented a map showing the streets that are used by log haulers to a considerable extent, there being from 50 to 100 truck loads a day entering Tillamook from each direction. He estimated that it would cost about $6,000 to do the necessary repair and maintenance work and suggested that, if the Commission approves the work, the City should contribute the sum of $1,000 toward this expense. The population of the City of Tillamook in 1940, he said, was 2,751, which is considerably under the present-day population which might exceed the 5,000 limit set by the Commission for state cooperation. Chairman Banfield gave as his thought that approval of this project would be a deviation from the Commission's established policy with respect to aiding small cities and towns in the maintenance of city streets that are being used by log haulers, inasmuch as it was the Commission's intention, as he understood it, to limit such aid to the cities and towns that received only a small amount from the state under the provisions of the State Tax Street Fund Law and who could not possibly maintain those streets with the funds available to them. Were the state to contribute to cities and towns such as Tillamook where such hauling is over a considerable number of streets, it might involve expenditure of as much as $25,000, but the Commission certainly did not have it in mind to spend any such sum in any one community, and while the Commission has not set a limit, there is a principle involved. He suggested that it might be advisable to set a limit to the amount that the Commission

would spend in any town. Commissioners Schaupp and Chessman approved the suggestion, whereupon it was decided to set a limit of $2,500 in any one place. The Commission approved an expenditure of such limit for the maintenance of streets in the City of Tillamook on the condition that the City will contribute a like amount.

A delegation from Ontario, consisting of H. A. Logue, Secretary of the Chamber of Commerce; Dyer Bennett, City Councilman; and F. P. Ryan, City Recorder, was present. Mr. Logue headed the group. They asked the Commission to designate and construct as a farm-to-market road an alternate route for truck traffic leading to the industrial area in the southeastern part of Ontario. This route extends easterly from a junction with the Old Oregon Trail at the north end of Oregon Street, near the north city limits, to an extension of Second Street, thence southerly along Second Street to the industrail district. They pointed out that a short section of entirely new highway would have to be built, including an underpass structure where the road would pass under the tracks of the Oregon Short Line Railroad.

The delegation also asked for the widening of the Ontario Spur Section of the Old Oregon Trail leading easterly from Ontario to the Snake River Bridge for four lanes of traffic as a measure to prevent traffic accidents. The improvement of the farm-to-market road which extends south and west from the intersection of S.W. 4th Street with the Old Oregon Trail to a connection with the state highway leading to Nyssa near Cairo Junction was also requested in behalf of livestock interests south of Ontario. They presented a map showing the location of the projects requested and a prepared statement of statistical information concerning the industries in their city and the productivity of the district. The Engineer advised that the Highway Commission contemplates an expenditure of some $80,000 in the Town of Ontario for the widening of Oregon Street; also, that future plans for the improvement of the Old Oregon Trail as an interstate highway contemplate further improvements to this highway that will not fit in with the city's plan. He pointed out that the bridge over the Snake River at Ontario is a two-lane structure so that the widening of the highway approach to this bridge for four lanes of traffic would not solve the accident problem because it would simply shift the bottleneck to the bridge.

Chairman Banfield advised that the city has asked for more improvements than the Highway Commission can approve. The proposed truck route, he said, is purely a local responsibility because its benefits would accrue primarily to the city interests. The Highway Commission, he added, could not assume the responsibility because it would establish a very undesirable precedent that could not be avoided in the consideration of similar projects in the future. Mr. Ryan stated that they appreciated the fact that considerable expense was involved, but, he said, the City has a program that requires an expense of $200,000, whereas the City has only $25,000 available to do the work and is not in position to raise additional funds. He urged construction of the underpass in the northern part of the city and construction of the connecting road between North Second Street and the highway if the Commission cannot see its way clear to approve all of the projects. The right of way for this improvement, he said, would be donated. Chairman Banfield concluded the discussion by stating that the Commission cannot give any encouragement to the projects but will refer the matter to the Engineer for study.

Commissioners Schaupp and Chessman indicated their approval of Chairman Banfield's statements.

Mr. Henry McKinney, Mayor of the City of Baker, and Mr. A. S. Grant, City Attorney, came before the Commission regarding construction of the Dewey Avenue Undercrossing of the Union Pacific Railroad on the Baker-Unity Highway in the City of Baker. Mr. McKinney repeated arguments presented to the Commission at former meetings in behalf of this proposed construction and urged approval of the project at the earliest possible time as an accident-prevention measure and in order to make it possible for the City to properly protect numerous industries that have developed on the opposite side of the railroad from the city proper. The Engineer advised that, according to present-day estimates, this undercrossing structure would cost approximately $250,000. He pointed out the possibilities of securing financial assistance from the railroad company and advised that to that end a hearing has been requested before the Public Utilities Commissioner for the purpose of presenting data and information for the use of the Commissioner in making his order on the subject. The Engineer also pointed out the possibilities of rerouting the Sumpter Valley Railroad for a short distance over the tracks of the Union Pacific Railroad, thus avoiding the separation of grade of the highway and the Sumpter Valley Railroad. He said that he anticipates that the hearing before the Public Utilities Commissioner will be held in the not distant future on such railroad matters.

Chairman Banfield advised that the Commission is now considering the matter of proceeding with this project, and it may be that the Commission will decide to go ahead with construction regardless of whether or not railroad cooperation is received. It was his thought that a decision by the Commission would be reached before the meeting adjourned. Mayor McKinney advised that the City owns a small triangular area adjacent to its fire station near the proposed underpass, and suggested that the city would deed this to the state without cost in the event it is needed in connection with the underpass project. (Messrs. McKinney and Grant reappeared before the Commission during the afternoon session at which time they were informed by Chairman Banfield that the Commission had just adopted a resolution approving the Dewey Avenue Underpass Project and others and had authorized the Engineer and the Chief Counsel to proceed with construction and right of way acquisition).

Messrs. A. L. Greenwalt and Walter Meacham, President and Secretary, respectively, of the Old Oregon Trail Association, were present in regard to the naming of the southern pioneer trail to Oregon. At the request of the Commission the Secretary read aloud the recommendation of the Memorials Committee of the Oregon Historical Society concerning the naming of this trail, the last paragraph of which reads as follows:

> "The recommendation of this Committee is that the name Southern Route be used and that there be not over three or four markers in all in the stretch between Ashland and Malin. These can be sufficiently large so as to contain an abbreviated sketch of the Road's History.

There will also be avoided the use of the word Trail which is rather out of place in describing Modern Roads or Routes.

Approved	Disapproved
Phil Metschan	_____
Isaac Burpee	_____
H. G. Smith	_____
Philip H. Parrish	_____"

Mr. Meacham stated that the Old Oregon Trail Association is not satisfied with this recommendation for the reason that the Association was not granted a hearing on the subject by the Committee. He alleged that 99 per cent of all the people residing along the route want it named "Applegate Trail" and in support of this contention he mentioned certain newspaper items and Mr. Parrish's booklet "Wagons West" all of which, he said, recognize and approve the name "Applegate Trail" as suggested by the Association. He gave as his opinion that the matter should never have been referred to the Memorials Committee of the Oregon Historical Society. Mr. Greenwalt concurred in the remarks of Mr. Meacham and expressed regrets that the Memorials Committee did not see fit to give the Association a hearing in the matter.

Chairman Banfield stated that the Commission referred this matter to the Memorials Committee of the Historical Society in conformity with established policy. He pointed out that the Commission has erected a number of historic markers throughout the state for the benefit of tourists and others interested, and in this case followed the usual procedure in securing its recommendation from the Memorials Committee because it wanted to be certain that it was right before taking definite action. The Memorials Committee, he explained, was appointed by the Oregon Historical Society several years ago at the Commission's request in order that the Commission might have the benefit of information from people who are well-versed in the history of the state. H. G. Smith, Construction Engineer for the State Highway Department and member of the Memorials Committee of the Oregon Historical Society, was present and advised that the Committee studied this matter thoroughly before taking action and decided that it would not be proper to apply the name "Applegate Trail" to the section between Rickreall, in Polk County, and Ashland, in Jackson County, because that section of the trail previously had been used for a long time and was known as the "California Trail"; moreover, the Applegate group followed other trails in its search for a southern route between Winnemucca, Nevada, and Fort Hall. Mr. Meacham disagreed with the Committee's findings in the matter of the use of the name "Route". It was his thought that the name "Trail" has more public appeal than the word "Route" and should be approved from the publicity standpoint as well as to commemorate the trails used by the convoys of wagon trains. Chairman Banfield suggested that, in order to avoid involving the Commission in a controversy of this kind, perhaps the Commission should erect its own signs and markers and word them in its own way. The Commission has not acted on the matter, he said, but it will probably do so before adjournment.

Mr. Meacham then asked assistance from the Commission in the erection of a monument at Yoncalla, Douglas Co., honoring Jesse Applegate, who was the leader of the expedition that conducted the search for a new route into Oregon. He advised that the Old Oregon Trail Association will provide a boulder and a bronze plaque for this purpose and would like to have the Highway Commission provide a base for the monument and a turn-out and parking place for the cars of people who desire to view the marker. He was asked to present his request in writing. (Mr. Meacham presented such a letter at the afternoon session. See ahead for the Commission's approval).

Mr. Meacham also requested erection of a large marker on the Barlow Trail overlooking Yocum Falls, and about 20 smaller markers bearing the wording "Barlow Trail". The Engineer advised that the site proposed by Mr. Meacham for the large marker is now being investigated.

A delegation from Newberg, consisting of Mr. Frank C. Colcord, Mayor, and Mr. Herbert Swift, City Attorney, came before the Commission relative to the rerouting of the Hillsboro-Silverton Secondary Highway in this town. Mr. Swift was principal spokesman. He advised that this highway is now routed over River Street for a distance of three blocks south of its intersection with U.S. 99W at the end of the bridge in the eastern part of the City, then turns easterly along Fourth Street to Wynoskie Street, thence to the Willamette River Bridge. He pointed out that logging trucks that enter this highway from the west are required to make a sharp right-angle turn at the end of the bridge and frequently lose their loads, creating a traffic hazard at this point; moreover, the route on River Street passes in front of the City's swimming tank where many children congregate during the summer season. He suggested rerouting the highway along College Street for a distance of three blocks, to Fourth Street, thence east four blocks along Fourth Street to a connection with the present highway on River Street. He pointed out that such rerouting would eliminate the bad turn at the bridge and would avoid the City swimming pool and would do away with two right-angle turns in the present routing of this highway for logging trucks which enter the city from the north over the Hillsboro-Silverton Secondary Highway. He stated that the city would contribute the sum of $2,500 toward the cost of improving such new route and, in addition thereto, would build curbs and sidewalks as may be required. The Engineer stated that such routing is desirable from the traffic safety standpoint. He was instructed to check into the costs involved and into other details and report back to the Commission at the next meeting.

A delegation from Eugene, consisting of Earl L. McNutt, Mayor; J. E. Turnbull, Chairman, Highway Committee, Chamber of Commerce; Clinton Hurd, County Judge, Lane County; P. M. Morse, County Engineer; V. Ed Johnson, City Councilman; William Tugman, Eugene Register-Guard; Fred Brenne, Manager, Chamber of Commerce; and Dean R. W. Leighton, University of Oregon, appeared in behalf of a three-way project involving the state, Lane County, and the City of Eugene, which provides for the rerouting of the Pacific Highway for a short distance along the present location of the Mill Race, one block east of High Street, and extends northerly to a connection with the county road which crosses the Willamette River and extends northerly along the east side thereof through Coburg to a connection with Pacific Highway East

near Harrisburg, being the project discussed with the Highway Commission some months previous. Mr. Turnbull headed the group. He advised that Lane County has made provision for county funds in the amount of $475,000 to build a new bridge over the Willamette River on this route and that the City of Eugene has voted a bond issue of $500,000 to pay its share of the cost of the proposed improvement. The purpose of the meeting today, he said, is to bring the facts to the attention of the Commission with the hope that the Commission will see its way clear to approve an expenditure of state highway funds in the amount of $135,000 to pay for that portion of the improvement which lies along the state highway section.

The Engineer exhibited a map showing the proposed layout and explained the details thereof. He estimated the cost to provide connections between the new route and Sixth Street and Seventh Street, which are one-way state highway streets, at about $65,000 and the cost of the state's share of the necessary right of way at approximately $70,000. Mr. Turnbull suggested that the state should do its portion of the work now and that the construction of the bridge and the balance of the improvement should be deferred until conditions are right and materials can be obtained. Chairman Banfield advised that this is a new matter to the Commission and that the Commission desires to give it careful study before taking any action. Commissioner Schaupp stated a desire to inspect the premises before acting. Commissioner Chessman expressed himself similarly. Chairman Banfield concluded the conference by stating that the Commission would give the matter careful consideration upon receipt of additional information from the Engineer. In any event, he said, it would be necessary to have the matter covered by a joint agreement in writing before anything at all can be done.

Mr. Larry E. Bufton, of Silica Products, Oreg. Ltd., Portland, came before the Commission regarding the improvement of an old county road which parallels the Eugene-Veneta Highway (Route F) about three miles west of Eugene, being an extension of West 11th Street. Mr. Bufton advised that his company owns about one-half mile frontage on this old road and that they propose to subdivide the property into lots, one tier of which will front on this old road, and, in order that access to the highway may be had at only two points, they have it in mind to use the old county road as a service road if the Highway Commission offers no objections thereto and will maintain the road. He explained that when the state obtained the right of way for straightening the highway at this point title was secured by the state to the south half of the old road, but the northern half of this road belongs to the Silica Products company. He offered to deed to the state the company's interests in such portion of the old road on the condition that the state will accept the company's proposal. He pointed out that the two points proposed for access to the highway would be at the extreme ends of the company's property. He also offered to deliver such pit-run gravel as may be required to improve the old road at the rate of 75 cents per cubic yard. The Engineer exhibited a map showing the proposed subdivision and the location of the old county road and the new highway. He advised that the state owns the southern half of the old road and has a provisional easement for use of the northern half. He read aloud a letter from Mr. Bufton presenting the company's offer in writing. Following discussion of this matter the Commission referred it to the Engineer and the Chief Counsel for investigation and report.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 1:30 p.m. in the same room with all Commissioners, the State Highway Engineer, the Chief Counsel, and the Secretary present.

The Engineer requested instructions relative to the repair of the ferry boat "North Beach" recently purchased from the Columbia Transportation Company to augment ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington. He advised that a large amount of repair work is required before this boat can be placed in service, a preliminary investigation revealing that such reconditioning work will cost between $35,000 and $40,000, although this may be increased or decreased according to the findings of a competent inspector who is now making a detailed survey to determine the extent of needed repairs. He requested authority to advertise for bids for the repair work on a cost-plus-fixed-fee basis, which, he declared, has advantages over the lump-sum basis. Regarding the Commission's choice in the matter of selecting someone to make the repairs, the Commission's Chief Counsel advised that it is simply a matter of business judgment, that the Commission has legal authority to select any method it chooses and that judgment applies as it would in private business. He also advised that the Commission need not advertise for bids for the repair work because it is hiring service. Following further discussion of this matter the Commission decided to have the work done on the basis of the Engineer's suggestion--cost plus a fixed fee. The Engineer and the Chief Counsel were thereupon authorized to negotiate with several repair concerns which they consider are capable and reliable and report back to the Commission their findings and their recommendation as to their first, second, and third choice.

The Commission discussed a proposed agreement with the City of Port Orford concerning the construction of streets, curbs, and sidewalks in that town. The Engineer read aloud the provisions of the agreement, which, among other things, provides for the prohibition of access to the highway from certain city streets. The Chief Counsel advised that he could not recommend the acceptance of the agreement as prepared because it involves the "dead ending" of a number of streets, which places the matter in the same category as the case in Cottage Grove, which was settled adversely to the state's interests. He suggested that the property owners affected be contacted relative to the waiver of their rights of access to the highway and that it be ascertained how much they want for such waiver. In view of the advice of the Chief Counsel, the Commission decided not to execute the agreement until advised by him that it is satisfactory to do so. The matter was referred to the Chief Counsel for further handling.

The Engineer advised that the State Land Board has under consideration a plan whereby the state would take over from the Federal Government 906,000 acres of unappropriated and unreserved Federal Land and that the Board has made inquiry whether or not the State Highway Commission would have any objections to the taking over of such lands because of the effect the resultant reductions in acreage of Federal Lands might have on the funds that the state receives as Federal aid for highway construction. He advised that such reduction in Federal Land acreage would affect Federal aid in two ways; first, it would reduce future allotments of Public Lands Highway Funds approximately

six per cent, which, roughly, would be about $10,000 annually; and second, it would increase the state's matching ratio on Federal Aid Primary, Secondary, and Urban Projects from 37.96 per cent to 38.87 per cent, which, this year, would have required the state to advance approximately $184,000 additional state funds. The value of the land that the state would acquire under the proposal that the State Land Board is now considering, he said, is about $2,000,000. The total loss in highway funds, he said, would amount to a considerable sum of money over a period of years. (See letter dated May 4, 1946, directed to the Oregon State Highway Commission, and letter dated May 10, 1946, directed to Forrest E. Cooper, Lakeview, Counsel for the Public Lands Committee of the Association of Oregon Counties, in general files for additional details). The Engineer requested instructions what to reply to the State Land Board. It was the thought of the Commission that the State Land Board should be fully advised as to how the acquisition of such lands would affect the state's Federal Aid allotment for highway purposes. The Engineer was instructed to direct a letter to the Land Board giving full information.

Mr. Russell Hubbard, Reedsport, was present and renewed his request to acquire certain state-owned property adjacent to the Umpqua Highway at Reedsport, particularly some fractional lots that the state acquired in connection with negotiations for right of way for the revised location of this highway, and some lowland near the east city limits of Reedsport which lies between the new highway location and the Umpqua River. He asked the Commission to sell this property to him at an agreed price without going through the formality of taking bids, particularly the fractional city lots, which, he said, the Highway Commission at one time offered to sell to him at the rate of three cents per square foot. He was informed by Chairman Banfield that the Commission does not want to dispose of the low marsh land, and so far as disposing of the other property is concerned, it is his feeling that the sale should be based on competitive bidding, and the Commission will authorize advertising the property for sale if Mr. Hubbard desires that done. Mr. Hubbard advised that he owns the booming rights in the Umpqua River along the marsh land under discussion and needs the state's property in connection with his activities. He advised that he will not erect any building or structure on the property that would interfere with the scenic view of the River from the highway. He further stated that he owns considerable property upstream from this location, and he offered to let the state "spill" dirt material anywhere along this property that might be necessary in connection with construction of the new highway. The Engineer advised that both he and the Parks Superintendent recommend retention of the marsh land by the state in order to protect the River scenery at this point. He also said that the area may be needed for highway purposes. Mr. Hubbard again asked the Commission to consider private sale of the fractional lots. The Commission agreed to give the request consideration. (Following Mr. Hubbard's departure the Commission reconsidered the matter and decided, upon the recommendation of the Engineer and the Chief Counsel, to advertise the fractional lots for sale.)

Mr. Hubbard then asked the Highway Department to help the City of Sutherlin to clean the channel of Sutherlin Creek and another small creek at

this place as prevention of floods which occur each year during periods of high water. It was his thought that the Highway Commission would be interested because the highway is inundated during such periods. He declared that he is personally interested in the matter because he owns a mill at this place, but he also is speaking in behalf of the people of the town. He said they are attempting to obtain Federal funds with which to help finance the project. The Engineer advised that the highway at Sutherlin will have to be realigned because of numerous mills that have been constructed and that a study of the situation will have to be made. He asked Mr. Hubbard to present his request in writing, following which he will investigate the matter and report his findings to the Commission.

Mr. Otto J. Kraemer, Attorney, Portland, was present regarding a subdivision of his property located at Cannon Beach, known as the First Addition to Elk Lake Park. He advised that he is having difficulty in closing several sales of lots abutting on the east side of the highway because it appears that the people are not going to be allowed access to the highway from certain streets. Mr. Kraemer further stated that the property is level but at one point the highway passes through a cut from eight to twelve feet in depth, and rumor is to the effect that because of this cut the Highway Commission will not permit access to the highway. The Chief Counsel advised that the Highway Commission has not acquired right of access to the highway so cannot deprive anyone of such right without a waiver. He further stated that the Highway Commission will not disturb Mr. Kraemer's right of access to the highway nor his acquired rights without consulting him first. Mr. Kraemer urged a definite decision by the Commission in this matter at the earliest possible time because his purchasers are disturbed and his surveys are being held up. The Commission referred the matter to the Engineer and the Chief Counsel to discuss details with Mr. Kraemer and to report back to the Commission.

The following members of the Recreational Resources Committee of the Portland Chamber of Commerce came before the Commission regarding preservation of timber strips along the Oregon Coast Highway through the holdings of the Sparrow Interests near Elbow Lake, in Douglas County: Mr. Alfred A. Loeb, Mr. Marshall Dana, and Mr. Thornton T. Munger. They presented a letter from Mr. Eugene R. Walsh, Forest Engineer, in which he advises that the Sparrow Interests have sold the timber on their property to the Coos Bay Pulp Corporation and Crown-Zellerbach Corporation who are logging it but are leaving a strip along the highway and are willing to let it stand permanently if assured that it will not be sold or logged at some future date by the Sparrow Interests. Mr. Walsh points out that the Sparrow Interests still own the land on which the timber is standing and gave as his thought, as engineer for these Interests, that the state could acquire it along with the timber if it wanted to preserve a timber corridor along this section. He suggested, however, that the Commission should take the initiative in the matter. The members of the Committee asked the Commission to give the matter favorable consideration. Chairman Banfield stated that he has no objection to the procedure. Commissioners Schaupp and Chessman expressed themselves similarly. The matter was thereupon referred to the Chief Counsel and the Parks Superintendent to handle, it being understood that the negotiations should include the acquisition of both the land and the timber standing thereon.

Mr. Loeb inquired whether or not the State Highway Commission has given further consideration to the establishment of small "lunch spots" along state highways as previously suggested by the Recreational Resources Committee. He was informed by Chairman Banfield that the Commission has not taken further action and there is no possibility of action being taken in the near future.

Mr. H. W. Fowler, owner of the Lake Tahkenitch Resort on the Oregon Coast Highway, Lane County, was present and urged the Commission to help him clean up weed growth and cull logs in Lake Tahkenitch which, he said, are becoming very serious and within two years will close the Lake entirely for pleasure seekers unless something is done to improve conditions. He exhibited samples of weed growth and seeds and advised that the seed was planted some years ago in another part of the Lake by the U.S. Biological Survey, but the growth has spread rapidly and unless something is done to correct the situation the Lake will soon become valueless for recreational purposes. It was his thought that the State Highway Commission should be interested because of the publicity that the Commission is giving the lakes in this district through its national advertising to attract tourists. The Commission's Chief Counsel advised that the property around the Lake is not State Highway property but is owned by the State Land Board. He suggested that Mr. Fowler present his problem to such Board. Chairman Banfield advised, the Chief Counsel concurring, that the Highway Commission has no authority over this Lake or any other lake, but nevertheless, the Commission will order investigations from the advertising standpoint, but it cannot do what Mr. Fowler requests.

Mr. Fowler then requested the use of State Highway equipment to oil a driveway and parking area at his resort. He was informed by the Engineer that his request would be given consideration if presented in writing.

The Commission discussed the bids received at the morning session for highway construction work and took action thereon, as follows, by unanimous vote:

The Commission awarded the following contracts: The contract for the Hampton-Suntex-Juniper Ridge Reoiling Project on the Central Oregon and Lakeview-Burns Highways, in Deschutes, Lake, and Harney Counties, was awarded to Del R. Beebe, Eugene, the low bidder; the contract for the Dairy Rock Production Project on the Klamath Falls-Lakeview and Dairy-Bonanza Highways, in Klamath County, was awarded to A.H. Saxton & Son, Corvallis, the low bidder; the contract for grading the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County, was awarded to Parker-Schram Company, Portland, the low bidder.

The Commission rejected the bids received for the Bly-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties.

All bids received for the construction of a 120-foot Howe truss bridge with trestle approaches over Crabtree Creek on the Richardson Gap County Road, Linn County, were referred by the Commission to the County Court

of Linn County for handling, inasmuch as this is a county project which the Commission advertised in behalf of the County Court as a matter of courtesy.

No bids were received by the Commission for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, Multnomah County, and bids received by the Commission for roadbed topping, construction of a rock toe, slope protection, topsoiling, and grass seeding on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County, were ordered returned to the respective bidders, inasmuch as this project previously had been withdrawn from the letting.

The Engineer reported on the cost to obtain right of way for a proposed revision of the Pacific Highway West in North Corvallis to provide approaches to Third Street and Fourth Street. He advised that an appraisal had been made by the Right of Way Department, which estimates roughly that such right of way will cost about $50,000. He requested authority for the Chief Counsel to negotiate options as may be required for such improvement. The Commission approved the request by unanimous vote, it being strictly understood that no commitment whatsoever is being made as to the construction of this project.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows:

"Hampton-Suntex-Juniper Ridge Reoiling Project on the Central Oregon and Lakeview-Burns Highways, in Deschutes, Lake, and Harney Counties. The low bid for this project was submitted by Del R. Beebe, Eugene, at $67,884. Babler Bros., Portland, submitted the next low bid at $74,790. There were two higher bidders. The Commission has awarded the contract to the low bidder, Del R. Beebe, at his bid price.

"Dairy Rock Production Project on the Klamath Falls-Lakeview and Dairy-Bonanza Highways, in Klamath County. The Commission received two bids for this project, being those of A. H. Saxton & Son, Corvallis, at $35,532, and Oscar E. Joelson, Eugene, at $36,540. The Commission has awarded the contract to the low bidder, A.H. Saxton & Son, Corvallis, at their bid price.

"Bly-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties. The Commission received only one bid for this project, being that of A.H. Saxton & Son, Corvallis, at $40,670. This bid has been rejected.

"Construction of 120-foot Howe truss bridge with five 19-foot pile trestle approach spans over Crabtree Creek near Bohemian Hall on the Richardson Gap Road, in Linn County. The Commission received two bids for this project, being those of Lindstrom Bros., Portland, at $39,708 using concrete piers and $36,618 using pile piers, and Sleeper & Keyes, Portland, at $43,016 using concrete piers and $38,310 using pile piers. The Commission has referred the bids to the County Court of Linn County inasmuch as this is a county project which was advertised by the Commission in behalf of the County as a matter of courtesy.

"Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County. The Commission received no bids for this job.

"Roadbed topping, construction of rock toe, slope protection, topsoiling, and grass seeding on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, Multnomah County. The Commission withdrew this project from the letting prior to the opening of bids and ordered bids received returned to the bidders unopened.

"Grading the Gardner Ranch-Berger Ranch Section of the Sunset Highway, Washington County. The Commission received three bids for this project, the low one being submitted by Parker-Schram Co., Portland, at $173,640.50. The next low bid was that of R.A. Heints - Construction, Portland, at $220,482.50. The Commission has awarded the contract to the low bidder, Parker-Schram Co., at its bid price."

Mr. Elmer Bankus, Brookings, Oregon, came before the Commission regarding an exchange of timber land adjacent to the Oregon Coast Highway north of the Town of Brookings. He advised that the company he represents desires to liquidate numerous small tracts of timber in this vicinity and to that end a small lumber mill is now operating in the vicinity. Some of the heaviest and sturdiest timber, he said, is immediately adjacent to the permanent highway location in Sec. 36, T. 39 S, R. 14 W, W.M., and it was his thought that the Highway Commission would like to preserve this, and if so, would be willing to acquire it by exchange of other state land of comparable value. He advised that he has several offers for the timber in question and suggested an early investigation by the Commission so as to enable him to close a deal with one of the prospective purchasers of the property if the state is not interested. He was informed by Chairman Banfield that the Highway Commission would be pleased to investigate an exchange and he asked Mr. Bankus to present his proposition in writing. The Engineer advised that he would make the investigation and report his findings to the Commission at its meeting on August 6, 1946. He was authorized by the Commission to inform Mr. Bankus, in advance, what he intends to recommend to the Commission at such meeting.

The Secretary presented a letter from Mr. Walter Meacham, Secretary of the Old Oregon Trail Association, requesting the Highway Commission's cooperation in providing a turn-out and monument base for a marker which the Association plans to erect at the old Jesse Applegate homestead in Yoncalla honoring this pioneer. Mr. Meacham advises that the Association will furnish the boulder and a bronze plaque containing a brief outline of the early history of Mr. Applegate, whose name, he said, was a household word in Oregon for more than 40 years. The Engineer recommended approval of the request. Construction Engineer H. G. Smith, who is a member of the Memorials Committee of the Oregon Historical Society, gave as his opinion that the monument is very appropriate. The Commission referred the matter to the Engineer and the Chief Counsel to check into the feasibility of it with authority to provide such turn-out and monument base if the project is found feasible.

JULY 9, 1946

In this connection the Commission resumed discussion of the controversial Applegate Trail matter. Commissioner Chessman stated his disapproval of numerous "finger board" signs bearing the wording "Applegate Trail". He suggested that perhaps a few signs bearing the wording "Applegate Trail-Southern Route into Oregon" might be satisfactory. The Engineer recommended approval of the recommendation of the Memorials Committee of the Oregon Historical Society. Following further discussion, the Commission decided to take no action in the matter other than to ascertain whether or not a meeting of minds cannot be reached among the opposing groups. The matter was referred to the Construction Engineer, H. G. Smith, to ascertain what can be done in that respect.

Chairman Banfield brought up for discussion the question of right of way width for the Sunset Highway west of Portland. He inquired why it is now necessary for the Highway Commission to acquire right of way 200 feet wide. The Engineer explained that when construction on this section was first started prior to the war it was as a W.P.A. project, and the right of way width was limited to 80 feet, for a two-lane highway; however, later on it was decided to make this a four-lane thoroughfare, so the balance of the right of way westerly from this section was acquired on that basis, but the negotiations did not include a widening of the 80-foot right of way on the first two-mile section. Chairman Banfield inquired as to the cost of the right of way now to be purchased. The Assistant Counsel estimated such cost at $120,000 between Canyon Road and Barnes Road. The Engineer estimated the cost of right of way and construction of the grade separation project requested by Commonwealth, Inc. at $100,000 making a total cost of $220,000 to complete the right of way acquisition to the Barnes Road junction and to build the traffic separation structure.

The question of constructing the service road paralleling U.S. 99E through the Milwaukie Housing Project was introduced into the discussion. The Engineer explained that the right of way in connection with this project will be furnished without cost to the state and that the estimated cost to the state for the whole improvement would be about $65,000. The Commission desired additional information of a definite character with respect to the project before making a final decision and thereupon referred the matter to the Chief Counsel to discuss with the Milwaukie Planning Commission in order that a definite agreement may be reached among all parties concerned.

The Chief Counsel was also instructed to consult with Commonwealth, Inc. regarding the right of way for the Sunset Highway through its holdings and to report his findings to the Commission for its information.

The Commission next had under discussion projects proposed for construction during the next three years with state funds, being a resumption of the discussion held in the Imperial Hotel on the afternoon of June 25, reference being made to the list of Rural and Minicipal Projects presented by the Engineer at that time. After careful consideration of each individual project the Commission approved certain projects for immediate undertaking without reservation, and others conditionally, totaling an expenditure of approximately $5,766,500 of state money. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, heretofore, to wit: on the twenty-ninth day of May, 1945, the Commission adopted a three-year program of postwar highway construction, which action of the Commission is evidenced by a resolution duly adopted and entered in the minutes and records of the Commission; and

WHEREAS, said postwar program, while it includes Federal Aid and Forest Highway construction of general character and classification, is nevertheless not adequate to meet the needs of the general public; and

WHEREAS, many of the highways and in particular sections of some highways in the State are in need of repair, reconditioning and reconstruction because of the fact that during the war emergency ordinary highway maintenance was neglected; and

WHEREAS, the State now has or will have available during the next three-year period approximately six million dollars of state highway funds which are not needed to meet the requirements of ordinary highway maintenance, debt service, operating expense or the matching of Federal Aid and therefore said funds may be employed on a state highway construction program; and

WHEREAS, the Commission, after due consideration of all matters and of all factors involved in and essential to an adequate highway system, is of the opinion that public welfare will be served by the promotion and accomplishment of the program of highway construction hereinafter set forth; and

WHEREAS, the program of projects now proposed for adoption is integrated with and bears a progressive relationship to the major program heretofore approved and adopted by the Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the proposed state highway construction program set forth in detail in the attached exhibit, consisting of five sheets, marked Exhibit A, and otherwise identified as bearing the signatures of R. H. Baldock, State Highway Engineer, and H. B. Glaisyer, Secretary to the Commission, and the date of June twenty-seventh, 1946, and by this reference made an essential part hereof, hereby is approved and the several highway projects listed and enumerated therein hereby are each and all adopted and approved as highway projects for construction during the years 1946, 1947 and 1948, except as hereinafter provided with respect to projects identified by the letter D.

2. That the State Highway Engineer be and he hereby is authorized and instructed to make all necessary surveys and thereafter, as such surveys are completed, report the same to the Commission for approval.

3. That upon approval and adoption by the Commission of any one or more of said surveys said Engineer shall then prepare correct descriptions of all real properties needed for rights of way or other uses or purposes in connection with the accomplishment of said projects or any one of the same and deliver such descriptions to the Chief Counsel, and thereafter said Counsel shall take the necessary steps to acquire options on all real properties needed in connection with said projects or any of the same and report said options to the Commission for approval.

4. That upon approval of the survey and location of any one or more of said projects and the acquisition of the necessary rights of way therefor and the approval by the Commission of options covering such rights of way, then the Engineer shall prepare or cause to be prepared and published the call or calls for competitive bids as required by law.

5. That if any of said projects are projects promoted under a cooperative arrangement between the State and a county or the State and a city or the State and a county and a city, then before the call for bids is issued an appropriate agreement or greements shall be prepared by the Chief Counsel, submitted to the Commission for approval and thereafter executed by the county or the city, or the county and the city, as the case may be, and presented for execution by the Commission.

6. With reference to projects set forth in said Exhibit A designated or identified by the letter D it hereby is provided and ordered that until such projects and each thereof have been further considered and cleared for construction no surveys with respect thereto shall be made or other action taken, provided, however, that the sums or amounts of money allocated to such identified projects shall be held subject to the further order of this Commission.

7. That this resolution be entered in the minutes and records of the Commission as of the twenty-seventh day of June, 1946, and copies thereof delivered by the Secretary to the Public Roads Administration.

The exhibit referred to in the foregoing resolution follows:

13141

PROPOSED STATE CONSTRUCTION PROGRAM

For Performance During 1946, 1947 and 1948

June 27, 1946

Exhibit "A"

PART I - STATE RURAL PROJECTS

County	Highway	Section and Description	Construction	R/W	Total	
		Division No. 1				
Clackamas	Pacific E.	Multnomah Co. Line-Milwaukie, Channelization and Service Road	$ 65,000	$ - -	$ 65,000	B
Clackamas	Pacific E.	Oregon City-Canby, Pav't. Resurf. & Widen.	400,000	13,000	413,000	A
Multnomah	Pacific	Interstate Bridge, Electrical Work	8,400	- -	8,400	C

Attest:

H. B. Glaisyer, Secretary

Approved:

R. H. Baldock, State Highway Engineer

Mayor Henry McKinney and City Attorney A. S. Grant, of the City of Baker, reappeared before the Commission at this time regarding their request for construction of the Dewey Avenue Undercrossing Project. They were informed by Chairman Banfield that the Commission had just passed a resolution approving construction of this project along with others and that the Engineer and the Chief Counsel have been authorized to proceed with the details.

The Engineer presented a request from the U.S. War Department that the State Highway Department conduct surveys as may be necessary in connection with the highway and county road relocation necessary around the Meridian Damsite, Lane County, which survey is to include all engineering necessary for final preparation of contract plans and specifications, but does not include engineering during actual construction operations. He estimated the cost involved at $76,500, which amount, he said, would be assumed by the War Department, which would reimburse the state in full. He recommended approval of the request. The Chief Counsel concurred. The Commission approved the recommendation by unanimous vote and thereupon signed an agreement with the U.S. War Department covering the matter.

The Chief Counsel brought up for discussion a proposed agreement with the U.S. Navy concerning the purchase of tickets for the transportation of Navy vehicles and passengers across the Columbia River at Astoria by state-owned ferries. He advised that the Navy is willing to pay 25 cents for each passenger and $1 for each car, but the proposed agreement is indefinite as to the number of each. The Navy wants to base it on its estimate of 400 passengers and 300 vehicles and reserves the right to obtain additional passages if ordered by the ordering officer. He gave as his thought that such a reservation is undesirable because there are possibilities that the privilege would be abused and suggested that the contract be revised by deleting the reservation. Following discussion the Commission referred the matter back to the Chief Counsel with instructions to negotiate such change.

The Engineer brought up for discussion a tentative plan for channelizing traffic along McLaughlin Boulevard (U.S. 99E) between Ross Island Bridge and the Milwaukie Avenue Viaduct, Portland, which necessitates widening the right of way 16 feet along the westerly side of this thoroughfare. He advised that the matter is mentioned at this time because a service station is being erected on a small triangular-shaped tract at the intersection of McLaughlin Boulevard and S.W. 8th Street, and if the Commission approves the channelization project, it would be necessary to acquire 16 feet along the frontage of this tract, which could be purchased much cheaper now than later on after the service station is completed and is in operation. The owner of the service station, he said, has agreed to deed a 16-foot strip to the state provided the state will acquire and deed to him abutting property owned by the Southern Pacific Company which will serve his purposes. This tract, he said, can be purchased from the railroad company for $1,000. He requested instructions. In the discussion that followed it was brought out that the Southern Pacific Company's tract is located in a residential zone and that one of the conditions of the exchange of properties is that the state assume the responsibility of securing a change in the zone classification so that the area could be used for commercial purposes. The Commission refused to assume

such responsibility because it would be a deviation from its established policy with respect to such matters and accordingly disapproved the project.

The Commission had under discussion the matter of raising salaries and wages of Highway Department employees in view of the increasing cost of living. Chairman Banfield asked the Chief Counsel whether or not, in his opinion, the new Civil Service Law supersedes the Chief Counsel's previous opinion that the State Highway Commission has the authority to fix the wages and salaries to be paid its employees. The Chief Counsel requested time to study the matter before replying. A general discussion of the matter followed, during which the Engineer presented and recommended for approval salary increases of $20 and $25 per month for employees in engineering classifications and an increase of $10 per month for all other employees in the Engineering Department. He also recommended an increase of six cents per hour for all employees who are paid on the hourly basis. The Chief Counsel presented and recommended a $20 per month increase for "key" employees in his Department and a $10 per month increase for remaining employees of that Department. After careful consideration the Commission approved the recommendations of the Engineer and the Chief Counsel and ordered that the increases be made effective as of June 1, 1946. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, by law the Highway Commission is charged with and there is imposed on the members thereof the duty to lay out, establish, construct, reconstruct and maintain a system of state highways and there is imposed a similar duty with respect to the acquisition, development and maintenance of state parks and recreational places; and

WHEREAS, by the same law there is imposed on the Commission a duty to cooperate with the Federal Government in all matters pertaining to the use and employment of funds made available to the State of Oregon by the Federal Government, which said cooperation often calls for and requires participation in the construction of highways which are parts of the federal highway system as well as of the state highway system; and

WHEREAS, in order to accomplish the functions of the Commission and discharge the trust imposed by legislative act, it is of vital importance that there be employed at all times a sufficient number of trained personnel; and

WHEREAS, for several years the salaries paid to all classes of highway employes, comprising not only professional service but unskilled labor, by private industry, federal agencies and the adjoining states of Washington and California are far in excess of the amounts or salaries paid by the State of Oregon for similar and like services; and

WHEREAS, the difference or differences in the rates of pay prevailing with the above named employing agencies as against similar rates of pay in the State of Oregon have become so marked as to invite and entice employes who have been in the service of the State of Oregon for many years; and

WHEREAS, it is the judgment of the Commission, after thorough study and investigati n and after consultation with the Budget Director, that circumstances and conditions warrant some increase in compensation to certain highway employes if the interests of the State are to be promoted and the highway construction program maintained without serious impairment.

NOW, THEREFORE, BE IT RESOLVED BY THE HIGHWAY COMMISSION, all members being present and voting affirmatively, as follows:

1. That the Commission does hereby recommend and approve, to be effective as of June 1, 1946, the following salary and wage schedules:

Members of Engineering Staff

Position	Adopted Scale	Present Scale	Approved rate effective June 1, 1946
State Highway Engineer		$600	
Asst. State Highway Engineer	$450-600	500

Right of Way Agent (Grade 2)	310	330
Real Property Office Men (Grade 3)	235	255

1946

2. All other monthly employes not included in the foregoing classifications shall receive a pay increase of $10.00 per month, and all hourly employes shall receive a pay increase of six cents per hour.

3. That this resolution be entered in the minutes and records of the Commission as of June 27, 1946, and shall be, until revised or otherwise modified by the Commission, the applicable wage and salary schedules for the classes of employment enumerated herein.

4. That this resolution be submitted to the Budget Director for final approval.

The Commission also discussed the advisability of raising the minimum salaries to be paid by contractors in connection with state highway contract work. The Engineer advised that the present minimum rate of pay is 85 cents per hour for unskilled labor, $1 and $1.15 per hour for intermediate labor, and $1.25 per hour for skilled labor. He recommended a 15-cent-per-hour increase in each classification, which would provide a minimum wage of $1 per hour for unskilled labor, $1.15 and $1.30 per hour for intermediate labor, and $1.40 per hour for skilled labor. The Commission approved the recommendation by unanimous vote, and so ordered.

The Commission considered and signed agreements, etc., as follows:

Agreement with Clatsop County covering abandonment of a portion of the old right of way of the Astoria Naval Base Section of the Nehalem Secondary Highway.

Agreement with U.S. War Department covering the making of surveys for the relocation of highways and roads around the Meridian Damsite.

Agreement with the U.S. Forest Service covering construction of a bridge across Salt Creek opposite M.P. 49.16 on the Willamette Highway, Lane County, one end of which encroaches on the highway right of way.

Agreement with the City of Hillsboro providing for installation of traffic signals at several street intersections with the Tualatin Valley Highway.

Agreement with Oregon Electric Railway Company covering the Sunset Highway undercrossing of the Oregon Electric Railway Company near Merle, Washington County.

Permit granting to the Bonneville Power Administration authority, revokable at will, to maintain a roadway across a state-owned stockpile site in the NW¼ NW¼, Sec. 15, T. 11 S, R. 8 W, W. M., Lincoln County.

Easement agreement with Alfred Marolt and wife providing for use of a temporary roadway on property owned by the Marolts for detour purposes during construction of the Stillwell Bridge over the Trask River, Tillamook County.

"Special Release" releasing the U.S. Navy of further obligation in connection with its use of state-city-owned property bounded by S. W. Salmon Street, S. W. Harbor Drive, S.W. Main Street, and S. W. Front Avenue, Portland.

"Relinquishment of Easement" canceling the rights acquired by the state of an easement of right of way 30 feet wide for a hauling road across lands platted as Marion Acres, in Douglas County.

Lease granting to the Department of Commerce permission to maintain an airways beacon on Sand Island in the Columbia River, which island the state is now acquiring from P. J. McGowan and Sons.

Permit from the U.S. Indian Service allowing the taking of gravel from Indian Lands in $SE\frac{1}{4}$ $SE\frac{1}{4}$, Sec. 19, T. 8 S, R. 11 E, W.M., Wasco County, allotted to Senetee.

Permit from the U.S. Indian Service permitting the taking of sand and gravel from Indian Lands in the $SW\frac{1}{4}$ $SW\frac{1}{4}$, Sec. 20, T.8 S, R. 11 E, W.M., Wasco County, allotted to Elsie Simtusus Holliquilla Jacobs.

"Consent to Vacate" certain streets in Fahrenback's Addition to the City of Baker.

Bargain and sale deed conveying unto Dorothy E. Hafner the south half of Lot 10 and the north half of Lot 11 in Block 17, Seal Rock Beach Addition to Cannon Beach.

Bargain and sale deed conveying unto John T. Conchuratt Lots 15 and 16 of Block 17, Seal Rock Beach Addition to Cannon Beach.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Schlappi
Commissioner

Secretary

M. M. Thurman
Commissioner

Portland, Oregon
August 6, 1946

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

GARDNER RANCH-BERGER RANCH SECTION

Lockyear & Lockyear, Seattle, Wn. $ 53,728.50

The Commission by unanimous vote approved the minutes of the meeting held on June 25, 26, and 27, 1946.

The State Parks Superintendent was present and reported on the following matters:

1. Agreement with A. J. Sweet regarding the preservation of myrtle wayside strips along the Oregon Coast Highway between Coquille and Bandon: The Commission deferred its approval of this agreement pending inspection of the premises. Such inspection is to be made during the progress of the Commission's trip through Southern Oregon starting August 19, if time will permit.

2. Future use of residence building in Cape Arago State Park: The Commission deferred a decision in this matter pending inspection of the property, which inspection is to be made, if possible, during the progress of its Southern Oregon trip starting August 19.

3. Public attendance in state parks: The Parks Superintendent presented a brief oral report on this matter. The Commission took no action thereon, however, ordered that such report be made in writing.

4. Offer of Union County Court to present to the state as a gift tract of land known as "Collins Park" situate on the Union-Medical Springs Secondary Highway. The Secretary read aloud the County Court's offer. The Engineer advised that the park is a very beautiful place, having been developed for a long time. He suggested that perhaps the Commission would prefer to view the park before taking action. The Commission approved the suggestion and decided to inspect the park during the progress of its trip through Eastern Oregon in September.

5. Exchange of properties in Recreational Development Project area: The Parks Superintendent advised that President Truman vetoed a bill passed by Congress providing for an exchange of properties within the boundaries of the Silver Creek Falls R. D. P. He advised that he is not particularly concerned in this matter but considered it best to bring it to the attention of the Commission because of the press releases concerning it. The Commission took no action.

6. "Daylighting" Upper Columbia River Highway: The Parks Superintendent rendered a status report as to what is being accomplished by a crew in his employ in the "daylighting" of the Upper Columbia River Highway between Crown Point and the slide area east of Multnomah Falls

so as to permit scenic views of the Columbia River from the highway. The Commission approved the report.

7. Proposed state park acquisition at Wallowa Lake: The Commission's Chief Counsel reported on this matter on behalf of the Parks Superintendent. He advised that one of the tracts being considered is under condemnation and that satisfactory options have been received from the owners of the three remaining tracts. These owners, he said, are anxious to know whether or not the State Highway Commission intends to acquire their properties regardless of the outcome of the condemnation suit. The Parks Superintendent recommended purchase of these three tracts as a start in the acquisition of this park area, notwithstanding the final decision that may be reached with regard to the Williamson tract, which is under condemnation. Following considerable discussion of this matter the Commission decided to defer final action pending the results of the condemnation suit.

8. Agreement with U.S. of America, Department of Agriculture, relative to the use of certain Federal lands within the Central Oregon Grazing Project: There was submitted to the Commission an amendment to the original agreement executed by the Commission on December 20, 1939. The amendment has to do with the annual income and revenue derived from the property. The matter was referred to the Chief Counsel for recommendation. (The Commission approved and signed the agreement on the following day upon the recommendation of the Chief Counsel).

The Assistant Counsel requested instructions relative to the disposition of two buildings on state highway right of way at Eugene. He advised that the buildings were badly damaged by fire a few days ago, and, according to reports, the expense to repair them is not justified, particularly because the right of way will be needed in the not distant future in connection with construction of the highway. He pointed out that no private insurance is carried on the buildings and that it would not be possible to secure any benefits from the State Restoration Fund unless the buildings were restored to their original condition. The Commission decided unanimously not to repair the buildings. The Chief Counsel was instructed to ascertain whether or not it would be possible to secure a special concession from the State Board of Control which would allow the State Highway Department payment for losses of this nature notwithstanding that the property destroyed is not restored.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for the various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of each item the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Foot Note:

* Item No. 12984, acquisition of a quarry and hauling road from Farmer and Loris Hale in connection with the improvement of the Walton-Veneta Section of the Route "F" Highway, Lane County: The Assistant Counsel gave as his thought that this property could be purchased outright from the owners for the sum of $3,500. It was the considered thought of the Commission that the property should be owned by the state rather than leased, whereupon the Commission, by unanimous vote, approved purchase of the property for the sum mentioned by the Assistant Counsel with the understanding that if it cannot be purchased, then the property is to be leased on the royalty basis mentioned in the resolution.

The Assistant Counsel also requested authority to institute condemnation proceedings to acquire additional properties that are needed for various highway improvements, concerning which he has been unable to reach satisfactory settlements by negotiation. He submitted a list of such properties together with offers that he recommended for condemnation as follows:

			Recommended Offer
COVE-UNION SECTION OF THE COVE SECONDARY HIGHWAY			
12708-A-- (Right of Way)			
2.43 acres at $125.00	$ 303.75

4.14 acres	$ 1,000.00	- - -

After careful consideration of each item the Commission approved the request and the recommended offers and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already

established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Theodore Dichter, et ux., which property is located in the south half ($S\frac{1}{2}$) of Section 19 and the north half ($N\frac{1}{2}$) of Section 30, Township 3 South, Range 40 East, W. M., Union County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 12708A, which property is being acquired for right of way purposes in connection with the Cove Secondary Highway; (*)

Real property owned by Wm. Curteman, which property is located in the east half ($E\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 7, Township 4 South, Range 40 East, W. M., Union County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 12717, which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Cove Secondary Highway; (*)

Real property owned by Stanley Augustyn, which property is located in the southwest quarter (SW¼) of Section 5, Township 19 South, Range 44 East, W. M., Malheur County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 12758, which property is being acquired for right of way purposes in connection with the Vale-West Secondary Highway; (*)

Real property owned by Theron C. Hoover, et al., which property is located in the northwest quarter (NW¼) of the northwest quarter (NW¼) of Section 17 and the northeast quarter (NE¼) of the northeast quarter (NE¼) of Section 18, Township 10 South, Range 6 East, W. M., Marion County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 12548, which property is being acquired for right of way purposes in connection with the North Santiam Highway; (*)

Real property owned by Louis Hillman Bell, which property is located in the northeast quarter (NE¼) of Section 23 and the northwest quarter (NW¼) of Section 24, Township 27 South, Range 5 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 12855, which property is being acquired for right of way purposes in connection with the North Umpqua Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

Foot Note: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 66, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, the Highway Commission on the 14th day of May, 1945, adopted a resolution authorizing the acquisition for right of way purposes of certain real property owned by and in the possession of the John C. Bechen Estate, which real property was described in said resolution; and

WHEREAS, since said action it has been found necessary that there be acquired from said owner additional land to be used for drainage purposes in connection with the construction and maintenance of the Sunset Highway; and

WHEREAS, the Commission does now find and declare that the real property hereinafter described is required and is necessary for use in connection with the permanent construction, improvement, and maintenance of said highway, and particularly for drainage purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the parcel of real property hereinafter described is necessary and is needed for and in connection with the construction of the Sunset Highway, said real property being described as follows, to wit:

A parcel of land lying in the John S. White D. L. C. No. 51 in Section 23, Township 1 North, Range 2 West, W. M., Washington County, Oregon; said parcel being described as follows:

Beginning at the intersection of the east line of the Oregon Electric Railroad right of way and the south line of the John S. White D. L. C., said point being 1621.9 feet South 79° 36' East of the southwest corner of said D. L. C.; thence North 1° 14' East along said east right of way line a distance of 353.93 feet to a line which is 170 feet southerly from and parallel to the center line of the Sunset Highway (formerly Wolf Creek Highway); thence South 61° 47' East parallel to said center line a distance of 1141.97 feet to the south line of said D. L. C.; thence North 79° 36' West along said south line 1030.82 feet to the point of beginning; containing 4.14 acres.

2. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and, in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

3. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

4. This resolution shall be entered in full in the minutes and records of this Commission.

The Chief Counsel requested instructions regarding the payment of a drainage district assessment on right of way which is being purchased for the Upper Columbia River Highway at Troutdale. He advised that the property owners cannot escape payment of the assessment and recommended payment of the same with the understanding that an endeavor will be made later to seek relief from the payment of future assessments. The Commission approved the recommendation unanimously.

The Assistant Counsel presented an offer from the Bunting Tractor Company, La Grande, to purchase for the sum of $200 state-owned property situate in Block 25, Williamson's Addition to La Grande, for use in connection with construction of a modern plant for the sale and service of heavy construction equipment. The Engineer advised that the property is of no value for state highway purposes and recommended approval of the sale at the price quoted on the condition the the Company will provide off-street parking for vehicles adjacent to its buildings. The Commission approved the recommendation by unanimous vote. (A deed of conveyance was signed by the Commission on the following day.)

The Assistant Counsel requested instructions regarding payment of the claim of A. H. Thompson for damages resulting from construction of the Steiwer Hill-Santiam River Section of the Pacific Highway East, Marion County. He advised that the option secured from Mr. Thompson provided for payment for loss of crop; also, that Mr. Thompson planted the area taken by the state, but construction of the highway was begun before his crop was harvested, and as a result he suffered damages in the amount of $492.50, of which amount the sum of $240 previously was paid, leaving a balance now due of $252.50. The Chief Counsel advised the Commission that it is obligated to pay this sum. The Commission approved payment of the claim unanimously.

The Assistant Counsel requested instructions regarding the purchase of private insurance covering an old hotel building acquired jointly by the state and the City of Portland from James Faturos in connection with a right of way settlement on the Front Avenue Project, in Portland. He advised that the building presently is covered by two insurance policies with a co-insurance clause, one of which has expired. It was his thought that the building should be insured under one policy in the amount of $10,000, and he recommended cancellation of existing policies and purchase of a single one in such amount. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to a proposed assignment by Victor Chambers, Cottage Grove, only heir of J. H. Chambers, Deceased, to W. H. Daugherty, Cottage Grove, of his interests in a certain easement agreement executed by the State Highway Commission and Mr. J. H. Chambers on May 23,

1941, covering the right to construct and maintain a spur railroad track over certain state-owned property in Cottage Grove. The Chief Counsel advised that the former Highway Commission entered into an easement agreement with Mr. J. H. Chambers on the above-mentioned date. It appears now, he said, that Mr. Victor Chambers, who is the only heir to the J. H. Chambers Estate, has sold his interests to Mr. Daugherty, so it would be quite in order for the Highway Commission to consent to the transfer of interests if it so desires. He so recommended. The Commission approved the recommendation. (The "Consent" to the assignment was signed by the Commission the following day.)

The Commission discussed a request from a Garden Club of Aloha for permission to landscape a small triangular-shaped tract of state-owned land situate between the Tualatin Valley Highway and the Southern Pacific Railroad in the town of Aloha, as a memorial to boys of this town who lost their lives during World War II. The Chief Counsel, who brought the matter up, recommended approval of the request. The Engineer suggested that the matter first be passed on by the State Parks Superintendent, who is in charge of roadside development. The Commission indicated its approval but deferred definite action pending inspection and recommendation by the Parks Superintendent.

The Commission recessed for luncheon at 12 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Chief Counsel brought up for discussion the state's claim against Sills Truck Service and Consolidated Freightways for damage to a rock wall guard rail on the Columbia River Highway at M. P. 27.50. He explained that the guard rail was damaged as a result of a collision between trucks owned by these two companies and that repairs cost the sum of $376.71, which the owners of the vehicles involved have not paid. He requested authority to institute suit to collect on the claim in the event it is not paid in the near future. The Commission approved the request unanimously.

The Chief Counsel also brought up for discussion the state's claim against DeWalt Houk and The Coastal Lumber Co. for damages to Ft. Hill Bridge on the Salmon River Highway near Valley Junction. He advised that the original claim was in the amount of $2,100, but the amount is disputed by the company which carried the insurance on the truck that did the damage; however, indications are that the company will pay $1,800 as settlement in full. Following discussion motion was made by Commissioner Schaupp that settlement in the amount of $1,800 be accepted. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. (The Chief Counsel reported on the following day receipt of information from the insurance company to the effect that it would pay $1,800 as settlement in full for this claim.)

The Chief Counsel reported the status of the proposed contract with Mr. Walter S. Taylor covering concession privileges at Silver Creek Falls State Park. He advised that, because of complications, difficulties in securing equipment, etc., Mr. Taylor has been unable to meet the Commission's requirements. He suggested, in view thereof, that the contract be cancelled and that Mr. Taylor be relieved of his obligation with regard thereto; also,

that the deposit that he made with his bid for the purchase of the concession be returned to him without deduction. The Commission approved the suggestion and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore, in an effort to find a competent party or parties to take over and operate the concession at Silver Creek Falls, issued a call for competitive bids; and

WHEREAS, among other bids submitted was the bid of Walter S. Taylor, whose bid was deemed by the Commission the best and most satisfactory bid, and said bid was therefore accepted; and

WHEREAS, subsequent to the said call for and receipt of bids, facts have been disclosed and conditions have developed which indicate that neither the State nor the said Walter S. Taylor can procure the equipment necessary for the operation and furnishing of the service needed at said place; and

WHEREAS, because of the conditions over which neither the bidder nor the State has control, it is deemed best that the transaction be abandoned and the bidder released from his obligation, his bid bond returned, and that the bidder release the State from any obligation and liability of any kind or character;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. That the Commission's Counsel be and he hereby is instructed to prepare an appropriate instrument by which the State shall release Walter S. Taylor of any obligation with respect to his said bid and that his bid bond be returned.

2. That Walter S. Taylor release the State from any and all claims of every kind and character growing out of or resulting because of his bid submitted and its acceptance by the State.

3. That this resolution be entered in the minutes and records of the Commission.

The Chief Counsel reported on an accident involving State Highway equipment which occurred on one of the streets in Astoria resulted in damage to the state's car necessitating repairs costing $102.12. He advised that the state's car collided with one privately-owned and that the accident occurred, according to reports, because of icy pavement. The company that carried the insurance on the other party's car denies liability and refuses to pay the claim. He gave as his opinion, under the circumstances, that the state could not recover were it to resort to litigation, and he recommended that the claim be dropped unless the other party presses a claim against the state. The Commission approved the recommendation.

The Commission discussed the matter of acquiring rights of access to state highways in connection with right of way negotiations, as suggested by the Chief Counsel in his letter to the Commission dated July 29, 1946. Chairman Banfield gave as his thought that the Commission previously had adopted a general policy with regard to such matter and suggested that such policy be continued in future right of way negotiations, including the provision that no access for commercial purposes be allowed except as may be agreed upon between the Highway Commission and the property owners. The Chief Counsel read aloud the Commission's resolution of October 30, 1945, covering this feature with respect to certain state highways, following which Chairman Banfield declared that it is the desire of the Commission to secure "freeways" wherever possible regardless of the limitations set forth in the resolution; however, common sense should be used in negotiating for them. Commissioners Schaupp and Chessman concurred.

In this connection the Engineer suggested the adoption of a "system of limited access highways" and presented a map showing a recommended system for the Commission's consideration. Action on this matter was deferred by the Commission for further study.

The Commission ordered that hereafter, in submitting requests for authority to conduct surveys, there shall be incorporated therein information concerning the "freeway" feature, if that has not previously been decided by action of the Commission. The Secretary was instructed hereafter to check such requests and other material, including construction data, maps, etc., against the original records of the Commission and to ascertain if they vary therefrom in any respect--in the event changes or alterations in the Commission's original authorization are contemplated, then the Secretary shall bring such changes to the attention of the members of the Commission by letter and shall present them to the Commission for discussion at its next regular meeting. If the Commission approves the changes, such approval shall be by appropriate resolution, using the same procedure and formality that was used in the adoption of the original authorization.

The Chief Counsel requested instructions relative to the Commission's claim against W. M. Shiffer, Hood River, for removal of a quantity of crushed rock maintenance material from a stockpile at M. P. 5.71 on the Hood River Secondary Highway. He advised that, according to reports, Mr. Shiffer took approximately 12 yards of material for use in constructing a driveway to his residence nearby, whereas Mr. Shiffer, upon being contacted, admitted removal of only two yards of material. This material, he stated, is valued at $2.09 a cubic yard, making a total amount of approximately $25.08 due from Mr. Shiffer. The Commission, following discussion, considered it advisable to prosecute this man and instructed the Chief Counsel accordingly.

The Chief Counsel also requested instructions relative to the Commission's claim against Mr. Dave Levander, Joseph, Oregon, for the theft of some snow fence materials which he appropriated for his own private use. He advised that, according to a report from George M. Rogers, State Police Sergeant, Mr. Levander admitted taking the fence material but stated that he intended to return it this fall. The question arises now, he said, whether

or not the man should be prosecuted for a criminal offense. The Commission decided the man should be prosecuted and so ordered.

The Commission by unanimous vote adopted the following resolution relative to the appointment of Mr. G. W. Neuner to serve as the Commission's Assistant Counsel:

> WHEREAS, the Commission's Counsel has recommended the employment of G. W. Neuner to serve as an Assistant Counsel and that the compensation be $385.00 a month, plus the increase of $20.00 a month recently approved by the Commission;
>
> NOW, THEREFORE, the Commission's Counsel is authorized to employ G. W. Neuner to serve as Assistant Counsel to the Commission and that his compensation, until otherwise changed by order of the Commission, shall be the sum of $405.00 per month.

The Engineer reported results of investigations for an historical marker designating the Old Barlow Road on Mt. Hood as requested by the Old Oregon Trail Association. He advised that the location suggested by the Association on the Mt. Hood Highway at Laurel Hill overlooking Yocum Falls is entirely satisfactory and recommended approval of the same by the Commission and that he be authorized to erect a suitable marker, which he estimated would cost about $250, installed. The Commission approved the report and authorized the erection of the marker as recommended.

A letter was presented from Northwest Fabricators, Inc., Albany, Oregon, requesting the privilege of taking water from Waverly Lake, Albany, to fill its sawmill pond nearby and to maintain a constant water level in the pond. The Engineer advised that careful examination of the situation reveals that there is not enough water flowing through the lake to handle evaporation and to furnish the Nebergall Meat Company one second foot of water for which it has a prior right. He real aloud a letter from the Northwest Fabricators, Inc. and his reply thereto and recommended denial of the request. Following discussion, during which the Commission expressed its desire to preserve Waverly Lake, the Commission denied the request. The matter was referred by the Commission to the Chief Counsel for further handling.

The Engineer reported an inquiry from the Coos Bay Lumber Company whether or not the State Highway Commission would have objections to the company dumping logs into the Middle Fork of the Coquille River near the town of Remote and floating them down the river to Coquille by means of flash dams. He pointed out that a similar procedure was followed some 15 years ago which resulted in damage to the highway and gave as his thought that the company should not be permitted to move its logs in such manner if it can be prevented. On the other hand, if the company proceeds with its plan, then every precaution should be taken by the State Highway Department to protect the highway, including the taking of pictures before and after operations

begin so that pictorial evidence will be available in the event that damage occurs and difficulties are encountered in securing reimbursement for repair expense. He quoted the Commission's Chief Counsel to the effect that, in his estimation, the control of the logging operations is more of a matter for the State Fish Commission to decide than for the State Highway Commission. The Commission concurred in the viewpoint of the Engineer and thereupon referred the matter to the Chief Counsel to handle legally and to protect the Highway Commission's rights and authority with respect to the highway. The Chief Counsel was authorized to appear before the Fish Commission, if necessary, to accomplish such objective.

The Engineer reported an agreement reached with log haulers and others interested in the truck hauling of logs over the Mt. Hood Highway from Barlow Pass to the City of Hood River, which agreement provides for the transportation of logs over this highway under certain conditions during certain hours of the day and free use of the highway by the general public during other periods. (See report in general files for details) The Commission approved the report, thus confirming the telephonic authority heretofore given the Engineer by the Commission to approve such solution to the problem.

In this connection the Engineer also reported that some of the log haulers are making a sincere effort to comply with the rules and regulations, but it appears that one hauler, by the name of Louis Zeman, is not paying much regard to or respect for the rules and has been observed on a number of occasions transporting logs over this highway in direct violation of the prescribed rules. The Commission ordered that this hauler be given a warning that if he does not comply with the rules his permit will be cancelled and he will not be permitted the use of the highway thereafter.

The question arose as to the duties of the deputy sheriffs who, according to the agreement, have been assigned to protect travel on the highway during the time logging operations are under way. The Commission ordered that the agreement with the log haulers be modified to provide that the duties of the deputy sheriffs shall be to protect the entire traveling public rather than log haulers only. The Engineer was instructed to see to it that the deputy sheriffs receive instructions to that effect.

The Engineer brought to the Commission's attention a number of log-hauling violations committed by operators in the employ of Ernest Organ, logging contractor, John Day, Oregon, the particular violation being the transportation of loads of greater width and height than is permitted by law. He advised that Mr. Organ has been warned several times to keep loads within the legal limits, but the warnings appear to be of no avail, as the violations continue, the principal offender being an operator named Eugene Arthur Negus. In this connection a letter was presented from Mr. Organ admitting neglect in loading his equipment and stating that hereafter more care will be taken so that the loads will comply with the requirements. Following discussion, the Secretary was instructed to again warn Mr. Organ that any further violations will result in the cancellation of his P.U.C. permit.

The Commission had under discussion a written offer from the City of Gresham regarding the proposed widening and pavement resurfacing project on the West Gresham Section of the Mt. Hood Highway, bids for which were received at this meeting, wherein the city agrees to cooperate with the Commission by doing certain things and contributing certain funds toward the cost of the work. (See "Option for Cooperative Construction Project" filed in Contract No. 2826) The Commission's Chief Counsel advised that he has examined this offer and is of the opinion that it meets the understanding previously had with the city on this subject. The Commission thereupon accepted the offer by unanimous vote.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work and took the following action thereon by unanimous vote:

Contracts for the following projects were awarded to the low bidder in each instance: Wren Rock Production Project on three state highways, in Benton and Lincoln Counties, E. C. Swaggart, Eugene, low bidder; widening and paving the Dixonville-Marks Ranch Section of the North Umpqua County Road, in Douglas County, J. C. Compton Co., McMinnville, low bidder; pavement resurfacing on the Sandy Boulevard (12th Ave. - 44th Ave.) Section of the Columbia River Highway, in Portland, Porter W. Yett, Portland, low bidder; widening and paving the West Gresham Section of the Mt. Hood Highway, in Multnomah County, Porter W. Yett, Portland, low bidder.

Bids received for the following projects were referred by the Commission to the Engineer with authority to award the contract to the low bidder in each instance when certain conditions have been satisfied: Regrading, surfacing and oiling Cline Falls-Tumalo Section of the Cline Falls Secondary Highway, Deschutes County, T. W. Thomas, low bidder; regrading, surfacing, and oiling Tumalo-Deschutes Section of the Tumalo-Deschutes Secondary Highway, Deschutes County, T. W. Thomas, low bidder.

The Commission decided to hold for further study all bids received for the grading and topping of the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County, and for grading and construction of bridges on the Glendale Junction-Wolf Creek Section of the Pacific Highway, in Douglas and Josephine Counties. Announcement of the disposition of bids is to be made within 30 days.

The Commission rejected the one bid received for the County Road Grade Separation Project at Merle on the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County.

No bids were received by the Commission for the Merle Railroad Grade Separation Project on the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County, or for the furnishing and placing of topsoil cover material on the Front Avenue (Alder Street-Sheridan Street) Section of the Pacific Highway West, in Multnomah County.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Wren Rock Production Project on three state highways in Benton and Lincoln Counties. The Commission received two bids for this project, the low one being that of E. C. Swaggart, Eugene, at $30,562.50. The other bid was submitted by J. N. & M. J. Conley, Portland, at $32,107.50. The contract has been awarded to the low bidder, E. C. Swaggart.

"Regrading, surfacing, and oiling the Cline Falls-Tumalo Section of the Cline Falls Secondary Highway, Deschutes County. T. W. Thomas, Portland, submitted the low bid for this work at $123,321.50. Halvorson Construction Co. and H. Halvorson, Salem, submitted the next low bid at $136,821.50. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, T. W. Thomas, when certain conditions have been satisfied.

"Regrading, surfacing, and oiling the Tumalo-Deschutes Section of the Tumalo-Deschutes Secondary Highway, Deschutes County. The low bidder for this work was T. W. Thomas, Portland at $64,217.50. The next low bidder was Del R. Beebe Construction Co., Eugene, at $69,522. There were five higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, T. W. Thomas, when certain conditions have been satisfied.

"Highway widening and paving on the Dixonville-Marks Ranch Section of the North Umpqua County Road, Douglas County. J. C. Compton Co., McMinnville, submitted the low bid for this work at $243,791. The only other bid was submitted by Warren Northwest, Inc., Portland, at $276,422.50. The Commission has awarded the contract to the low bidder, J. C. Compton Co., at its bid price.

"Grading and topping on the Johns-Glendale Junction Section of the Pacific Highway, Douglas County. The low bid for this work was submitted by R. A. Heintz Construction at $299,478.50. McNutt Bros., Eugene, submitted the next low bid at $310,292.50. There were two higher bids. The Commission has deferred the award of this contract pending further study but will announce its decision within the next 30 days.

"Grading and bridge construction on the Glendale Junction-Wolf Creek Section of the Pacific Highway, Douglas and Josephine Counties. McNutt Bros., Eugene, submitted the low bid for this work in the amount of $877,031. Guy F. Atkinson Co., Portland, submitted the next low bid at $884,962. There were two higher bidders. The award of this contract has been deferred by the Commission pending further study; however, the disposition of the bids will be announced within the next 30 days.

"Furnishing and placing topsoil covering material on the Front Avenue (Alder Street-Sheridan Street, Portland) Section of the Pacific Highway West, Multnomah County. The Commission received no bids for this work.

"Pavement resurfacing on Sandy Boulevard (12th Ave. - 44th Ave., Portland) Section of the Columbia River Highway, Multnomah County. The Commission received two bids for this work, the low one being submitted by Porter W. Yett, Portland, at $34,735. The other bid was submitted by Parker-Schram Co., Portland, in the amount of $35,925. The contract has been awarded to the low bidder, Porter W. Yett, at his bid price.

"Highway widening and paving on the West Gresham Section of the Mt. Hood Highway, in Multnomah County. Porter W. Yett, Portland, submitted the low bid for this work in the amount of $78,977.50. The only other bid was submitted by Parker-Schram Co., Portland, at $79,977.50. The contract has been awarded to the low bidder, Porter W. Yett, at his bid price.

"Construction of the Merle Grade Separation Project at Merle on the Gardner Ranch-Berger Ranch Section of the Sunset Highway in Washington County. The Commission received no bids for this work.

"Construction of a County Road Grade Separation Project at Merle on the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County. The Commission received one bid for this work being that of Lockyear & Lockyear, Seattle, Washington, in the amount of $53,728.50. The bid has been rejected."

The Engineer reported the results of the taking of bids in Salem on July 29, 1946, for the sale of state-owned property in the town of Reedsport and for the sale of "down" timber in Van Duzer Corridor along the Salmon River Highway in Tillamook County, as follows:

SALE OF LAND IN REEDSPORT

Item No. 1, Fractional Lot 16, Block 80

Roy G. Cairns, Reedsport	$ 110.00
James W. Ford Jr., Gardiner	55.00
Russel J. Hubbard, Reedsport	30.00

Item No. 2, Fractional Lots 1 to 6, Block 1

Russel J. Hubbard, Reedsport	$ 821.00
Roy G. Cairns, Reedsport	130.00
James W. Ford Jr., Gardiner	105.00

Item No. 3, Fractional Lots 1, 2 & 3, Block 2

Russel J. Hubbard, Reedsport	$ 80.00
Roy G. Cairns, Reedsport	50.00

Item No. 4, Fractional Lots 4, 5 & 6, Block 2

Russel J. Hubbard, Reedsport	$ 230.00
Roy G. Cairns, Reedsport	25.00

(Con't)

SALE OF LAND IN REEDSPORT (Con't)

Item No. 5, Fractional Lot 4, Block 5

Russel J. Hubbard, Reedsport	$ 40.00
Roy G. Cairns, Reedsport	25.00

SALE OF DOWN TIMBER ON
SALMON RIVER HIGHWAY IN TILLAMOOK COUNTY

No bids received

The Engineer recommended rejection of all bids received. The Chief Counsel concurred in the recommendation, however, added that the City of Reedsport is desirous of having some control over the property so as to prevent "spot" zoning. Commissioner Schaupp suggested that it would be proper to cooperate with the city in this matter, whereupon the Commission, by unanimous vote, rejected the bids and referred the matter to the Chief Counsel to discuss with the city officials. He is to report back to the Commission the results of the conference.

The Engineer reported on a request from the Seaside City Council for the installation of a traffic signal at the junction of the Oregon Coast Highway and Roosevelt Drive near the north city limits. He advised that the matter has been very carefully studied by the Acting Traffic Engineer who recommends against the installation of the signal, but who also recommends, as an alternate plan of treatment, the channelization of traffic at this point which would cost approximately $400. The Engineer advised that he concurs in this recommendation. Following discussion the Commission approved the recommendation by unanimous vote as a trial proposition.

The Engineer reported on a plan of traffic control for the prevention of accidents on the Astor St. - Taylor Ave. Section of the Oregon Coast Highway, Astoria, which plan provides for the installation of a median strip with handrail fence to prevent cross travel. The Astoria City Council, he said, at one time tentatively approved the project, and it was his intention to include the work in a contract for which bids are to be received in September, but objections to such type of construction have been filed with the City Council by the West End Development League of Astoria, in view of which the city has gone on record against this feature of the improvement pending further study. He inquired as to the wishes of the Highway Commission in the matter and asked for instructions whether or not to proceed with the advertising of the work in conjunction with the other project. Commissioner Chessman advised that the City of Astoria for several years has been trying to get something done to prevent accidents along this thoroughfare. He suggested, in view of the circumstances, that the responsibility for safeguarding the public should be placed directly with the City Council. The Chief Counsel gave as his opinion that the Commission should not proceed with the traffic control work unless the city adopts an ordinance approving the plan for the same.

AUG 6 1946

The matter was discussed at considerable length, and as a result thereof, the Commission authorized the advertising of the traffic control project along with the adjacent Federal Aid widening project, alternate bids to be received both with and without the traffic control section. If the City of Astoria, in the meantime, approves the traffic control project, then the Commission will consider the award of the contract on the basis of the alternate bid that includes such project.

The Engineer reported the results of investigations relative to the proposed bridge across the Willamette River at Independence. He exhibited a map showing the alternate routes investigated and explained the details of each. He suggested adoption of a site a short distance upstream from the present ferry crossing where it is feasible to construct a new road approach from the Marion County side where it would be least affected by flood waters. He advised that the people of Independence do not object to such location, but the county courts have not expressed themselves relative thereto. He estimated the cost of the structure, based on present-day conditions, at $640,000, which is some $40,000 in excess of his previous estimate, and advised that, according to a previous understanding, this expense would be paid 50 percent by the state and 50 percent by both counties, each county to pay one half of such share. Marion County, he said, will pay its share of the cost in one lump sum; however, Polk County wants to stretch its payment out over a period of 12 years by assigning a portion of the monies that it receives annually from state highway revenues. He suggested that the counties should pass resolutions adopting the recommended location, following which the definite location survey should be authorized, then a three-party agreement should be prepared covering the matter of payment of costs. Chairman Banfield gave as his thought that a survey should not be undertaken unless and until there is a meeting of minds with respect to the location and the total expense involved. Following further discussion the Commission ordered preparation of an agreement covering the entire matter, it being understood that when this is executed by all parties the Commission will authorize the making of necessary surveys. The Chief Counsel and the Engineer were instructed to proceed on such basis and report back to the Commission.

The Engineer reported on a request from the City of Sandy for the oiling of First Street from Main Street to Proctor Street which is being damaged by log-hauling traffic. The Engineer advised that this particular block will be the new route of the Woodburn-Sandy Secondary Highway when this highway is improved which improvement is scheduled for the second postwar year's undertaking. In view of this report, the Commission instructed the Secretary to inform the city that the state cannot immediately do what it asks but will give consideration to the project in the construction program for the second postwar year.

A letter was presented from Theron R. Howser, Secretary of the Portland City Planning Commission regarding a proposed highway that will by-pass the City of Portland and extend northerly from a connection with the Pacific Highway West at some point near Tigard to a connection with the Sunset Highway near the Commonwealth Inc. subdivision, and ultimately will connect with the Lower Columbia River Highway through Cornelius Pass. Mr. Howser desires information concerning such highway for use in connection with the Planning Commission's studies for the control of subdivisions in this

district. The Engineer exhibited a map showing the proposed highway alignment and its proximity to the large subdivisions that are being developed west of Portland. He recalled that the Commission some time ago had this matter under discussion but turned it down, but he considered it advisable to bring it to the Commission's attention again because of Mr. Howser's letter and because, in his estimation, the idea is a good one. He suggested, if the Commission approves the project, that a survey be authorized to determine a definite location for the road. Chairman Banfield gave as his opinion that, if anything is done at all the highway should skirt the Commonwealth and Kaiser developments in order to avoid future conflicts. Commissioner Schaupp declared that he is not in favor of the road. Commissioner Chessman gave as his thought that the road will have to be built some time. The Engineer estimated the cost of a reconnaissance survey to determine the approximate location at about $1,000. The Assistant Counsel estimated that it would cost about $200 to appraise the right of way. Chairman Banfield expressed himself in favor of the expenditure of $1,200 to secure a rough estimate of what is needed without any obligation whatsoever to do more. Commissioners Schaupp and Chessman also approved such expenditure and it was so ordered.

Consideration was given by the Commission to a request from the Aurora School Board and the Aurora Lutheran Brotherhood for sidewalk construction along the Beaverton-Aurora Secondary Highway from the town of Aurora to the Aurora Public School, a distance of about 0.4 mile, for the benefit and safety of school children. The Engineer suggested, in view of the many requests for projects of this kind, that the Commission might wish to budget a certain sum annually for such purpose and construct each year those projects which have the highest merit rating. He suggested a budget of $50,000. The Commission deferred action on the entire matter pending the establishment of a policy with respect thereto.

The Engineer reported on a request from the City of Willamina for the paving of the shoulders adjacent to the Salmon River Highway along Main Street through this town. He estimated the cost of the improvement, including storm drain, curbs, and pavement, at $36,300. The Commission denied the request.

A petition was presented from residents of Glendale and vicinity urging reconstruction of the Pacific Highway along the present location through the agricultural area between Stage Road Pass and Canyon Creek Pass, Douglas County, rather than on the proposed new alignment. The Commission deferred action on this matter for the time being. The location is to be inspected during the Commission's inspection trip through southern Oregon later in the month.

The Engineer reported that the Willamette National Lumber Company is erecting a large mill adjacent to the Santiam Highway east of the town of Foster and in connection therewith is constructing a railroad spur track which crosses the highway. This matter, he said, has been before the Public Utilities Commissioner, who has made an order which provides that the state highway shall be depressed under the railroad at this point to avoid a grade crossing, and also provides that the State Highway Department shall surface and oil the reconstructed highway, which is estimated to cost about $7,000.

He further stated that in order to provide a proper improvement and to safeguard traffic additional work, consisting of widening for four lanes of traffic, should be done. He estimated the cost of such additional work at $16,000, making a total estimated cost of $23,000 for the entire improvement. He requested authority to include this project in the construction program for state funds which the Commission adopted at the previous meeting. The question arose whether or not the improvement meets with the approval of the lumber company. The Engineer was instructed to ascertain such information and report full facts concerning the project to the Commission at its next meeting.

A petition was presented from residents of Summit, Oregon, complaining about the condition of the Eddyville-Blodgett Secondary Highway through this town and urging the construction of an oiled surface thereon in order to alleviate the dust nuisance. The Engineer advised that this highway is now under contract for surfacing, but it will not be possible to do the oiling work until next year. He recommended, in the meantime, that the road be sprinkled with water until the oiling work can be done. Motion was made by Commissioner Schaupp that the road be sprinkled as long as necessary this fall and that no action be taken with regard to oiling it. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. The Engineer was instructed to keep a record of the sprinkling expense for future information.

A letter was presented from Mary Louise Steere, Kernville, complaining that the Siletz Secondary Highway beyond the end of the paved section is in an "intolerable" condition and urging immediate improvement. The Engineer advised that there are 18 miles of unoiled macadam road between Kernville and the town of Siletz, also, that no provision has been made in the maintenance budget for the oiling of this section nor are there any plans for grading and oiling it in the construction program. Moreover, the project is too big to consider at this time. The Secretary was instructed to inform Miss Steere that there are no funds available to immediately finance the improvement that she has requested but that the Commission will analyze the project later on.

The Engineer brought up for discussion a proposed compromise settlement of the claim of Morrison-Knudsen Company, Inc. arising out of this company's contract with the state for surfacing, oiling, and production of maintenance materials on the Malloy Ranch-Hooker Creek Section of the I.O.N. Highway, in Malheur County, State Highway Contract No. 2649. The Engineer explained that the contractor lost $250,000 on this job but submitted a claim for only $14,964.67, which represents expenses incurred in connection with the opening up of a quarry that did not prove satisfactory. Careful consideration of the items making up the claim, he said, reveal justification for payment of $10,076.50, which sum the contractor has agreed to accept as payment in full for its claim. He recommended settlement with the contractor on such basis. Following discussion, motion was made by Commissioner Chessman that settlement of this claim for $10,076.50 be authorized. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission. (The agreement with Morrison-Knudsen Company, Inc. covering the matter was signed by the Commission on the following day).

The Chief Counsel brought up for discussion the action taken by the Commission at the previous meeting declaring White Bros. Co. in default in connection with the contract awarded to them by the Commission on May 16, 1946, for the excavation of materials on the Oneonta Section of the Columbia River Highway, in Multnomah County, and ordering recovery on the proposal bond furnished by the company. He advised that it would be of advantage to him, if the case goes to court, if the Commission would confirm its action by formal resolution, and he recommended that that be done. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, the Commission on the twenty-ninth day of April, 1946, called for bids and on the sixteenth day of May, 1946, received a bid by White Bros. Company, a limited partnership doing business at Third and Sumach, Walla Walla, Washington, for certain excavation of materials on the Oneonta Section of the Columbia River Highway in Multnomah County; and

WHEREAS, the bid of said White Bros. Company in the sum of $93,600 was deemed by the Commission a satisfactory bid and was therefore accepted and the contract awarded to said bidder; and

WHEREAS, in connection with said bid the bidder filed with the Commission a bidder's bond in the sum of $4,680, with the Maryland Casualty Company as surety, to insure the execution of the contract and the performance bond, the amount of which bond was computed on five per cent of the amount of the bid; and

WHEREAS, said contract form and bond form were prepared and delivered to the said White Bros. Company, but said White Bros. Company refused to execute said contract and refused to furnish and provide the performance bond required, but instead returned the said contract and the said bond unexecuted and refused to execute the contract or bond;

NOW, THEREFORE, BE IT RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the said White Bros. Company hereby is declared to be in default with respect to the execution of said contract and bond.

2. The Commission does hereby find and determine, based upon the conduct and acts of the said company, that the bidder has abandoned the contract and under the provisions of his bid and bidder's bond has forfeited the amount of the security fixed in said bidder's bond.

3. That the Commission's Chief Counsel is hereby authorized to collect and recover from the bidder and the bidder's bondsman or surety the said sum of $4,680.

4. That if Counsel is unable to recover or collect said sum without litigation, then Counsel hereby is instructed to institute and prosecute such suit or action as may be necessary to accomplish the recovery and collection of said sum of $4,680.

In this connection the Engineer advised that this project has been advertised for bids on two different occasions, the first time resulting in the award of the contract to White Bros. Co., who now have defaulted, and the second time resulting in no bids whatsoever. He suggested that the work be done on a force account basis and recommended such a contract with Berke Bros., contractors, Portland, who are interested and who have stated a willingness to enter into such a contract if the state will pay them actual cost of doing the work plus a 15-percent premium for labor and a five-percent premium for materials used, and in addition thereto they will expect the state to pay the insurance and bond premiums, which are estimated to cost about $6,500 on the basis of furnishing $50,000/$100,000 public liability and property damage insurance. He explained that this contractor wants the state to relieve him from liability in case of an accident resulting in damages greater than the amount of the bond. The matter was discussed at some length, but because of the lateness of the hour, a decision relative thereto was deferred until the following day. (See ahead for final decision)

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
August 7, 1946

The State Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building with the following persons present and participating:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids for construction work, as follows, were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contract would be made at 3:00 p.m. in the same room:

POWELL BUTTE SECONDARY HIGHWAY AND
ALFALFA COUNTY ROAD IN DESCHUTES COUNTY
ALFALFA MARKET ROAD SECTION

Babler Bros., Portland	$ 23,885.00
Del R. Beebe Constr. Co., Eugene	26,865.00
Harr & Horton, Portland	28,116.00

KLAMATH FALLS-LAKEVIEW HIGHWAY IN KLAMATH AND LAKE COUNTIES
BLY-EAST FOREST BOUNDARY ROCK PRODUCTION PROJECT

Oscar E. Joelson, Eugene	$ 39,816.00
A. H. Saxton & Sons, Corvallis	40,670.00
M. C. Lininger & Sons, Medford	41,440.00

TERRITORIAL SECONDARY HIGHWAY IN LANE COUNTY
SMITHFIELD-ELMIRA SECTION

	Using Asphalt	Using Tar
Del R. Beebe Constr. Co., Eugene *	$ 98,204.00	$ - - -
J. N. & M. J. Conley, Portland	112,440.00	- - -
O. C. Yocom Co., McMinnville **	112,657.50	- - -
A. H. Saxton & Sons, Corvallis	118,063.50	- - -

* Bidder will not accept this project alone.
** Reduction of $3,000.00 if also awarded Veneta-Crow Project.

TERRITORIAL SECONDARY HIGHWAY IN LANE COUNTY
VENETA-CROW SECTION

	Using Asphalt	Using Tar
Del R. Beebe Constr. Co., Eugene *	$ 94,935.00	$ - - -
A. H. Saxton & Sons, Corvallis	99,500.50	- - -
O. C. Yocom, McMinnville	104,233.00	- - -

* Bidder will not accept this project alone.

SANTIAM HIGHWAY IN LINN COUNTY
HOGG ROCK SECTION

Lloyd Calkins, Ocean Lake	$ 48,295.00
Del R. Beebe Constr. Co., Eugene	58,500.00
Sleeper & Keyes, Bend	63,225.00
F. L. Somers, Klamath Falls	63,350.00
White Bros. Co., Walla Walla, Wn.	71,500.00
R. A. Heintz Constr., Portland	72,650.00
J. N. & M. J. Conley, Portland	76,000.00
Natt McDougal Co., Portland	78,700.00
John A. Logan, Portland	89,700.00

VALE-WEST SECONDARY HIGHWAY IN MALHEUR COUNTY
HOPE-DERRY RANCH SECTION

K. F. Jacobsen & Co. Inc., Portland	$ 122,796.50
Leonard & Slate, Portland	122,965.00
J. C. Compton Co. & Duffey E. Reed, McMinnville	126,939.50

DALLAS-COAST SECONDARY HIGHWAY NEAR BUELL IN POLK COUNTY
RECONSTRUCT EXISTING BRIDGE OVER MILL CREEK

Philpott & Buckingham, Portland	$ 38,960.00
Archie R. Averill, Portland	39,895.00
C. W. Manning, Oakland	43,770.00

WILSON RIVER HIGHWAY IN TILLAMOOK AND WASHINGTON COUNTIES
McNAMAR'S CAMP-WASHBURN SECTION

Warren Northwest, Inc., Portland	$ 224,540.00
Parker-Schram Co., Portland	226,260.00
J. C. Compton Co., McMinnville	234,465.00
Sound Constr. & Engr. Co., Seattle, Wn.	272,867.50

COVE SECONDARY HIGHWAY IN UNION COUNTY
COVE-UNION SECTION

Morrison-Knudsen Co., Inc., Boise, Idaho	$ 209,422.00
E. C. Hall Co., Portland	212,500.50
Leonard & Slate, Portland	237,390.00

SUNSET HIGHWAY IN WASHINGTON COUNTY
BRIDGE OVER ROCK CREEK ON GARDNER RANCH-BERGER RANCH SECTION

Lockyear & Lockyear, Seattle, Wn.	$ 24,855.00

WILSON RIVER AND NEHALEM SECONDARY HIGHWAYS IN WASHINGTON COUNTY
FOREST GROVE (MAIN STREET AND COLLEGE WAY) SECTION

No bids received

The Commission resumed discussion of the proposed force account contract with Berke Bros. for the removal of slide materials on the Oneonta Section of the Columbia River Highway, Multnomah County. The Engineer recommended, if the Commission decides to enter into such a contract, that the amount of the insurance be increased to $75,000/$250,000 so as to avoid the state's being obligated to pay any damages whatsoever should an accident occur. Chairman Banfield suggested that such contract be awarded to Berke Bros. on the basis outlined by the Engineer, subject to the condition that adequate insurance shall be purchased to properly protect the state. Motion

to that effect was offered by Commissioner Chessman, seconded by Commissioner Schaupp, and carried by the unanimous vote of the Commission. The matter was thereupon referred to the Engineer and the Chief Counsel for further handling.

The Engineer advised that the City of Lexington has fulfilled the requirements with respect to the expenditure of State Tax Street Funds that the city received in 1944 from 1943 highway revenues and that the plans of the city for expenditure of the money have been examined and found satisfactory. He recommended, in view thereof, approval of the plans by the Commission in order to meet the legal requirements. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by the Oregon State Highway Commission apportioned to the city hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the sum or amount set opposite the name of said city:

Lexington - - - - - - - - - - - - - - - - - $306.28

AND, WHEREAS, said city has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following street in the following named city:

Lexington - "B" Street (bridge repair)

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named city hereby are approved.

3. That the action taken by said city as evidenced by appropriate resolutions adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city so as to qualify said city to receive and use the funds apportioned to said city.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in said city a duly certified copy of the resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 7th day of August, 1946.

The Engineer also reported that the cities of Lexington and Oakland have met the legal requirements with respect to the expenditure of State Tax Street Funds that they received in 1945 from 1944 revenues and that the plans of these cities for the expenditure of such funds have been examined and found satisfactory. He recommended approval of the plans in order to meet the legal requirements. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Lexington - - - - - - - - - - - - - - - - - -	$311.70
Oakland - - - - - - - - - - - - - - - - - - -	512.97

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Lexington - "B" Street (bridge repair)
Oakland - Maple Street from 3rd Avenue to intersection at Locust Street, Oak Street from 1st to 5th Streets

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 7th day of August, 1946.

A similar report was rendered by the Engineer with respect to the expenditure by the following cities and towns of State Tax Street Funds received by them in 1946 from 1945 revenues:

Creswell	Joseph	Lexington	Mosier
Halfway	Lakeview	Lostine	Paisley

The plans of the respective cities for the expenditure of the funds, he said, have been examined and found satisfactory. He recommended approval of the same by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Creswell	$ 746.50
Halfway	624.84
Joseph	890.69
Lakeview	3,703.96
Lexington	334.95
Lostine	306.41
Mosier	324.43
Paisley	355.98

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Creswell - 1st Street, 2nd Street, "C" Street, "D" Street, 5th Street, Oregon Street

Halfway - Bell Street, Dawson Street, Church Street, Center Street

Joseph - Mill Street, River Street, also newly opened road from Alder Street across O.W.R. & N. Co. right of way to the northern edge thereof

Lakeview - "B" Street South, South Street, Third Street South, Fourth Street South, "H" Street, First Street North, Second Street North

Lexington - "B" Street (bridge repair)

Lostine - Elizabeth Street, College Street, Cole Street, Roswell Street, Wallowa Street, Resort Street

Mosier - Washington Street, Third Avenue

Paisley - Mill Street, John Street, Chewaucan Street, Green Street, Willow Street, Main Street, West Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 7th day of August, 1946.

The Engineer reported that in conformity with authority previously given him by the Commission he has awarded the following contracts, bids for which were received by the Commission at its meeting on June 26, 1946, the conditions of the awards being satisfied:

Prineville Railway Undercrossing Section of the Madras-Prineville Secondary Highway, Crook County; contract awarded July 2, 1946, to John A. Logan, low bidder.

Construction of the Woodburn Section of the Pacific Highway East and the Hillsboro-Silverton Secondary Highway, Marion County; contract awarded on July 24, 1946, to Warren Northwest, Inc., low bidder.

The Commission by unanimous vote confirmed the awards as reported.

A letter was presented from Mrs. Mabel F. Campbell, Waldport, Oregon, requesting permission to construct an additional driveway entrance to her property on the west side of the Oregon Coast Highway just south of Waldport. The Engineer advised that Mrs. Campbell now has an approach to her property on a graded and surfaced street leading west from the highway and that to authorize another approach at the location she wants would necessitate an excavation through a cut bank between eight feet and ten feet high, which would create a very undesirable condition from a traffic standpoint unless the whole cut were removed. He recommended that the request be denied. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction contracts:

Oscar E. Joelson, Contract No. 2729, for furnishing crushed materials in stockpiles for the Hoffman Bridge Rock Production Project on the Coos Bay-Roseburg and Powers Highways, in Coos County, requested an additional extension of time, from December 31, 1945, to July 3, 1946, within which to complete this job. He attributed his failure to complete the project within the previously-extended time limit to exceedingly heavy rains which flooded the gravel bar from which he was securing his materials, and to the impossibility of retaining a crew on the job because of the unsteadiness of the work. The Engineer advised that the contractor had exceedingly bad luck with both high water and engine trouble. It was his thought, in view thereof, that the extension of time requested should be granted without penalty, and he so recommended, notwithstanding that the state has incurred some extra expense for engineering supervision. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

Archie R. Averill, Contract No. 2755, for construction of bridges on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, Multnomah County, requested an extension of time of 45 days, from July 31, 1946, to September 14, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to scarcity of materials. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct and he recommended, in view of the circumstances, that the extension of time

requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Philpott & Buckhingham, Contract No. 2781 for placing new timbers on the Vine Maple Bridge over the Nehalem River on the Fishhawk Falls Secondary Highway, Clatsop County, requested an extension of time of 30 days, from July 31, 1946, to August 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather and slow delivery of materials. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2721, 2729, 2751, 2759, 2765, and 2763 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2721, with Rogers Construction Co., for furnishing crushed rock in stockpiles on the Chemult-Beaver Marsh Section of The Dalles-California Highway and East Diamond Lake Secondary Highway in Klamath County; completed on June 15, 1946.

Contract No. 2729, with Oscar E. Joelson, for furnishing crushed material in stockpiles on the Hoffman Bridge Section of the Coos Bay-Roseburg Highway and Powers Secondary Highway in Coos County; completed on July 3, 1946.

Contract No. 2751, with J. N. and M. J. Conley, for bituminous macadam surfacing work on the Madras-Juniper Butte Section of The Dalles-California Highway in Jefferson County; completed on June 26, 1946.

Contract No. 2759, with Newport, Kern & Kibbe, for furnishing crushed material in stockpiles on the Vale Section of the Central Oregon and John Day Highways in Malheur County; completed on July 5, 1946.

Contract No. 2765, with Vernie Jarl, for furnishing crushed rock in stockpiles on the Mitchell-John Day River Section of the Ochoco Highway in Grant and Wheeler Counties; completed on May 31, 1946.

Contract No. 2763, with E. C. Hall Co., for grading, surfacing, oiling and rock production on the Ruckles Creek-Middle Bridge Section of the Baker-Homestead Highway in Baker County; completed on June 27, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

A letter was presented from the Amity City Council requesting installation of flashing beacons over the Pacific Highway West at its intersections with Church Street and Fifth Street in Amity; also, requesting the erection of signs at highway entrances into the city, school caution signs, and the painting of parking strips. The Engineer advised that this matter has been carefully investigated by the Acting Traffic Engineer, who recommends against the installation of the flashing beacons but who suggests, in lieu thereof, that the matter be taken care of by appropriate signs and the painting of crosswalks on the highway pavement. He declared his concurrence in the recommendation. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Engineer reported that there no longer is need for the reduced load limit ordered by the Commission on April 4, 1946, for the Eddyville-Blodgett Secondary State Highway between M. P. 7.6, near the old "Edwards' place", and M. P. 11.7 at Nashville, Lincoln County. He recommended the lifting of such reduced load limit. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, on the 4th day of April, 1946, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY NO. 180 from M. P. 07.6, near the "old Edwards' place", to M. P. 11.7, at Nashville, in Lincoln County;

and

WHEREAS, subsequest to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the

EDDYVILLE-BLODGETT SECONDARY STATE HIGHWAY NO. 180 from M. P. 07.6, near the "old Edwards' place", to M. P. 11.7, at Nashville, in Lincoln County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Lincoln County, in which county said section of said highway is located, and the Superintendent of the Department of State Police for his information.

Dated this 7th day of August, 1946.

The Engineer also recommended the lifting of the reduced load limit which was adopted by the Commission on February 16, 1944, for the I.O.N. Secondary State Highway No. 456 and the Jordan Valley Secondary State Highway No. 458, in Malheur County. He advised that this is a perfunctory matter simply to clarify the records. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, on the 16th day of February, 1944, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the

I.O.N. SECONDARY STATE HIGHWAY NO. 456, and the JORDAN VALLEY SECONDARY STATE HIGHWAY NO. 458

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highways;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the

L.O.N. SECONDARY STATE HIGHWAY NO. 456 from the Idaho state line near Malloy Ranch, Oregon, to the Nevada state line near McDermit, Nevada, in Malheur County, and on the

JORDAN VALLEY SECONDARY STATE HIGHWAY NO. 458 from its junction with the I.O.N. Secondary State Highway north of Jordan Valley to its junction with the I.O.N. Secondary State Highway west of Jordan Valley, in Malheur County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said sections of said highways hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerk of Malheur County, in which county said sections of said highways are located, and the Superintendent of the Department of State Police for his information.

Dated this 7th day of August, 1946.

The Engineer brought to the attention of the Commission the need for designation of speed-limit zones for log haulers on the Elkton-Sutherlin Secondary Highway. He advised that permits now being issued to operators on this highway contain provisions for reduced speed limits, but State Police will not enforce this provision unless the Highway Commission formally orders reduced speeds and posts the highway accordingly. He recommended adoption of a 25-miles-per-hour speed limit between M. P. 13.44 and M. P. 18.01 and between M. P. 22.84 and the junction with the Pacific Highway in Sutherlin. He also recommended a speed limit of 15 miles per hour between M. P. 18.01 and M. P. 22.84. The Chief Counsel gave as his opinion that the Commission is without authority to designate reduced speeds for one class of traffic to the exclusion of others, in view of which, the Commission deferred action on this recommendation. The matter was referred by the Commission to the Chief Counsel to work out a solution for the problem, if it is possible.

The Commission discussed the adoption of a resolution designating as a state secondary highway the old route of U.S. 97 (The Dalles-California Highway) from a point near the town of Chemult to its junction with the Crater Lake Highway because of the rerouting of this highway on the east side of Sun Mountain. The Engineer advised that the new highway has not been completed, although it is under contract. In view thereof, the Commission decided to defer action on the designation until the new road is completed and open to public use.

A letter was presented from Mr. L. M. Christensen, Yachats, Oregon, requesting permission to remove sand from the ocean beach at Yachats, Lincoln

AUG 7 1946

County, for use in connection with the construction of homes and buildings at this place. Mr. Christensen asked for this privilege for a five-year period and agreed not to take any sands during the months of June and July of any year. He declared that there is no other sand supply available nearer than Foley Creek at Newport, which sand cannot be delivered to Yachats from that place at reasonable cost. The Chief Counsel read aloud Mr. Christensen's letter. He advised that there is a question as to the Commission's authority to control the beach area, inasmuch as the shore of the ocean was designated a public road before the Legislature created the State Highway Department; nevertheless, he gave as his thought that the Commission should assume some authority in the matter and recommended the granting of Mr. Christensen's request on the condition that he will not remove the sands from this beach during the spawning period of smelt, which, according to information received from the State Master Fish Warden, is during the months of June and July and early August. The Secretary presented a letter from Mr. Arnie J. Suomela, Master Fish Warden, in which Mr. Suomela suggests that "in order that ample protection be given these food fish it is desired that no sand be removed from the beach during the period May 15 - August 31. By not removing sand during the period referred to above will protect the early spawners and also give ample protection for the eggs to hatch, and at the same time give the young fish an opportunity to leave the area". Following discussion, motion was made by Commissioner Chessman that Mr. Christensen be allowed to remove the sand from this beach area subject to the restrictions mentioned by the Master Fish Warden. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission. The Chief Counsel was instructed to prepare an appropriate agreement with Mr. Christensen covering the matter.

County Judge Nelson B. Higgs, of Harney County, and Mr. A. A. Bardwell, of the Burns Chamber of Commerce, were present in the interests of the John Day-Burns Highway (U.S. 395), particularly, the section which extends southerly from the Grant-Harney County line to the national forest boundary. Judge Higgs mentioned that the Commission has budgeted the sum of $195,000 for improvements on this section, however, gave as his understanding that the proposed project does not include the worst section of the highway at the south end where the road is badly cut up and is in a muddy condition. He urged the Commission to extend the project to include this section, which he estimated would cost about $50,000. The Engineer advised that the muddy section to which Judge Higgs refers is mainly in the forest area, and it is planned to improve this section as a forest highway project, but the program for the funds has not been prepared. He mentioned that the $50,000 requested by Judge Higgs would not finance the entire section. Chairman Banfield advised that the Commission is not in position to increase the allotment at this time. He pointed out that there are numerous jobs of a similar nature throughout the state which the Commission cannot undertake because of lack of funds. It was his thought that the Burns area has been pretty well taken care of. Commissioners Schaupp and Chessman concurred. Judge Higgs then asked the Commission to revive the contract for the improvement of this highway between Sylvies and Seneca, Grant County, which contract was awarded before the war but was canceled because of wartime restrictions. He was informed by Chairman Banfield that the Commission is now doing all that it can in this district and cannot lend much encouragement at this time. Mr. Bardwell inquired as to the possibilities of securing

forest highway funds and was informed by Chairman Banfield that there are possibilities later on but nothing definite with regard thereto can be said at this time because it needs the action of the three agencies--the state, the Public Roads Administration, and the Forest Service.

Judge Higgs then asked for a survey of a stub county road extending from the Central Oregon Highway at Drewsy to a place called Griffin Creek. He gave as his understanding that this road is on the Federal Aid Secondary Highway System and advised that the county has in mind to spend some county money to repair it but first wants to be sure that the road is in the proper location. The Engineer advised that the road is included in the tentative Federal Aid Highway System but is not scheduled for improvement in the post-war program. He estimated that it would cost about $1,500 to make the survey. The Commission authorized the Engineer to make the survey as soon as he can spare a survey crew.

A delegation from Depoe Bay representing the Depoe Bay Boosters Club and consisting of Ernest Smith, Lincoln Beach; Hollis Smith, Mayor of Dallas; C. L. Marsters, City Attorney and President of the Dallas Chamber of Commerce; J. C. Pepper, Manager of the Columbia River Packers Association, Depoe Bay; and Buell Grady, realtor, Portland, was present and asked the Commission to construct a new highway from Salem to the coast in the vicinity of Depoe Bay, which, they thought, would greatly shorten the distance between these points. Mr. Ernest Smith was spokesman for the group. He outlined briefly what the delegation had in mind. Chairman Banfield advised that a rough preliminary engineering investigation of the proposed road reveals that there would be practically no saving whatsoever in mileage between these common points and that it would cost about $2,500,000 to build the road. All that would be accomplished, he said, would be to open up a new road with no saving in distance. The Commission, he added, could not give any encouragement to the project because it is a big undertaking and there is no money available to finance it. Mr. Smith stated that the thing of most importance to them is to secure a shortcut to the valley from Depoe Bay through the town of Siletz, the present route being long and circuitous. Inquiry was made if the Commission has considered recently a proposed road from Siletz to Salem via Valsetz. Chairman Banfield advised that this road has not been considered in the past three years, but the Commission will ask the Engineer for a report on it, although that cannot be given in a short time. Mr. Pepper asked for a survey of this road within the next three or four years and was informed that the Commission could not authorize such survey until it has more detailed information of a preliminary nature, which the Commission will ask the Engineer to furnish. This concluded the conference.

Following departure of the group, the Commission instructed the Engineer to make a written report to the Commission on the subject.

Messrs. A. L. Greenwalt, President, and Walter Meacham, Secretary of the Old Oregon Trail Association, came before the Commission with further reference to the naming of the southern pioneer route into Oregon. Mr. Greenwalt stated that, as a result of contacting people throughout the state concerning this matter, he is convinced that 95 percent of the people of the

state desire that this route be named the "Applegate Trail" and that Mr. Jesse Applegate, who headed the group that found the route, should be honored in this manner. He also declared that the name "Applegate Trail" has been accepted nationally. Mr. Greenwalt gave as his understanding that when the matter of naming this trail was referred by the Commission to the Oregon Historical Society it was with the intention that such Society would invite the Old Oregon Trail Association to be present at a meeting to discuss their differences; however, such invitation was not extended and, naturally, they feel rather upset about it.

Mr. Meacham referred to a letter written by Jesse Applegate at Ft. Hall, a letter from the Portland Chamber of Commerce, and numerous newspaper items, all of which, he said, favor the use of the name "Applegate Trail" for this route. He also said that the Old Oregon Trail Association would be satisfied if the Highway Commission will approve the name "Applegate Trail--Southern Route to Oregon". Chairman Banfield advised that the Commission cares not to be placed in an "in-between" position in this matter because of its controversial nature or to take sides; moreover, the Commission is not obligated to take a middle stand or to even mark the trails but is willing to erect the markers when the differences between the two factions have been ironed out to the Commission's satisfaction. Commissioner Chessman stated that he could see no objection to asking the Oregon Historical Society to meet with the committee of the Old Oregon Trail Association to iron out this matter and moved that such a letter be directed to Mr. Phil Metschan, Chairman of the Memorials Committee, representing the Oregon Historical Society, asking him to arrange for a meeting soon. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

Mr. Meacham then brought up for discussion the erection of a marker on the Old Barlow Trail in the Mt. Hood area. He mentioned a suitable site on Laurel Hill overlooking Yocum Falls. He was informed that the Commission discussed this matter previously at this meeting and approved the erection of such a marker and the location of the same and that the marker would be erected as soon as that could be done conveniently.

Mr. Paul L. Patterson, Attorney, Hillsboro, came before the Commission in behalf of Fred C. and Ernest Zurcher, from whom the Commission is acquiring right of way for the Sunset Highway, in Washington County. It appears that an option to purchase this right of way has been obtained from the Zurchers, which option provides that they shall have two farm crossings and access to the highway at one point because the highway bisects their farm, which has a frontage on the highway one mile long. It further appears that payment of the purchase price has not been effected and that the Zurchers are desirous of having the option agreement modified because of changed conditions. Mr. Patterson urged such a modification of the agreement by eliminating one of the farm crossings and substituting therefor a single access road on the south side of the highway at one point and a double entrance, allowing access on both north and south sides of the highway, at another point. He explained in detail the reasons for this request. The matter was discussed at some length, but a decision thereon was deferred by the Commission pending further study and consultation with the Engineer and the Chief Counsel. Mr. Patterson was

informed that he would be given an answer as soon as possible.

The Commission resumed discussion of the matter following departure of Mr. Patterson, at which time the Chief Counsel advised that when the option was secured from the Zurchers evidentally no thought was given by them as to the value of the property for commercial purposes; however, conditions have changed and now they are able to sell their property for commercial purposes at a price considerably higher than they realized at the time of signing the option, provided the Highway Commission would allow right of access at additional points. He pointed out that the option agreement provided for payment of $6,000 to the Zurchers as severance damages because of the bisecting of their property. The Engineer recommended that the Zurchers be allowed right of access at two points in lieu of the farm crossing on the condition that the access roadways will not be used for commercial purposes, and provided further that the Zurchers will agree to a reduction in the amount allowed them for severance damages. The Commission took no definite action on the matter but referred it to the Chief Counsel to discuss with the Zurchers and their attorney to ascertain what can be done in that respect.

Mr. C. Meachem, Warm Springs, Oregon, and his attorney, Mr. John F. Steelhammer, Salem, came before the Commission regarding the truck hauling of logs over the Warm Springs Highway. Mr. Steelhammer advised that Mr. Meachem and his brothers have purchased some Army equipment for the purpose of engaging in log hauling and have committed themselves to make certain payments, but it appears that they cannot meet their obligation unless they are allowed to transport loads weighing 66,000 pounds gross. They are asking the Commission to grant them this privilege as they cannot operate without it. He pointed out that for the most part the operation is over roads in the Warm Springs Indian Reservation, but they travel over about five miles of state highway, only one and one-half miles of which has an oiled surface, which they have been given to understand is sufficiently strong to hold up under traffic of this kind without damage. Chairman Banfield advised that, according to the Engineer's report, this road is not strong enough to stand up under the excess weight; moreover, he said, the Highway Commission does not have authority to increase the weight limits that have been set by the Legislature and, even if it did have the authority, it would work to the state's disadvantage because if the privilege were granted in this instance it would have to be extended to cover the entire state. He further stated that the Commission would take the matter under advisement, but it is not likely that the Commission will change its attitude with respect thereto.

Mr. Elmer Bankus, Brookings, came before the Commission with regard to his offer to exchange timber lands along the Oregon Coast Highway near Brookings. He exhibited a map showing the location of the privately-owned tracts, one of which is located in Sec. 36, T. 39 S., R. 14 W., and contains about 70 acres of land, and the other containing about 60 acres of land being located in Sec. 23, T. 39 S., R. 14 W. He advised that the 70-acre tract contains one of the best stands of timber in this district, and he offered to exchange both tracts for 230 acres of state-owned land which the state doesn't need. The Engineer read aloud a report from the Parks Department on the proposed exchange (see report in the general office files for details) and recom-

mended favorable consideration of the exchange, in principle, with deferment of a final decision until an appraisal of the timber values has been made. Mr. Bankus urged that the investigations be expedited because he has a definite commitment to sell the timber in the 70-acre tract if the state doesn't want it. The Commission thereupon ordered the inspection made at once and the report rendered to the Commission on August 19, 1946.

The Commission recessed for luncheon at 12 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Clackamas County Court, represented by County Judge E. L. Pope and County Commissioner George Randall, was present and urged the Commission to take over and maintain as a state secondary highway the county road which extends from Eagle Creek to Milwaukie via Barton. Others present in regard to this matter were Mr. Charles Covey, Logging Superintendent, Vancouver Plywood Co; Mr. A. J. Dwyer, Vice President, Southeast Portland Lumber Co.; O. F. Ericson, Assistant Regional Forester, U. S. Forest Service; and V. V. Church, Logging Engineer, U. S. Forest Service. Judge Pope was principal spokesman. He advised that there are approximately 48 billion feet of timber to be taken out of the Clackamas River district as a continuing proposition and that presently from 80 to 100 truck loads of logs are hauled over this road daily. The road is going to pieces, he said, and the county is absolutely unable financially to bear the burden of maintenance. He further stated that if the state or some other organization will not assume this maintenance responsibility then the county will have to order a reduced load limit of such an extent that it will force all log hauling to stop. Chairman Banfield pointed out that this is a county road and that the state has no special obligation to keep it in repair for private interests; also, that if the Commission would assume the obligation then it would be necessary to take over many other roads throughout the state where similar conditions obtain, which the Highway Commission cannot do because it does not have sufficient funds at its disposal to assume such added responsibilities. Commissioners Schaupp and Chessman concurred in the remarks of the Chairman. There followed a general discussion of the matter in which Messrs. Dwyer, Covey, and Ericson expressed themselves in favor of the project. Mr. Dwyer stated that if the state cannot help out the situation it would be their sentiment to go to the Legislature and secure for the counties a larger percentage of state highway revenues than they now receive. Mr. Covey said that the Vancouver Plywood Company will have to close down its plant if it cannot get the timber from this district. Mr. Ericson stated that the Forest Service has funds to build access roads within the forest area but that would not help unless suitable road facilities are provided outside of the district over which to transport the logs. He estimated that ultimately 125 million feet of timber will be marketed from this district annually. Chairman Banfield pointed out that the Highway Commission has just recently authorized an allotment of state funds to finance the improvement of the Pacific Highway East between Oregon City and Canby. He inquired whether or not the County Court would prefer that a portion of this money be spent for the Eagle Creek

Road improvement, which would necessarily reduce the amount of work that could be done on the Pacific Highway. "If you approve such transfer," he said, "let the Highway Commission know and the matter will be discussed." Judge Pope indicated that the County Court would not approve reducing the allocation for the Oregon City-Canby project. The conference was concluded by a warning from Judge Pope that if the State Highway Commission and the U. S. Forest Service doesn't do something to remedy the situation the County Court will stop all log hauling over this road.

The Commission discussed a letter from the Columbia River Fishermen's Protective Union and the Columbia River Salmon and Tuna Packers Association requesting revision of the schedule of the state-owned ferry that operates between Astoria, Oregon, and Megler, Washington, for the benefit of gillnet fishermen who operate floater type gillnets in the river at the point where the ferry crosses. They alleged that the area where the ferries navigate when crossing the river is the most popular and concentrated fishing area in the Columbia River during the month of August and until the summer season closes on August 26, and also for about a week from September 10 to 17. They also stated that unless the ferry schedule is changed to eliminate evening trips after the fishermen have set their nets, serious damage will result to the fishing equipment, costing many thousands of dollars. The Commission was requested to immediately revise the schedule so that the last ferry would leave Megler not later than 7:45 p.m. on all nights except Saturday from August 1 to August 26, and not later than 7:45 p.m. from September 10 to September 17. This matter had been given considerable thought by the members of the Commission prior to this meeting, and certain revisions in the schedule were mutually agreed upon. The Commission, by unanimous vote, confirmed such revisions, which provide that during the period beginning August 4 and ending August 26 the ferry schedule is to be changed so that the last boat will leave Astoria at 7:45 p.m. and will leave Megler at 8:30 p.m., except on Saturdays. It also provides an extra morning service which will leave Astoria at 6:15 a.m., or at such other time as in the opinion of the Commission may seem best; however, no change is to be made in the present schedule during the period September 10 to September 17, 1946, unless authorized later. The Commission thereupon signed a letter directed to the Columbia River Fishermen's Protective Union dated August 7, 1946, explaining the matter in detail and ordered that copies of this letter be sent to the Columbia River Salmon and Tuna Packers Association and others interested. (See letter in general files for further details)

The Commission discussed with the Engineer the bids received at the morning session for construction work and took the following action thereon:

The Commission by unanimous vote awarded the following contracts: Oiling Alfalfa Market Road Section of the Powell Butte Secondary Highway and the Alfalfa County Road, Deschutes County, awarded to Babler Bros., Portland, the low bidder; slide correction on the Hogg Rock Section of the Santiam Highway, in Linn County, awarded to Loyd Calkins, Oceanlake, low bidder; pavement resurfacing on the McNamar's Camp-Washburn Section of the Wilson River Highway, in Tillamook and Washington Counties, awarded to Warren Northwest, Inc., Portland, low bidder.

The Commission referred bids received for the following projects to the Engineer with authority to award the contracts to the low bidder in each instance when certain conditions have been satisfied: Surfacing and oiling Smithfield-Elmira Section of the Territorial Secondary Highway, Lane County, low bidder, Del R. Beebe Constr. Co., Eugene; regrading, surfacing, and oiling on the Veneta-Crow Section of the Territorial Secondary Highway, in Lane County, low bidder, Del R. Beebe Constr. Co., Eugene; regrading, surfacing, and oiling the Hope-Derry Ranch Section of the Vale-West Secondary Highway, Malheur County, K. F. Jacobsen Co., Inc., Portland, low bidder; reconstruct existing bridge over Mill Creek on the Dallas-Coast Secondary Highway near Buell, Polk County, low bidder, Philpott & Buckingham, Portland.

The Commission rejected all bids received for the following projects: Bly-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties; regrading, surfacing, and oiling the Cove-Union Section of the Cove Secondary Highway, Union County; construction of a bridge over Rock Creek on the Gardner Ranch-Berger Ranch Section of the Sunset Highway, Washington County.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows:

"Oiling Alfalfa Market Road Section of the Powell Butte Secondary Highway and Alfalfa County Road, Deschutes County. The Commission received three bids for this project, the low one being that submitted by Babler Bros., Portland, at $23,885. Del R. Beebe Construction Company, Eugene, submitted the next low bid in the amount of $26,865. The Commission has awarded the contract to the low bidder, Babler Bros., at their bid price.

"Bly-East Forest Boundary Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath and Lake Counties. Oscar E. Joelson, Eugene, submitted the low bid for this work at $39,816. The next low bid was that submitted by A. H. Saxton & Sons, Corvallis, at $40,670. There was one higher bidder. The Commission has rejected all bids received for this job.

"Surfacing and oiling the Smithfield-Elmira Section of the Territorial Highway, Lane County. Del R. Beebe Construction Co., Eugene, submitted the low bid for this work in the amount of $98,204 based on the use of asphalt. The contractor qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for construction of the Veneta-Crow Section of this highway. The next low bid was received from J. N. & M. J. Conley, Portland, at $112,440 based on the use of asphalt. There were two higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Del R. Beebe Construction Co., at its bid price when certain conditions have been satisfied, this contractor also being the low bidder for the other project.

"Regrading, surfacing and oiling the Veneta-Crow Section of the Territorial Secondary Highway, in Lane County. Del R. Beebe Construction Co., Eugene, submitted the low bid for this work in the amount of $94,935 based on the use of asphalt. The contractor qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for the Smithfield-Elmira Project. A. H. Saxton & Sons, Corvallis, submitted the next low bid in the amount of $99,500.50 based on the use of asphalt. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Del R. Beebe Construction Co., when certain conditions have been satisfied, this contractor being the low bidder on the Smithfield-Elmira Project.

"Slide correction on the Hogg Rock Section of the Santiam Highway, Linn County. Loyd Calkins, Oceanlake, submitted the low bid for this work in the amount of $48,295. Del R. Beebe Construction Co., Eugene, submitted the next low bid in the amount of $58,500. There were seven higher bidders. The Commission has awarded the contract to the low bidder, Loyd Calkins, at his bid price.

"Regrading, surfacing, and oiling the Hope-Derry Ranch Section of the Vale-West Secondary Highway, Malheur County. K. F. Jacobsen & Co., Inc., Portland, submitted the low bid for this work in the amount of $122,976.50. Leonard & Slate, Portland, submitted the next low bid in the amount of $112,965. There was one higher bidder. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Reconstruction of an existing bridge over Mill Creek on the Dallas-Coast Secondary Highway near Buell, Polk County. The Commission received three bids for this project, the low one being that of Philpott & Buckingham, Portland, at $38,960. The next low bid was that of Archie R. Averill, Portland, at $39,895. The bids have been referred by the Commission to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Pavement resurfacing on the McNamar's Camp-Washburn Section of the Wilson River Highway, in Tillamook and Washington Counties. Warren Northwest, Inc., Portland, submitted the low bid for this work at $224,540. The next low bid was submitted by Parker-Schram Co., Portland, at $226,260. There were two higher bidders. The contract has been awarded to the low bidder, Warren Northwest, Inc., at its bid price.

"Regrading, surfacing, and oiling the Cove-Union Section of the Cove Secondary Highway, Union County. Morrison-Knudsen Co., Inc., Boise, Idaho, submitted the low bid for this work in the amount of $209,422. The next low bid was submitted by E. C. Hall Co., Portland, at $212,500.50. There was one higher bidder. The Commission has rejected all bids received for this project.

"Construction of a bridge over Rock Creek on the Gardner Ranch-Berger Ranch Section of the Sunset Highway, in Washington County. The Commission received only one bid for this work, being that of Lockyear and Lockyear, Seattle, Washington, at $24,855. The bid has been rejected.

"Pavement widening on the Forest Grove (Main Street and College Way) Section of the Wilson River and Nehalem Secondary Highways, in Washington County. The Commission received no bids for this job."

The matter of extending the hospitalization contract with the National Hospital Association through the year 1947 had the attention of the Commission. The Engineer advised that he has been in consultation with a representative of this company but is not ready to make a recommendation, although he expects to be able to do that some time during the Commission's inspection trip which starts on September 9.

A letter was presented from Karl L. Janouch, Supervisor of the Rogue River National Forest, advising that the U. S. Forest Service contemplates the sale of approximately 13,000,000 feet of timber along Mill Creek about six miles northeast of Prospect, Jackson County, and inquiring whether or not the successful bidder for this timber will be allowed to truck haul the logs over the Crater Lake Highway to Prospect or possibly to Medford. The Engineer advised that this section of highway has been under log haul for many years and, in his estimation, the additional hauling would not be objectionable provided the loads were kept within the legal weight limits and tolerance allowances and if the length were kept within the legal length limit of 50 feet. In view of this report, the Commission approved the truck hauling of logs over this highway.

A letter was also presented from M. M. Nelson, Forest Supervisor of the Umpqua National Forest, advising that the U. S. Forest Service contemplates the sale of timber in the Diamond Lake District which will necessitate the truck hauling of approximately 20,000,000 feet of logs annually over the Diamond Lake Secondary Highway to the railroad reload point near the junction of this highway with The Dalles-California Highway. He inquired whether or not the Highway Commission has any objection to the transportation of the logs over this road. The Engineer advised that this road was built in the first instance by the U. S. Forest Service for recreational purposes and is not strong enough to hold up under the continuous stresses to which it would be subjected by log-hauling operations without considerable extra maintenance work and expense. He recommended, however, that such traffic be allowed the use of this road provided that the loads do not exceed the statutory weight and dimension limits and provided further that the U. S. Forest Service will agree to pay one-half of the additional cost of maintaining the highway, which may be necessary as a result of these operations. The Commission approved the recommendation.

In this connection telegrams were presented from the Shaw Lumber Company and the Modoc Lumber Company, Klamath Falls, advising that the U. S. Forest Service cannot cooperate in the maintenance of the highway and urging, nevertheless, that the Highway Commission give the matter favorable consideration. The Engineer advised that the Forest Service has been advised of the

requirements but no reply has been received from them relative thereto. He was instructed by the Commission to discuss the matter with the Regional Forester, Mr. H. G. Andrews.

A letter was presented from Charles D. Simpson, Forest Supervisor of the Whitman National Forest, advising that the U. S. Forest Service contemplates the sale of national forest timber which will necessitate the truck hauling of logs over the Old Oregon Trail from North Powder to Union, over the Sumpter Valley Secondary Highway and the Baker Unity Highway from McEwen to Baker, and over the John Day Highway from East Camp Creek to Unity. The Engineer recommended approval of these operations insofar as they pertain to the Old Oregon Trail and the John Day Highway without any special restrictions. He also recommended approval of the operations over the other route, from McEwen to Baker, subject to the condition that the operations will be conducted under an approved system of flagging so as to protect the general traveling public, particularly where they are over the Sumpter Valley Secondary Highway which is narrow and crooked. The Commission approved the recommendations unanimously.

A letter was presented from Mr. Charles R. Stark, Manager of the Klamath County Chamber of Commerce urging the erection of a "Keep Oregon Green" marker on U.S. 97 (The Dalles-California Highway) at the Oregon-California state line. The Commission approved the request unanimously and assigned Commissioner Schaupp to represent the Commission at the dedication ceremonies.

The Engineer brought up for discussion the matter of purchasing or renting trailer houses for the use of State Highway Department employees who are temporarily assigned to locations where housing facilities are at a premium. He advised that in an instant case one of the employees who owns a camp trailer desired to have it towed from place to place behind a state-owned car so as to provide him overnight accommodations when traveling in isolated sections; however, the matter of insurance was involved, and inquiry revealed that the trailer could not be insured as state equipment unless it was actually owned or leased by the state. Moreover, it appears that insurance does not cover a state car when towing a privately-owned vehicle. He cited another instance which involves a weighmaster who is to be assigned to the Klamath Falls District. This man, it appears, has purchased a house trailer to provide him and his family with living accommodations, but he has no personal automobile to move it from place to place so will have to depend on a state car or truck to tow it. The Engineer suggested that a solution would be for the state to purchase or rent house trailers for the use of its employees in such cases. He was instructed by the Commission to investigate the matter and report his findings during the Commission's inspection trip which starts August 19.

The Engineer requested authority for Mr. F. B. Crandall, Acting Traffic Engineer, to attend the annual meeting of the Institute of Traffic Engineers in Columbus, Ohio, during October 3, 4, and 5, 1946, at state expense. He estimated such expense at $275. The request was denied.

The Commission had under discussion the selection of the persons who are to represent the State Highway Department at the annual meeting of the American Association of State Highway Officials which is to be held in Los Angeles, California, during December 17 to 20, 1946. The Commission authorized the State Highway Engineer and the Chief Counsel to attend this meeting at state expense subject to approval by Governor Snell.

The Commission discussed a date for its next regular meeting for the receiving of bids and the hearing of delegations and decided to hold such meeting in Portland on Monday and Tuesday, September 23 and 24, 1946. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building.

The Chief Counsel brought up for discussion and recommended approval of an increase in salary for Mr. S. B. Gillette, State Purchasing Agent, who does the buying of all equipment, materials, and supplies for the State Highway Department. He advised that, for the most part, Mr. Gillette's salary is paid by the State Highway Department, he being carried on the payroll of this department for such purpose. He also advised that Mr. Gillette did not receive the benefit of the salary increase recently approved by the Commission for State Highway Department employees and gave as his thought that Mr. Gillette is entitled to such increase because of the efficient and faithful service that he has rendered. The Commission, by unanimous vote, approved a $20-per-month increase for Mr. Gillette starting July 1, 1946, it being understood that $10 of such amount would be paid by the State Highway Department and the balance by the State Board of Control, if the increase is approved by the Board.

The attention of the Commission was directed to a number of items of unfinished business from previous meetings but took no action thereon because the reports ordered from the Engineer and the Chief Counsel were not ready for presentation.

The Assistant Counsel, Mr. George Neuner, reported on the proposed agreement with the City of Port Orford covering construction of curbs and sidewalks and the improvement of the Oregon Coast Highway in this town. He advised that, pursuant to the instructions of the Commission at the previous meeting, a letter was directed to the City Council requesting that the city take action to vacate certain streets in order to stop traffic from entering the highway at such points, and a reply has been received to the effect that the city will not vacate the streets but will agree to the erection of barricades barring entrance to the highway. He requested instructions, however, suggested that the Engineer should make a recommendation with respect thereto. Following discussion, the Commission ordered that the city be informed that unless it conforms with the wishes of the State Highway Commission with respect to such improvement the improvement will not be undertaken.

W. H. Lynch, Division Engineer, Public Roads Administration, was present and discussed with the Commission matters pertaining to the Forest Highway Program. He was accompanied by Dr. L. I. Hewes, Chief of Western Headquarters, Public Roads Administration, San Francisco; T. M. Davis, District

Engineer, P. R. A., Portland; F. E. Andrews, Principal Highway Engineer, P. R. A., Portland; and Robert N. Kellogg, P. R. A., Portland. Mr. Lynch proposed the transfer of $1,000,000 set up in the 1946 program for grading and topping the Wahkeena-Dodson Section of the Upper Columbia River Highway from this project to the North Umpqua Forest Highway Project in Douglas County in order to expedite completion of the latter-mentioned project, which is now scheduled for construction on a three-year basis. He advised that this request is made because of the unsatisfactory bids that have been received for the Columbia River Highway Project and in order to facilitate the movement of logs from the districts served by the North Umpqua road. He pointed out that the North Umpqua road is an access road to timber so is exempt from the Government's recent order deferring projects financed with Federal funds. Chairman Banfield expressed himself as being not in favor of transferring this money out of Multnomah County except on a loan basis only. Mr. Lynch assured him that the $1,000,000 would be restored to Multnomah County in the 1947 program and advised that the Commission could qualify its approval of the transfer by letter or otherwise on the basis that such approval is given only on the condition that the money will be restored to Multnomah County. In view of this assurance, the Commission voted unanimously to approve the transfer.

Mr. Lynch also asked the Commission to approve the transfer to other forest highway projects of the funds allocated in the Forest Highway Program for the improvement of the ZigZag-Rhododendron Section of the Mt. Hood Highway. He advised that difficulties are being encountered in connection with the ZigZag Project which indicate that it cannot go forward as rapidly as was originally anticipated so funds provided for this work will not be needed as soon as it was first thought; whereas, they can be used to good advantage in financing other forest highway projects were funds are short. He requested the Commission's approval of such transfer. Following discussion, the Commission approved the request by unanimous vote on assurance that the funds will be restored to the ZigZag Project in next year's program.

Mr. Lynch next brought up for discussion the bids received for the construction of the North Santiam Highway Project between Niagara and Detroit. He advised that the bids are extremely high, being in the amount of $5,500,000; whereas, the estimated cost is $3,600,000. Accordingly, it appears, if the contract is to be awarded, that the state will have to approve an additional contribution of $900,000 of state and forest highway funds; otherwise, the bids will have to be rejected unless the Army Engineers can find some way to finance the job. Following a full discussion of this matter the Commission by unanimous vote refused to assume the additional obligation and to underwrite the excess payment, thus placing the obligation to finance the project in the hands of the Army Engineers. It was the expressed opinion of the Commission that the bids should be rejected.

The Chief Counsel reported on the proposed amendment to the agreement with the U. S. Government concerning revenues from The Cove Palisades State Park which was presented by the State Parks Superintendent on the previous day. He advised that he has examined this amendment and finds it satisfactory for acceptance. He recommended that the agreement be signed by the

Commission. The Commission approved the recommendation.

The Commission discussed with the Engineer matters pertaining to the award of the contracts for the improvement of the Pacific Highway between Johns and Glendale Junction, in Douglas County, and Glendale Junction and Wolf Creek, in Douglas and Josephine Counties, bids for which were received by the Commission at this meeting. It was recalled that the Commission announced that a decision would be made within the next 30 days. The question arose whether or not a decision with respect thereto could be reached within such 30-day period. In view thereof, the Engineer was instructed to contact the low bidder for each of these jobs and ascertain whether or not it would be agreeable with them to extend the time limit for the award of the contracts beyond the 30-day limit.

The Commission considered and signed agreements, etc., as follows:

Bargain and sale deed conveying to Bunting Tractor Company, La Grande, state-owned property in Block 25, Williamson's Addition to La Grande.

Bargain and sale deed transferring property in Klamath County to Swan Lake Moulding Company.

"Consent to Assignment of Easement" from Victor Chambers to W. H. Daugherty covering maintenance of railroad track on state property, Lane County.

Affidavit in connection with acquisition of land in Jefferson Water Conservancy District, Madras.

Release of claim against Dewalt Houk and The Coastal Lumber Co. for damage to Ft. Hill Bridge.

Agreement with Morrison-Knudsen Co. covering extra compensation in connection with contract for construction of Malloy Ranch-Hooker Creek Section of the I.O.M. Highway.

Agreement with City of Portland covering use of parking area between S.W. Front Avenue and S.W. Harbor Drive and extending from S.W. Salmon Street to S.W. Main Street.

Agreement with City of Woodburn covering the improvement of the Young Street Section of the Hillsboro-Silverton Secondary Highway in Woodburn, Contract No. 2822, and stipulating portion to be paid by the city.

Agreement with Astoria North Beach Ferry Company and Columbia Transportation Company, Clatsop County, City of Astoria, and Pacific County, Washington, regarding the Astoria-Megler Ferry operation.

Amendment to agreement covering acquisition from the Federal Government of 1150 acres of land in Jefferson County known as The Cove-Palisades State Park.

Contract No. 2822 with Warren Northwest, Inc. covering pavement widening on the Woodburn Section of the Pacific Highway East and Hillsboro-Silverton Secondary Highway, Marion County.

There being no further business to come before the Commission at this time the meeting adjourned at 4:30 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Lakeview, Oregon
August 22, 1946

The State Highway Commission held a short business session at 11:00 a.m. at "Hunter's Lodge" during the progress of an inspection trip which started Monday, August 19, 1946, which included inspection of highway conditions in general, construction projects in progress, wayside strips, parks, etc. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

1946

The petition heretofore filed with the Commission by property owners and taxpayers of Glendale and Azalea, Douglas County, protesting the proposed relocation of the Pacific Highway as proposed through the agricultural area north of Stage Road Pass had the attention of the Commission. Chairman Banfield stated that as the result of personal inspection of the proposed relocation by members of the Commission on Tuesday, August 20, and subsequent discussion of the matter, the Commission decided unanimously as follows: That the Engineer shall analyze the petition thoroughly and report back to the Commission the cost to acquire right of way and to construct the highway on the proposed new alignment, as compared with the cost to acquire a standard-width right of way and to construct a standard highway improvement on the present alignment, including the cost to provide suitable detours to accommodate traffic during the time that construction is under way; further, that the petitioners are to be informed of the facts involved by letter, which letter is to be forwarded to the petitioners when approved by the Commission; also, that the petitioners shall be given the privilege of appearing before the Commission at its next regular meeting on September 24, in behalf of their protests, if they so desire. Chairman Banfield further stated that the Engineer has been instructed to prepare descriptions of the land needed as right of way along the relocated line and to deliver such descriptions to the Chief Counsel who has been authorized to institute condemnation proceedings to acquire such right of way as cannot be acquired at reasonable cost by negotiation; however, no definite offer for acquisition of such right of way by purchase or condemnation shall be made by the Chief Counsel unless and until such offer has been first authorized by the Commission by telephone or otherwise.

The Chief Counsel thereupon presented the following offers for use in connection with condemnation proceedings and recommended approval of the same:

Johns-Wolf Creek Section of the Pacific Highway		Recommended Offer
12206	Mabel D. Winkleman	$ 2,500.00
12207	J. B. Moore	5,250.00
12187	W. O. Condray	2,250.00
12196	Union Central Life Ins. Co. - B.G. Johnson, Contract Purchaser	3,000.00
12196-A	Thomas M. Martin	2,700.00
12199	Virgil McCollum	2,700.00
12201	C. E. Lovell, et al.	2,000.00
12208	Chester A. Smith and Harold E. Smith	1,500.00
11779	Percy Williams	2,500.00

Johns-Wolf Creek Section of the Pacific Highway (Cont)		Recommended Offer
12098	Elsie J. Rock, et al.	$ 100.00
12120	Daniel R. Hanna	40.00
12124	Edward Holland	2,500.00
12113	Letha Jacques	400.00
12103	George R. Watson	300.00
12114-A	W. R. Garrett, et al.	800.00
13004	Lydia Emma Forsythe	750.00
12118	H. W. Sanders	150.00
13024	William Ashby	300.00
12117	Wylie Schultz	400.00
12119	Joseph M. Poe	850.00
12121	Fred O. Ellis	125.00
12122	George W. Klein	350.00
12104	Milo Kline	300.00

After consideration the Commission approved such offers and by unanimous vote adopted the following resolution authorizing the Chief Counsel to commence the condemnation proceedings:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so

as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, the Pacific Highway (State Highway No. 1, U.S. Route No. 99) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Johns-Wolf Creek Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for procuring therefrom roadbuilding materials; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor and real properties from which to procure roadbuilding materials; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Pacific Highway, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that all of the properties hereinafter described are needed and required for use in connection with the construction and maintenance of the section of the Pacific Highway known and designated as the Johns-Wolf Creek Section.

2. That the specific purpose and use for which each particular piece of real property is needed and required is expressly stated and the ownership of said property is named in the particular and respective tracts hereinafter described.

3. That all of said real properties are needed and the acquisition of the same is necessary for the specific purpose stated in the description of each ownership.

4. That the section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will, in the opinion of the Commission, do the least private injury.

5. The Commission does hereby further find and declare that, in addition to the acquisition of the respective real properties described hereinafter in this resolution, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting properties to the parcels of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission.

6. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

7. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission,

and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

8. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

9. The real properties sought to be acquired are described on the attached sheets, consisting of 25 pages, and on which sheets are shown the respective ownerships, the purpose for which the properties are to be acquired, and a complete and accurate description of said properties; said parcels or real property are otherwise identified as Parcels 1 to 34, inclusive. (*)

10. This resolution shall be entered in full in the minutes and records of this Commission.

Footnote: (*)

The names of the property owners and the detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 67, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein,

---

The matter of awarding the contracts for the construction of the Johns-Glendale and Glendale-Wolf Creek Sections of the Pacific Highway, bids for which were received by the Commission on August 6, 1946, both of which involve construction of the section protested by the petitioners, was mentioned. Chairman Banfield advised that the Commission has decided unanimously to withhold the award of both contracts until its next regular meeting so as to give the petitioners an opportunity to be heard in the matter if they so desire.

Consideration was given by the Commission to a suggestion from the State Parks Superintendent that the State Highway Department pay the expenses incident to the National Park Association's convention which is to be held in Oregon during the period September 29 to October 1, inclusive, 1946, which expense is estimated will not exceed $350. The suggestion was approved by the Commission by unanimous vote, with the understanding that the expense will be paid out of the Travel and Information Department budget which will be reimbursed later on if necessary.

The Engineer reported the results of investigations conducted by the State Parks Department concerning the proposed exchange of timber land with Mr. Elmer Bankus, Brookings, Oregon, along the Oregon Coast Highway in Curry County. He exhibited a map showing the tracts under consideration and explained details of the proposed exchange. Decision in this matter was deferred by the Commission, pending an additional report which is to be rendered during the progress of the Commission's inspection trip that is scheduled for the week commencing September 9, 1946. The Engineer was instructed in the meantime to employ Mr. Eugene Walsh, Forest Engineer, Portland, to make a general inspection of the properties involved and to advise his recommendation with respect to the value of the several tracts under exchange consideration.

The meeting adjourned at 11:30 a.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Prineville, Oregon
August 23, 1946

The State Highway Commission convened for a short session at 11:45 a.m. in "Sonny's Casino" for disposal of a number of accumulated routine matters appearing on its inspection trip agenda. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

A letter was presented from the Cannon Beach Commercial Club suggesting that certain state-owned property situate at the junction of the old and new highway locations in Cannon Beach be developed as a state park. The Engineer advised that this matter has been investigated by the State Parks Superintendent who recommends against such use of the property because it is not suitable for state park development. He advised that he concurs in the recommendation. The Commission approved the recommendation unanimously.

The Commission confirmed the action taken at its meeting at Lakeview on August 22 with respect to the proposed exchange of timber lands with Elmer Bankus along the Oregon Coast Highway in Curry County. (See minutes of meeting held in Lakeview for details.)

The question of future use of the residence building situate in Cape Arago State Park, which was reported by the State Parks Superintendent at the previous meeting as being in need of considerable repair, was discussed. Chairman Banfield advised that the Commission inspected this building enroute to the City of Coos Bay on Tuesday, August 20, 1946, and decided at that time that it should take no definite action with respect thereto until a more detailed report has been received from the State Parks Superintendent with respect to the conditions that exist and the need of the repairs. The Engineer was instructed to see that such report is rendered.

The proposed establishment of a myrtle tree wayside strip on the Oregon Coast Highway between Coquille and Bandon was also discussed. The Commission decided unanimously not to take any action at this time to preserve myrtle trees growing along this section of highway, it being the considered opinion of the Commission that the project that is now under way along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point is sufficient.

The question of requiring tenants of a privately-owned building in Cascy State Park to vacate the premises was given consideration. The Commission inspected the property on Wednesday, August 21, enroute from Grants Pass to Chemult and Klamath Falls, and as a result thereof ordered a report from the State Parks Superintendent as to his plans for the development of this park and the necessity for the removal of the building. In the event

there are no plans for such development and there appears to be no special reason why the building should be removed, then the property on which the building is located, comprising about one acre of land, either shall be leased to the owner of the building or sold to him outright. The Commission by unanimous vote confirmed such understanding of the matter.

The Engineer submitted a plan for the relief of traffic conjestion on Jefferson Street, Portland, (route of the Tualatin Valley Highway) from S. W. 18th Avenue to S. W. 4th Avenue, which plan includes the designation of Jefferson Street and Columbia Street as one-way traffic streets, westbound traffic being directed along Jefferson Street and eastbound traffic along Columbia Street. He pointed out that if such plan is adopted it would necessitate designation of Columbia Street as a state highway route and the assumption of the maintenance of the same by the state. The Commission discussed the matter briefly but deferred a decision with respect thereto until its next meeting in order to give the Commission time to analyze the proposition.

The Engineer reported that the U.S. Army Engineers are working up plans to control flood waters at the town of Drain in Lane County and at the town of Sutherlin in Douglas County, which will involve considerable expense by the State Highway Department. He explained briefly what the Army Engineers have in mind at both places. The Commission decided after discussion to do nothing whatsoever at either place at the present time, however, declared its intention to join with the Army Engineers in the undertaking at both places if and when the Army undertakes its work.

The Engineer brought up for discussion certain projects tentatively approved by the Commission for construction in the state construction program for 1946-47 and 1948 which was adopted by the Commission at its June meeting, particularly the following projects which are on the Forest Highway System:

1. Grading, surfacing and oiling Bennett Pass-Cooper Spur Section of the Mt. Hood Highway in Hood River County. Estimated cost, $130,000.

2. Grading, surfacing and oiling the McDougal Camp-Pioneer Spur Section of the Weston-Elgin Secondary Highway in Umatilla County. Estimated cost, $230,000.

3. Resurfacing the Trout Creek Section of the Canyon City-Burns Highway (five miles) in Harney County. Estimated cost, $50,000.

He recalled that the Commission tentatively approved construction of such projects in this program, subject to the condition that they would be given further study and that an attempt would be made to secure aid from the U.S. Forest Service in payment of the costs involved, inasmuch as it was believed that these sections were within the National Forest areas. Inquiry reveals, he said, that the first two of the above-mentioned projects are

within the forest boundaries but there are no funds available under the jurisdiction of the Regional Forester to apply on this work, so it appears that if the improvements are to be made they will have to be paid for either with Forest Highway funds, Federal Aid funds, or with state money. He requested instructions from the Commission in regard thereto. As to the proposed improvement of the Trout Creek Section, the Engineer advised that this project is not within the Forest Reserve so it is not eligible for Forest Highway funds, in view of which it appears that the project was placed in the tentative category by mistake. He suggested, in view thereof, that the $50,000 tentatively approved by the Commission for this improvement be definitely added to the $195,000 heretofore approved for expenditure in the third postwar year Federal Aid Program, and that the project be advanced from the third postwar year to the second postwar year in order to expedite completion of the project and to insure the strengthening of weak roadbed north of the National Forest boundary. He advised that fifty percent of the expense would be paid with Federal Aid funds and approximately $5,000 of the state's contribution would be applied to the elimination of mud holes complained of by County Judge Nelson B. Higgs at the August 7 meeting of the Commission. The Commission discussed the matter at considerable length, during which Chairman Banfield expressed his disapproval of making quick changes in the program as suggested. It was his thought that such changes should not be made on short notice and that the Public Roads Administration and the Forest Service should present the proposed changes to the Commission in person and allow the Commission sufficient time to analyze them thoroughly before making its decision. The Commission approved by unanimous vote the changes suggested by the Engineer for the Trout Creek Section and authorized the Engineer to advertise the project accordingly, it being understood, however, that further changes in the program shall be the result of conference among the Commission, Public Roads Administration, and the U. S. Forest Service.

With respect to the projects on the Bennet Pass-Cooper Spur Section of the Mt. Hood Highway and on the McDougal Camp-Pioneer Spur Section of the Weston-Elgin Secondary Highway, the Commission ordered that the amounts set up for these projects in the state construction program be left in such program for the time being without alterations.

In this connection the Engineer was instructed to keep the members of the Commission fully advised of any changes that are made in the adopted program.

The Engineer and the Chief Counsel reported on the request of Silica Products, Oreg. Ltd., for the designation of a service road about one-half mile in length along the front of its property adjacent to the Richardson-Eugene Secondary Highway (Route "F") about three miles west of Eugene. The Engineer recalled that a permanent highway has been constructed along this section immediately adjacent to the county road, one-half of which is owned by the state and the other half by the company, also, that the company desires that this old road be designated a service road for use by the people of its subdivision and has stated its willingness to deed its share of the old road to the state and to relinquish its right of access to the permanent highway along the entire frontage, except at each end, if the state will surface the

road. He advised that he personally examined the premises and finds that the old road could be oil-surfaced for about $2,000. He recommended approval of the expenditure on the basis that the company will deed its share of the old road to the state and will relinquish its right of access to the new highway except at each end of its property. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer brought up for discussion the proposed improvement of the Santiam Highway near Foster, necessitated by the construction of a railroad spur track across this highway by the Willamette National Lumber Company in connection with a plant development that it is making at this place. He recalled that the order of the Public Utilities Commissioner with respect to the railroad crossing requires the State Highway Commission to do certain work which is estimated to cost $7,000 and that the Commission approved such expenditure over the telephone. He requested confirmation of the authorization. The Commission by unanimous vote approved the expenditure of the $7,000 mentioned by the Engineer but held in abeyance its approval of the expenditure of an additional $16,000 which the Engineer recommended at the previous meeting as necessary to provide the complete improvement. The Engineer was instructed to report at the next meeting details with respect thereto.

The Engineer reported that, in conformity with authority previously granted to him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission on August 7, 1946, the conditions of the awards having been satisfied:

1. Grading, surfacing and oiling of the Veneta-Crow Section of the Territorial Secondary Highway, Lane County; contract awarded August 14, 1946, to Del R. Beebe, low bidder.

2. Surfacing and oiling the Smithfield-Elmira Section of the Territorial Secondary Highway, Lane County; contract awarded on August 14, 1946, to Del R. Beebe, the low bidder.

The Commission by unanimous vote approved the awards of these contracts.

The Engineer reported receipt of an inquiry from the Secretary of State whether or not the State Highway Commission is willing to operate a joint booth with him at the State Fair, as has been done in the past, to disseminate information about highway signs and signals and to impress the public with the necessity for safe driving to avoid traffic accidents. He estimated the cost of operating such joint booth at about $400, which would be paid $200 by each department, and recommended approval of the expenditure. The Commission approved the recommendation by unanimous vote.

Consideration was given by the Commission to changing the schedule of the Astoria-Megler ferry during the period September 10 to 17, as heretofore requested by the Columbia River Fishermen's Protective Union and the

Columbia River Salmon and Tuna Packer's Association, for the accommodation of gillnet fishermen. A decision in the matter was deferred by the Commission pending advice from Commissioner Chessman as to the results of a similar change approved by the Commission at its previous meeting covering the period August 4 to August 25, 1946.

A letter was presented from M. F. Ohman, a tourist of Pittsburg, California, complaining of the condition of the highways leading into the "Lake O' Woods" area, Klamath County, and inquiring as to the plans of the Commission to improve the road conditions prior to the next vacation season. The Secretary was instructed to inform Mr. Ohman that there are no plans for the improvement of these roads at the present time.

A bill was presented from the Western Association of State Highway Officials covering Oregon's membership fee in that Association for 1946, amounting to $25. The Commission by unanimous vote approved payment of the fee. In this connection the Commission cautioned the Engineer and the Chief Counsel to hold to a minimum the attendance of personnel at all out-of-state meetings.

Consideration was given by the Commission to a letter from Mr. John A. Laing, Chairman of the Special Committee of the Portland Chamber of Commerce on Portland's Guest Center, to Mr. William A. Bowes, Commissioner of Public Works, and to a letter from Mr. Bowes to the Oregon State Highway Commission, concerning the establishment of a "Guest Center" on certain state-city-owned property situate immediately south of the Portland Public Market Building and being bounded by S. W. Salmon Street, S. W. Main Street, S. W. Front Avenue, and S. W. Harbor Drive. It appears from Mr. Laing's letter that the Chamber of Commerce has raised approximately $80,000 from Portland businessmen to finance construction of a suitable building on this site, which is considered by the committee to be the most desirable location available that will accomplish the desired objective. Mr. Bowes advises that the Portland City Council has informally approved the use of the property for such purpose at a nominal charge of $1 per year and inquires as to the attitude of the State Highway Commission relative thereto. The matter was discussed by the Commission at some length but a decision was deferred pending receipt of an official letter from the City Council setting forth all the facts in the case.

A letter was presented from the City of Redmond advising that the city is planning to improve "E" Street (Route of the Ochoco Highway) between 5th Street and the right of way of the Central Oregon Irrigation District canal by installing curbs, gutters and drainage facilities, and inquiring if the State Highway Department will cooperate by paving the street full width between curbs so as to eliminate mud holes and improve traffic conditions. In a second letter presented from the City of Redmond, the City renews its request for the designation of 5th and 6th Streets as one-way traffic streets in order to eliminate traffic conjestion on 6th Street, route of The Dalles-California Highway.

The Engineer advised that the first of the above-mentioned projects consists of oil-surfacing two blocks of state highway on "E" Street between

6th and 4th Streets, which is estimated to cost about $2,500. The estimated cost to improve 5th and 6th Streets as one-way streets for state highway traffic, he said, is about $60,000. The Commission deferred its decision with respect to both projects pending adoption of its 1947 budget.

The Engineer requested instructions relative to the removal of a log jam in Dobbins Creek just above the bridge over this creek on the South Santiam Highway near Cascadia, in Linn County. He advised that this log jam is endangering the bridge structure and, unless it is removed, the bridge will be seriously damaged. He further advised that the Powers-Davis Lumber Company, of Sweet Home, which owns the logs, has been requested to remove them, but to date the company has taken no action to that end and apparently is not going to do anything about it. The Chief Counsel suggested that the facts of the case should be brought to the company's attention again, and if the company still refuses to remove the logs that the Engineer be authorized to remove them as a bridge-protection proposition and that the company be required to pay the expense involved and damages. The Commission approved the suggestion by unanimous vote and so ordered.

Commissioner Chessman reported a suggestion from Brigadier General Thomas E. Rilea, Adjutant General for Oregon and Assistant Commander of the 41st Division of the U.S. Army, that the Sunset Highway be dedicated in honor of the 41st Division and as a memorial to the members of that division who lost their lives during the recent war. General Rilea, he said, suggests the erection of an appropriate monument on this highway at Necanicum Junction and that it be dedicated with appropriate ceremonies either on the anniversary of the induction of the 41st Division into the Army, about the middle of September, or on Armistice Day. The Commission approved the suggestion by unanimous vote and referred the matter to Commissioner Chessman and the Engineer to work up the details.

The meeting adjourned at 1:15 p.m.

Commissioner

Enroute Prineville to Salem
August 23, 1946

Following the short business meeting in Prineville, Commissioner Schaupp returned to Klamath Falls. Chairman Banfield and Commissioner Chessman motored to Salem and inspected the North Santiam Highway project enroute. They were accompanied by the Engineer on this portion of the trip.

The Commission discussed with the Engineer the advisability of continuing the use of Federal funds in the purchase of right of way needed for Federal Aid projects. The Engineer suggested that such practice be discontinued and that state funds entirely should be used for this purpose in order to avoid confusion in meeting the requirements of the Federal Government and to avoid delays incident to the securing of the Federal funds. He explained that the state would not lose any of the Federal funds by so doing because they could be used to finance construction of the Federal Aid projects rather than for right of way purchases. Following discussion, the Commission unanimously approved the recommendation and authorized the use of state funds only, at least for the time being, for the purchase of right of way needed for the Federal projects.

This concluded the business transacted by the Commission on this inspection trip, which terminated at 5:00 p.m. in Salem.

13503		Meeting adjourned at 5:00 p.m.

Portland, Oregon
September 23, 1946

The State Highway Commission met in regular session at 9:00 a.m. in Room 715, Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting of the Commission held on August 6 and 7, 1946, and the minutes of special meetings held during the progress of its inspection trip, August 19 - 23, inclusive.

The State Parks Superintendent was present and reported on the following park matters:

1. Request of County Judge C. K. McCormick, Union County, that the state assume control and jurisdiction over a county park located on Catherine Creek on the Medical Springs State Secondary Highway about eight miles east of the town of Union: The Parks Superintendent advised that this is a lovely park containing 160 acres of land, and he recommended that it be taken over by the Commission as a state park. He estimated that it would cost about $2,000 to clean up the premises, which have not been taken care of during the wartime period, and, in addition thereto, it would be necessary to maintain a caretaker in the park during the summer season. He pointed out that there are no state parks in Union County at the present time. The State Highway Engineer concurred in the Parks Superintendent's recommendation. Following discussion, during which Chairman Banfield gave as his thought that if the state takes over this park, money should be provided to maintain and develop it, motion was made by Commissioner Schaupp that the Commission accept this gift on the condition that the county will convey it to the state free of all encumbrances. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

2. Report on proposed state park at Wallowa Lake: The Commission's Chief Counsel reported on this matter. He advised that he recently visited this place in connection with the condemnation action that he is conducting to acquire a portion of the area, and he ascertained that the local people are fearful that if the state takes over jurisdiction of the park certain facilities which are now furnished by private individuals will not be furnished by the state. He gave as his thought that he should be able to say, when the case comes to trial, just what the State Highway Commission expects to do and will do along that line, particularly with respect to the furnishing of cabins, the furnishing of boats, and the operation of concessions. He pointed out that the trial has been set for

November 19 and, in the meantime, options which have been obtained for the acquisition of two other tracts of land that are included in the proposed park area will expire. He requested instructions whether or not to renew the options and as to what statement he should make at the trial with respect to the facilities. In the discussion, Chairman Banfield expressed a desire to know how much it would cost to furnish the facilities in the first instance and how much it would cost to operate them. He also inquired whether or not the Highway Commission has legal authority to expend state funds for such purposes. He was informed by the Chief Counsel that the Commission has full legal authority to spend state funds for purposes of this kind if it so desires, and that the law leaves it entirely to the discretion of the Commission without limit; in fact, there is no more limitation placed on the Commission with respect to the maintenance and operation of state parks than is placed on the construction and maintenance of highways. In view of the Chief Counsel's statement Chairman Banfield gave as his thought that if and when the Commission acquires state parks it should consider and make provision for their development. Commissioner Chessman expressed himself similarly. He also gave as his thought that the Chief Counsel should so state in his condemnation suit, which would probably relieve the minds of people who have raised the question. Motion was thereupon made by Commissioner Schaupp that the options referred to by the Chief Counsel be renewed and that the Chief Counsel be authorized to make it clear during the condemnation trial that it is the intention of the Commission to provide the facilities that are now being furnished by the private individuals. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

3. Report on plans for the development of Casey State Park: The Parks Superintendent explained in considerable detail his plans for the development of this park, particularly that portion on which a privately-owned cabin is being maintained. He pointed out that the cabin is located directly in front of one of the best fishing holes in the Rogue River, and were it disposed of to private interests the general public would be prohibited from the use of this fishing hole. He also called attention to a provision in the deed by which the Commission acquired the property from the Federal Government that if the property is used for purposes other than public park purposes for a period of five years the property will revert to the Government. He urgently recommended that action be taken to secure the removal of the cabin from this property. The Chief Counsel concurred in the recommendation and suggested definite action by the Commission to that end. Following discussion, motion was made by Commissioner Schaupp that the Commission take such action as may be necessary to secure the removal of this privately-owned cabin from the state's property. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. The matter was referred to the Chief Counsel for further handling.

4. Establishment of a myrtle tree wayside strip along the Oregon Coast Highway between Coquille and Bandon: The Parks Superintendent asked the Commission to reconsider its action taken at the previous meet-

ing refusing his request for the establishment of such a wayside strip. In support of his request he pointed out that this tract is located along the Oregon Coast Highway, being one of the main routes of travel through the State of Oregon, where travel is much greater than along the Coos Bay-Roseburg Highway, which is secondary in nature, and where a similar wayside strip has already been approved by the Commission. He also pointed out that the 16-acre tract owned by Mr. A. J. Sweet, five miles south of the City of Coquille, is the only tract along the Oregon Coast Highway which contains a good stand of myrtle trees. It was his thought that this should be preserved. He pointed out that Mr. Sweet is of the same mind and has signed an agreement providing for the trees' preservation. He estimated that it would cost about $50 to do the necessary clearing work around the trees, and he strongly urged the Commission to approve the agreement with Mr. Sweet. After careful consideration the Commission by unanimous vote approved the request and thereupon authorized the completion of an appropriate agreement with Mr. Sweet covering the matter.

5. Clearing operations on the Columbia River Highway between Crown Point and Cascade Locks: The State Parks Superintendent submitted a status report on these operations, which was approved by the Commission. In this connection Chairman Banfield pointed out that, whereas each year the Commission budgets a certain amount for state park operations, off times, for some reason or other, the amounts budgeted are not spent, and the operation for which the funds were provided is not completed. He particularly pointed out that such a condition obtains this year because of a shortage of men and equipment, and, as a result, the proposed park improvements are behind schedule. He suggested, in view of the circumstances, that the unexpended balances contained in the park improvement budget for 1946 be carried over for the expenditure in 1947 in addition to the amount that the Commission may provide for such purposes in its regular budget for 1947. Commissioners Schaupp and Chessman approved Chairman Banfield's suggestion, making the decision unanimous, and it was so ordered.

6. Destruction of an oak tree growing on the Salem-Dallas Highway near Oak Knoll Golf Course: The Parks Superintendent advised that Mr. F. D. Errion, Independence, is subdividing his property which fronts on the highway at this point and deliberately cut down this oak tree, which, he alleges, interfered with access to the highway from one of the streets that he has laid out in this subdivision, regardless of the fact that there was at least 120 feet of highway frontage available in each direction where he could have planned his street entrances without interfering with tree growth. This tree, he said, was 82 years old according to ring count, was 48 feet high, in good health, and was of an undeformed shape. It was his thought that Mr. Errion should be prosecuted. The Chief Counsel advised that Mr. Errion is guilty of a misdeamor by destroying the tree in this manner and pointed out that the law specifies a penalty in cases of this kind. It was the thought of the Commission that Mr. Errion should be prosecuted to the full extent of the law, and it was so ordered by the unanimous vote of the Commission. The matter was referred by the Commission to the Chief Counsel for further handling.

SEP 23 1946

7. Sale of concession in Silver Creek Falls State Park: The Chief Counsel reported on this subject in behalf of the Parks Superintendent. He recalled that the Commission, earlier in the year, sold this concession to a Mr. Walter S. Taylor as a result of competitive bidding, but it later developed that Mr. Taylor could not comply with requirements because of difficulties in securing necessary equipment and supplies, in view of which, the Commission relieved him of his obligation and ordered the return of his proposal deposit. He suggested, if the Commission is still desirous of operating a concession in this park, that plans for the same should be started now to assure that the concession would be in operation next year. He advised that the operator of the concession at Multnomah Falls is interested in the proposition and suggested that the Commission authorize negotiations with this man and others who may be interested in the project. Following discussion, the Commission approved the suggestion and authorized the Chief Counsel and the Parks Superintendent to negotiate with prospective concessionaires for the concession privileges in this park.

8. Request of the Garden Club of Aloha to landscape a small tract of state-owned land at Aloha: The Engineer reported on this matter in behalf of the Parks Superintendent. He advised that, pursuant to instructions from the Commission at the previous meeting, the Parks Superintendent made an inspection of the premises and discussed the matter with a Mr. Gordon Grimm, who is handling the matter in behalf of the Garden Club, and that Mr. Grimm admitted that the proposed location at the west entrance to Aloha was unsatisfactory and too small for the purposes intended. He also said that Mr. Grimm is investigating another location at the east end of their town which will better suit their purposes. It is the recommendation of the Parks Superintendent, he said, that action on the original request be indefinitely postponed unless and until some future action is initiated by the Garden Club. The Commission approved the recommendation unanimously.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the purchase offer that he recommended for each parcel. Following discussion and careful consideration of each item on the list, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further inprovement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Following discussion and careful consideration of each of the items, the Commission approved the request and the offers recommended and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purcase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

SEP 03 1946

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the the same are being acquired are described as follows, to wit:

Real property owned by Charles Enegren, et ux., which property is located in Government Lot 7 of Section 27, Township 25, South, Range 12 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 13045, which property is being acquired for right of way purposes in connection with the Coos River Secondary Highway; (*) (**)

Real property owned by Charlie J. Austin and Sarah Davis, which property is located in Government Lot 6 of Section 27, Township 25 South, Range 12 West, W. M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 13046, which property is being acquired for right of way purposes in connection with the Coos River Secondary Highway; (*) (**)

Real property owned by Millard I. Bony and Guy Duncan, which property is located in Government Lot 8 ($NW\frac{1}{4}$ $SW\frac{1}{4}$) of Section 2, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as File R 11593, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Oregon Trunk Railway, which property is located in the west half ($W\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 3, Township 4 South, Range 14 East, and in the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 34, Township 3 South, Range 14 East, W. M., and in the southeast quarter ($SE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) and the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 3, Township 4 South, Range 14 East, W. M., Wasco County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4 and 5, and is further identified in the records of the Highway Commission as File R 11217, which property is being acquired for right of way purposes in connection with the Sherars Bridge Secondary Highway; (*)

Real property owned by Deschutes Falls Power Company, which property is located in the west half ($W\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 3, Township 4 South, Range 14 East, and in the southeast quarter ($SE\frac{1}{4}$) of Section 34, and in the north half ($N\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 35, Township 3 South, Range 14 East, W. M., Wasco and Sherman Counties, Oregon, and in the southeast quarter ($SE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 3, Township 4 South, Range 14 East, W. M., Wasco County,

Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7, and is further identified in the records of the Highway Commission as file R 11218, which property is being acquired for right of way purposes in connection with the Sherars Bridge Secondary Highway; (*)

Real property owned by Warren A. McMinimee, which property is located in Lot 13 ($SW\frac{1}{4}$ $SW\frac{1}{4}$) of Section 23, Township 1 South, Range 9 West, W. M., Tillamook County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 12319, which property is being acquired for right of way purposes in connection with the Wilson River Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or

court procedure connected with or prosecuted for the acquisition of said properties or interest therein as i his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this commission.

Foot Notes:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 68, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

(**) The Commission approved the recommended offers in connection with the condemnation of the Enegren and Austin properties needed for the Enegren Ferry Section of the Coos River Secondary Highway but decided, in view of a question as to the title of the existing road, to defer the award of the contract for the improvement of this section, bids for which are to be received on the following day, until such time as the right of way question has been clarified satisfactorily.

The Assistant Counsel brought up for discussion an inquiry from Mr. J. E. Craven, Portland, as to the possibilities of acquiring right of access to the Northeast Portland Secondary Highway from property sold by the Commission to Mr. E. F. Wilson, near N. E. 52nd Avenue. He advised that Mr. Craven contemplates the purchase of a portion of Mr. Wilson's property, but the deed the Commission gave to Mr. Wilson contains provision for limited access to the highway. Mr. Craven is inquiring, if he purchases a portion of this property, will the Highway Commission allow him access to the highway therefrom. The Commission voted unanimously not to allow access to the highway other than that provided for in the deed given to Mr. Wilson.

The Commission had under consideration the offer of Mr. Thomas R. Ellis, Portland, to pay $2 each for fallen trees situated on state-owned property in the town of North Plains. The Engineer advised that repeated efforts have been made to contact Mr. Ellis and to ascertain the location of the property so that inspection of the premises could be made, but Mr. Ellis cannot be located. The Commission took no action in the matter.

The Engineer reported the results of the taking of bids in Salem on August 26, 1946, for the sale of buildings at Troutdale and at Union, and for the sale of accumulations of scrap materials and obsolete equipment at the Salem, Coquille, La Grande, and Klamath Falls Shops. He presented a list of the high bidders in each instance, as follows, and recommended acceptance of

the offers for the purchase of the buildings at the prices bid and acceptance of the offers of the high bidders for the scrap materials and obsolete equipment as indicated:

SALE OF BUILDINGS AT TROUTDALE

After due consideration the Commission approved the Engineer's recommendations by unanimous vote.

The Engineer reported that, in conformity with telephonic authority given him by Chairman Banfield and Commissioner Chessman, he has ordered five trailer houses for emergency use by State Highway Department employees whose duties necessitate their temporary residence in parts of the state where housing facilities are at a premium. He advised that two of these trailer houses are of the large size — eight feet wide by twenty-four feet long, priced at $2,750 each — and that three are of the small size — eight feet wide by sixteen feet long, priced at $1,600 each — all being purchased from Travel House, Inc., Portland. He asked the Commission to confirm these purchases. Following discussion, the Commission by unanimous vote approved the purchase of such trailer houses as an emergency proposition only.

The Commission discussed a letter from Mr. L. E. Wiggans, Superintendent for California and Pacific Utilities Company, Baker, Oregon, urgently requesting that the Commission authorize snow-removal operations on the road which extends from Sumpter, Baker County, to Granite, in Grant County, so that this road may be available for local travel throughout the winter season. The Engineer advised that it would cost between $6,000 and $7,500 to keep this road open during the winter months were equipment available, but it would not be possible to assign equipment to this work without handicapping similar operations on the Pacific Highway through the Siskiyou Mountains. He also pointed out that the road is not a state highway but is under the jurisdiction and control of the County Courts of Baker and Grant Counties, and he recommended that the request be denied unless the counties and the power company are willing to pay the entire cost of the operations. In view of the Engineer's report, the Commission voted unanimously to deny the request.

The Engineer reported on a proposal for the construction of a bridge across the Columbia River on McNary Dam near the town of Umatilla. He advised that Congress has made available under Section 4 of Public Law 562, 79th Congress, approved July 29, 1946, Federal funds in the amount of $10,000,000 to finance construction of public highway bridges upon and across

Government-owned and controlled dams provided the Public Roads Administration will certify that the bridge is economically desirable and needed as a link in the state or Federal Aid highway systems. He suggested that the Commission join with the Director of Highways of the State of Washington in an application for a portion of such funds to finance a bridge on McNary Dam, which would form a link between the highway systems of both states and, which according to law, would cost the states nothing except for roadway approaches. Insofar as the State of Oregon is concerned, the approach would require only about 2,000 feet of roadway construction, which, it is understood, the Army Engineers will build in order to provide roadway access to the dam construction for workmen employed thereon. He further advised that this matter has been discussed with the highway officials of the State of Washington, who have approved the project from the standpoint of that state and who have prepared a letter directed to Mr. W. H. Lynch, Division Engineer, Public Roads Administration, for the joint signatures of both Highway Departments for an allocation of a portion of the funds that may be necessary to finance this work. He presented the letter for the Commission's consideration and pointed out that it already has been signed by Mr. Clarence B. Shain, Director of Highways of the State of Washington. He strongly recommended approval of the letter by the State Highway Commission. He also requested authority to work out the details with the Army Engineers in the event the Commission approves the project. Following considerable discussion, the Commission approved the project by unanimous vote on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman, and thereupon signed the letter. The Engineer was authorized to work up the details with the Army Engineers.

The Commission had under consideration the matter of replacing equipment that was worn out during the wartime period, and the purchase of additional equipment to build up the equipment inventory to a point where highway work can be carried on with maximum efficiency. The Engineer explained the need for additional equipment, and advised that to restore the equipment inventory to normal will require an expenditure of about $1,000,000. He suggested that advantage should be taken of the present opportunity to purchase surplus war stocks and that he be given authority to establish a "floating" fund to finance the purchases on short notice. The question arose whether or not the Commission can legally authorize an expenditure of a certain sum for equipment purchases. The Chief Counsel advised that the Commission has such authority if it desires to exercise it. In view of this advice and the apparent need for purchase of the equipment, the Commission approved the expenditure of $150,000 for such purpose. The Engineer was authorized to make purchases of surplus war stocks on short notice. He was instructed to render to the Commission at frequent intervals a statement of equipment ordered and equipment received under this setup.

In this connection, the Engineer requested blanket authority for Mr. E. F. Halik, Master Mechanic, to make trips to war supply centers for the purpose of examining available equipment and of expediting the completion of purchases. The Commission approved the request by unanimous vote.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:30 p.m. in the same room with all Commissioners, the State Highway Engineer, the Chief Counsel and the Secretary present.

The Commission considered and denied a request from the City of Molalla for the oiling of the south end of Lola Avenue, which, they allege, is being damaged by log-hauling traffic. It appeared to the Commission that it already has fulfilled its obligation to the City of Molalla as covered by previous understanding and a written agreement dated December 11, 1943.

A resolution was presented from Westmost Grange No. 884, Coos County, urging the construction of the Seven Devils Road as a main trunk highway between Coos Bay and Bandon. The Engineer advised that this is an improvement which, ten years ago, was estimated to cost $2,500,000 and is a project which is planned for a long time in the future. He recommended that the request be denied. The Commission approved the recommendation.

A letter was presented from Mr. Cornelius O'Donovan, Portland, requesting that the Commission give consideration, in the formulation of its next postwar program, to the construction of a new highway extending from Gates on the North Santiam Highway to the town of Marquam, thence to Portland. The Commission denied the request because this would require construction of an entirely new highway between Gates and Marquam, for which funds are not now available and will not be available for a long time in the future.

A petition was presented from numerous residents of Lincoln County requesting the construction of pedestrian underpasses across the Oregon Coast Highway at numerous points between Otter Rock and Agate Beach, where it is now under construction, for the benefit and safety of people who reside on the east side of the highway and who have to cross the highway when going to the beach. The Engineer estimated the cost of constructing such underpasses at $2,000 each, using corrugated iron pipe, and at $4,000 each, using concrete. He questioned the justification for the expense because there is very little development on the east side of the highway along this section. He pointed out, however, that if the Commission favored the construction there are only about two places along the entire section where the underpasses might be used beneficially, one of which is at Beverly Beach. Chairman Banfield agreed that there is no justification for constructing underpasses at all of the points mentioned by the petitioners; however, he gave as his thought that it would be advisable to install such facilities at the two points mentioned by the Engineer, which could be done now while the highway is under construction at less expense than later on. It was his thought that if the state provided the underpasses then it would be relieved of responsibility in case of accidents if they were not used. The matter was discussed at some length, during which Commissioners Schaupp and Chessman expressed concurrence in the viewpoint of Chairman Banfield. Accordingly, the Engineer was authorized and instructed to construct two underpasses as a trial proposition at the points mentioned, using the corrugated iron pipe type.

A letter was presented from the City of Mt. Angel requesting the improvement of the Hillsboro-Silverton Secondary State Highway through this town, by widening the pavement full width between curbs and constructing necessary drainage facilities. The Commission denied the request by unanimous vote because of insufficient funds in the state construction program to finance the work, however, agreed to give it further consideration at some future time.

SEP 13 1940

A resolution was presented from Jasper Grange No. 532, Lane County, and a petition signed by numerous residents and freeholders of Lane County who reside adjacent to the Springfield-Creswell Secondary Highway, requesting the grading, surfacing and oiling of this highway between Jasper and Pleasant Hill.

The Engineer advised that the section referred to is about three miles in length and that to place it in good condition would cost from $10,000 to $15,000 per mile. The Commission indicated a favorable attitude toward the project but deferred a definite decision with regard thereto pending additional information. The Engineer was instructed to make further investigations and to report back to the Commission whether the work should be done as a betterment project or as new construction.

A letter was presented from the City of Roseburg requesting reconsideration of the Commission's decision denying the city's request for state maintenance of Winchester Street, in Roseburg, which they allege is being damaged by log-hauling traffic. The Engineer suggested that the Commission might co-operate with the city to the extent of contributing $2,500 toward the cost of the work, as was done in the case of the City of Tillamook where similar conditions obtained. Chairman Banfield gave as his thought that the state is now doing all that it can for the City of Roseburg without assuming additional obligations. He favored the retention of the previous decision. Commissioner Schaupp concurred. The Commission thereupon voted unanimously denying the city's request for this improvement.

The Engineer requested authority to construct a cabin at Chemult Maintenance Station for the use and accomodation of an assistant to the Section Foreman who is located at that place. He estimated the cost at $2,000 and advised that the building would be constructed by a bridge maintenance crew which will be available in November, using lumber that is available at the Maintenance Headquarters at Brothers for part of the construction work. He also requested authority to construct equipment sheds at the Maintenance Headquarters located at Cave Junction, Dufur and Dexter, each of which he estimated would cost about $2,000, using salvaged lumber from certain dismantled bridges over Looking Glass Creek, Douglas County, and from dismantled buildings at Camp Adair if it can be obtained. These buildings, he said, would be temporary structures to house equipment until permanent buildings could be constructed. He assured the Commission that the permanent buildings would not be erected until full value has been obtained from the temporary structures. The Commission, by unanimous vote, approved the construction of all four buildings as an emergency proposition.

A petition was presented from residents of Woodburn requesting that the Pacific Highway improvement that is now under way in their city be extended northerly from its present terminus at Lincoln Street to Hardcastle Street at the north city limits of Woodburn. The Engineer estimated the cost of such improvement at $35,000 and recommended that the request be denied because there is no apparent need for the improvement at this time, there being very little culture on the west side of the highway at this point. The Commission considered that there are many other places where the money can be spent to much better advantage and thereupon, by unanimous vote, approved the Engineer's recommendation.

The Commission discussed a proposed modification of the project agreement with the Public Roads Administration pertaining to the access road project under which the state performed certain surface stabilization work and maintenance work for the Federal Government on the Crater Lake Highway between M.P. 9.75 and M.P. 59.25. The Engineer advised that, according to the original arrangement, the state was to perform the maintenance work for a period of one year — November 20, 1944, to November 20, 1945 — however, when the agreement was drawn the period was described as being from October 25, 1944, to October 25, 1945, so, in order to secure reimbursement for expenses incurred during the period October 25 to November 20, 1945, amounting to approximately $800, it is now necessary to modify the original agreement so as to correct the error in dates. The Commission approved the modification by unanimous vote.

The Commission discussed a petition from residents of Cascade Summit in which the state is requested to maintain travel during the winter season over the road which extends from the Willamette Highway to the railroad station at Cascade Summit. The Engineer advised that this is a forest service road about two and one-half miles in length, and its condition is such that it would be impossible to operate a "Snow-Go" over it, although it could be kept open with a tractor and dozer. He further stated that the road is not on the state highway system, and, in his estimation, it is the obligation of either the county or the U.S. Forest Service to maintain it and to keep it open for travel. He recommended that the request be denied. The Commission approved the recommendation.

A letter was presented from the City of Sweet Home requesting construction of a sidewalk along the Santiam Highway for a distance of about one and one-quarter mile for the benefit and safety of school children and other pedestrians. The Engineer advised that there is no question that a definite hazard exists at this location, the records showing that the weekday traffic averages 3,500 vehicles and 332 pedestrians, and that the vehicular traffic, which consists largely of logging trucks, passes over this section at a high rate of speed. He pointed out that the hazard is emphasized because of three deep cuts with sloping shoulders where pedestrians are forced to walk on the pavement. He estimated the cost to construct the sidewalk along this section at $5,600 and recommended approval of the project in the 1947 budget.

In this connection Chairman Banfield gave as his thought that the Commission should budget a sum of $100,000 or $150,000 for purposes of this kind and should construct such projects as are recommended by the Engineer as being of most importance. Commissioners Schaupp and Chessman concurred. Motion was thereupon made, duly seconded, and adopted by the unanimous vote of the Commission that $150,000 of state highway funds be included in the 1947 budget for construction of sidewalks and pedestrian footpaths. The Engineer was instructed to prepare a list of projects of this nature for consideration by the Commission.

A letter was presented from Mr. Arthur Boeschen, Santiam Lodge, Sisters, Oregon, requesting the construction of a road-way extending from the Santiam Highway to Hoodoo Ski Bowl located at the summit of Santiam Pass, and that provision be made for snow removal from this roadway during the

winter season for convenience of people who patronize this recreational area. The Engineer advised that the roadway referred to would be about one mile in length and that it would cost about $50,000 to build it; also, that it would cost about $1,000 to keep it open for travel during the winter season. The Commission denied the request by unanimous vote because of the costs involved.

The Commission discussed a letter from Mr. Frank I. Kinney, who represents the Oregon Settlement Association, Eugene, in which Mr. Kinney urges the improvement of the Fox Hollow Secondary Highway south from the City of Eugene to a G.I. suburban projedt where some 600 houses are being constructed. Mr. Kinney alleges that this road is in deplorable condition and badly in need of repair, being, in his estimation, the poorest road leading from the City of Eugene to the outlying farms and suburban areas. The Engineer advised that this matter has been investigated and, while the condition of the road is hardly as bad as reported by Mr. Kinney, it is a graveled road and not adequate to carry a great amount of suburban traffic. He recommended the resurfacing and oiling of a four-mile section of the road in the 1947 program at an estimated cost of $50,000. The Commission ordered a more detailed report on the project and instructed the Engineer to bring such report to the Commission's attention for consideration in the preparation of the Minor Betterment Budget for 1947.

In this connection Chairman Banfield suggested that it would be advisable to authorize in the 1947 Minor Betterment Budget an expenditure of $1,000,000 to finance improvements of this nature, subject to the understanding that when said projedts arise, the Engineer will get them cleared through the Commission before beginning work. Commissioners Schaupp and Chessman concurred. The matter is to be given final action in the discussion of the budget for 1947.

The Engineer reported that the cities of Granite and Scotts Mills have satisfied the requirements with respect to the State Tax Street Funds that they received in 1944 from 1943 state highway revenues and that the plans furnished by these cities for the expenditure of monies available have been examined and found satisfactory. He recommended approval of the plans by the Commission in order to satisfy the legal requirements. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Granite	$118.11
Scotts Mills	311.77

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

SEP 23 1946

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Granite - Main Street, Center Street
Scotts Mills - Grand View Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and/or towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 23rd day of September, 1946.

The Engineer also reported that the cities of Arlington, Central Point, Elgin, Granite, Glendale, Gresham, Scotts Mills, Shaniko, and Weston have satisfied the legal requirements with respect to the expenditure of 1944 State Tax Street Funds that they received in 1945, and that the plans submitted for the improvements proposed to be financed with such monies have been examined and found satisfactory. He recommended approval of the plans in order to meet the legal requirements. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Arlington	$ 851.23
Central Point	1,266.36
Elgin	1,393.55
Glendale	778.55

Granite	$ 120.21
Gresham	2,727.01
Scotts Mills	317.29
Shaniko	76.88
Weston	696.08

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Arlington - 1st Street, "A" Street, "B" Street, "C" Street, "D" Street, Columbia Street
Central Point - Ninth Street, Fifth Street, Sixth Street, Ash Street, Haskell Street, First Street, Bush Street, Grand Avenue.
Elgin - Wallowa Avenue, Elgin Street, "D" Street, Main Street
Glendale - Pacific Avenue, Molly Street
Granite - Main Street, Center Street
Gresham - 5th Street, 4th Street, 3rd Street, 2nd Street, N.E. Kelly Street, 1st Street, N.W. Florence Street, N.W. Wilson Street, N.W. Ava Street, Miller Street, 13th Street
Scotts Mills - Grand View Avenue
Shaniko - "E" Street, 4th Street
Weston - Depot Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Weston and approved by the State Highway Commission on August 31, 1945, shall be canceled, in accordance with the request of the City of Weston on file in the records of the Oregon State Highway Department, and Resolution Form 3 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 23rd day of September, 1946.

A similar report was rendered by the Engineer relative to the plans furnished by the Cities of Cascade Locks, Central Point, Shaniko, Sodaville, Umatilla, and Wasco with respect to expenditure of 1945 State Tax Street Funds received by them in 1946. He advised that the plans have been examined and found satisfactory, and he recommended approval of them by the Commission. The Commission approved the recommendation and adopted the following resolution relative thereto by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Cascade Locks	$1,055.91
Central Point	1,736.32
Shaniko	82.61
Sodaville	148.70
Umatilla	555.41
Wasco	455.11

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Cascade Locks - All city streets, and new street to city garbage dump.
Central Point - 9th Street, 5th Street, 6th Street, Ash Street, Haskell Street, First Street, Bush Street, Grand Avenue.

Shaniko - "E" Street, 4th Street
Sodaville - Cottage Street, Washington Street, Rock Street, Pine Street, St. Louis Street
Umatilla - "I" Street, Water Street, "G" Street, 1st Street
Wasco - Davis Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 23rd day of September, 1946.

The Engineer reported that, under authority previously given him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting on August 6 and 7, 1946, the conditions of the award having been satisfied:

Regrading, surfacing and oiling Cline Falls-Tumalo Section of Cline Falls Secondary Highway, Deschutes County. Bids received August 6; contract awarded August 24 to T. W. Thomas, low bidder.

Regrading, surfacing and oiling Tumalo Section of the Tumalo-Deschutes Secondary Highway, Deschutes County. Bids received August 6; contract awarded August 24 to T. W. Thomas, low bidder.

Reconstruct existing bridge over Mill Creek on the Dallas-Coast Secondary Highway, Polk County. Bids received August 7; contract awarded August 24 to Philpott and Buckingham, low bidder.

Grading, surfacing and oiling Hope-Derry Ranch Section of the Vale-West Secondary Highway, Malheur County. Bids received August 7; contract awarded September 13 to K. F. Jacobsen & Co., Inc., low bidder.

The Commission by unanimous vote approved the awards as reported.

The Engineer reported the following location surveys completed and recommended approval of the same by the Commission.

SEP 23 1946

Location survey for the Enegren Ferry Section of the Coos River Secondary Highway, Coos County.

Location survey for proposed revision of Tutuilla Creek Section of the Pendleton-John Day Highway, Umatilla County.

After careful consideration, the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the following sections of state highways, to wit:

Enegren Ferry Section of the Coos River Secondary Highway, in Coos County;

Tutuilla Creek Section of the Pendelton-John Day Highway, in Umatilla County,

and in connection therewith to prepare maps showing the route and location of said sections of highways and file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map File Nos. 6B-20-6 and 6B-20-17, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-third day of September, 1946.

OCT 13 1941

The Commission considered the following requests for extensions of time within which to complete highway contracts:

Porter W. Yett, Contract No. 2504, for grading and construction of bituminous macadam on the Banzer Bridge-East Section of the Nehalem Secondary Highway, Columbia County, requested an additional extension of time of 264 days, from October 30, 1945, to July 21, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to instructions received from the Division Engineer to defer the construction of the oil-mat surface until the season of 1946. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct, such instructions having been given to him because of the possibility of slides occurring and the probable need for drainage correction. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Guerin Bros., Contract No. 2718, for the Union Creek Rock Production Project on the Crater Lake and West Diamond Lake Highways, in Jackson County, requested an additional extension of time of 99 days, from May 1, 1946, to August 7, 1946, within which to complete this job. They alleged that their rock plant was washed out during the winter season, necessitating the rebuilding of the plant before they could start crushing operations, and they gave that reason for their failure to complete the contract within the previously-extended time limit. The Engineer advised that the reason given by the contractor for overrunning the time limit is substantially correct; however, in addition thereto, the contractor experienced labor troubles and difficulties in obtaining machinery parts. The delay increased inspection costs somewhat but did not interfere with the production of sufficient rock for maintenance needs. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Tom Lillebo, Contract No. 2724, for reconstruction of a bridge over Duval Creek on the Willamette Highway, in Lane County, requested an extension of time of 425 days, from June 30, 1945, to August 25, 1946, within which to complete this job. Mr. Lillebo alleged that it was impossible to secure timbers of the sizes and grades specified for this work until the latter part of September, 1945, and when this timber was received he immediately installed it, and the bridge was open to traffic shortly thereafter, the only work remaining to be done being the painting of the handrail, which work the Engineer ordered postponed until the following season when weather conditions were favorable. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Slate Construction Company, Contract No. 2744, for slide correction on the Toll Creek-Snow Creek Section of the Santiam Highway, in Linn County, requested an additional extension of time of 92 days, from July

31, 1946, to October 31, 1946, within which to complete this job. He gave the following reasons for overrunning the previously extended time limit: Shortage of materials and labor, inclement weather, instability of embankment materials, and fire hazard. The Engineer recommended the granting of this extension of time without penalty because of the difficulties experienced by the contractor in securing labor and equipment. The Commission approved the recommendation by unanimous vote.

Archie R. Averill, Contract No. 2755, for the construction of bridges on the Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County, requested an additional extension of time of 30 days, from September 14 to October 14, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing cement for the concrete work. The Engineer advised that the reason given by the contractor for failure to complete the project within the previously-extended time limit is correct, that it was not the fault of the contractor that the delay occurred. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Del R. Beebe, Contract No. 2760, for re-oiling and rock production on the Flight Strip-McDermitt Section of the I.O.N. Highway, in Malheur County, requested an extension of time of 40 days, from July 31 to September 10, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in obtaining certain equipment and to extreme labor problems. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially as stated. He further advised that the delay has caused no inconvenience to traffic and that the state has not incurred much extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Del R. Beebe, Contract No. 2760, for re-oiling and rock production on the Flight Strip-McDermit Section of the I.O.N. Highway, Malheur County, requested an additional extension of time of 30 days, from September 10 to October 10, 1946, within which to complete this job. He advised that he was unable to complete the project within the previously-extended time limit for reasons previously given -- difficulties in securing equipment and the impossibility to hire efficient skilled labor. The Engineer advised that the reasons given by the contractor for overrunning the time limit on this job are correct, and he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Struss and McCoy, Contract No. 2770, for the Redmond Rock Production Project on the McKenzie, The Dalles-California, Ochoco, and O'Neill Highways, in Crook and Deschutes Counties, requested an extension of time

from August 31, 1946, to December 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to shortage of help and difficulties encountered in working their gravel pit. The Engineer advised that the contractor has worked diligently at this project, but he has a small-capacity plant and accordingly was unable to complete the work within the specified time limit, although, in his estimation, the work would be done before the material is needed next year. He recommended that the extension of time requested be granted without penalty, notwithstanding that the state will incur some extra expense for engineering supervision. The Commission approved the recommendation unanimously.

C. J. Eldon, Contract No. 2773, for the construction of a trestle bridge over McKay Creek on the Sunset (Wolf Creek) Highway, Washington County, requested an extension of time from September 30, 1946, to December 31, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in obtaining materials such as lumber, nails, steel, etc., and to shortage of labor. The Engineer advised that the reasons given by the contractor for failure to complete this job within the specified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

C. J. Eldon, Contract No. 2788, for construction of a bridge over Coffey Creek on the Tiller-Trail Secondary Highway, in Douglas County, requested an extension of time from October 31, 1946, to July 31, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in obtaining materials and labor. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that contracts Nos. 2504, 2752, 2769, 2782, and 2827 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2504, with Porter W. Yett, for grading and bituminous macadam surfacing on the Banzer Bridge-East Section of the Nehalem Secondary Highway in Columbia County; completed July 21, 1946.

Contract No. 2752, with M. C. Lininger & Sons, for furnishing crushed gravel in stockpile on the Alkali Lake-Fort Creek Section of the Lakeview-Burns Highway in Lake County, completed June 26, 1946.

Contract No. 2769, with J. S. Risley, for furnishing crushed rock in stockpiles on The Dalles-Maupin Section of The Dalles-California Highway, in Wasco County; completed July 15, 1946.

Contract No. 2782, with Warren Northwest, Inc., for pavement resurfacing on the West Unit, Lebanon-Sweet Home Section of the Santiam Highway in Linn County, completed on July 16, 1946.

Contract No. 2827, with Babler Bros., for oiling work performed on the Alfalfa Market Road Section of the Powell Butte Secondary Highway and Alfalfa County Road in Deschutes County; completed August 29, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Commissioner Schaupp presented a number of telegrams received from people conducting business along South Sixth Street in Klamath Falls complaining of delays in completing the highway construction work at this place. The telegrams were referred by the Commission to the Engineer to check into the matter at once so that the wires can be answered. He was also instructed to see what can be done to speed up construction work.

A letter was presented from Mr. Jack Mayne, Manager, Lake County Chamber of Commerce, requesting construction of a turn-around for vehicles on the Warner Secondary Highway at the ski grounds of the Fremont Highlanders Ski Club about four miles east of the Fremont Highway. The Engineer advised that it has been determined by investigation that the work would cost upwards of $2,500. He pointed out that the construction program contains an item for widening and surfacing a section of this road next year, and he gave as his thought that, if the Commission approves, the turn-around can be constructed under that contract and adequate provision can be made for the parking of cars. The Commission deferred a definite decision pending additional information. The Engineer was instructed to obtain a close estimate of the cost to construct the turn-around and to report such information to the Commission, together with information as to how it will affect other jobs of a similar nature.

The Commission had under discussion a number of proposed revisions in the Postwar Construction Program which was adopted by the Commission by

resolution at its meeting on May 29, 1945. After careful consideration, the Commission approved the revisions and by unanimous vote adopted the following resolution amending the original resolution of May 29, 1945, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, the Commission on the twenty-ninth day of May, 1945, approved and by resolution adopted a postwar program of highway construction of projects consisting of:

(a) Primary Federal Aid Projects;
(b) Urban Projects;
(c) Secondary Federal Aid Projects; and
(d) Federal Aid Secondary and Feeder Roads; and

WHEREAS, the projects named above under (a), (b) and (c) are all set forth in particular and are designated in Exhibit A attached to and made a part of said resolution of May 29, 1945; and

WHEREAS, the highways and roads designated above under (d) are all set out and designated in Exhibit B attached to and made a part of said resolution of May 29, 1945, all of which said highways enumerated in said Exhibit B were approved by the Highway Commission and the respective county courts but had not been approved by the Public Roads Administration at the time of the adoption of said resolution; and

WHEREAS, since the adoption of said postwar program circumstances and conditions have developed which require and warrant some changes in and additions to the projects enumerated and defined in said Exhibit A; and

WHEREAS, since the adoption of said resolution of May 29, 1945, the Public Roads Administration has approved a system of federal aid secondary and feeder roads, which system includes most, but not all, of the roads enumerated and defined in said Exhibit B, which said system of federal aid secondary and feeder roads approved by the Public Roads Administration are set out and defined in an exhibit designated as Exhibit B-1, which is attached hereto and by this reference made a part hereof; and (*)

WHEREAS, when said postwar program was adopted on May 29, 1945, it was then the purpose and plan of the Commission to accept and employ for the acquisition of rights of way under the provisions of the Federal Aid Highway Act federal funds made available for such purpose; and

WHEREAS, since the adoption of said resolution, it has been

found and determined by the Commission that public interests in Oregon can be best served by using and employing only state funds for the purchase of rights of way needed in connection with said postwar program, thereby releasing for construction purposes all federal funds which have been allocated to Oregon under the provisions of said Federal Aid Highway Act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That Exhibit A, which is attached to said resolution of May 29, 1945, and made a part thereof, be and the same hereby is amended and revised in the manner, to the extent and for the purposes set out, defined and provided for in Exhibit A-1, which is attached hereto and by this reference made a part hereof, and said changes, modifications and additions set out in said Exhibit A-1 hereby are approved and adopted and shall become a part of the said postwar program. (*)

2. That all rights of way required in connection with the accomplishment of the State's said postwar program shall be acquired and purchased with state funds, and that all federal funds available under the provisions of said Federal Aid Highway Act for the acquisition of rights of way shall be used and employed for purposes of highway construction.

3. That the federal aid secondary and feeder road system approved by the Public Roads Administration and set out and defined in Exhibit B-1, which is attached hereto and by this reference made a part hereof, hereby is approved and adopted as the system of highways which shall constitute the federal aid secondary and feeder roads which are to be constructed as a part of the State's postwar program. (*)

4. There is attached hereto, marked Exhibit B and by this reference made a part hereof, a map or print on which are shown all of the highways constituting the federal aid secondary and feeder road system designated and defined in Exhibit B-1 (**)

5. There is attached hereto and made a part hereof a map or print on which are shown all of the projects named and designated in Exhibit A which is a part of the postwar program adopted May 29, 1945. There are also shown on said print the projects or highways added and those deleted and those changed as to year of construction, all of which additions, deletions and changes are provided for in Exhibit A-1 which is a part of this resolution. The print herein referred to is

SEP 03 1946

designated as Exhibit F and by this reference made a part hereof. (**)

6. Except as revised or amended by this resolution and specially set forth herein, the provisions of said resolution of May 29, 1945, shall remain in full force and effect and shall constitute the findings, declarations, acts and purposes of this Commission with respect to said postwar program.

7. Any changes, modifications or alterations of said postwar program as disclosed and established in said original resolution and in this amendatory resolution shall be considered and disposed of by this Commission by resolution or other official act properly identified with said programs duly adopted and entered in the minutes of the Commission.

8. This resolution shall be entered in the minutes and records of the Commission as of September 23, 1946, and a complete copy thereof delivered to the Public Roads Administration.

Footnotes:

(*) Exhibit A-1, consisting of four pages, and Exhibit B-1, consisting of forty-one pages mentioned in the above resolution, follow.

(**) The maps mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 5, under the heading "Special Matters" and said maps by this reference are made a part of this minute entry to the same extent as if copied in full herein.

CHANGES IN FEDERAL AID PROGRAMS

SUBSEQUENT TO PASSAGE OF RESOLUTION MAY 29, 1945

County	Section and Description	Estimated Construction Cost	Year
	I. PROJECTS TO BE ADDED IN PRIMARY FEDERAL AID PROGRAM		
U. S. Route No. 30 (Columbia & Old Oregon Trail):			
Columbia	Rainier-Goble, 5.6 Mi. Grad., Surf., Paving & Bridge	$800,000	3
State Route No. 2 (Wolf Creek or Sunset):			
Washington	Commonwealth Traffic Interchange	$ 46,500	2
Washington	Austin Road Grade Separation	$ 26,000	2
Washington	Cemetery Road Grade Separation	$ 25,000	2
	II. PROJECTS TO BE ADDED IN SECONDARY FEDERAL AID PROGRAM		
Baker-Unity, Primary 13:			
Baker	Unity Jct.-Mill Gulch, 21.24 Mi. Grad., Surf. & Oiling (Substituted for Salisbury-McEwan Project)	$296,000	1
U. S. Route No. 20 (Central Oregon):			
Malheur	Nyssa Section, Sta. 23+31-44, 0.43 Mi. Paving (Transferred from Primary F. A. Program as project is not on Primary F. A. System)	$ 40,000	2

SEP 18 1946

County	Section and Description	Estimated Construction Cost	Year
	II. PROJECTS TO BE ADDED IN SECONDARY FEDERAL AID PROGRAM - CONT.		
John Day-Burns, Primary 395:			
Harney	Crant Co. Line-Forest Bdry., Grad., Surf. and Oil in addition to work originally contemplated. (Substituted for Trout Creek Project originally included in State Project)	$ 50,000	2
Bonanza-Malin, Co. Rd.			
Klamath	Bonanza-Malin, Grad., Surf. & Oil, 14.8 Miles (Substituted for Olene-Poe Valley Project)	$250,000	3
	III. PROJECTS TO BE ELIMINATED FROM PRIMARY FEDERAL AID PROGRAM		
U. S. Route No. 101 (Oregon Coast):			
Lincoln	Oceanlake Section, Sta. 879+13-922, 0.8 Mi. Grad. & Bit. Macadam (Transferred to State Program)	$ 50,000	3
U. S. Route No. 20 (Central Oregon):			
Malheur	Nyssa Section, Sta. 23+31-44, 0.43 Mi. Paving (Transferred to Secondary F. A. Program as project is not on Primary F. A. System)	$ 40,000	2
	IV. PROJECTS TO BE ELIMINATED FROM SECONDARY FEDERAL AID PROGRAM		
Adrian Spurs (3), Secondary			
Malheur	Adrian-Parma, 0-9, 2.77 Miles	$ 11,000	3

SEP 13 1946

County	Section and Description	Estimated Construction Cost	Year
	IV. PROJECTS TO BE ELIMINATED FROM SECONDARY FEDERAL AID PROGRAM CONT.		
Adrian Spurs (3), Secondary (Cont.)			
Malheur	Adrian-Arena Valley, Grad., Surf. & O-9, 3.19 Miles	$ 18,000	3
Malheur	Adrian-Caldwell, Grad., Surf. & O-9, 4.4 Miles	$ 46,000	3
	(Above projects transferred to State Program as Adrian Spurs were not approved by P.R.A. as parts of Secondary F. A. System)		
Sumpter Valley, Sec.-220			
Baker	Salisbury-McEwan, Grad., Surf. & Oil	$360,000	2
	(Replaced by Unity Jct.-Mill Gulch Project)		
Olene-Poe Valley, Co. Rd.			
Klamath	Olene-Poe Valley, Grad., Surf., & Oil, 10.0 Miles (Replaced by Bonanza-Malin Project)	$250,000	3
	V. PROJECTS TO BE TRANSFERRED FROM FIRST YEAR TO SECOND YEAR		
Cornelius Pass, Co. Rd.			
Washington	Orenco Section, Grad., Surf. & Oil, Sta. 330+00-717+00, 3.66 Mi. (Transferred to permit advancing Unity Jct.-Mill Gulch Project to first year)	$190,000	2

SEP 23 1946

County	Section and Description	Estimated Construction Cost	Year
	VI. PROJECTS TO BE TRANSFERRED FROM THIRD YEAR TO SECOND YEAR		
John Day-Burns, Primary 395			
Harney	Grant Co. Line-Forest Bdry., Surf. & Oil, M.P. 39.7-47.0, 7.3 Mi. (Transferred to permit earlier contracting)	$195,000	2

FEDERAL AID SECONDARY HIGHWAYS
APPROVED BY THE COMMISSIONER OF PUBLIC ROADS

As of January 29, 1946

BAKER COUNTY

Primary State Highways:		FAS No.	Miles
Baker-Homestead	From FA Route 1 in Baker via Richland to junction with State Highway No. 55 east of Richland	505	50.95
Baker-Homestead	From junction with State Highway No. 55 (FAS 505) east of Richland via Robinette to Brownlee	500	10.81
Halfway	From junction with State Highway No. 12 (FAS 505) east of Richland to Halfway	505	11.15
Baker-Unity	From FA Route 5 approximately 2.5 miles north of Unity to FA Route 1 in Baker	501	46.31
	Sub-total		119.22
Secondary State Highways:			
Halfway-Cornucopia	From State Highway No. 55 (FAS 505) at Halfway to Cornucopia	505	11.52
Pine Creek	From State Highway No. 55 (FAS 505) at Halfway to a road junction in Section 7, T. 8 S., R. 47 E., W. M.	504	3.72
Sumpter Valley	From a road junction near the north city limits of Sumpter to State Highway No. 13 (FAS 501) at Salisbury	502	19.86
Haines-Anthony	From FA Route 1 near Haines northwesterly to a road junction in Section 5, T. 7 S., R. 38 E., W. M.	503	11.30
Medical Springs	From State Highway No. 12 (FAS 505) near the north city limits of Baker to the Baker-Union County line near Pondosa	486	19.83
	Sub-total		66.23

SEP 23 1946

County Roads:		FAS No.	Miles
Baker-Goodrich Creek-Pine Creek-Wingville	From FA Route 1 at north city limits of Baker Northwesterly to a road junction near Pine Creek; thence easterly via Wingville to FA Route 1 approximately 3 miles northwest of Baker	506	13.60
Haines-Rock Creek Loop	From FA Route 1 at Haines westerly to Rock Creek; thence north 0.5 mile; thence east 3 miles to Secondary State Highway No. 411 (FAS 503)	507	8.70
Muddy Creek	From Secondary State Highway No. 411 (FAS 503), approximately 3.5 miles northwest of Haines, west and south to FAS 507, 0.5 mile north of Rock Creek	508	4.40
Baker-Homestead Highway-Keating	From State Highway No. 12 (FAS 505) in Section 29, T. 8 S., R. 42 E., W. M., northerly to the village of Keating	509	3.20
Richland-New Bridge	From State Highway No. 12 (FAS 505) at Richland northwesterly to New Bridge	510	2.10
Richland-South	From State Highway No. 12 (FAS 505) at Richland southerly to a county road junction in Section 36, T. 9 S., R. 45 E., W. M.	511	3.00
Halfway-North	From State Secondary Highway No. 413 (FAS 505) at Halfway north to a county road junction in Section 29, T. 7 S., R. 46 E., W.M.	512	3.00
North Powder-Haines-Anthony Secondary State Highway	From Secondary State Highway No. 411 (FAS 503) approximately 7 miles northwest of Haines to the Union-Baker County line	488	0.30
	Sub-total		38.30
	Total Miles, Baker County		223.75

1946

BENTON COUNTY

		FAS No.	Miles
Primary State Highways:			
Alsea	From FA Route 22 near Philomath via Alsea to the Benton-Lincoln County line	144	29.57
	Sub-total		29.57
Secondary State Highways:			
Eddyville-Blodgett	From FA Route 22 at Blodgett via Summit to the Benton-Lincoln County line	145	6.47
Kings Valley	From FA Route 22 near Wren via Kings Valley to the Benton-Polk County line	190	9.82
Territorial	From FA Route 9 in Monroe to the Benton-Lane County line	200	2.02
Corvallis-Eastside	From FA Route 9 in Corvallis to the Benton-Linn County line	202	0.13
	Sub-total		18.44
County Roads:			
North Albany-Granger Road	From FA Route 10 in North Albany to the Benton-Polk County line	193	8.60
Granger-Independence	From FA Route 10 at Granger to a junction with FAS 193 approximately 1½ miles northeast of Wells	205	5.60
Greenberry-Beaver Creek	From FA Route 9 at Greenberry to a junction with a county road in Section 11, T. 13 S., R. 6 W., W. M.	206	5.50
Bellfountain-Dawson	From FA Route 9 approximately 3 miles north of Monroe to Dawson	207	6.40
	Sub-total		26.10
	Total miles, Benton County		74.11

CLACKAMAS COUNTY

Primary State Highways:			
Mt. Hood	From FA Route 24 southeast of Government Camp to the Clackamas-Hood River County line	115	2.90
	Sub-total		2.90

SEP 13 1944

CLACKAMAS COUNTY - Continued

Secondary State Highways:		FAS No.	Miles
Woodburn-Sandy	From FA Route 24 at Sandy southwesterly via Eagle Creek to junction with FAS 140 approximately 1 mile southeast of Eagle Creek	141	7.68
Woodburn-Sandy	From FAS 141 approximately 1 mile southeast of Eagle Creek southerly via Estacada, Springwater, and Colton; thence southwesterly via Molalla to the Clackamas-Marion County line	140	36.35
Cascade	From FA Route 26 in Oregon City, via Mulino and Marquam, to the Clackamas-Marion County line	147	24.20
Canby-Marquam	From FA Route 3 in Canby to a junction with FAS 140	117	8.02
Beaverton-Aurora	From the Clackamas-Marion County line via Wilsonville to the Clackamas-Washington County line	22	5.59
	Sub-total		81.84
County Roads:			
Eagle Creek-Roy Corner-Mt. Hood Highway	From FA Route 24 approximately 1.8 miles east of Sandy via Dover to State Secondary Highway No. 161 (FAS 140)	140	9.50
S. E. 82nd Street-Damascus	From FAS 129 at Damascus to the Clackamas-Multnomah County line	39	3.50
Clackamas-Boring	From FA Route 41 at Clackamas, via Damascus and Boring, to junction with FA Route 24	129	12.80
Rock Creek-Carver-Barton-Eagle Creek	From FAS 129 near Rock Creek, via Carver and Barton, to junction with State Secondary Highway No. 161 (FAS 141) at Eagle Creek	132	9.80
Parkplace-Springwater	From FA Route 41 at Parkplace, via Logan, to junction with State Secondary Highway No. 161 (FAS 140) near Estacada	131	17.20
Milwaukie-Gladstone	From a county road junction near the south city limits of Milwaukie southeasterly to FA Route 41 in Gladstone	119	5.90

1346

CLACKAMAS COUNTY - Continued

County Roads: (Con.)		FAS No.	Miles
West Linn-Oswego-Wilsonville Road	From FA Route 3 in West Linn southwesterly and northwesterly to FAS 122 approximately 2 miles southwest of Oswego	120	5.10
Oswego-Wilsonville-Yamhill County line	From FA Route 3, via Wilsonville, to the Clackamas-Yamhill County line	122	16.50
Liberal-Molalla-Wilhoit	From State Secondary Highway No. 160 (FAS 147) at Liberal, via Molalla, to a junction with county road approximately one mile northwest of Wilhoit	118	9.00
	Sub-total		89.30
	Total Miles, Clackamas County		174.04

CLATSOP COUNTY

Primary State Highways:		FAS No.	Miles
	None		
Secondary State Highways:			
Nehalem	From FA Route 2 in Astoria southeasterly via Jewell and Vesper to the Clatsop-Columbia County line	1	37.72
Fishhawk Falls	From FA Route 27, approximately 2 miles northwest of Elsie, northeasterly to FAS 1, approximately 4 miles northwest of Jewell	3	5.86
	Sub-total		43.58
County Roads:			
Warrenton-Fort Stevens	From FA Route 2 in Warrenton northwesterly through Warrenton and Hammond to the east boundary of the Fort Stevens U. S. Military Reservation	2	4.50
Warrenton-Chapman Street	From FA Route 2 in Warrenton north and west to FAS 2 in Warrenton	5	1.80
Jewell-Elsie	From FA Route 27, approximately 1.5 miles east of Elsie, northeasterly to FAS 1 at Jewell	6	8.70

SEP 23 1946

CLATSOP COUNTY - Continued

County Roads: (Con.)		FAS No.	Miles
Youngs Bay-Melville	From Melville on the Lewis and Clark River northerly to FA Route 2 south of Astoria	8	7.20
	Sub-Total		22.20
	Total Miles, Clatsop County		65.78

COLUMBIA COUNTY

Primary State Highways:		FAS No.	Miles
	None		
Secondary State Highways:			
Nehalem	From the Columbia-Clatsop County line, via Birkenfeld, Mist, Vernonia, to the Columbia-Washington County line	1	30.14
Mist-Clatskanie	From FAS 1 at Mist northerly to FA Route 1 at Clatskanie	4	11.90
	Sub-total		42.04
County Roads:			
Pittsburg-Scappoose	From FAS 1 at Pittsburg southeasterly to FA Route 1 north of Scappoose	9	21.00
Inglis-Mayger	From FA Route 1, approximately 1 mile south of Quincy, northeasterly to Mayger	10	4.40
Treharne-Sunset Camp	From FAS 1, approximately 1.7 miles southwest of Vernonia, to the Columbia-Washington County line	12	7.00
	Sub-total		32.40
	Total Miles, Columbia County		74.44

COOS COUNTY

Primary State Highways:		FAS No.	Miles
	None		
Secondary State Highways:			
Cape Arago	From Cape Arago State Park southwest of Charleston northeasterly to FA Route 2 in North Bend	263	14.25

SEP 23 1946

COOS COUNTY - Continued

Secondary State Highways: (Con.)		FAS No.	Miles
Empire-Coos Bay	From FAS 263 near the east city limits of Empire southeasterly to FA Route 2 in Coos Bay	246	3.55
Coos River	From FA Route 2 near Coos Bay northeasterly via Allegany to a road junction approximately 5 miles northeast of Allegany	262	18.86
Powers	From Powers northerly to FA Route 14 approximately 1.5 miles southeast of Myrtle Point	247	18.62
	Sub-total		55.28
County Roads:			
Lakeside Road	From FA Route 2 in Section 13, T. 23 S., R. 13 W., W. M., southeasterly to Lakeside	248	1.10
North End Bay Bridge-Jordan Point	From FA Route 2 at the north end of the Coos Bay Bridge southeasterly to a road junction at Jordan Point	249	2.80
Coquille-Fairview	From State Highway No. 9 in Coquille northeasterly to a road junction near Fairview	250	8.00
Coquille-Myrtle Point (South Side)	From FA Route 14 at Myrtle Point northwesterly to FA Route 14 south of Coquille	251	13.10
Myrtle Point-Gravelford	From FA Route 14 at Myrtle Point northeasterly to a road junction at Gravelford	252	8.00
Enegren Ferry-Delwood	From FAS 262 at Enegren Ferry easterly to Delwood, in Section 29, T. 25 S., R. 11 W., W. M.	255	8.00
	Sub-total		41.00
	Total Miles, Coos County		96.28

CROOK COUNTY

Primary State Highways:		FAS No.	Miles
Crooked River	From a junction with State Secondary Highway No. 380 in Section 13, T. 17 S., R. 16 E., W. M., northerly to FA Route 5 in Prineville	321	21.44
	Sub-total		21.44

SEP 23 1946

CROOK COUNTY - Continued

Secondary State Highways:		FAS No.	Miles
O'Neil	From FA Route 5 at Prineville westerly to the Crook-Deschutes County line	320	13.97
Madras-Prineville	From FA Route 5 in Prineville northwesterly to the Crook-Jefferson County line	385	10.70
Powell Butte	From FA Route 5 approximately one mile west of Powell Butte, southerly to a county road junction at the southeast corner of Section 17, T. 16 S., R. 14 E., W. M.	404	5.72
Paulina	From a junction with FAS 402 in Section 13, T. 16 S., R. 17 E., W. M., easterly to Paulina	403	39.53
	Sub-total		69.92
County Roads:			
Prineville-Davis Ranch	From FAS 403 in T. 16 S., R. 17 E., W. M., northwesterly to FA Route 5 in Prineville	402	17.50

1946

In the discussion of the above resolution Chairman Banfield suggested that the Commission should provide a "cushion" fund for use in connection with the financing of jobs that cost more than the amounts originally budget for them. The suggestion was approved by Commissioners Schaupp and Chessman.

The matter of constructing the Sunset Highway adjacent to the Commonwealth subdivision west of Portland was also discussed. The Engineer advised that the amounts contained in the program as shown in the resolution for the Commonwealth traffic interchange and for the Austin Road and Cemetery Road grade separations represent only a portion of the total cost to provide a four-lane highway along the 2.4-mile section west from the Tualatin Valley Highway at Sylvan. He estimated that the total cost of such section at approximately $600,000. The Commission instructed the Engineer to render a complete report on this subject. In the meantime, the program will remain the same as adopted.

Regarding the proposed revision of the Old Oregon Trail between Echo and Umatilla, the Engineer advised that such revision is necessary in order to connect with the Umatilla River Dam. The County Court of Umatilla County, he said, has approved the change. He requested authority to negotiate approval of the change by the Public Roads Administration. The Commission approved the request by unanimous vote.

The Commission discussed briefly proposed revisions in the construction program recently adopted for state funds but deferred a decision thereon until the following day.

The Commission had under discussion adoption of a budget for the year 1947, and in this connection the Engineer submitted for the Commission's consideration a tentative budget covering all activities of the State Highway Department. This was given very careful consideration by the Commission, which ordered a number of changes and additions. The Engineer was instructed to make the changes as outlined by the Commission and to resubmit the budget in final form for adoption by the Commission at its next regular meeting.

The meeting adjourned at 5:15 p.m. to reconvene at 9:00 a.m. on the following day in the auditorium of the Public Service Building.

Portland, Oregon
September 24, 1946

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work and for the operation of the Wilsonville Ferry across the Willamette River were opened and read in conformity with previously-published notices, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

COLUMBIA RIVER AND OREGON COAST HIGHWAYS IN CLATSOP COUNTY
ASTORIA (BOND ST.-COMMERCIAL ST. AND TAYLOR AVE.-ASTOR ST.) SECTION

Grimstad and Vanderveldt, Astoria	$ 68,209.50

COOS RIVER SECONDARY HIGHWAY IN COOS COUNTY
ENEGREN FERRY SECTION

Coos Bay Dredging Co., Inc., Coos Bay	$ 46,394.00

MADRAS-PRINEVILLE SECONDARY HIGHWAY IN CROOK AND JEFFERSON COUNTIES
MADRAS-PRINEVILLE SECTION

Rogers Constr. Co., Portland	$407,668.00
J. N. & M. J. Conley, Portland	409,360.00
E. C. Hall Co., Portland	425,185.50
Edwin C. Gerber, Oregon City	425,959.00
Sound Constr. & Engr. Co., Seattle, Wn.	431,591.50
J. A. Terteling & Son, Boise, Idaho	505,751.50
Morrison-Knudsen Co., Inc., Boise, Idaho	516,263.00
McNutt Bros., Eugene	595,051.00

PACIFIC HIGHWAY IN JACKSON COUNTY
ASHLAND (WATER ST.-OAK ST.) SECTION

No bids received

PACIFIC HIGHWAY WEST IN MULTNOMAH COUNTY
FRONT AVENUE (ALDER ST.-SHERIDAN ST.) SECTION

Edlefson Weygandt Co., Portland	$ 16,455.00
Miner and Co., Portland	17,304.00

SHERARS BRIDGE SECONDARY HIGHWAY IN SHERMAN AND WASCO COUNTIES
DESCHUTES RIVER-SHERARS SUMMIT SECTION

O. C. Yocom Co., McMinnville*	$100,751.00
Babler Bros., Portland	115,166.00
E. C. Hall Co., Portland *	137,624.00

* Bidder will not accept this project alone.

SHERARS BRIDGE SECONDARY HIGHWAY IN WASCO COUNTY
TYGH VALLEY-DESCHUTES RIVER SECTION

O. C. Yocom Co., McMinnville * **	$ 98,620.50
E. C. Hall Co., Portland **	107,856.50
Babler Bros., Portland	107,982.00
Vernie Jarl, Gresham	111,887.00

* If also awarded the Deschutes River-Sherars Summit Project, the bidder will make a "lump sum reduction" of 5% in the sum of the amounts bid for the two projects.

** Bidder will not accept this project alone.

COMBINATION BIDS FOR ABOVE TWO PROJECTS

	(1)	(2)	Reduc.	Comb. Bid
O. C. Yocom Co.	$100,751.00	$ 98,620.50	$9,968.58	$189,402.92
E. C. Hall Co.	137,624.00	107,856.50	None	245,480.50
Babler Bros.	115,166.00	107,982.00	None	223,148.00

WILSON RIVER AND NEHALEM SECONDARY HIGHWAYS IN WASHINGTON COUNTY
FOREST GROVE (MAIN STREET AND COLLEGE WAY) SECTION

Harr and Horton, Portland	$ 18,997.00
O. C. Yocom Co., McMinnville	19,837.00

SUNSET HIGHWAY IN WASHINGTON COUNTY
DAVIES-NORTH PLAINS SECTION

	Using Tar	Using Asphalt

McNutt Bros., Eugene	- - - - -	550,650.00

FURNISHING FERRY SERVICE ACROSS WILLAMETTE RIVER
AT WILSONVILLE

Theodore E. Bruck, Wilsonville	$ 2,390.00 per month

Mr. Charles A. Sprague, Member of the Highway Committee of the Salem Chamber of Commerce, headed a delegation which urged the Commission to complete the construction of the West Portland-Hubbard Highway, including a bridge over the Willamette River near Wilsonville. Others in the delegation were E. A. Miller, W. L. Phillips, members of the Highway Committee of the Salem Chamber of Commerce; Charles W. Smith, Secretary, Woodburn Chamber of Commerce; A. R. Trombly, Chairman, Roads and Highways Committee of the Portland Chamber of Commerce, C. C. Boozier and Floyd L. Martin, members of the Roads and Highways Committee of the Portland Chamber of Commerce.

Mr. Sprague presented petitions signed by 2,343 people residing at various points in the Willamette Valley south of the town of Hubbard who urgently requested this improvement. He recited the history of this project and gave statistics to show the economic justification for the early completion of the road, which, he said, would provide a new route from Willamette Valley points to Portland that would be four miles shorter in distance than the existing route of the Pacific Highway East and would contain grades and curvature that would provide easier and safer travel. He gave as their understanding that the Commission has authorized an expenditure of $400,000 for the improvement of the Pacific Highway East between Oregon City and Canby and gave as their thought that the completion of the West Portland-Hubbard Highway should be given preference in the expenditure of such funds, although he admitted that the Oregon City-Canby Section should be widened.

Mr. Boozier advised that the Highway Committee of the Portland Chamber of Commerce has gone on record in support of the request of the Salem Chamber of Commerce for the early completion of the West Portland-Hubbard Highway. Mr. Tromley also spoke in behalf of the improvement of this road.

Chairman Banfield advised that the West Portland-Hubbard Highway Project is not in the Commission's Three Year Postwar Construction Program and that even were it in this program, the Commission would be unable to complete it because of the inability to secure materials with which to construct necessary bridges. He pointed out that there are now two highways available between Salem and Portland and advised that, whereas the Commission appreciates that the West Portland-Hubbard Highway is desirable and would shorten the distance into Portland from the south, there are other places where the Commission feels it should spend the money because of the difficulties which exist in getting into and out of some of the cities. He mentioned the City of Hood River in this category. Chairman Banfield also advised that it would take about three years to complete the West Portland-Hubbard Highway and that the Commission undoubtedly will give the project consideration when other important projects have been taken care of; that the Commission will discuss it in the formulation of its next postwar program. He declared that the proposed improvement of the present highway between Oregon City and Canby is just as essential as the construction of the West Portland-Hubbard Highway and stated that spending $400,000 for this improvement has not handicapped construction of the "Wilsonville Cut-Off" at all.

The Engineer estimated the cost to complete the West Portland-Hubbard Highway at $2,250,000, including the bridge over the Willamette River at Wilsonville which is estimated to cost $1,138,000. Commissioner Schaupp

gave as his thought that the Highway Commission is fully justified in straightening and widening the present highway in preference to the constructing of the West Portland-Hubbard Highway because of the volume of traffic which it carries, and for the further reason that it is a long-established road which will always be traveled by many people. Commissioner Chessman stated that he considers the improvement of the Oregon City-Canby Section of the present highway of primary importance because of the many complaints that have been received concerning it, however, expressed appreciation of the desirability of the Wilsonville Cut-Off Project for the reasons stated by Mr. Sprague. Chairman Banfield concluded the discussion by stating that, while the Commission has not programmed the construction of the West Portland-Hubbard Highway in conformity with the desires of the people represented by the delegation, it is not because the Commission has not given it consideration, but the Commission has deferred it for reasons stated. He assured the delegation that the Commission will give it consideration later on when the time is propitious.

A delegation from Hood River, consisting of C. O. Bunell, President of the Hood River Chamber of Commerce; R. E. Steele, Secretary of the Chamber of Commerce; and C. M. Hurlburt, County Engineer, representing the County Court of Hood River County, appeared before the Commission in the interests of the Columbia River Highway. Mr. Steele headed the group. He urged the Commission to improve what he termed three dangerous points in the existing highway by widening and eliminating curves, one of the points being at Herman Creek where there is a sharp curve and a narrow bridge. The second point is at the east end of Shell Rock Mountain, and the third point is a section about one and one-quarter mile long just east of Viento. He advised that, as they understand it, the improvements would fit in with the plans of the Highway Commission for the major improvement of this highway and that the total length of the three improvements now requested is only about three miles long. He pointed out that the three points are above the railroad so would require no dredging work and that the work would consist of light construction. The Engineer was instructed to investigate the conditions at these points and to report back to the Commission.

Mr. Steele also suggested that the Highway Commission acquire strips of timber land along the Columbia River Highway in the Herman Creek area so as to prevent logging operations and insure the preservation of the timber stand. He gave as his thought that the purchase price would be insignificant compared with the values received by the state. He was informed by Chairman Banfield that such matters are under the supervision of the State Parks Superintendent, Mr. S. H. Boardman, who keeps in close touch with all matters of this kind; further, that the Commission has received no reports from the Parks Department that the acquisition of timber strips along this highway is essential and will be an asset to the State Parks system, and until such report has been received the Commission does not feel like taking action.

Mr. Steele then asked the Commission to make a decision relative to the permanent location of the Columbia River Highway, in Hood River, as an aid to the city in subdividing and developing a six-acre tract of land just east of the State Highway Department's maintenance site. He explained that the city owns this tract and wishes to subdivide it in cooperation with the

county. The plan calls for a street lay-out on the contour basis and the sale of the lots to returned soldiers for not over $200 each, but it is essential, before the project can proceed, to know just where the highway will be located. Chairman Banfield advised that the Commission is waiting for the city to express itself concerning the highway location because of the controversial nature of the subject. The Commission, he said, will make its decision when the local people have decided what they want and probably will do something if and when it will satisfy the majority of the people of this community. He stated that the Commission will do nothing until it receives expressions of the attitude of the County Court of Hood River County and the Hood River City Council relative to this matter. Such expressions, he said, should be in the form of resolutions. This concluded the conference.

A delegation from Klamath and Jackson Counties was present regarding the improvement of a road leading to the Lake of the Woods recreational area. Mr. William H. Fluhrer, President, Jackson County Chamber of Commerce, headed the delegation, which included County Judge U. E. Reeder, Klamath County; Charles R. Stark, Secretary, Klamath County Chamber of Commerce; Jack A. Dutcher, Klamath Falls, resort operator at the Lake of the Woods; Paul Rynning, County Engineer, Jackson County; and Tom Neeley, Medford, resort operator. Mr. Fluhrer urged the improvement of this road as a primary highway route between Medford and Klamath Falls. He declared that this route could be constructed to primary highway standards for less money than it would take to modernize the present highway (Green Springs Highway) between Ashland and Klamath Falls. He stressed the improvement of the road from the standpoint of opening up additional farm lands that are now isolated, from the recreational and tourist standpoint, and from the standpoint of making the Lake of the Woods area accessible for people who maintain summer homes at that place and for groups, such as Boy Scouts, etc., who conduct camps at the Lake of the Woods each year. He also urged favorable consideration from the standpoint of providing road facilities for the marketing of timber in the district which is now inaccessible because of lack of such facilities.

Chairman Banfield advised that the Commission a couple of years ago formulated a construction program for available funds based on the recommendation of the Klamath County Court and the Chamber of Commerce and that such program was prepared in good faith. Mr. Stark advised that they do not wish to divert from that program. He suggested that the Commission authorize a survey of the road so that engineering data will be available if and when construction can proceed on a timber-access-road basis. He confirmed Mr. Fluhrer's remarks relative to timber, much of which, he said, is ripe and must be marketed. He also stressed the recreational features of the Lake of the Woods area and filed with the Commission a letter in support of his arguments. Judge Reeder urged the Commission to make a survey as suggested by Mr. Stark.

Chairman Banfield pointed out that from a recreational standpoint the delegation is asking for a $2,000,000 project and for a $3,000,000 project from the logging standpoint. He explained that the Highway Commission does not authorize a survey of any project until it is placed in the construction program and in this particular instance such procedure is con-

tingent upon joint decision among the Public Roads Administration, the U.S. Forest Service, and the Highway Commission because a considerable portion of the road is within the National Forest area. Forest Highway Funds, he said, are allocated one year at a time. He pointed out that the project under discussion is only one of many where similar conditions exist, and while the Commission is not in position to make any commitment at this time, the matter will be taken under consideration.

In this connection the Secretary presented numerous letters from people who have visited the Lake of the Woods recreational area during the past season, all of whom complain of the road conditions and urge improvements.

A delegation representing the Three Flags Highway Association appeared before the Commission and urged additional improvements on U.S. Highway No. 395, which extends from the California State line, near Lakeview, northerly through Burns, Canyon City, and Pendleton to the Washington State line, near Wallula. Included in the delegation were the following: Nelson B. Higgs, Burns, County Judge, Harney County; P.W. Hotchkiss, Lakeview, County Commissioner, Lake County; William R. Meiners, Pendleton, County Commissioner, Umatilla County; C.W. Ogle, Lakeview, Vice-President, Lake County Chamber of Commerce; and Jack Mayne, Lakeview, Manager, Three Flags Highway Association. Mr. Mayne headed the group.

Mr. Mayne inquired as to the Commission's plans for the improvement of the highway between Burns and John Day, such information being needed, he said, because of the large expenditure that is contemplated for tourist advertising purposes. He advised that the State of California has available for expenditure for such purposes before June, 1947, the sum of $195,000 and the question arises whether or not this money should be spent on an intensive program of tourist promotion now or whether they should wait a year or so. Chairman Banfield advised that the Commission has authorized an expenditure of approximately $945,000 for improvements on this highway route, consisting of $50,000 for the improvement of the Tutuilla Creek Section, near Pendleton; $150,000 for the improvement of the Beech Creek Section , north of John Day; $500,000 for the improvement of the Soda Mountain-Harney County Line Section; and $245,000 for the improvement of the Grant County Line-Forest Boundary Section. He added that these projects are definitely in the Commission's program and will be contracted as rapidly as possible, although some of them may have to be postponed because of conditions beyond the control of the Highway Commission. He gave as his thought that the district has been pretty well taken care of by such allocations. He suggested that they should wait a year or so before spending the advertising money mentioned by Mr. Mayne because of uncertainties that exist as to construction of the above-mentioned projects.

Mr. Mayne asked for better maintenance of the Three Flags Highway route and the filling in of mud holes in certain sections. He was informed that this work will be taken care of to the best of the Commission's ability with the equipment and forces available.

Mr. O.A. White, representing White Bros. Co., contractors, Walla Walla, Washington, to whom the Commission, on May 16, 1946, awarded the contract

for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County, appeared before the Commission regarding his request for relief from performance of the work and the return of his proposal bond. Mr. White declared that he looked this job over very carefully with the Resident Engineer in charge prior to the day that the Commission received bids for the project and was given certain information by the Resident Engineer concerning the finished slope, which information later proved erroneous; however, it is now evident that the Resident Engineer and he were not thinking along the same line. It was his thought that such misunderstanding is justification for his refusal to proceed with the work under the contract and for the return to him of the bid bond which he submitted along with his proposal.

The Engineer asserted his faith in the Resident Engineer, who, he said, would, in no case, misinform any contractor regarding proposed construction; moreover, subsequent to the time that White Bros. Co. defaulted, arrangements were made to have the work done by another contractor, who is carrying on the work in strict conformity with the same plans and specifications that were issued to White Bros. Co., with no difficulties whatsoever having been encountered to date. He read aloud a report from Division Engineer W. C. Williams on the subject in which Mr. Williams gave as his opinion that White Bros. Co. were of the belief that they had made an error in estimating the work, their offer being some $25,000 lower than the Engineer's estimate for the project, and that it was this feature, and not the actual performance of the work, that determined them to default. (See Mr. William's letter dated September 20, 1946, directed to H. G. Smith, Construction Engineer, in general files, for further details.)

Following considerable discussion of this subject, Chairman Banfield stated that he could not understand on what basis the Commission could justify the return of the bond submitted by White Bros. Co. He gave as his feeling that it would establish an undesirable precedent; moreover, the defaulting of a contract by any contractor carries with it the automatic forfeiture of the bond. Commissioner Schaupp expressed concurrence in the viewpoint of Chairman Banfield, notwithstanding that he sympathized with White Bros. Co. in their loss. Chairman Banfield concluded the discussion by stating that the Commissioners would discuss the matter among themselves and would announce their decision later.

A delegation representing three committees of the Portland Chamber of Commerce -- Recreational Resources Committee, Committee on Roads and Highways, and Visitors Service Committee -- appeared before the Commission regarding the completion of the Sunset Highway between Portland and Davies. The delegation was headed by Mr. Arthur Kirkham, Chairman of the Recreational Resources Committee, and included the following: Arthur Moulton, Member, Recreational Resources Committee; A.R. Trombly, Chairman of the Roads and Highways Committee; Floyd L. Martin, Member, Roads and Highways Committee; Lynn Sabin, Chairman of the Visitors Service Committee; Q. Cox, and Larry Hilaire, Members of the Visitors Service Committee.

Mr. Kirkham advised that, according to press reports, this section of highway is not scheduled for completion until 1949, and their purpose in

coming before the Highway Commission today is to urge the Commission to reschedule the project for early completion. He alleged that the route which is now being used, via Forest Grove, is hazardous, being of a low type of construction with many curves, and is utterly incapable of carrying the volume of traffic which uses it. Chairman Banfield advised that this project is now in the Commission's construction program for early undertaking and that it is anticipated that the work will be completed within 18 months. He added that the money to finance it has been provided and that the Commission is expediting the improvement as much as it possibly can. Mr. Kirkham expressed satisfaction with such program.

The Commission recessed for luncheon at 12:10 p.m. and reconvened the meeting at 2:00 p.m. in the same room with the same persons present and participating.

A delegation from McMinnville, headed by Hon. R. H. Windishar, Mayor, appeared before the Commission regarding the acquisition of right of way needed for a proposed revision in the Three Mile Lane Secondary Highway, which extends easterly from McMinnville to Dayton. Others in the delegation were Eugene Marsh, City Attorney; Glen S. Macey, Chairman, Planning Commission; E. G. Younger, Manager, Chamber of Commerce; C. L. Knight, Member, Chamber of Commerce; Gale Vinton, Chairman, Highway Committee, Chamber of Commerce; Cyrus Forell, Member, Chamber of Commerce; O. C. Yocom, City Engineer; Lloyd Crow, City Councilman; Herman Larsen, City Councilman; M.W. Mattecheck, City Councilman; H.W. McNicol, businessman; Jack Bladine, Publisher, Telephone-Register; Father George J. Campbell, Member of the School Board, Archdiocese of Oregon; and Arthur J. Sullivan, Superintendent of Schools, Archdiocese of Oregon.

Mayor Windishar advised that the City of McMinnville is very anxious to secure a new bridge over the South Yamhill River on the Three Mile Lane Secondary Highway to facilitate the movement of traffic to the city's airport, which is located on this road. The present structure, he said, is inadequate to take care of the large volume of traffic that has to pass over it. He said that the city is not crowding the Highway Commission to construct a new bridge but is particularly anxious that it be located in the proper place, which means that right of way for the approaches must be acquired. He particularly mentioned a proposed revision at the outskirts of the City of McMinnville where the new location passes through the property of the Catholic school. The school authorities, he said, are willing to sell the right of way through the school property provided the state furnishes a new site for the school and for its athletic field, such a site being available nearby and being bounded by First Street, Second Street, Logan Street, and the highway. Mr. Windishar further stated that this property is now vacant and the owner has plans to subdivide it into small tracts, so, in their estimation, it is important that the Highway Commission take action to acquire the property while it is intact and can be obtained at reasonable cost. He said that the city is not urging the Commission to construct this proposed revision now but is simply asking the Commission to acquire the right of way so that it will be available when the Commission has the funds to finance construction. The Engineer advised that the former Highway Commission was familiar with this

project and was ready to contract the work but was unable to do so because of the lapse in the Federal monies with which the job was to be financed.

Chairman Banfield gave as his understanding that this is a four-way proposition involving the Catholic Church, the owner of the new school site, the city, and the state. He stated that this is an entirely new project to the present Highway Commission, and that the Commission must have time to study it before making its decision, so will take it under advisement for 30 days.

This matter was discussed at considerable length during which Mr. Forell, the owner of the proposed new school site, advised that he is anxious to proceed with the development of his property but is willing to postpone the work for another 30 days, if it is absolutely necessary. Mr. Marsh urged the Commission to authorize the taking of options for the right of way at once, but the request was denied. Father Sullivan advised that the present school site is ideal for their purposes and that they are not anxious to move but will do so in a spirit of cooperation, if necessary, because the present school building is old and must be replaced.

Chairman Banfield again stated that the Commission must have more time to study this matter and will make its decision within the next 30 days. Commissioners Schaupp and Chessman concurred. The matter was thereupon referred to the Engineer and the Chief Counsel for report at the next meeting of the Commission, such report to show the values of the properties involved, the estimated cost of acquiring the right of way and a new school site, engineering data, and other information.

Mr. J. E. Seabloom, representing the E. K. Wood Lumber Company, Scottsburg, Oregon, was present at the invitation of the Commission to give reasons why the special carrier permit issued to the E. K. Wood Lumber Company by the Public Utilities Commissioner should not be canceled in view of the Company's record of overloads. Mr. Seabloom expressed regrets that the violations occurred. He declared that the overload violations did not involve trucks owned by the Company but were committed by private individuals who were engaged to truck haul logs for the Company. He further stated that he has done everything possible to cooperate with the Highway Commission in the matter of loads and has repeatedly cautioned the truck operators to keep their loads within the prescribed limitations, but there are some who will not comply, and it is these few that the Company is planning to replace. Mr. Seabloom further stated that the E. K. Wood Lumber Company is now constructing its own private roads over which to truck haul its logs and when the work is done, which he anticipated would be in about two weeks, the Company's trucks no longer need use the state highway except for a three-mile section between Wells Creek and Weatherly Creek on the Umpqua Highway. Mr. Seabloom also stated that the Company has installed a reload on the Loon Lake County Road about one mile south of the Umpqua Highway where all loads passing this point will be weighed and excess logs will be removed before delivery to their Mill Creek Dump by other hauling equipment, so there will be absolutely no chance for overloads at this point. Mr. Seabloom promised hereafter to keep all of

his loads within the prescribed limits if the Highway Commission will not cancel his permit in this instance.

Chairman Banfield pointed out that the Commission has had more trouble with the E. K. Wood Lumber Company than with any other operator in this class of business. He recalled difficulties with this Company on previous occasions. Commissioner Schaupp declared that the Commission must "back up" its weighmasters; however, he advised that he would be willing to let the Company have another chance in view of Mr. Seabloom's promise that the violations would not be repeated. Commissioner Chessman stated that the Commission can not tolerate overloading and must put a stop to it; however, he also, was willing to give the E. K. Wood Lumber Company another chance in view of Mr. Seabloom's promise, but he suggested cancellation of the permits of Messrs. Hansen, Jackson, and Ulam, three of the private individuals who are hauling logs for the E. K. Wood Lumber Company, whose records were discussed at this conference. Chairman Banfield stated that he would join with Commissioners Schaupp and Chessman in giving the E. K. Wood Lumber Company another chance to make good its promises. He warned, however, that any further violations on the part of the Company would mean the automatic cancellation of the Company's permit. The Commission, by unanimous vote, ordered the cancellation of the permits of Hansen, Jackson, and Ulam as suggested by Commissioner Chessman. The Commission also ordered that hereafter permits shall be automatically canceled for violation of the rules and regulations in this district without the necessity of presenting the cases to the Commission for decision.

In this connection the Engineer reported additional violations by log-hauling operators, as follows:

Name	Violation
C. R. Staples, Sweet Home	Refusal to allow his load to be weighed, notwithstanding previous warning.
Donald R. Smith, Estacada	Refusal to allow his load to be weighed.
Sykes and Burr, Coquille	Deliberate overloads on two trucks, the gross weight of one being 88,400 pounds, the other being 70,980 pounds.

The Commission, by unanimous vote, ordered the cancellation of the special carrier permits of these three operators.

The Commission discussed with the Engineer bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

Grading and paving the Astoria (Bond Street-Commercial Street and Taylor Avenue-Astor Street) Section of the Columbia River and Oregon Coast Highways. All bids were rejected. Grading and surfacing the Enegren Ferry

Section of the Coos River Secondary Highway, Coos County. Bid rejected.

Regrading and oil-mat surfacing the Madras-Prineville Section of the Madras-Prineville Secondary Highway, in Crook and Jefferson Counties. Contract awarded to the low bidder, Rogers Construction Company.

Grading and paving the Ashland (Water Street - Oak Street) Section of the Pacific Highway, in Jackson County. No bids received. The Commission ordered that the people of Ashland be informed that the taking of bids at this meeting was the first opportunity the Commission has had to receive bids for this job and because of weather conditions it will be necessary to postpone readvertising it until next spring.

Furnishing and placing topsoil material on the Front Avenue (Alder Street - Sheridan Street) Section of the Pacific Highway West, Multnomah County. The contract was awarded to the low bidder, Edlefsen-Weygandt Co.

Grading and oil-mat surfacing the Deschutes River-Sherars Summit Section of the Sherars Bridge Secondary Highway, in Sherman and Wasco Counties. Contract awarded to O. C. Yocom Company, low bidder, on the basis of the combination bid for this project and for the grading and oil-mat surfacing of the Tygh Valley - Deschutes River Section of this highway, in Wasco County. Grading and oil-mat surfacing the Tygh Valley-Deschutes River Section of the Sherars Bridge Secondary Highway, Wasco County. Contract awarded to the low bidder, O. C. Yocom Company, on the basis of its combination bid covering this project and the Deschutes River - Sherars Summit Project.

Pavement widening on the Forest Grove (Main Street and College Way) Section of the Wilson River and Nehalem Secondary Highways, in Washington County. Contract awarded to the low bidder, Harr and Horton. Bituminous macadam surfacing on the Davies - North Plains Section of the Sunset Highway, Washington County. Contract awarded to the low bidder, Rogers Construction Company, using asphalt.

Furnishing ferry service across the Willamette River at Wilsonville. Contract awarded to Theodore E. Bruck, the only bidder.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Grading, paving, and construction of traffic control structures on the Astoria (Bond Street - Commercial Street and Taylor Avenue - Astor Street) Section of the Columbia River and Oregon Coast Highways, in Clatsop County: The Commission received only one bid for this job, being that of Grimstad and Vanderveldt, Astoria, at $68,209.50. The bid has been rejected.

"Grading and surfacing the Knegren Ferry Section of the Coos River Secondary Highway, in Coos County: The Commission received only one bid for this job, being that of the Coos Bay Dredging Company, Inc., Coos Bay, at $46,394. The bid has been rejected.

"Regrading and oil-mat surfacing on the Madras-Prineville Section of the Madras - Prineville Secondary Highway, in Crook and Jefferson Counties: The Commission received eight bids for this job, the low one being that submitted by Rogers Construction Company, Portland, at $407,668. The second low bid was that of J. B. and M. J. Conley, Portland, at $409,360. The Commission has awarded the contract to the low bidder, Rogers Construction Company.

"Grading and paving the Ashland (Water Street - Oak Street) Section of the Pacific Highway, in Jackson County: The Commission received no bids for this job.

"Furnishing and placing topsoil cover material on the Front Avenue (Alder Street - Sheridan Street) Section of the Pacific Highway West, in Multnomah County: Edlefsen - Weygandt Company, Portland, submitted the low bid for this job at $16,455. The only other bid was submitted by Miner and Company, Portland, at $17,304. The contract has been awarded to the low bidder, Edlefsen and Weygandt Company.

"Grading and oil-mat surfacing the Deschutes River - Sherars Summit Section of the Sherars Bridge Secondary Highway, in Sherman and Wasco Counties: O. C. Yocom Company, McMinnville, submitted the low bid for this job at $100,751. This bidder stated that he would not accept this project unless also awarded the contract for the grading and oil-mat surfacing of the Tygh Valley - Deschutes River Section of the Sherars Bridge Secondary Highway, in Wasco County. Babler Bros., Portland, submitted the next low bid at $115,166. There was one higher bidder. The contract has been awarded to the low bidder, O. C. Yocom Company, on the basis of its combination bid for both projects, totaling $189,402.92.

"Grading and oil-mat surfacing the Tygh Valley - Deschutes River Section of the Sherars Bridge Secondary Highway, in Wasco County: The low bid for this job was that of O. C. Yocom Company, McMinnville, at $98,620.50. This contractor stated that he would not accept the award of this project alone. He also offered a lump sum reduction of five percent on this job if awarded both contracts. The second low bid was submitted by E. C. Hall Company, Portland, at $107,856.50. This contractor stated that he would not accept this project unless also awarded the contract for the Deschutes River - Sherars Summit Project. There were two higher bidders. The Commission has awarded the contract to O. C. Yocom Company, low bidder for both jobs, on the basis of the combination bid submitted for both projects.

"Pavement widening on the Forest Grove (Main Street and College Way) Section of the Wilson River and Nehalem Secondary Highways in Washington County: The Commission received two bids for this work, the low one being that of Harr and Horton, Portland, at $18,997. The other bid was that submitted by O. C. Yocom Company, McMinnville, at $19,837. The contract has been awarded to the low bidder, Harr and Horton.

"Bituminous macadam surfacing and furnishing crushed rock in stockpiles on the Davies - North Plains Section of the Sunset Highway, in Washington County: Rogers Construction Company, Portland, submitted the low bid for this job at $59,982.50, based on the use of asphalt. The second low bid was submitted by Babler Bros., Portland, at $62,030, based on the use of asphalt. There were seven higher bidders. The Commission has awarded the contract to the low bidder, Rogers Construction Company.

"Furnishing ferry service across the Willamette River on the Beaverton - Aurora Secondary Highway at Wilsonville: The Commission received only one bid for this operation, being that of Theodore E. Bruck, Wilsonville, at $2,390 per month. The Commission has awarded the contract to Mr. Bruck at his bid price."

The Commission at this time considered the award of contracts for grading, topping, and culvert construction on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County, and for the grading and construction of bridges and culverts on the Glendale Junction-Wolf Creek Section of the Pacific Highway, in Douglas and Josephine Counties, bids for which were received by the Commission at its previous meeting on August 6, 1946. Public announcement was made that the Commission was now considering the award of these contracts and that it would hear at this time objections thereto if there were anyone present to protest the reconstruction of the highway on the proposed new alignment. There being no one present to offer objections to the award of these contracts, the Commission, after discussion, decided unanimously to award the contracts to the low bidder in each instance. Chairman Banfield thereupon publicly announced the awards as follows:

"Grading and topping the Johns - Glendale Junction Section of the Pacific Highway, in Douglas County: R. A. Heintz - Construction, Portland, submitted the low bid for this work at $299,478.50. McNutt Bros., Eugene, submitted the next low bid at $310,292.50. There were two higher bidders. The Commission has awarded this contract to the low bidder, R. A. Heintz - Construction, at its bid price.

"Grading and bridge construction on the Glendale Junction - Wolf Creek Section of the Pacific Highway, in Douglas and Josephine Counties: McNutt Bros., Eugene, submitted the low bid for this work at $877,031. Guy F. Atkinson Co., Portland, submitted the next low bid at $884,962. There were two higher bidders. The Commission has awarded the contract to the low bidder, McNutt Bros., at their bid price."

A delegation from Beaverton, headed by Paul L. Patterson, City Attorney, and including R. C. Doty, City Recorder; I. R. Metzler, School Superintendent; J. J. McMahon, Realtor; Leonard Adams, Chairman, Planning Commission; and Charles Bernard, Airport Owner, came before the Commission at this time regarding a proposed arterial highway which would by-pass Portland on the west and extend from a junction with U.S. 99W, near Tigard, northerly through Cornelius Pass to a junction with U.S. 30, near Burlington. Mr. Patterson advised that rumors are that this proposed highway is to pass through the Beaverton City Airport and if that is a fact they they wish to

protest the alignment. He was informed by the Engineer that the plans for this project are still in embryonic stage and that he is now conducting investigations to determine the location that would be removed from the subdivision developments that are now springing up in this district. He exhibited a map showing the several alternate lines that are being investigated. In view of this information Mr. Patterson stated that the delegation would make no formal statements at this time, but they would appear before the Commission later in the event the proposed alignment passes through the city's airport.

Mr. Herman Oliver, former Highway Commissioner, John Day, was present and inquired as to the Commission's plans for the further improvement of the Pendleton - John Day and the John Day - Burns Highways. He was informed that the Commission's construction program to date includes the following on these highways: $245,000 for surfacing and oiling between the Grant County line and the Forest Boundary, the work to be finance with second-year postwar secondary highway funds; $53,000 for grading, surfacing and oiling the Tutuilla Creek Section south of Pendleton; $500,000 for surfacing and oiling the Soda Mountain-Harney County Line Section; and $150,000 for grading and surfacing the Beech Creek Section north of Mt. Vernon. Mr. Oliver expressed satisfaction with such program; however, mentioned that the section of the John Day Highway just west of the town of John Day is also in need of improvement, particularly by the elimination of numerous curves. He suggested an immediate survey of the project because of developments that are taking place in this district. He also stated that the people of his district are very anxious for the completion of the Ochoco Highway between Prineville and Mitchell and inquired as to the status of the proposed oiling project over Dixie Mountain east of Prairie City. As to the latter-mentioned project, he was informed by Mr. W. H. Lynch, Division Engineer of the Public Roads Administration, who was present, that this project was advertised once, but no bids were received, and it is planned to readvertise the project next spring. Following further discussion of a general nature, Chairman Banfield advised that all of the projects mentioned by Mr. Oliver are definitely in the construction program and that the work will be carried on as rapidly as possible under existing conditions.

The following persons representing the U. S. Public Roads Administration and the U. S. Forest Service were present and conferred with the Commission relative to the adoption of a construction program for Forest Highway Funds for the fiscal year 1947: W. H. Lynch, Division Engineer, Public Roads Administration; T. M. Davis, District Engineer, Public Roads Administration; Robert N. Kellog, Senior Highway Engineer, Public Roads Administration; and F. E. Andrews, Principal Highway Engineer, Public Roads Administration; and W. L. McDonald, Assistant Regional Engineer, U.S. Forest Service. Mr. Lynch recalled that at the previous meeting there was discussed a proposed change in the 1946 Forest Highway Program providing for a transfer of $1,000,000 from funds set up for the Columbia River Highway construction from this project to the North Umpqua Forest Highway Project, in Douglas County, in order to expedite the completion of the latter-mentioned project. Since that time, he said, the matter has been reconsidered and other arrangements have been made, so it no longer will be necessary to make any changes whatsoever in the 1946 program.

He then brought up for discussion adoption of a program for 1947 Forest Highway Funds. He advised that there are available for the 1947 fiscal year funds in the amount of $3,439,553, of which $100,000 is being set aside for payment of administration costs and $339,553 for contingencies and major equipment purposes, leaving a balance of $3,000,000 to be programmed for construction. After careful consideration the following projects were selected by the unanimous consent of all parties for the utilization of such funds; and it was mutually agreed to recommend them to the Chief, Forest Service, and the Commissioner of Public Roads for approval:

North Umpqua Highway, grading 9.8 miles	$1,000,000
Ochoco Highway, grading 3 miles	280,000
Pendleton-John Day Highway, grading and surfacing 6 miles	150,000
Alsea Highway, grading, surfacing and oiling 10 miles	400,000
Diamond Lake Highway, surfacing and oiling 22 miles	335,000
Flora-Enterprise Highway, grading 0.9 mile	150,000
John Day-Burns Highway, grading, surfacing and oiling 12.2 miles	500,000
Tiller-Trail Highway, grading and surfacing 4 miles	185,000
TOTAL	$3,000,000

Concerning the Tiller-Trail Highway Project, Mr. Lynch advised that to provide a complete improvement to adequately serve logging operations that are developing on this road it would require an additional expenditure of $165,000, making a total of $350,000 for this project. He pointed out that there are no Forest Highway Funds available to finance the extra work and suggested that the State Highway Commission might be willing to contribute the extra amount needed in view of the importance of the project. As a result of the discussion that followed, Chairman Banfield recommended that the state cooperate by contributing the $165,000 needed for this work. Commissioners Schaupp and Chessman approved the recommendation, and it was so ordered.

Note: A program letter, as follows, directed to the Chief, Forest Service, and Commissioner of Public Roads, Washington, D.C., recommending the above program for approval, was signed by Mr. Lynch, Division Engineer, on behalf of the Public Roads Administration, by Mr. James Frankland, Acting Regional Forester, on behalf of the U.S. Forest Service, and by the State Highway Commission on September 26, 1946. The letter is copied herein for reference purposes only.

"486 Oregon General

September 26, 1946

Chief, Forest Service,
Commissioner of Public Roads
Washington, D. C.

Dear Sirs:

In accordance with the Rules and Regulations for Administering Forest Highways, a joint conference was held on September 24, 1946, at

the Portland Office of the Oregon State Highway Commission, between the Oregon State Highway Commission and representatives of the U. S. Forest Service and the Public Roads Administration, for consideration of and agreement upon projects to be recommended for approval for construction out of funds apportioned for the fiscal year 1947.

The following is the statement of funds available and a list of projects as agreed upon for recommendation:

FUNDS AVAILABLE

Apportionment of fiscal year 1947 Forest Highway Funds		$3,439,553.00
Less reserve for administration by Public Roads Administration and U. S. Forest Service	$100,000	
Less Major Equipment and State Contingent	339,553	439,553.00
Balance available for allocation to projects		$3,000,000.00
Cooperative funds by State on Project 16-A1,B1,D1,M		165,000.00
Total available for project construction		$3,165,000.00

PROJECTS RECOMMENDED

Project Number	Route Name, Type of Work and Mileage	Estimated Cost	F. H. Funds	Coop. Funds
6-A2,B2,F2,E9	Alsea Hwy., Grad., Surf. & Bit. Surf., 10.0 miles	$400,000	$400,000	-
16-A1,B1,D1,M	Tiller-Trail Hwy., Grad. & Surfacing, 8 miles	350,000	185,000	$165,000
27-B3	Ochoco Hwy., Grad., 3 miles	280,000	280,000	-
34-B4,C	Pendleton-John Day Hwy., Grad., Surf., 6 miles	150,000	150,000	-
35-D3,F2	John Day-Burns Hwy., Grad., Surf. & Bit. Surf., 12.2 miles	500,000	500,000	-
38-E	Flora-Enterprise Hwy., Grad., 0.88 mile	150,000	150,000	-
43-A2	Diamond Lake Hwy., Surf. & Bit. Surf., 14.8 miles	235,000	235,000	-

Project Number	Route Name, Type of Work and Mileage	Estimated Cost	F. H. Funds	Coop. Funds
(Projects Recommended) Con't.				
46-A4,B2	Cascade Lakes Hwy., Surf. & Bit. Surf., 7.2 miles	$ 100,000	100,000	-
47-A1,B1,D	North Umpqua Hwy., Grading, 5.8 miles	567,000	567,000	-
47-B2	North Umpqua Hwy., Grading, 4 miles	433,000	433,000	-
	Total Construction	$3,165,000	$3,000,000	$165,000

PROJECT DESCRIPTION & COMMENT

Alsea Highway
Grading, Surfacing & Bituminous Surfacing. Proj. 6-A2,B2,F2,E9, 10 miles.

This project contemplates the reconstruction grading, surfacing and bituminous surfacing of approximately 6 miles easterly from Project 6-A1, E8 as programmed under the Fiscal Year 1946 funds. This section has developed to be inadequate for the logging traffic now using it and is inferior in construction standards. This project also includes additional surfacing and the bituminous surfacing of the 4 miles on Project 6-A1, E8 funds for which, as set up, were insufficient to include this work. The project has been certified by the Forest Service as essential to lumber production.

Tiller-Trail Highway.
Grading & Surfacing, Project 16-A1,B1,D1,M, 8.5 miles.

This project contemplates widening and subgrade stabilization and surfacing from Tiller south to Deer Creek or the north end of a previously improved roadway.

This project now carries a very heavy logging traffic which is increasing. There is also a considerable tourist travel from Crater Lake north. The present road is of very low standard particularly between Tiller and Drew, being deficient in both width and alignment, is extremely hazardous, and does not adequately serve the logging operations depending upon it. It is contemplated to widen the existing roadbed to a minimum 20 foot width and to reduce the most critical curvature. The project is specifically requested by the Forest Service and has been certified by them as to its essentiality to the lumber production industry.

Ochoco Highway
Grading, Project 27-B3, 3 miles.

This project completes the reconstruction of the 18 miles begun

under Project 27-A1, programmed from 1942-43 Fiscal Year funds and continued under Project 27-A2,B2, under Fiscal Year 1946 funds. It has been certified by the Forest Service as essential to lumber production.

Pendleton-John Day Highway
Grading & Surfacing, Project 34-B4,C, 6 miles.

This project includes the grading and crushed rock surfacing of the remaining 6 miles of substandard improvement on this route. The present road is below standard for width and alignment and surfacing has become so depleted it is unstable. This road now carries a heavy logging traffic and has been certified by the Forest Service as to its essentiality to the logging industry.

John Day-Burns Highway
Grading, Surfacing & Bituminous Surfacing, Project 35-D3,F2, 12.2 miles.

This project contemplates the reconstruction grading, surfacing and bituminous surfacing of a section of this highway which is of low standard and is inadequate as to width, alignment and stability to serve the present and potential logging traffic. It will rectify the worst portion of the forest highway section which has become uneconomical to maintain under the existing traffic. The Forest Service has certified the project as essential to the logging industry.

Flora-Enterprise Highway
Grading, Project 38-E, 0.88 mile.

Grading of this section completes the grading of the route to the Oregon-Washington State line, where it will join with construction on the Washington side by that state. This highway is an essential communication route between the Lewiston, Idaho area and northeastern Oregon and is specifically requested by the State of Oregon as a commitment of long standing to connect with construction by the State of Washington. There is at present no existing road of adequate construction which serves between these areas.

Diamond Lake Highway
Surfacing & Bituminous Surfacing, Project 43-A2, 14.8 miles.

The project contemplates reinforcing that section of the route from the Cascade Lakes Highway to the Dalles-California Highway. This project, combined with Project 46-A4,B2, constitutes the only route over which timber from the National Forest north of Diamond Lake can be hauled to the Dalles-California Highway and thence taken by train or truck to Klamath Falls where there now exists a shortage of timber to keep existing mills operating. Attempt has been made to utilize the existing road but has resulted in severe subgrade failures of the roadbed. The proposed improvement will permit early usage of a large body of Government timber for relief of the shortage. The project is urgently requested by the Forest Service and is certified by them as to its essentiality to the logging in-

dustry. It is proposed to combine this project and Project 46-A4,B2 under one contract.

Cascade Lakes Highway
Surfacing & Bituminous Surfacing, Project 46-A4,B2, 7.2 miles.

This project contemplates the reinforcement of that section of the route leading northerly from its junction with the east leg of Forest Highway Route 43, and will serve as a portion of the total improvement necessary to enable hauling from the timber source to mills in the Klamath Falls area. This project has also been certified as essential to the continued marketing of logs from the Diamond Lake area.

North Umpqua Highway
Grading, Project 47-A1,B1,D, 5.8 miles.

This project contemplates the reconstruction grading of 5.8 miles beginning at the westerly end of the Forest Highway Route and extending to the vicinity of Susan Creek. To enable immediate usage upon completion of construction it is planned to place a course of talus material over practically all of the project. The existing road is too narrow, steep and winding to permit of economical log hauling and this project is the initial undertaking of standard construction of the route which serves one of the largest bodies of National Forest timber in this area on a perpetual yield basis. The project has been certified by the Forest Service as urgently essential to the logging industry.

North Umpqua Highway
Grading, Project 47-B2, 4 miles.

This project is a continuing one easterly from Project 47-A1, B1, D and the necessity of its construction and its essentiality are identical to those of Project 47-A1, B1, D. It has been certified by the Forest Service as essential to the logging industry.

Very truly yours,

/s/ W. H. Lynch
W. H. LYNCH
Division Engineer

/s/ OK R. H. Baldock

U. S. FOREST SERVICE
By /s/ James Frankland
Acting Regional Forester

OREGON STATE HIGHWAY COMMISSION
By /s/ T. H. Banfield
Chairman

By _____
Commissioner

By /s/ M. R. Chessman
Commissioner

Attest: H. B. Glaisyer
Secretary

The Engineer asked the Commission to confirm telephonic authority recently granted him to change the schedule of the ferry operation between Astoria, Oregon, and Megler, Washington, by reducing the total number of daily round trips from 20 to 15 and by advancing the time of departure of the first ferry from Astoria from 7:00 a.m. to 6:30 a.m. with the corresponding advancement of the departure of the last ferry leaving Astoria from 8:30 p.m. to 8:00 p.m. The Commission approved such changes by unanimous vote.

Further, in connection with the operation of the Astoria-Megler Ferry, the Engineer advised that the records disclose an increase in the freight truck traffic, which is expected to continue during the harvest season. Also, that requests have been received to transport livestock, cranberries and other commodities on truck and trailer combinations with an overall length in excess of 50', for which no provision has been made in the schedule of toll charges. He recommended a charge of $4 per trip for vehicle combinations that exceed 50' overall in length, and that no combination of equipment exceeding 55' in length be permitted on the ferry. Further, that it be left to the ferry operator to determine whether or not the overlength combinations will or will not discommode other traffic. Chairman Banfield gave as his thought that it would be satisfactory to permit such movements with proper regulation if other traffic is not discommoded. Commissioner Chessman concurred. The Commission thereupon, by unanimous vote, ordered that vehicle combinations up to but not exceeding 55' overall in length be permitted to cross on this ferry, provided that other traffic is not discommoded, and with the understanding that it be left up to the operator of the ferry for the time being to determine such feature. The charge of $4 per trip recommended by the Engineer for vehicle combinations in this classification was approved by the Commission by unanimous vote.

The Engineer also recommended that, in view of the impaired vertical clearance on the ferry, no vehicle in excess of 10'6" overall in height be allowed the use of the ferry; also, that no load greater than 8' in width be permitted on the ferry, and that the gross weight of any truck and trailer combination be limited to 27 tons. The Commission approved the recommendations by unanimous vote and so ordered.

The Engineer presented a letter from Babbidge & Holt, Inc., operators of the Astoria-Megler Ferry, relative to increasing the protection and indemnity insurance on the ferry boats "Tourist No. 2" and "Tourist No. 3". They pointed out that there is now in effect on these two vessels P. and I. Insurance in the amount of $200,000 for each vessel, the total cost of which was $2,490. They expressed a desire to increase the amount of the insurance from $200,000 to $500,000 on each vessel, which, they stated, could be done by payment of an additional premium of $225 for each ship. They urged the additional insurance in the interests of safety, efficiency, and protection to the public. The Engineer advised that he has very carefully considered this matter and agrees with Babbidge & Holt that it would be advisable to increase the amount of insurance, which can be obtained at nominal cost. He recommended purchase of the insurance on the basis that Babbidge and Holt will pay 50 percent of the $450 premium charge. The Commission approved the recommendation unanimously.

A letter was presented from Foster and Kleiser Company, Portland, advising that they are erecting an advertising sign on the building located at the southeast corner of Seventh and Astor Streets, in Astoria, and that, in connection therewith, it is necessary that they construct and maintain a platform that will encroach about four feet upon adjoining property owned by the state. They requested permission to lease a four foot strip of the state's property for this purpose. The Engineer recommended that the property be sold outright to the owner of the adjoining land rather than leased to Foster and Kleiser Company, inasmuch as it is only a narrow strip of land of no value for State Highway purposes. The Commission deferred a decision in the matter pending a recommendation from the Chief Counsel, who was instructed to determine the value of the property and advise whether or not it should be sold.

The Assistant Counsel brought up for discussion the matter of renewal of the contracts with the National Hospital Association and the Oregon Physicians' Service during the year 1947. He advised that the proposed contracts are nearly identical with the 1946 contracts with these concerns and that the few slight changes are satisfactory. He recommended approval of the 1947 contracts as revised. The Commission approved the recommendation by unanimous vote subject to the condition that the form is acceptable to the employees concerned.

The Commission discussed requests from the City of Grants Pass and the Grants Pass Lions Club for the installation of traffic signals at seven or eight intersections along 6th Street, Grants Pass, route of the Pacific Highway, because of the hazards that exist by reason of the large volume of automobiles, trucks and pedestrians that use this thoroughfare. The Engineer advised that this matter had been investigated by the Traffic Engineer, who recommends the approval of the project, which is estimated to cost approximately $20,000, and that he concurs in the recommendation subject to the usual requirements that the city pay 50 percent of the original installation, will maintain the signals, and will furnish the electrical energy to operate the signals at no cost to the state. The Commission approved the recommendation unanimously.

The Engineer reported on the request of the Parkrose Chamber of Commerce for the installation of traffic signals at several intersections along Sandy Boulevard (U.S. Highway No. 30) easterly from N. E. 82nd Avenue through the Parkrose District. He advised that the matter has been investigated by the Traffic Engineer, who recommends the installation of such signals at the following intersections with N. E. Sandy Boulevard: N. E. Prescott Street, N. E. 99th and Columbia Boulevard, N. E. 105th Street, and N. E. 112th Street. He estimated the cost of the four installations at approximately $7,000 and recommended approval of the project, which, he said, would have to be paid entirely with state funds because the locations are outside of the corporate limits of the City of Portland. The Commission approved the recommendation by unanimous vote.

A letter was presented from the City of Eugene requesting the installation of fixed-time signals at the intersections of Sixth Avenue and Seventh Avenue with Blair Boulevard in Eugene, and agreeing to pay 50 percent of the cost of the installation. The Engineer advised that Sixth Avenue and

Seventh Avenue have been designated as state highway routes for north and southbound Pacific Highway traffic and that Blair Boulevard is an important city street which crosses both of them. The Traffic Engineer, he said, has investigated this project and recommends approval of the installation, which is estimated to cost $3,400. He further advised that he concurs in the recommendation on the condition that the city will pay 50 percent of the cost of the original installation, will maintain the signals, and will furnish electrical energy to operate them without cost to the state. The Commission approved the recommendation unanimously.

The Commission also discussed a request from the City of Waldport that the flashing beacon now installed on the Oregon Coast Highway, in Waldport, be remodeled so as to require all traffic entering Waldport from the Alsea Bay Bridge to come to a complete stop. The Engineer recommended approval of the request subject to the standard conditions that the city will pay 50 percent of the cost of the alteration, will maintain the signal, and will furnish electrical energy to operate it at no cost to the state. The Commission approved the recommendation unanimously.

A request was presented from the City of Salem that the flashing beacon now installed at the intersection of Commercial and Center Streets, in Salem, be reinstalled at the intersection of Mission and Commercial Streets when the new traffic lights have been installed at the first-mentioned point. The Engineer advised that the Mission-Commercial Street intersection is an important junction point. He recommended approval of this request subject to the usual conditions that the city will pay 50 percent of the cost of installation, will agree to maintain the signal and will furnish the electrical energy to operate it free of cost to the state. The Commission approved the recommendation unanimously.

The Commission discussed a letter from Mrs. Helen Dennon, Cannon Beach, requesting the establishment of a bus loading zone in this town for the benefit and safety of pedestrians who are obliged to cross the highway at this point. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends establishment of such a zone ("no parking" area) on the west side of the Oregon Coast Highway for a distance of 60 feet in front of Dennon's Store, the present loading point. He advised that this town is not incorporated, so the Commission has full jurisdiction, also that he concurs in the Traffic Engineer's recommendation. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Oregon Coast Highway, (U.S. 101), passes through the City of Cannon Beach, Oregon, and

WHEREAS, said City is unincorporated, but is heavily populated and the business district therein congested with traffic, and

WHEREAS, it has come to the attention of the Commission and the Commission now finds that parking of motor vehicles on portions of the business area of said City is a hazard and menace to pedestrians,

and particularly those pedestrians who patronize or intend to patronize common carriers of passengers operating on said highway, and

WHEREAS, the Commission has found that the prohibition of parking of motor vehicles in a sufficient area to permit the stopping and loading of common carriers at or adjacent to the curb or right of way lines will decrease the hazard and menace of motor vehicles to pedestrians,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the parking of motor vehicles on the westerly side of the Oregon Coast Highway for a distance of sixty (60) feet northerly from a point located 228 feet north from the center line of Second Street in said City be and the same hereby is prohibited.

2. The State Highway Engineer be and he hereby is directed to erect "No Parking" signs in the area above described, and to mark such area as a bus stop or bus loading zone. That the Engineer is further directed to do all necessary and proper painting to denote the zone above established.

3. This resolution shall be entered in the minutes and records of the Commission as of the twenty-fourth day of September, 1946.

The Commission also discussed a request from the City of Silverton for the establishment of a "no parking" zone on both sides of James Avenue between Water Street and Pine Street and on the south side of Water Street between Brown Street and James Avenue, in Silverton, so as to facilitate the movement of general highway traffic and to eliminate traffic congestion. A resolution from the Silverton City Council confirming the request was also presented. The Engineer advised that the matter has been investigated by the Traffic Engineer, who recommends approval of the request, and that he concurs in the recommendation. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, James Avenue in the City of Silverton has heretofore been by the Highway Commission designated as and now is a street of said city over which there has been and now is being routed traffic moving over the Hillsboro-Silverton Highway, being Oregon Secondary Highway No. 140 (Route-Oregon 214); and

WHEREAS, Water Street in said City has heretofore been by said Highway Commission designated as and now is a street of said city over which and has been and now is being routed traffic moving over the Hillsboro-Silverton Highway (Route-Oregon 214); and

WHEREAS, said route is used by log truck traffic and by reason of narrowness of said streets and the length of said log trucks, vehicles parked on said streets are subject to possible damage; and

WHEREAS, the City of Silverton by appropriate resolution in response to a request made by the Highway Commission has prohibited parking on both sides of James Avenue between the intersection of Water Street and Pine Street and on the South side of Water Street between Brown Street and James Avenue and has served on the State Highway Commission a copy of said resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That said resolution duly and regularly adopted by the Common Council of the City of Silverton be and the same hereby is approved and ordered filed in the records of the State Highway Commission at Salem, Oregon.

2. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of September, 1946, and a duly certified copy thereof delivered to the Common Council of the City of Silverton.

The Commission also discussed a request from the City of West Salem for the approval of City Ordinance No. 260 establishing "no parking" zones and otherwise regulating the parking of motor vehicles along Edgewater Street, route of the Salem-Dallas Secondary Highway. A copy of the city's Ordinance No. 260 was presented. The Engineer recommended approval of the city's request. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, Edgewater Street in the City of West Salem has heretofore been by the Highway Commission designated as and now is a street of said city over which there has been and is now being routed traffic moving over the Salem-Dallas Highway (Oregon No. 30, Route-Oregon No. 22); and

WHEREAS, said route is subject to heavy traffic and by reason of the narrowness of said street the parking of vehicles on certain portions of said street, as hereinafter designated, creates an unreasonable hazard to the motoring public; and

WHEREAS, the City of West Salem by appropriate resolution in response to a request made by the Highway Commission has prohibited parking upon said Edgewater Street as follows:

a. On the North side of Edgewater Street between the intersection of the Salem-Dayton Highway No. 150 and the intersection of Lincoln Avenue.

b. On the North side of Edgewater Street from 160 feet to 180 feet of Melinda Avenue.

c. On the North side of Edgewater Street and for 25 feet West of Melinda Avenue.

d. On the North side of Edgewater Street for 35 feet East of Patterson Avenue.

And, whereas, the City of West Salem has also provided that the parking of all motor vehicles on Edgewater Street shall be parallel to the curbs; and

WHEREAS, the city has served on the State Highway Commission copies of said resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That said resolution duly and regularly adopted by the Common Council of the City of West Salem be and the same hereby is approved and ordered filed in the records of the State Highway Commission at Salem, Oregon.

2. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of September, 1946, and a duly certified copy thereof delivered to the Common Council of the City of West Salem.

A resolution was presented from the Albany City Council establishing a "no parking" zone on the north side of First Street at the end of the Willamette River Bridge, in Albany, so as to provide more adequate space for traffic approaching said bridge from the east, also prohibiting left-hand turns at any time on any street at the intersection of First and Ellsworth Streets. The Engineer recommended approval of this resolution as a traffic-safety proposition. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the City of Albany, a municipal corporation acting by its duly constituted authorities, adopted on August 28, 1946, a resolution by which the City, among other things, has prohibited the parking of motor vehicles on the north side of First Street for a distance of forty-five feet easterly from the east property line of Ellsworth Street, and said City by said resolution has ordered and directed that vehicles making a right turn from First Street on the east be permitted to make such turn on red signal after stopping, and by said resolution the City has further directed that appropriate traffic signs and signals be installed and conformance therewith enforced by the Police Department of the City; and

WHEREAS, in the opinion of the Highway Commission such action on the part of the said municipal authorities is in the interests of the general public, and proper enforcement of said orders will contribute to the safety, the convenience and the orderly movement of traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commis-

sion, all members being present and affirmatively voting, as follows:

1. That the action taken by the City of Albany by the adoption of Resolution No. 102, the purpose and objectives of which are disclosed in the foregoing clauses, be and said official action hereby is approved.

2. That the municipal authorities of said City be and they hereby are commended for their foresight and their interest in traffic problems within said City.

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Mayor of the City of Albany.

The Engineer reported that portions of the Crabtree-Scio Section of the Albany-Lyons Secondary Highway, in Linn County, are no longer of value for state highway purposes since the highway has been reconstructed on permanent alignment. He exhibited a map showing the portions referred to and recommended abandoning such portions as state highways and permitting them to revert to Linn County for such disposition as the County Court may decide. After careful consideration the Commission approved the recommendation and adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Albany-Lyons Secondary Highway No. 211, known as the Crabtree-Scio Section in Linn County, the westerly terminus of which is at Highway Engineer's Station 103+50 of the reconstructed line, and the easterly terminus of which is at Highway Engineer's Station 326+30 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway or other public purposes, while other portions or sections are needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The areas of land within the limits of the old right of way which lie between Highway Engineer's Station 121+50 and Highway Engineer's Station 130+00 of the reconstructed highway, between Highway Engineer's Stations 167+00 and 174+70, between Highway Engineer's Station 175+20 and Highway Engineer's Station 179+00 of the reconstructed

highway, and between Highway Engineer's Station 181+50 and Highway Engineer's Station 187+70 of the reconstructed highway, which areas are shown in brown on the map attached hereto, which map is marked "Exhibit 'A'", and by this reference is made a part of this resolution, are no longer needed for highway or other public purposes and, therefore, all of said areas colored in brown are eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said real property is hereby permitted to revert to Linn County, for such disposition as said County Court may decide.*

2. The areas shown colored in green on said Exhibit "A" include right of way and other properties acquired for the relocation and reconstruction of the said highway and include also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said areas colored in green, it is the judgment and finding of the Commission that all of said areas are and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or areas shown colored in green on said Exhibit "A" shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners.

3. The boundaries of all real properties acquired for right of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Linn County a duly certified copy thereof, and shall file with the Clerk of Linn County a like certified copy; and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall vacate the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto marked Exhibit "A".

NOTE: The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 146, under the heading "Abandonment and Retention Resolutions", and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

A request was presented from the Linn County Pioneer Association for permission to install a marker near the site of the first schoolhouse that was erected in Linn County. The Engineer advised that the Memorials Committee of the Oregon Historical Society has signified its approval of such installation. He recommended approval of the request by the Highway Commission on the condition that the wording is satisfactory to the Memorials Committee. He also recommended that the state construct a turn-out on the highway for the convenience of people who wish to view the marker. The Commission approved the recommendation by unanimous vote.

The Engineer reported a request from the Mt. June Forest Products Company, Marcola, Oregon, for permission to truck haul logs across the bridge over the North Fork of the Willamette River on the Springfield-Creswell Sec-

ondary Highway at Jasper. He advised that the bridge is a light steel structure with a roadway width of only 14'5", which will allow only one-way traffic, so, if the request is approved, provision would have to be made for traffic control. He also advised that the floor beams of the truss must be reinforced before log truck traffic can be permitted. He suggested that traffic control could best be effected by traffic-actuated stop and go signals, which would cost about $1,500, and he estimated that the reinforcement of the floor beams would cost an additional $1,000, making a total cost of $2,500 to open the structure for log-truck traffic. Because of the need for hauling logs over this structure he recommended that the Company be allowed to use the bridge for this purpose subject to the condition that it will enter into an agreement with the Highway Commission to pay 50 percent of the cost of the installation of the traffic signals and of the floor beam repairs and further agreeing that the Company will not permit loads exceeding those legally permitted under the state traffic law to be hauled over the structure at any time. Following discussion, the Commission approved the recommendation unanimously.

A letter was presented from Mr. James C. Rodger, Medford, requesting permission to operate a Hyster Lift truck, commonly known as a lumber carrier, having an overall height of thirteen feet three inches over the Pacific Highway between a lumber loading point at Voorhies and another similar loading point at Phoenix, Jackson County, with an occasional movement to Medford. The Chief Counsel advised that, in his estimation, the Commission may, within the meaning of Section 115-393, O. C. L. A., issue a temporary 30-day permit covering the operation of this vehicle over this short section of highway. In view of this information, the Commission voted unanimously to grant such a 30-day permit to Mr. Rodger.

The Engineer reported receipt of a letter from Mr. D. O. Denman, Aurora, complaining of delays in the operation of the Wilsonville Ferry across the Willamette River caused by the towing of log rafts in the river. He read Mr. Denman's letter aloud and also his reply thereto in which he explains the procedure to secure a closed period for the traffic of log rafts in the river and advises that because of the critical condition of the lumber industry at this time a request for such a closed period would be denied. The Commission approved the Engineer's reply.

The Commission discussed a letter from the Booth-Kelly Lumber Company requesting permission to truck haul logs directly across the Springfield-Creswell Secondary State Highway at grade from their privately-owned logging road. The Engineer recommended approval of the request on the same basis that similar privileges have been granted to the Ostrander Lumber Company and other operators in the past. The Commission approved the recommendation.

The Engineer reported that the Vine Maple Bridge over the Nehalem River on the Fishhawk Falls Secondary State Highway, in Clatsop County, has been reinforced so there no longer exists any valid reason for the reduced load limit that has been in effect for the past several months. He recommended action by the Commission lifting this reduced load limit. The Commis-

sion approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, on the 24th day of October, 1944, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on certain state highway bridges, including the following, to-wit:

FISHHAWK FALLS SECONDARY HIGHWAY NO. 103

M.P. 103-03.75 "Vine Maple" Bridge over Nehalem River 10 tons

and

WHEREAS, subsequent to the passage of said resolution conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said state highway bridge;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the said bridge be and the same is hereby rescinded and cancelled as of this date, and the maximum load limit permissible on the said highway bridge hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of the county in which said highway bridge is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

Dated this 24th day of September, 1946.

The Engineer asked the Commission to confirm telephonic authority previously given Bridge Engineer G. S. Paxson and Assistant Chief Locating Engineer E. M. Booth to go to Olympia, Washington, at state expense for a conference with Washington Highway Department officials relative to a proposed bridge on McNary Dam. He advised that the expense was less than the $40 estimated. The Commission approved the expenditure.

The Engineer also requested authority for Manley Robison, Director of the Travel and Information Department, to make three trips out of the state in connection with his official business — Annual Convention of the Redwood Empire Association at Hoberg's, in Northern California, October 11, 12, and 13; Pacific Northwest Tourists Association meeting in Spokane, Washington, on October 24 and 25; and the meeting of the National Association of Travel Officials in Chicago, Illinois, November 14 and 15. He estimated the cost of the first two of the above trips at $60 each and of the trip to Chicago at $225. The Commission approved Mr. Robison attending these meetings at state expense [illegible] if recommended by the Advisory Committee on

travel matters and approved by Governor Snell.

The Secretary presented an invitation from the Redwood Empire Association for the Commission to be its guests at its 26th Annual Banquet at Hoberg's, Bay County, California, on October 12. He also presented an invitation from the Oregon Coast Association for the Commission to be its guests at the Association's banquet at Gearhart, Tuesday evening, October 22. The Commission expressed regrets that it could not attend these functions and instructed the Secretary to so inform Mr. Clyde Edmondson, Manager of the Redwood Empire Association, and Mr. A. B. Sanders, Manager of the Oregon Coast Association, with appropriate letters of thanks.

A letter was presented from the Deschutes County Advertising Committee, Bend, Oregon, requesting permission to maintain special markers on certain highways in the Central Oregon area calling attention to the recreational features of this district. Also presented was an artist's sketch of two of the signs that it is proposed to install, one of which contains the wording "Entering Central Oregon Recreational Area, one of America's Finest Vacation Playgrounds", and the other contains the wording "See all of Oregon, Crater Lake _____ Miles, Highways U.S. 97 and _____". The Engineer advised that this manner of advertising recreational resources of the state is an entirely new idea and that he could see no objection to it as a matter of principle. A decision in the matter was deferred by the Commission pending further study. The Engineer was instructed to advise the Commission the details by letter.

The Secretary presented a report from the Memorials Committee of the Oregon Historical Society regarding the naming of the southern pioneer route to Oregon, concerning which there has been a difference of opinion between the Historical Society and the Old Oregon Trail Association. Following discussion, the Commission approved the report and the name recommended by the Committee for this route viz: "Southern Route to Oregon, sometimes known as the Applegate Trail". Motion to that effect was offered by Commissioner Chessman, seconded by Commissioner Schaupp, and carried by the unanimous vote of the Commission. The Engineer was authorized to erect markers along the route in conformity with the ideas expressed by the Committee in its report. The Secretary was instructed to thank the Committee for the report which the Commission considers contains historical information of great value.

The Commission noted and ordered filed a copy of an article by Bernard DeVoto published in the September issue of Harper's Magazine concerning the marking of historic sites and routes.

The Engineer reported an inquiry from the Secretary of State whether or not the State Highway Commission would join with him in the operation of a booth at the Pacific International Livestock Exposition, October 5 - 12, 1946, as was done at the State Fair. He advised that the Secretary of State has estimated the cost of such joint booth at $150, which would be paid $75 by each department. The Commission approved the expenditure.

The Engineer requested authority to increase the salary now being paid Mr. Rolando Jose Porras, one of the Latin American engineers who has been employed by the Highway Department for the past several months under agreement with the American Road Builders' Association. He advised that Mr. Porras has been receiving the salary of $110 per month as a student, but he is now regularly employed in a capacity which carries with it the salary of $170 per month. It was thought that Mr. Porras is entitled to the standard wage for his services, and he so recommended. The Commission approved the recommendation.

The Commission discussed a proposed agreement with the owners of lands situate along Shingle House Slough, Coos County, concerning the installation of a tide gate, or tide gates, where the proposed permanent state highway will cross said Slough. As an inducement for the state's cooperation the property owners agree to reimburse the state for the cost of installing these facilities and also agree to assume the cost of upkeep of the facilities at all times in the future, the proportion to be born by each property owner to be based upon the amount of land that each owns as compared with the total lands included in the so-called district, the only condition being that the total cost to the property owners shall not exceed $1,250. The Chief Counsel advised that approval of such an agreement by the Commission is satisfactory because the facilities to be installed will not adversly affect the highway, and the property owners are obliged to maintain them. In view of this assurance, the Commission approved the proposition and ordered that the matter be covered by appropriate agreement.

The Chief Counsel brought up for discussion the matter of purchasing public liability and property damage insurance covering accidents that occur at the Interstate Bridge, with particular reference to accidents such as recently occurred when the drawspan of this bridge was not raised high enough to permit a barge to pass beneath the span without causing damage. He recommended the purchase of such type of insurance on condition that the State of Washington will pay 50 percent of the premium. The Commission deferred action in the matter pending settlement of the pending law suit.

The Commission had under discussion several changes and additions in the construction program for state funds that it adopted by resolution at its meeting held on June 27, 1946. Following discussion, the Commission approved the deletion from this program of the item of $60,000 heretofore allocated for resurfacing the Trout Creek Section (five miles) of the Canyon City-Burns Highway, in Harney County, which project has been transferred to the postwar program, and the addition to the program of the Foster Undercrossing Surfacing and Channelization Project on the Santiam Highway, in Linn County, $25,000; the construction of a revetment in the Santiam River at Sanderson Bridge on the Albany-Lyons Secondary Highway, Linn County, $30,000; and construction of a dyke in the Umatilla River on the Boardman-Stanfield Highway near the town of Stanfield, Umatilla County, $20,000. The following resolution amending the original resolution of June 27, 1946, was adopted by the Commission by unanimous vote upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp:

WHEREAS, on the twenty-seventh day of June, 1946, the Highway Commission approved and adopted a state postwar program consisting of projects allocated to the five divisions into which the State for highway construction and maintenance purposes has been divided; and

WHEREAS, the highways and highway projects which comprise said state postwar program are each and all enumerated and set forth in Exhibit A, which is attached to said resolution and made a part thereof, and there are also set forth in said Exhibit A the estimated costs of the several projects and the sums allocated thereto; and

WHEREAS, since the approval and adoption of said state postwar program certain facts and circumstances have made necessary a modification and amendment of said program and resolution to the extent and in the particulars herein set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the highways and projects defined and set forth under Part I, Division No. 2, on page 1 of said Exhibit A, shall be and the same hereby are amended by inserting following the word "Linn" in the first column the following:

Linn	Santiam	Foster Undercrossing Section, Surfacing and Channelization	25,000	--	25,000 A
Linn	Albany–Lyons	Revetment near Sanderson Bridge	30,000	--	30,000 A",

and changing the total of the sums allocated to correspond thereto so that the whole shall now read:

"

County	Highway	Section and Description	Construction	R/W	Total
		* * * * * * *			
		Division No. 2			
Benton	Eddyville–Blodgett	Eddyville–Blodgett, 18.9 mi. Resurfacing	$172,500	$--	$172,500 C
Clatsop	Ore. Coast	Arch Cape Tunnel, Lighting	21,000	—	21,000 A
Linn	Santiam	W. Unit, Lebanon–Sweet Home, 8.0 mi. Pav't Resurf.	91,900	—	91,900 C
Linn	Santiam	Foster Undercrossing Section, Surfacing and Channelization	25,000	—	25,000 A

"

County	Highway	Section and Description	Construction	R/W	Total	
		* * * * * * *				
		Division No. 2 (Con't)				
Linn	Albany-Lyons	Revetment near Sanderson Bridge	$ 30,000	$ - - -	$ 30,000	A
Marion & Polk	Co. Road	Independence Bridge (State Share)	300,000	- - -	300,000	B
Polk	Salmon R.	Ft. Hill Bridge & Apprs.	85,000	10,000	95,000	A
Tillamook	Netarts	Stillwell Bridge & Appr.	70,000	1,000	71,000	A
		Total - Division No. 2	$795,400	$11,000	$806,400	"

2. That the highways and projects defined and set forth under Part I, Division No. 5, page 3 of said Exhibit A, shall be and the same hereby are amended by, immediately below the word "Grant" in the first column, deleting the words:

"Harney Canyon City-Burns Trout Creek, 5 mi. Resurfacing 50,000 --- 50,000 D",

above the word "Union" in the first column adding the following:

"Umatilla Boardman-Stanfield Dike in Umatilla River near Stanfield 20,000 --- 20,000 A",

and changing the total sums to correspond thereto so that said Division No. 5 shall now read as follows:

"

County	Highway	Section and Description	Construction	R/W	Total	
		* * * * * * *				
		Division No. 5				
Baker	Baker-Unity	Mill Gulch-Salisbury, Gr. Widening	$152,100	$---	$152,100	C

Umatilla	Boardman-Stanfield	Dike in Umatilla River near Stanfield	20,000	- - -	20,000	A
Union	Starkey	Hilgard-Starkey, Resurf.	30,000	- - -	30,000	A
Wallowa	Joseph-Wall. L.	N. Unit, Joseph-Wallowa Lake, Gr., Surf. & Oil.	30,000	- - -	30,000	A
		Total - Division No. 5	$924,100	$3,000	$927,100	

3. That the summary on page 5 of said Exhibit A be amended by deleting the figures "751,400" under the topic "Rural Projects" related to Division No. 2 and inserting in lieu thereof the figures "806,400", and by deleting the figures "957,100" under the said topic related to Division No. 5 and inserting in lieu thereof the figures "927,100", and correcting the total of "Rural Projects" be deleting the figures "$4,290,700" and inserting in lieu thereof the figures "$4,315,700"; and that the totals under said summary be amended by deleting the figures "1,338,200" related to Division No. 2 and in lieu thereof inserting the figures "1,393,200", and by deleting the figures "1,302,100" related to Division No. 5 and inserting in lieu thereof the figures "1,272,100", and that the total be amended by deleting the figures "$5,766,500" and inserting in lieu thereof the figures "$5,791,500", so that the summary will now read as follows:

"SUMMARY

	Rural Projects	Municipal Projects	Total
Division No. 1	$ 796,400	$ 142,000	$ 938,400
Division No. 2	806,400	586,800	1,393,200
Division No. 3	674,300	245,000	919,300
Division No. 4	1,111,500	157,000	1,268,500
Division No. 5	927,100	345,000	1,272,100
State Total	$4,315,700	$1,475,800	$5,791,500"

4. Except as revised or amended by this resolution and set forth herein the provisions of said resolution of June 27, 1946, shall remain in full force and effect and shall constitute the findings, declarations, acts and purposes of this Commission with respect to said state postwar program.

5. Any changes, modifications or alterations of said postwar program as disclosed and established in said original resolution and in this amendatory resolution shall be considered and disposed of by this Commission by resolution or other official act properly identified with said programs duly adopted and entered in the minutes of the Commission.

6. This resolution shall be entered in the minutes and records of the Commission as of September 24, 1946, and a complete copy thereof delivered to the Public Roads Administration.

A letter was presented from Mr. Rex Russell, Los Angeles, California, inquiring whether or not it would be possible for him to obtain permission to cut some small evergreen trees growing on the shoulders of Oregon state highways, particularly along the West Diamond Lake Secondary Highway and the East Diamond Lake Secondary Highway between Union Creek and The Dalles-California Highway Junction. The Commission denied the request by unanimous vote as a matter of policy.

The Commission also discussed a letter from Mr. Ben F. Phillips, Portland, inquiring as to possibilities of leasing a portion of Cascadia State Park in order to protect a private business that he contemplates developing on his own land adjacent thereto, also inquiring, if the Commission cannot see its way clear to help him in such manner that he be given the first refusal in connection with any concession privileges that the Commission may offer for sale in this park. The Engineer advised that the State Parks Superintendent has plans to develop the park, which include the construction of cabins and the sale of a concession. In view thereof, the Commission refused to grant Mr. Phillips any special privilege; in the event the concession is offered for sale, Mr. Phillips is to be given an opportunity to bid for it along with others.

The Commission discussed a complaint from the Weyerhaeuser Timber Company that the State Highway Department is permitting its contractor at North Bend to deposit waste materials on a small triangular tract of land opposite its plant site in North Bend which would interfere with the Company's use of the property in the event the Company acquired it. The Engineer advised that the material referred to is topsoil material which is being put there at his request as a basis for landscaping. It was his thought that this would not interfere in any way whatsoever with the use of the property by the Company if it acquired it later on. The Secretary was instructed to convey such information to the Company and to state further that the Highway Commission at no time made any commitment or implied promise to sell this property to the Weyerhaeuser Timber Company; moreover, the Commission is not now inclined to sell the property, but expects to retain it for state purposes.

The Commission discussed a date for its next regular meeting for the receiving of bids and decided unanimously to hold such meeting in Portland on Monday and Tuesday, October 28 and 29, 1946. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

The Commission considered and signed agreements, etc., as follows:

Agreement with the City of Hermiston providing for the installation of a flashing beacon at the intersection of First Street and Gladys Avenue on State Secondary Highway No. 333, Oregon Route 207, Umatilla County.

Modification of Project Agreement with P.R.A. covering maintenance of Crater Lake Highway between M.P. 9.75 and M.P. 59.25 by the state.

Agreement with Dewey E. Peterson covering rental of property at north end of the Steiwer Hill-Albany Section of the revised location of the Pacific Highway East, in Marion County.

Agreement with Warren Northwest, Inc. covering rental of buildings on the Wilson River Highway at McNamars Camp.

Agreement covering lease by the State Highway Department of a trailer owned by Paul Van Scoy.

Quitclaim deed conveying to Adolph A. Nurnberg property lying outside of the highway right of way in Secs. 21 and 28, T. 8 N., R. 9 W., Clatsop County.

Bill of sale to Sullivan Wrecking Company covering sale of buildings at Troutdale.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 p.m.

State Highway Engineer

A W Schaupp
Commissioner

Secretary

Commissioner

Portland, Oregon
October 28, 1946

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

OCT 28 1946

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

1. Suggestion of North Lincoln Lions Club that the Cliff House property at Depoe Bay be acquired for state park purposes: The Parks Superintendent advised that the building located on this property recently burned down and that it would be desirable to acquire the site before another building can be constructed on it. The tract is needed, he said, to fill out the state park at this location and to insure an unobstructed view of the ocean scenery. The Commission authorized the Parks Superintendent and the Chief Counsel to ascertain how much it would cost to purchase the property, it being understood that there is no obligation on the part of the Commission to buy it.

2. Proposed exchange of timber land with Mr. Elmer Bankus along the Oregon Coast Highway, in Curry County: The Chief Counsel advised that apparently Mr. Bankus has made other arrangements for the disposal of the timber, inasmuch as he has not responded to recent letters. He recommended, under the circumstances, that the proposed exchange be abandoned. The Commission approved the recommendation unanimously.

3. Proposed addition to Dabney State Park: The Parks Superintendent recommended the purchase of a one-acre tract situate next to the Sandy River Bridge in order to fill out this park and to secure control of the shoreline at this location. He said that he has secured an option from the owner to purchase it for the sum of $50. The Commission approved the recommendation by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

4. Renewal of Henry Zorn lease of a portion of Champoeg Park: The Parks Superintendent recommended renewal of this lease at the former price of $3 per acre. In the discussion that followed the question arose whether or not the rental price of $3 per acre is sufficient. The Commission referred the matter to the Parks Superintendent and the Chief Counsel to ascertain the facts, with authority to renew the lease on the former basis if they consider that $3 an acre is a sufficient amount to charge for the use of the property.

5. Sale of concession privileges in the Vista House at Crown Point: The Parks Superintendent recommended advertising for bids for this concession because of its value to the concessionaire. He advised that during the wartime period the present operator paid nothing for the privilege of operating but was simply required to act as the building caretaker. Because of the large increase in the traffic volume and the number of people who stop at this place, he said, the concession is now quite valuable. The Chief Counsel concurred in the recommendation. The recommendation was approved by the Commission by unanimous vote.

6. Offer of R. C. Moulton to salvage burned standing timber on the Sunset Highway near Quartz Creek: The Parks Superintendent advised that

Mr. Moulton wishes to cut this timber into cord wood for public sale and that he has offered to clean-up the area when the timber has been removed, such cleaning-up work to consist of piling debris for disposal by the state later on. He recommended Mr. Moulton be authorized to remove this timber in order to secure clean-up of the premises, on the condition that he will burn the accumulated debris. The Commission appeared favorably inclined to approve the recommendation provided a satisfactory agreement can be reached with Mr. Moulton. The matter was referred to the Parks Superintendent and the Chief Counsel to prepare an appropriate form of agreement with Mr. Moulton and to report the same back to the Commission for final approval.

7. Suggestion from Deschutes Geology Club, Bend, Oregon, re acquisition of the Painted Hills area for state park purposes: The Parks Superintendent read aloud a letter from Mr. Phil F. Brogan, Vice President of this Club, and advised that the acquisition of the area referred to therein has been provided for in the state parks budget. He was instructed by the Commission to convey such information to Mr. Brogan.

8. Overnight camping in state parks: The Parks Superintendent advised that up to the present time the public has not been allowed to stop overnight in any of the state park areas; however, in his estimation, such privilege should be granted in certain state parks because of public demand, provided a nominal charge is made to offset state expense. He suggested a charge of 50 cents per night, which he thought would be sufficient to make the project self-sustaining. The privilege, he said, would be limited to the larger parks such as Ecola State Park, Honeyman State Park, and others in the same class. The matter was discussed at some length, but a decision thereon was deferred by the Commission pending additional information. The Parks Superintendent was instructed to submit a complete report as to what other states are doing with regard to such matters.

In this connection the Parks Superintendent inquired as to the Commission's attitude with respect to the development of waysides so as to permit people to drive off the highway at scenic points. He was instructed to present projects of this kind separately, and the Commission will then pass on each on its individual merits.

9. Proposed acquisition of Sodaville Mineral Springs as a state park: The State Highway Engineer read aloud a letter from Mr. Roy H. Mills, Secretary, State Board of Control, giving certain facts concerning this park, which is now state-owned and under jurisdiction of the Board of Control, and suggesting that jurisdiction of the area be transferred to the State Highway Commission. The Commission deferred a decision in the matter pending information as to the obligations that it would assume if it took over this park and whether or not the park will fit into the state parks set up. The Engineer was instructed to investigate the matter thoroughly and to render a full report on the matter at the next meeting.

10. Proposed park adjacent to the Oregon Coast Highway north of Waldport: The Parks Superintendent advised that a delegation is to appear before the Commission on the following day to urge the establishment of a state park on the west side of the Oregon Coast Highway about three miles north of Waldport. He said that this is the same area that he discussed with the Commission at the previous meeting and which the Commission decided not to acquire because of the cost involved — $15,000 for the 32 acres. He also said that he still cannot recommend purchase of the area at the price quoted; moreover, he could not recommend the purchase unless the adjoining property, which contains several small lakes, was also acquired. The Commission took no action in the matter. (See delegation ahead)

11. Establishment of myrtle-tree-wayside areas in Coos County: The Chief Counsel recommended adoption of a resolution formally approving the creation of a series of areas along the Coquille-Myrtle Point Section of the Coos Bay-Roseburg Highway for the preservation of myrtle tree groves and the creation of one such area along the Oregon Coast Highway between Coquille and Bandon, and confirming agreements heretofore executed with the owners of certain tracts adjoining these highway sections. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission is authorized to acquire by agreement or donation, real property necessary or deemed necessary for the maintenance and development of parks, roadside development, forest or timbered areas and other places of attraction and scenic value, which, in the judgment of the Commission, are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road user, and

WHEREAS, the State of Oregon is one of the few places in the world where myrtle trees grow, and

WHEREAS, certain owners of real property along the Coos Bay-Roseburg Highway, between Coquille and Myrtle Point, and also along the Oregon Coast Highway, between Coquille and Bandon, have indicated their willingness to cooperate and join with the Commission in preserving myrtle trees and groves of trees along such highway, and

WHEREAS, the Highway Commission has found that cooperation between the adjoining owners and the State will best promote the preservation of such trees at the least cost to the State, and will best contribute to the general welfare and pleasure of the motoring public,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as

follows:

1. That there be created on the Coos Bay-Roseburg Highway, between Coquille and Myrtle Point, a lane or series of areas for the preservation of myrtle trees and groves of myrtle trees.

2. That there be created on the Oregon Coast Highway, between Coquille and Bandon, one area for the preservation of myrtle trees and groves, said area to be the A. J. Sweet tract.

3. That such areas be based upon agreement between the Commission and adjoining owners, by which title to the areas remain in the owners with the right in the State to enter the properties to cut brush and otherwise preserve the trees and their scenic value.

4. That a form of myrtle tree agreement, as attached and marked "Exhibit A", hereby is approved. The Superintendent of Parks is directed to use such forms of agreement in all future negotiation and agreements, and to perform the Commission's obligations thereunder. *

5. That agreements heretofore executed between the Commission and the following owners of the following number of acres adjoining such highways, hereby are ratified and confirmed.

James N. and Anna M. Jacobsen	22 Acres
J. H. and Sarah McCloskey (two parcels)	6 Acres
Fred B. and Olive A. Kickok	6 Acres
Dal M. and E. S. King (two parcels)	19 Acres
A. J. Sweet	16 Acres

6. This resolution shall be entered in the minutes and records of the Commission as of the twenty-eighth day of October, 1946.

---

* "EXHIBIT A"

A G R E E M E N T

THIS AGREEMENT, made and entered into this _____ day of _____, 194_, by and between the STATE OF OREGON, by and through its State Highway Commission, hereinafter called the "State", party of the first part, and _____ hereinafter called the "Owners", parties of the second part;

W I T N E S S E T H :

RECITALS:

1. The undersigned Owners hold fee title to the real property hereinafter described, on which property or portions thereof there are

growing myrtle trees of such value as to justify special effort and special means for their preservation.

2. That said real property abuts upon the _____ Highway, which is a part of the Oregon state highway system and is one of the scenic roads of the State.

3. Because of the fact that only in a few places in the world, one of which is the State of Oregon, are there found groves of myrtle trees, it is the considered judgment of the Commission that sufficient of the myrtle trees growing upon real property bordering and paralleling the _____Highway should be preserved to form a myrtle lane. It is further the judgment of the Commission that the area immediately surrounding the trees should be cleared of underbrush and dead and other offensive growth, and the entire setting converted into and thereafter kept in a condition suitable and fitting for such rare and classic trees as the myrtle.

NOW, THEREFORE, in consideration of the things to be done by the State and in consideration of the mutual benefits and public good which will for all time be shared and enjoyed by the Owners and the public generally, the said Owners hereby sell, transfer and convey to the State of Oregon, by and through its State Highway Commission, and/or its successors, an undivided joint, common and equal interest in and title to all of the myrtle trees now standing or growing or which may hereafter grow upon the following described real property situated in _____County, State of Oregon, to wit:

together with the perpetual right and privilege to go upon said property for the purpose of cleaning up underbrush, trimming, cutting or otherwise removing dead limbs and other growth, and burning or otherwise disposing of waste material, and for the purpose of doing such other things as in the opinion of the State Highway Commission are necessary and appropriate for the preservation and development of said trees, and their settings and surroundings; provided that in the doing of any of said things the State Highway Commission, its officers, agents and employes shall always keep in mind the historic significance, the forest dignity and the primative aspect which the myrtle possesses among the trees and woods of the world.

The State shall from time to time consult the Owners, or their successors, to the end that the interests of the Owners and of the public may at all times be promoted and conserved.

Nothing in this conveyance, transfer or sale shall be in anywise construed or deemed to pass, convey or vest in the State any interest in or title to the real property hereinabove described, save and

except such interest as may be incidental to the growth, the preservation, the culture and development of said trees.

The Owners shall and do reserve the right to use the said real property freely and at all times for any and all purposes not inconsistent with the purpose and objective of this agreement; provided, however, that in the use of said property the Owners shall employ every reasonable means and adopt all measures and methods necessary for the preservation of the trees and such measures and methods as will conserve, supplement and implement the work done from time to time by the State for the beautification and preservation of said trees and their surroundings.

It is agreed that no trees shall be cut or trimmed by the Owners without first procuring the written consent of the State Highway Commission or its successors. In the event that any tree or part of a tree is trimmed, cut of felled with the permission and consent of the State Highway Commission, the tree or portion of the tree cut or felled shall, if it have commercial or other value, become the property of the Owners, and the State shall have no interest therein.

If improvements or structures are hereafter placed or erected on any part of said real property by the Owners the preservation and protection of the trees upon the land shall be given first and paramount consideration.

The State shall not place on said real property any structure of any kind or character, except signs or other structures the purpose of which is to give information to the general public with respect to the character of said area and the purpose of the State and the Owners in protecting and conserving the same.

Nothing in this agreement shall be permitted or construed in such manner as to impair or in any way affect the right of the State to acquire title to said property by purchase, donation or agreement or by the exercise of the power of eminent domain.

It is agreed that the judgment and decision of the Highway Commission with respect to the method, the extent, the type and character of the improvement, and the maintenance of said myrtle lane in general and of the above described section thereof in particular shall be final.

The purpose or objective sought to be accomplished by this compact is one of mutual interest to the Owners and the general public, and therefore, each party to this agreement pledges to the other complete and wholesome cooperation, to the end that by their joint and continued effort there may be for all time preserved for the people the stately grandeur of trees which are peculiar and native to the State of Oregon—the myrtle tree.

IN WITNESS WHEREOF, the parties hereto have subscribed their names and affixed their seals the day and year first above written.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended in connection with each parcel. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Footnotes:

** Item No. 13024: The Commission approved this settlement with William and Lily M. Ashby for acquisition of right of way for the Glendale Junction-Wolf Creek Section of the Pacific Highway on the condition that the Engineer approves an unrestricted business approach to the highway at this location.

* Items Nos. 12888, 12899, 12903, 12898, 12895, 12897, 12896, 12894, 12914, 12891, 12893: In the discussion of the settlements for right of way for the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, in Grant County, the Engineer pointed out that the Commission has not yet approved the final location survey for the highway between these points. He advised that the survey is completed and submitted, in support thereof, a map and other pertinent information. He asked the Commission to approve the survey at this time so as to allow the Chief Counsel to proceed with the closing of the right of way options. The matter was discussed at considerable length and as a result thereof the Commission approved the Engineer's request. The following resolution approving the Dry Creek-Monument survey was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and loca-

tion of the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, in Grant County, and in connection therewith to prepare a map or maps showing the route and location of said section of highway and file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

*1. That the survey of the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, together with the maps, which for identification purposes bear map file Nos. 5B-25-17 and 6B-20-5, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-eighth day of October, 1946.

The Assistant Counsel also requested authority to condemn certain parcels of real property that are needed for certain highway improvements concerning which settlements cannot be reached by negotiation. He presented a list of such properties and offers that he recommended in condemnation as follows:

LOVE BRIDGE-BLACK BRIDGE SECTION OF BAKER-HOMESTEAD HIGHWAY		Recommended Offer
R 12260	Oran F. Hutton	$1,250.00
DRY CREEK-MONUMENT SECTION OF KIMBERLY-LONG CREEK HIGHWAY		
R 12902	Fred Page	225.00
R 12887	A. D. Fleming	600.00

(Cont)

* Explanatory note:
The section covered by this resolution includes only from Engineer's Station 290+00 to Engineer's Station 701+85. Adoption of the survey through the town of Monument definitely is not included but was adopted by an amended resolution on December 30, 1946. (See page 13532 of the minute record)

JOHNS-GLENDALE JUNCTION SECTION OF THE PACIFIC HIGHWAY		Recommended Offer
R 12208	Chester A. Smith	$ 150.00
R 13073	Amy E. Gray and Joseph A. Gray	200.00
GLENDALE JUNCTION-WOLF CREEK SECTION OF THE PACIFIC HIGHWAY		
R 12114	W. B. Garrett	900.00

Following careful consideration of each item the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution and the offers with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the develolpment and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Oran F. Hutton, which property is located in the east half of the southwest quarter of the southwest quarter, the north half of the southwest quarter, and the southeast quarter of the northwest quarter of Section 33, and in the south half of the northwest quarter of Section 33, all in Township 8 South, Range 43 East, W.M., Baker County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2, and is further identified in the records of the Highway Commission as file R 12260, Parcel No. 1 being acquired for right of way purposes and Parcel No. 2 being acquired for storage or maintenance site purposes in connection with the Baker-Homestead Highway; (*)

Real property owned by Fred M. Page, which property is located in Lots 4, 3, and 2 of Section 2, Township 9 South, Range 27 East, W.M., Grant County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 12902, which property is being acquired for right of way purposes in connection with the Kimberly-Long Creek Highway; (*)

Real property owned by A. D. Fleming, which property is located in the north half of the northeast quarter of Section 14 and the southeast quarter of the southeast quarter of Section 11 and the southwest quarter of the southwest quarter of Section 12 and the northwest quarter of the northwest quarter of Section 13, Township 9 South, Range 26 East, W.M., Grant County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4, 5, and 6, and is further identified in the records of the Highway Commission as file R 12887, Parcel No. 4 being acquired for right of way purposes, Parcel No. 5 being acquired for the purpose of procuring therefrom roadbuilding materials, and an easement over Parcel No. 6 being acquired for hauling road purposes, all in connection with the Kimberly-Long Creek Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and

submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission

---

Foot Note:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 69, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Assistant Counsel requested instructions regarding the issuance of permits for the use of excess state properties during the calendar year

1947. He recommended continuance of the present policy in that regard, which authorizes the issuance of permits under certain conditions. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Chief Counsel presented a request from Miss Jean Ryser, Portland, to purchase state-owned property situate adjacent to the Sunset Highway for homesite purposes. He recalled that the Commission, some time ago, declared as a policy that it would not sell any property along this highway until construction of the highway had been completed. The Commission voted unanimously not to deviate from such policy at this time.

The Secretary presented a copy of City of Portland Ordinance No. 83792 whereby the City Council grants to the Portland Chamber of Commerce, on certain conditions, a revokable permit of five years' duration to establish and operate a guest center on city-state-owned property bounded by S.W. Harbor Drive, S.W. Front Avenue, S.W. Salmon Street, and S.W. Main Street, in the City of Portland. The Engineer advised that the area described lies between Harbor Drive and Front Avenue and is owned jointly by the city and the state, the state's interest being 40 percent of the total. It was originally acquired, he said, to provide a freeway along Harbor Drive and to prevent access to this thoroughfare at this point, and plans are to landscape it so that it will present an attractive appearance. He pointed out that, whereas the city is permitting the use of the property as a guest center for a period of five years, nevertheless, in his estimation, it will be a permanent proposition. He gave as his opinion that it is a meritorious project and recommended favorable consideration by the Commission provided the freeway characteristic of Harbor Drive is maintained.

Chairman Banfield stated his concurrence in the viewpoint of the Engineer that once a guest center is established on the property it will be there permanently. He also stated his dislike to conduct a joint business of this kind because once started it would be permanent and would be the establishment of a precedent that could not be avoided in considering the requests of other cities for similar privileges. He suggested, if the Commission approves the use of the property for the purpose intended, that it dispose of the state's 40 percent share to the city, either by sale or lease, which would take the state out of the picture, and the city would then be able to proceed on its own responsibility. Commissioner Schaupp stated his approval of Chairman Banfield's suggestion if the property is not needed for state highway purposes. Commissioner Chandler stated his opposition to the joint-ownership plan. The matter was discussed at considerable length, and, as a result thereof, the Commission decided unanimously to lease the state's share of the property to the city for a five-year period on the condition that the city will not allow access from the property to Harbor Drive and that the matter will be reconsidered when the five-year-lease period expires. The Chief Counsel was instructed to prepare an agreement with the city on such basis and to submit the same to the Commission for approval before presenting it to the City Council for acceptance.

The Chief Counsel reported that on December 17, 1942, the former Highway Commission adopted a resolution authorizing condemnation of certain real property owned by W. P. and Anna Wurster which was needed in connection with construction of the West Portland-Hubbard Secondary Highway at the location of the Aurora Flight Strip because a satisfactory settlement could not be reached with the owners. Provision was not made in this purchase, he said, for acquiring the right of access to the highway from the abutting property although subsequent thereto such provision was made in the acquisition of right of way from adjoining property owners. The Wurster case, he said, has not been settled. He suggested, in view thereof, that the original resolution be amended to provide for the acquisition of such right of access as well as for the real property itself. The Commission approved the suggestion and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, heretofore, to wit: on the seventeenth day of December, 1942, the Commission adopted a resolution finding and declaring the acquisition of certain real property owned by Anna B. Wurster and W. P. Wurster necessary in connection with highway construction, and in and by said resolution authorized and directed the Commission's Chief Counsel to institute and prosecute condemnation proceedings for the acquisition of said property in the event the property could not be acquired by agreement; and

WHEREAS, conforming to the provisions of said resolution a condemnation complaint was filed in the Circuit Court of the State of Oregon for Clackamas County on the seventeenth day of April, 1943, which said case is now pending; and

WHEREAS, since the adoption of said resolution and since the filing of said complaint the Commission has found it advisable and in the interests of the traveling public that, in addition to acquiring fee title to the real property described in said complaint, there be acquired the defendants' right of access from their abutting property to said highway and all right of access from said highway to said abutting property; and

WHEREAS, it is the judgment and opinion of the Commission that said resolution should be amended so as to provide for and authorize the acquisition of all rights of access from the defendants' abutting property to the real property described in said complaint and all rights of access from the property described in said complaint to said abutting property;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That said original resolution be amended and that by said amendment the Commission's Counsel be and he hereby is authorized and directed to file an amended complaint so as to provide, in addition to

acquisition of the fee title to the real property described in said complaint, for the acquisition of all rights of access from the defendants' abutting property to the property described in said complaint and from said real property and the highway to be constructed thereover to the said abutting real property, except at such places as may be designated by the Highway Commission.

2. That this resolution be entered in full in the minutes and records of this Commission as of October 28, 1946.

The Chief Counsel also asked the Commission to amend the resolution that was adopted by this Commission on August 22, 1946, authorizing the acquisition of certain real properties that are needed as right of way for construction of the Pacific Highway on permanent alignment in Douglas County. He explained that since the adoption of the original resolution on August 22 changes have been made in the descriptions of several of the parcels, and the proposed amendment simply is for the purpose of correcting the original resolution in that respect. He recommended approval of an amendatory resolution. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission on the twenty-second day of August, 1946, adopted a resolution authorizing the acquisition of certain real properties for highway purposes, which said real properties were described in said resolution and the names of the respective owners given therein, among which owners were W. B. Garrett, J. B. Moore, and Chester A. Smith; and

WHEREAS, since the adoption of said resolution the owner W. B. Garrett requested a change in the description of the property sought to be acquired as a site from which to procure roadbuilding materials; and

WHEREAS, for the purpose of conforming to the request and desire of the said owner W. B. Garrett the Commission authorized a change in the description of said parcel of property and a change in the description of the parcel of land required for hauling road purposes and has approved and authorized the acquisition of the following described real property as a site from which to procure roadbuilding materials:

A parcel of land lying in the east half ($E\frac{1}{2}$) of the John Redfield D. L. C. No. 38 in Section 35, Township 32 South, Range 6 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to W. B. Garrett and Amanda Garrett recorded in Book 104, Page 165, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point 2327.7 feet north and 2161.6 feet west of the southeast corner of Section 35, Township 32 South, Range 6 West, W.M.; thence North 30° 38' West a distance of 277.2 feet; thence South 75° 43' West a distance of 541.7 feet; thence South 45° 36' West a distance of 512.1 feet; thence South 66° 07' East a distance of 324.5 feet; thence North 65° 28' East a distance of 317.0 feet; thence South 58° 56' East a distance of 75.5 feet; thence North 52° 40' East a distance of 481.3 feet to the point of the beginning.

The parcel of land to which this description applies contains 7.87 acres.

and has approved and authorized the acquisition of the following described real property for hauling road purposes:

A parcel of land lying in the east half ($E\frac{1}{2}$) of the John Redfield D. L. C. No. 38 in Section 35, Township 32 South, Range 6 West, W.M., Douglas County, Oregon, and being a portion of the following described real property: that tract of land which was conveyed by that certain deed to W. B. Garrett and Amanda Garrett recorded in Book 104, Page 165, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the southeasterly line of the above described parcel of land, said point being South 52° 40' West a distance of 13.12 feet from the most easterly corner of said tract, said point also being 2319.7 feet north and 2172.0 feet west of the southeast corner of Section 35, Township 32 South, Range 6 West, W.M.; thence South 65° 04' East a distance of 132.77 feet; thence on a 317.03 foot radius curve left (the long chord of which bears North 84° 21' East 322.61 feet) a distance of 338.45 feet; thence North 53° 46' East a distance of 502 feet to a point on the proposed right of way line on the connection between the relocated Pacific Highway and the present Pacific Highway; thence in a southeasterly direction along said proposed right of way line a distance of approximately 43 feet; thence South 53° 46' West a distance of 489 feet; thence on a 357.03 foot radius curve to the right (the long chord of which bears South 84° 21' West 363.31 feet) a distance of 381.15 feet; thence North 65° 04' West a distance of 153.81 feet to a point on the southeasterly line of the above described parcel; thence North 52° 40' East along said southeasterly line a distance of 45.19 feet to the point of beginning; containing 0.92 acre.

and

WHEREAS, likewise subsequent to the adoption of said resolution the owner J. B. Moore requested a change in the description of the area sought to be acquired for the purpose of procuring therefrom roadbuilding

materials, and in order to conform and comply with the said request the Commission authorized a modification of said description and a modification of the description of the property required for hauling road purposes, so that the real property sought to be acquired as a source or site from which to procure roadbuilding materials shall be described as follows:

A parcel of land lying in the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) and the south one-half ($S\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$), said northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) being designated as Government Lot No. 6, of Section 30, Township 32 South, Range 5 West, W.M., Douglas County, Oregon; the said parcel being all that portion of said subdivisions of Section 30 included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land being determined by the said center line from Station 5+53.4 to Station 17+30.0, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 5+53.4, opposite and 150.0 feet distant from which point the southerly line of the said strip of land intersects the north line of Section 30; said point being 76.8 feet north and 738.6 feet west of the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence South 29° 37' West a distanct of 446.6 feet; thence South 61° 48' 30" West a distance of 730.0 feet to Engineer's center line Station 17+30.0, opposite and 150.0 feet distant southerly from which is the center of the present channel of Cow Creek, said station 17+30 being approximately on the north line of the south one-half ($S\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30.

The widths [in feet] of the strip of land above referred to are as follows:

Station	to	Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
5+53.4	to	17+30.0	300 feet	150 feet	150 feet

The parcel of land to which this description applies contains 6.32 acres.

and the real property sought to be acquired for hauling road purposes shall be described as follows:

A parcel of land lying in the northeast quarter ($NE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30, Township 32 South, Range 5

West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Arthur J. Fawcett and Verle V. Fawcett recorded in Book 108, Pages 404-405, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the northerly right of way line of the relocated Pacific Highway which is opposite and 100 feet distant northerly from Engineer's center line Station 338+00, said point also being 1167.8 feet south and 428.5 feet west from the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence North 34° 48' 30" West a distance of 647.1 feet; thence North 44° 48' 30" West a distance of 226.6 feet to a point on the southerly boundary of the above described gravel bar strip; thence South 61° 48' 30" West along said gravel bar boundary a distance of 104.4 feet; thence South 44° 48' 30" East a distance of 265.0 feet; thence North 40° 16' 30" East a distance of 69.3 feet; thence South 34° 48' 30" East a distance of 638.3 feet to a point on said right of way line; thence northerly along said right of way line a distance of 30.0 feet to the point of beginning.

The parcel of land to which this description applies contains 1.01 acres.

and

WHEREAS, the modification of the description of the property owned by the said J. B. Moore has made necessary the acquisition of the following parcel of real property owned by Chester A. Smith for the purpose of procuring therefrom roadbuilding materials:

A parcel of land lying in the north one-half ($N\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$), said northwest quarter of the northwest quarter being designated as Government Lot No. 6, of Section 30, Township 32 South, Range 5 West, W.M., Douglas County, Oregon; the said parcel being all that portion of said subdivision of Section 30 included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land being determined by the said center line from Station 5+53.4 to Station 17+30, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 5+53.4, opposite and 150 feet distant from which point the southerly line of the said strip of land intersects the north line of Section 30; said point being 76.8 feet north and 738.6 feet west of the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence South 29° 37' West a distance of 446.6 feet; thence South 61° 48' 30" West a distance of 730 feet to

Station 17+30, at which station the westerly end of said strip of land lies at right angles to said center line, said Station 17+30 being approximately on the south line of the north one-half ($N\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30.

The parcel of land to which this description applies contains 1.20 acres.

and the acquisition of the following parcel of real property owned by Amy E. Gray for the purpose of procuring therefrom roadbuilding materials:

A parcel of land lying in the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 19, Township 32 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Amy E. Gray recorded in Book 108, Page 594, of Douglas County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 3+50.0 to Station 7+22.2, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 3+50.0, opposite and 150 feet distant from which point the northerly line of the said strip of land intersects the center of Cow Creek; said point being 253.6 feet north and 638.1 feet west of the south quarter corner of Section 19, Township 32 South, Range 5 West, W.M.; thence South 29° 37' West a distance of 372.2 feet to Engineer's center line Station 7+22.2, opposite and 150 feet distant from which the northerly line of said strip of land intersects the south line of said property.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
3+50.0	to	7+22.2	300 feet	150 feet	150 feet

The parcel of land to which this description applies contains 1.98 acres.

and

WHEREAS, it is the judgment of the Commission that the said

resolution should be modified or amended in the above respects and that the properties above described are needed and necessary for the purposes above stated;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the resolution adopted by the Commission on the twenty-second day of August, 1946, be and the same is hereby modified and amended in the following respects:

a. That the parcel of land described in said resolution as Parcel No. 25, owned by W. B. Garrett, et al., be and the said parcel as described therein is deleted and in lieu thereof the following described parcel is inserted:

Parcel No. 25 (W. B. Garrett, et al., file R 12114, owners)
(Gravel Pit purposes)

A parcel of land lying in the east half ($E\frac{1}{2}$) of the John Redfield D. L. C. No. 38 in Section 35, Township 32 South, Range 6 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to W. B. Garrett and Amanda Garrett recorded in Book 104, Page 165, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point 2327.7 feet north and 2161.6 feet west of the southeast corner of Section 35, Township 32 South, Range 6 West, W.M.; thence North 30° 38' West a distance of 277.2 feet; thence South 75° 43' West a distance of 541.7 feet; thence South 45° 36' West a distance of 512.1 feet; thence South 66° 07' East a distance of 324.5 feet; thence North 65° 28' East a distance of 317.0 feet; thence South 58° 56' East a distance of 75.5 feet; thence North 52° 40' East a distance of 481.3 feet to the point of beginning.

The parcel of land to which this description applies contains 7.87 acres.

b. That the parcel of land described in said resolution as Parcel No. 26, owned by W. B. Garrett, et al., and required for hauling road purposes, be deleted and in lieu thereof there be inserted the following description:

Parcel No. 26 (W. B. Garrett, et al., file R 12114, owners)
(Hauling Road Purposes)

A parcel of land lying in the east half ($E\frac{1}{2}$) of the John

Redfield D. L. C. No. 38 in Section 35, Township 32 South, Range 6 West, W.M., Douglas County, Oregon, and being a portion of the following described real property: that tract of land which was conveyed by that certain deed to W. B. Garrett and Amanda Garrett recorded in Book 104, Page 165, of Douglas County Record of Deeds, the said parcel being described as follows:

Beginning at a point on the southeasterly line of the above described parcel of land, said point being South 52° 40' West a distance of 13.12 feet from the most easterly corner of said tract, said point also being 2319.7 feet north and 2172.0 feet west of the southeast corner of Section 35, Township 32 South, Range 6 West, W.M.; thence South 65° 04' East a distance of 132.77 feet; thence on a 317.03 foot radius curve left (the long chord of which bears North 84° 21' East 322.61 feet) a distance of 338.45 feet; thence North 53° 46' East a distance of 502 feet to a point on the proposed right of way line on the connection between the relocated Pacific Highway and the present Pacific Highway; thence in a southeasterly direction along said proposed right of way line a distance of approximately 43 feet; thence South 53° 46' West a distance of 489 feet; thence on a 357.03 foot radius curve to the right (the long chord of which bears South 84° 21' West 363.31 feet) a distance of 381.15 feet; thence North 65° 04' West a distance of 153.81 feet to a point on the southeasterly line of the above described parcel; thence North 52° 40' East along said southeasterly line a distance of 45.19 feet to the point of beginning; containing 0.92 acre.

c. That the parcel of land described in said resolution as Parcel No. 3, owned by J. B. Moore, be deleted and in lieu thereof there be inserted the following description, to wit:

Parcel No. 3 (J. B. Moore, file R 12207, owner)
(Gravel Pit Purposes)

A parcel of land lying in the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) and the south one-half ($S\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$), said northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) being designated as Government Lot No. 6, of Section 30, Township 32 South, Range 5 West, W.M., Douglas County, Oregon; the said parcel being all that portion of said subdivisions of Section 30 included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land being determined by the said center line from Station 5+53.4 to Station 17+30.0, which portion of center line is described as follows:

Beginning at a point which is Engineer's Center line Station 5+53.4, opposite and 150.0 feet distant from which point the southerly line of the said strip of land intersects the north line of Section 30; said point being 76.8 feet north and 738.6 feet west of the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence South 29° 37' West a distance of 446.6 feet; thence South 61° 48' 30" West a distance of 730.0 feet to Engineer's center line Station 17+30.0, opposite and 150.0 feet distant southerly from which is the center of the present channel of Cow Creek, said Station 17+30 being approximately on the north line of the south one-half ($S\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
5+53.4	to	17+30.0	300 feet	150 feet	150 feet

The parcel of land to which this description applies contains 6.32 acres.

d. That the parcel of land described in said resolution as Parcel No. 4, owned by J. B. Moore and required for hauling road purposes, be deleted and in lieu thereof there be inserted the following description:

Parcel No. 4 (J. B. Moore, file R 12207, owner)
(Hauling Road Purposes)

A parcel of land lying in the northeast quarter ($NE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30, Township 32 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Arthur J. Fawcett and Verle V. Fawcett recorded in Book 108, Pages 404-405, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the northerly right of way line of the relocated Pacific Highway which is opposite and 100 feet distant northerly from Engineer's center line Station 338+00, said point also being 1167.8 feet south and 428.5 feet west from the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence North 34° 48' 30" West a distance

of 647.1 feet; thence North 44° 48' 30" West a distance of 226.6 feet to a point on the southerly boundary of the above described gravel bar strip; thence South 61° 48' 30" West along said gravel bar boundary a distance of 104.4 feet; thence South 44° 48' 30" East a distance of 265.0 feet; thence North 40° 16' 30" East a distance of 69.3 feet; thence South 34° 48' 30" East a distance of 638.3 feet to a point on said right of way line; thence northerly along said right of way line a distance of 30.0 feet to the point of beginning.

The parcel of land to which this description applies contains 1.01 acres.

e. That there be added following the description of the parcel of land described in said resolution as Parcel No. 13 the following described parcel of real property owned by Chester A. Smith, which shall be designated as Parcel No. 13A and which is needed as a site or source from which to procure roadbuilding materials, to wit:

Parcel No. 13A (Chester A. Smith, owner)
(Gravel Pit Purposes)

A parcel of land lying in the north one-half ($N\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$), said northwest quarter of the northwest quarter being designated as Government Lot No. 6, of Section 30, Township 32 South, Range 5 West, W.M., Douglas County, Oregon; the said parcel being all that portion of said subdivision of Section 30 included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land being determined by the said center line from Station 5+53.4 to Station 17+30, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 5+53.4, opposite and 150 feet distant from which point the southerly line of the said strip of land intersects the north line of Section 30; said point being 76.8 feet north and 738.6 feet west of the north quarter corner of Section 30, Township 32 South, Range 5 West, W.M.; thence South 29° 37' West a distance of 446.6 feet; thence South 61° 48' 30" West a distance of 730 feet to Station 17+30, at which station the westerly end of said strip of land lies at right angles to said center line, said Station 17+30 being approximately on the south line of the north one-half ($N\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the east one-half ($E\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 30.

The parcel of land to which this description applies contains 1.20 acres.

f. That there be added to said resolution and designated as Parcel No. 35 the following described parcel of real property owned by Amy E. Gray, which parcel is needed as a source or site from which to procure roadbuilding materials:

Parcel No. 35 (Amy E. Gray, file R 13073)
(Gravel Pit Purposes)

A parcel of land lying in the southeast quarter ($SE\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 19, Township 32 South, Range 5 West, W.M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Amy E. Gray recorded in Book 108, Page 594, of Douglas County Record of Deeds, the said parcel being all that portion of the foregoing described property included in a strip of land 300 feet in width, 150 feet on each side of the center line of a base line as said base line has been established over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 3+50.0 to Station 7+22.2, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 3+50.0, opposite and 150 feet distant from which point the northerly line of the said strip of land intersects the center of Cow Creek; said point being 253.6 feet north and 638.1 feet west of the south quarter corner of Section 19, Township 32 South, Range 5 West, W.M.: thence South 29° 37' West a distance of 372.2 feet to Engineer's center line Station 7+22.2, opposite and 150 feet distant from which the northerly line of said strip of land intersects the south line of said property.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to	Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
3+50.0	to	7+22.2	300 feet	150 feet	150 feet

The parcel of land to which this description applies contains 1.98 acres.

2. That the parcels of real property herein described as Parcels Nos. 25, 3, 13A, and 35 are needed and are necessary as sources or

sites from which to procure roadbuilding materials and their acquisition is hereby ordered by the Commission, and the parcels of real property herein described as Parcels Nos. 26 and 4 are needed and are necessary for hauling road purposes and their acquisition is hereby ordered by the Commission.

3. That except as herein amended or modified, the said resolution of August 22, 1946, shall remain in full force and effect.

4. That this amended resolution be entered in the minutes and records of the Commission as of the 28th day of October, 1946.

The Chief Counsel reported an inquiry from Judge E. C. Latourette, Oregon City, whether or not the Commission would be willing to sell to him a small parcel of land situate between the highway and the Willamette River at the end of 5th Street, in Oregon City. He advised that this property was acquired by the former Highway Commission in connection with a right of way settlement, the Commission being forced to purchase it in order to secure the right of way. He further advised that he could see no special value in the property for highway purposes and recommended that it be sold to Judge Latourette at its market value. The Engineer gave as his thought that the Commission should retain title to the property in order to control its use. He pointed out that the property is located at the turn in the highway where an excellent view of the Willamette River Falls may be obtained, which view would be obstructed were the property to get into private ownership and a building constructed on it. The preservation of the scenery along the Oregon City waterfront, he said, was one of the arguments presented by the proponents of the water front route when the former Highway Commission discussed a location for the highway through this city. He further stated that access to this property near the sharp curve at this point would create a decided hazard. He recommended against the sale of the property. In the discussion of this matter, Commissioner Schaupp stated a desire to personally inspect the property before taking definite action. The Commission thereupon deferred its decision until a future date.

The Chief Counsel presented for approval and execution a bargain and sale deed conveying unto the Port of Newport certain state-owned property situate on the south side of Yaquina Bay, consisting of a portion of the sand spit which contains the dock where ferries used to land prior to construction of Yaquina Bay Bridge. He recalled that a delegation from Newport appeared before the Commission some months ago and requested the privilege of acquiring this tract, which they declared was needed by the Port of Newport in connection with construction by the U. S. War Department of a turning basin for ships. He also stated that the Commission at that time agreed to sell the property to the Port of Newport under certain conditions, one of which was that the general public should have access to the water in Yaquina Bay at all times. The consideration to be paid for the property, he added,

was not set, although mention was made that the state might sell it to the Port at actual cost, which investigation reveals was a lump sum of $10. He recommended that it be sold to the Port of Newport for such amount, a recent appraisal of the property revealing that it is not worth more than $1 per acre. The matter was discussed at some length, and, it appearing to the Commission that the deed of conveyance has been properly prepared to protect the public's interest, the Commission voted unanimously to sell the property to the Port of Newport for the sum of $10. The deed of conveyance was signed by the Commission on the following day.

The Commission had under discussion a request from Mr. Luke Nichols, Hood River, to lease for a period of from ten to fifteen years a portion of what is known as the Button property at Hood River, which was acquired as right of way for the improvement of the Columbia River Highway at this point. Mr. Nichols offered to pay $50 per year for the use of the property and agreed to the termination of the lease at any time when the Commission found it desirable for highway construction or other highway purposes. The matter was discussed at considerable length, and, as a result thereof, the Commission decided not to lease the property.

The Chief Counsel presented a report on the necessity for adoption by the Commission of an order with respect to restricting access from individual properties to existing highways. He also presented copy of a suggested order, the provisions of which, he said, are in conformity with ideas previously expressed by the Commission. Because of its importance the Commission deferred action on this matter until its next meeting in order that sufficient time may be had to study the order thoroughly.

A committee representing the Advisory Committee on Travel and Information Matters, consisting of Messrs. John A. Laing, Chairman; Arden X. Pangborn, member; and Manley F. Robison, Director of the Travel and Information Department, was present and presented the recommendation of the Advisory Committee concerning the 1947 budget of the Travel Department. A mimeographed copy of the Committee's recommendation containing detailed information was presented to each member of the Commission. Mr. Laing advised that the Advisory Committee is unanimous in recommending it for approval by the Highway Commission. He explained the features thereof in detail. After careful consideration the Commission approved the budget, as follows, by unanimous vote, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

"Magazine Advertising contracted for in 1946, but not billed until 1947	$ 60,000.00
Printing, Photographic Department, Auxiliary Promotion, General Office and Salaries	64,592.00
Magazine Advertising - 1947	112,004.85
Newspaper Advertising - 1947	12,969.40
	$ 249,566.25"

Mr. Laing also presented, in behalf of the Advisory Committee, a recommendation that Mr. Merle R. Chessman, former Highway Commissioner and prior thereto a member of the Advisory Committee on Travel Matters, be re-appointed a member of their committee. The Commission took the matter under advisement.

The Chief Counsel reported on the request of Foster and Kleiser Company, Portland, for permission to maintain a platform on a strip of State Highway property about four feet wide situate at the southeast corner of Seventh and Astor Streets, in Astoria. He recalled that the Commission had this matter under discussion at the previous meeting and at that time referred it to him to ascertain whether or not it would be advisable to sell the property or to lease it. In response thereto he contacted the officials of the Foster and Kleiser Company who stated if the Commission will sell the property to the owner of the abutting property, that they would be glad to deal with said party in as much as they are now leasing space from him. The Commission appeared favorably inclined to sell the property to this owner if he will pay a reasonable amount for it. The Chief Counsel was instructed to ascertain such information and report back to the Commission.

The Chief Counsel brought up for discussion a proposed settlement of the claim of Mr. Lester Wilkins for the destruction of a well located on the Arlington-Condon Section of the John Day Highway, in Gilliam County. He advised that the right of way was acquired by the county in the first instance but it appears that the county failed to record the final judgment, although the amount thereof was paid to the owner. It also appears that later on, when the state took over the highway, the well was found to be in disrepair and, accordingly, was filled in, with a result that Mr. Wilkins started a law suit alleging that the county had not paid for the well. This case, he said, is of long standing and has now arrived at a point where it would be cheaper to settle out of court, which Mr. Wilkins is willing to do upon payment to him of the sum of $150. The Chief Counsel recommended payment of such sum to Mr. Wilkins in order to dispose of the matter. The Commission approved the recommendation unanimously.

The Chief Counsel reported on the cutting of an oak tree by employees of the Mountain States Power Company on the Monmouth-Independence Highway. He advised that during the progress of constructing a new power line on this highway in front of the premises of Mr. J. M. Tillman the men encountered a large oak tree which interfered with the power wires and, after consulting with Mr. Tillman with regard to trimming the tree, cut it down upon instructions from Mr. Tillman, who now alleges that he thought the tree was located on his property and wanted it removed because it was destroying part of his filbert orchard. Investigation reveals, he said, that the tree was entirely on State Highway property, in view of which the matter was called to the attention of the Mountain States Power Company by letter, reply to which has been received from the Company's attorney, Mr. Willard L. Marks, Albany. The Chief Counsel read aloud Mr. Mark's letter, in which he expresses regrets that the tree was felled and advises that Mr. Tillman assumes full responsibility for the cutting; also in which he expresses the sincere desire of the

Company to cooperate with the State Highway Commission in every way possible in order that the scenic features along state highways may be preserved.

The Chief Counsel advised that, in view of the circumstances surrounding this case, he did not believe that the Commission would secure any satisfaction by criminally prosecuting the Mountain States Power Company; in fact, there is a question in his mind whether or not the Commission would be able to secure any satisfaction in view of the fact, as alleged, that Mr. Tillman's filbert trees were destroyed by the roots of the oak tree.

The State Parks Superintendent was present and cited other cases where the Mountain States Power Company had maliciously destroyed tree growth along state highway rights of way. He recommended that the Company be prosecuted and a penalty assessed on the basis of the age of the tree. The matter was discussed at considerable length during which the Engineer advised that the evidence gathered in the investigations clearly shows that the tree was located entirely on State Highway property. The Commission referred the matter back to the Chief Counsel for further analysis and recommendation as to the method of procedure.

Like action was taken by the Commission on a report rendered by the Chief Counsel on the destruction of a tree growing on the right of way of the Salem-Dallas Highway near the Oak Knoll Golf Course which was felled by a Mr. F. D. Errion, which matter was previously discussed by the Commission at its meeting in September. (The Chief Counsel reported his recommendation concerning both of the aforementioned tree-cutting matters on the following day, at which time he recommended against prosecuting the Mountain States Power Company because it would mean criminally prosecuting the employees of the Company and not the Company itself, and that Mr. Errion be prosecuted to the full extent of the law. The Commission approved the recommendations unanimously and instructed the Chief Counsel to send proper notification to the guilty parties.)

The Chief Counsel brought up for discussion the proposed agreement with the City of Port Orford covering improvement of the Oregon Coast Highway and construction of curbs and sidewalks along the highway through this town. He advised that the Commission's requirements with respect to such improvement have been conveyed to the city authorities who have not seen fit to adopt them, in view of which, he suggested that the matter be abandoned until the city indicates its willingness to cooperate. The Commission approved the recommendation unanimously.

The Engineer reported the necessity to improve the ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington. He advised that this could be accomplished in two ways, one by repairing the "spare" ferry "North Beach", which, according to the estimates submitted by reliable concerns, would cost from $40,000 to $87,000 to give five years of service, and the other would be to purchase a new ferry boat, which would cost approximately $180,000 but which would have a service life of from 35 to 50 years with proper maintenance. He recommended purchase of the new

boat, also that he be given authority to advertise for bids for the building of a new ferry and to hire a Naval architect to design and oversee its construction. In support of his recommendation the Engineer gave figures on the volume of traffic that is now using the ferry, and anticipated traffic volume and revenues. (See Engineer's typewritten report to the Oregon State Highway Commission dated October 15, 1946, in general files for details.) Following considerable discussion of this matter the Engineer was authorized by the Commission to secure prospectuses from a number of marine architects setting forth their qualifications to handle a project of this kind and the compensation they would expect to receive for their services. Such information is to be furnished the Commission, which will then make its decision with respect to the entire matter.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 4:30 p.m. in the same room:

BAKER-HOMESTEAD HIGHWAY IN BAKER COUNTY
WEST UNIT, LOVE BRIDGE - BLACK BRIDGE SECTION

J. C. Papin, Baker	$332,918.00
E. C. Hall Co., Portland	339,273.00
Sound Constr. & Engr. Co., Seattle, Wn.	357,677.50
J. A. Terteling & Sons, Inc., Boise, Idaho	393,206.80

OREGON COAST HIGHWAY IN LINCOLN COUNTY
OCEANLAKE SECTION

Knight Pearcy Nursery, Salem	$ 4,661.31
Miner & Co., Portland	6,220.54
Albert W. Denton, Vancouver, Wn.	7,598.20
Brennan Constr. Co., Portland	7,969.00

ALBANY-LYONS HIGHWAY IN LINN COUNTY
SANDERSON BRIDGE REVETMENT SECTION

Dobyns & Webb, Salem	$ 13,700.00
Stevenson Constr. Co., Salem	13,750.00
C. J. Eldon, Portland	14,350.00
John A. Logan, Portland	14,885.00
Oscar E. Joelson, Eugene	18,125.00
Leonard & Slate Oreg. Ltd., Portland	22,125.00

OCT - 1946

PACIFIC HIGHWAY IN MULTNOMAH COUNTY
JANTZEN BEACH SECTION

Edlefsen-Weygandt, Portland	$117,813.30

PENDLETON-JOHN DAY HIGHWAY IN UMATILLA COUNTY
TUTUILLA SECTION

John A. Logan, Portland	$ 73,960.00
Vernie Jarl, Gresham	76,560.00
Porter W. Yett, Portland	92,414.00

COVE SECONDARY HIGHWAY IN UNION COUNTY
COVE-UNION SECTION

E. C. Hall Co., Portland	$201,622.00
Morrison-Knudsen Co., Boise, Idaho	208,472.00

The Engineer discussed with the Commission the request of White Bros. Co., contractors, Walla Walla, Washington, for the release of the bid bond which they furnished in connection with their proposal for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County, and in this connection the Engineer introduced Mr. Carl A. Peterson, Resident Engineer, and Division Engineer, W. C. Williams, who have charge of this job. Mr. Peterson was interrogated by Chairman Banfield as follows:

Chairman Banfield: Did you give any instructions to White Bros. Co., or anyone else, different from the plans and specifications set out by the Highway Commission?

Mr. Peterson: No, I did not.

Chairman Banfield: What conversation did you have with them?

Mr. Peterson: He (Mr. White) came into the office at Troutdale the morning prior to the day of letting. I asked him if he wanted to go up on the job. He said that he was familiar with it. He was there two or three days prior to this. We laid the plans out then. "What are these lines", he said. I answered, "Slope lines. That is the slope we have to slope the pit to." He said, "To those marks"? I said, "As near as we can. We might not be able to slope to these lines but as near as we can." He said, "Well, I'll put in a complimentary bid." That was all that was said.

Chairman Banfield: Did any other contractors come in?

Mr. Peterson: Yes. I went up with all of them. They all understood that they had to slope it.

Chairman Banfield: There was no question in Mr. White's mind that the slope had to be sloped to those lines?

Mr. Peterson: No. After the bids were opened we went up to the job and discussed ways and means of sloping it. He decided then he couldn't get a "Cat" up there. Five days later Mr. Anderson, the superintendent, came and said they were going to start sloping by hand.

Chairman Banfield: You and Mr. White went up there and decided you couldn't put a "Cat" up there. Did you decide or did he?

Mr. Peterson: He did. I didn't have anything to do with it.

Chairman Banfield: Are you sure there was no information given him that would lead him to believe that the plans were incorrect?

Mr. Peterson: He said, "Do you have to slope that?" (Referring to the east side of the borrow area) I said, "No, we aren't going to touch that."

Chairman Banfield at this point recited the history of this case for the benefit of the new Highway Commissioner, Mr. Ben R. Chandler, following which the interrogation was continued, as follows:

Mr. Devers: Has Mr. White talked with you since he was told by his superintendent he couldn't do the job?

Mr. Peterson: No.

Mr. Devers: When you said you told him he would be expected to do the work to these lines as near as possible, what did you mean?

Mr. Peterson: The rocks are large. It is pretty hard to sandpaper them down to meet the line of the slope.

Chairman Banfield: You meant general conformity to the plans within possibility?

Mr. Peterson: Yes.

Mr. Devers: I don't think they have any ground on which to say to the Commission they shouldn't forfeit their bond.

Chairman Banfield: What cases in the past has the Commission given it back?

Mr. Devers: I remember only one and that was at Grants Pass. It was minor work. The conditions were such that we all felt that the contractor wasn't to blame for the situation that had arisen.

Mr. Baldock: I think in all the other cases the bond has been forfeited.

Chairman Banfield: Do you feel, Mr. Baldock, that your engineering plans and specifications given to the contractors, plus the information that your representatives have given, have been ample enough so that Mr. White was in possession of all the information needed to put in an adequate bid?

Mr. Baldock: Yes.

Mr. Devers: After he decided he couldn't do the job he and his superintendent were in my office in Salem. He said the superintendent told him he couldn't do it.

The Engineer then gave as his opinion that after submitting his bid the contractor considered that it was too low and wanted to get rid of his obligation. The fact of the matter is that his bid was $25,000 below the Engineer's estimate. Another thing that should be considered, he said, was the delay that has been caused by the White Bros. Co. default. The material has not been removed as was anticipated when bids were taken and it is going to be necessary to extend the time limit for the present contractor, who is doing the work by force account. He added that had White Bros. Co. accepted the contract and performed the work diligently it would have been completed by now.

Commissioner Schaupp inquired if Mr. White mentioned, when he called at the Salem office, that his superintendent told him that he couldn't do the job. The Chief Counsel replied in the negative. He further stated that the superintendent said he didn't see how he could do the job, also, that he hadn't seen it until after the contract had been awarded to White Bros. Co. This concluded the discussion. Action on the matter was deferred by the Commission until the following day. (This matter was brought to the attention of the Commission before adjournment on October 29 but action was again deferred until a future meeting).

The Engineer reported a request from the City of Warrenton that the state assume jurisdiction over the old route of the Oregon Coast Highway through this town. He recited the history of this road, stating that when it was designated a state highway route the cities were required to maintain the section within the city limits, but later the highway was rerouted to by-pass the town of Warrenton and the old route was allowed to revert to the status of a city street. It appears now, he said, that two bridges on this route are badly in need of repair, one of which is over Skipanon River and the other over Skipanon Slough, and that it will cost about $15,000 to repair them. The city alleges that it does not have the funds to pay this expense

and will have to close the bridges to all traffic if the state will not pay it.

In addition to this project, he said, the city and Clatsop County are asking the Commission to assume full jurisdiction over the county road which extends from the Oregon Coast Highway at Warrenton to Fort Stevens, the maintenance of which is now being done by the state under a wartime agreement which expires on December 31, 1946. The City of Warrenton is also asking the state to repair and maintain a one-block section of Fifth Street, which is used by log haulers.

The Chief Counsel advised that the old highway route through Warrenton was originally a county road and, in his opinion, still is a county road even though it may be inside the corporate limits of the city. He gave as his opinion that it would be unwise and the establishment of an undesirable precedent for the Commission to assume any obligation for the repair of the route on the assumption that the road was or is a state highway; however, if the Commission considers it advisable to contribute state funds toward the reconstruction of the bridges, then it would be his recommendation that it do so under the statute which authorizes the Commission to use state highway funds for improvement of county roads or city streets.

This matter was discussed at some length, but action thereon was deferred pending discussion with representatives of the city and the county who are to appear before the Commission on the following day. The Engineer and the Chief Counsel were instructed to contact such individuals in advance of the conference and submit to the Commission their recommendation covering the three projects.

The Chief Counsel reported receipt of a number of complaints from the owners of property at Cannon Beach that contractors who are clearing private lots in this vicinity are depositing debris such as tree trunks and roots upon the beach, creating hazards and giving the beach a very unattractive appearance. He advised that he hesitates to recommend that the Commission take any affirmative action in the matter because of the uncertainty of its authority to control the beach area; however, he suggested that he be authorized to notify the guilty parties of the complaints and that they may be held liable in the event someone should be injured or property damaged as a result of the accumulation of debris which they have deposited on the beach area. He also suggested, if such warning letters do not bring about the desired results, that the Commission ask the Legislature to clarify its authority over the beach area, so, if the Legislature sees fit to give the Commission proper authority, it then can take action as may be necessary to control situations of this kind. The Commission authorized the Chief Counsel to send such warning letters to the guilty parties.

The Engineer asked the Commission to confirm the telephonic authority given him for reinstatement of the log-hauling permits of the following

operators whose permits were canceled by the Commission at the previous meeting for overweight violations, refusal to allow their equipment to be weighed, and for "laying out": Wm. L. Hansen, Scottsburg; Wm. Ulam, Milo; C. R. Staples, Cascadia; and Donald R. Smith, Estacada. He read aloud letters received from each of these operators, each of whom promises hereafter to comply with the laws, rules and regulations governing his activities. In view of these letters the Commission, by unanimous vote, confirmed the reinstatement of the permits of these operators on a probationary basis.

The Engineer also asked the Commission to confirm telephonic authority given him to recommend to the Public Utilities Commissioner the granting of a log-hauling permit to Mr. Roy Jackson. He advised that Mr. Jackson is purchasing two trucks under contract from his brother, Beryl Jackson, and has been operating them under his brother's P.U.C. permit, which the Commission canceled at its last meeting because of his operator's refusal to allow his load to be weighed in the vicinity of Scottsburg. It appears that this latter-mentioned truck, which was originally owned by Mr. Beryl Jackson, had been sold by him to a Mr. Geo. W. Hendryx, who was operating it under Mr. Beryl Jackson's P.U.C. permit at the time of the offense, but who later on transferred his operations to the State of Washington. Neither Mr. Beryl Jackson nor Mr. Roy Jackson, he said, had any knowledge of Mr. Hendryx's operations, which were in a different part of the state, so it appears that the penalty assessed against Mr. Roy Jackson is not quite in order, although he should have secured a P.U.C. permit in his own name to operate the two trucks that he is purchasing. He advised that Mr. Roy Jackson has now complied fully with the requirements of the law with respect to permits and recommended confirmation of the telephonic order allowing him to continue his log hauling. The Commission by unanimous vote approved the recommendation insofar as it pertains to the two trucks belonging to Mr. Roy Jackson.

The Engineer also reported overweight violations of the following operators in the Willamina and Grand Ronde district:

Roy Howard, McMinnville	Gross overweight	4,900 pounds
Donald Howard, McMinnville	Gross overweight	8,400 pounds
Fay Howard, McMinnville	Gross overweight	2,700 pounds
	Unit overweight	2,900 pounds
Robert Trenholme, McMinnville	Unit overweight	4,400 pounds
	Concentrated overhang load	27 feet
Galen West, McMinnville	Overweight positive but unknown because Mr. West refused to allow his load to be weighed	

The Engineer advised that, according to the Chief Weighmaster, all of these loads were observed "laying out" west of the Willamina scales at 3:00 p.m. on October 24, evidently waiting for Weighmasters to close their

weighing operations for the day. However, upon being contacted by the Weighmasters all of them consented to the weighing with the above results except Mr. West, who refused to go to the scales and later on by-passed them when the Weighmasters closed the scales after 40 hours of continuous operation. He requested instructions whether or not to cancel the permits of these operators. Following discussion the Commission instructed the Secretary to direct a warning letter to each of the operators reciting their past record and notifying them that a repetition of their offense will result in cancellation of their P.U.C. permits.

The Engineer also reported a "lay out" violation by Mr. Gustave E. Martin, Milwaukie, who operates on the state highway north of Estacada. It appears that Weighmasters observed Mr. Martin's truck "laying out" above the loadometer scale site, and when requested to submit to weighing, Mr. Martin alleged tire trouble but stated that he would drive to the scales as soon as repairs were completed. The Weighmasters returned to the scale pit but when Mr. Martin did not show up, again contacted him and observed him sawing off a portion of the largest log on his truck in order to reduce his gross weight. It later developed, he said, that Mr. Martin did not finish the sawing off of this log, but proceeded to the dump with the original load after the Weighmasters had closed down the weighing operations for the day. The Engineer recommended cancellation of Mr. Martin's permit. The Commission was inclined to impose such penalty on Mr. Martin, however, deferred a definite decision with regard thereto pending a conference with him. The Secretary was instructed to invite Mr. Martin to be present at the next meeting to show cause why his permit should not be canceled.

The Commission had under discussion a report from the Engineer on the necessity to extend the activities of the Highway Department Weighmasters to include the citing of truck operators for any manner of violation of the laws, rules and regulations governing their operations. Chairman Banfield gave as his thought that the Commission previously had given the Weighmasters such authority; however, he said, if the records do not so disclose, then, in his estimation, such authority should be granted at this time. Commissioner Schaupp concurred and thereupon moved that the Weighmasters be authorized and instructed to not only weigh logging trucks but also to weigh any vehicle coming under their observation which they consider to be overloaded and to cite to the justice courts all such that weigh in excess of the legal weight limits and the tolerances authorized by the Highway Commission, and also to cite to such justice courts the operators of all logging equipment and other equipment who are observed by them transporting loads in violation of the laws, rules and regulations. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Engineer submitted a report on overweight violations committed by operators in the employ of the Mitchell Pine Lumber Company, Mitchell, Oregon, in the transportation of lumber over state highways in the vicinity of Prineville. He advised that four of the trucks belonging to this company were recently weighed by State Police officers and were found to have overloads of 10,600 pounds, 12,700 pounds, 11,812 pounds, and 11,812 pounds, respectively.

The operators in each instance, he said, were arrested. He pointed out that the Company is operating the trucks under wartime emergency permits which authorize a limited amount of overweight, but not the amount of their violations, and suggested that it might be advisable to cancel the Company's permits, which would require the operators to limit their loads to the weights specified by statute. The Secretary was instructed to bring these violations to the attention of the Company and to warn the Company that a repetition of the offense will result in the cancellation of its wartime emergency permits.

The Engineer reported on the request of the Deschutes County Advertising Committee for permission to erect rustic type signs on state highway rights of way in the Central Oregon Recreational Area, which matter was first discussed at the previous meeting. He recommended the granting of this request, subject to execution of an agreement whereby the Committee agrees to furnish, install, and maintain the signs at its sole cost and expense subject to Highway Department approval of the design, wording, size, color, and locations. The Chief Counsel questioned the advisability of allowing various agencies to erect signs on state highway property without more control by the Highway Commission. In view of this question, the Commission again deferred action. The matter was referred back to the Engineer and the Chief Counsel for review and report at the next meeting.

The Engineer brought to the attention of the Commission a list of employees of other state departments whose salaries are paid partially with State Highway funds. The Commission indicated that it had no objection to paying a portion of the salaries of each of these employees, of whom there are eight, however, decided that the salaries they receive should be set by the other state agencies without interference from the State Highway Department.

The Engineer reported the cost to construct a turn-around on the Warner Secondary Highway about four miles east of its junction with the Fremont Highway, Lake County, for the benefit of members of the Fremont Highlanders Ski Club. He estimated the cost of constructing such turn-around, with provision for the parking of some 40 cars, at approximately $2,500 and recommended approval of the expenditure as conforming with the Commission's established policy with regard to such matters. The Commission approved the recommendation by unanimous vote.

The Engineer reported on the resolution of Jasper Grange No. 532, Lane County, and a petition from residents and freeholders of Lane County requesting the grading, surfacing, and oiling of the Springfield-Creswell Secondary Highway between Jasper and Pleasant Hill. He advised that this road really doesn't qualify as a state secondary highway because it is little used, and there are so many other roads in Lane County more worthy of improvement. In fact, it has a very low priority rating. He further advised that negotiations have been carried on with the County Court of Lane County with the view that the County Court might be persuaded to take it back into the county road system; however, the negotiations are still in an incomplete status. He recommended, in view thereof, that the request be denied and if the

Commission has any additional money to spend in Lane County that it be spent for the improvement of other secondary highways. The Commission approved the recommendation unanimously.

The Engineer reported results of studies and investigations by the Chief Counsel and himself relative to the rerouting of the Three Mile Lane Secondary Highway through the Catholic School property at the eastern city limits of McMinnville. He advised that the right of way for this project, which involves 0.9 mile of new construction, is estimated to cost about $34,700 based on an appraisal made in September, 1946, by the Right of Way Department. The principal items of expense, he said, involve the Catholic School property — moving and re-establishing the school on a new location, which is estimated to cost approximately $10,000, and acquisition of land upon which to re-establish the school and to locate the portion of the highway through the Cyrus Forell property, which can be acquired for the sum of $9,834, being approximately $500 per lot. As to construction, he estimated the cost of grading work at $49,550, and the cost of a new bridge over the South Yamhill River at $169,000, making a total cost of the project, including engineering, of $253,200. He pointed out that the most important thing to do at the present time is to acquire the new site for the Catholic School and to come to some sort of agreement with the school authorities for the right of way across its property. The matter of constructing the project, he said, could be deferred until some future time, although it is a meritorious project and should be undertaken in the not distant future because of the condition of the existing bridge structure, which is now posted for 12-ton loads. He advised that the former Highway Commission was committed to the project, which would have been constructed before now were it not that Federal funds with which it was to be financed, lapsed.

The Chief Counsel concurred in the statements of the Engineer. He suggested that the Commission could purchase the properties that are required on the assumption that they are needed for highway right of way, and if it developed later that they are not needed for such purpose then the Commission could sell them if it so desired. In that connection he suggested that it would be advisable, where the right of way requires the taking of fractional lots in some instances, to acquire the entire lot, which could be more easily disposed of later if the Commission decided to sell them.

Chairman Banfield gave as his thought that the Highway Commission does not want to obligate itself to construct this project; however, in order to avoid handicapping the Commission later on should the project be approved for construction, it might be wise to arrange for the right of way now provided the proponents of the project fully understand that the Commission is making no commitment or promise whatsoever as to construction. Commissioners Schaupp and Chandler expressed themselves similarly, Commissioner Schaupp adding that if the property is acquired then no buildings should be allowed to be erected on any of it. The Chief Counsel was thereupon authorized to secure an option from Mr. Forell for purchase of the property needed from him, such option to be based on the taking of full lots rather than fractional lots for reasons mentioned by the Chief Counsel.

In the discussion of this matter the Engineer asked the Commission to approve the location survey for this proposed highway revision which extends from the intersection of Third and Kirby Streets, in the City of McMinnville, southeasterly 0.9 mile to a junction with the present secondary highway in F. W. Martin's Addition. He exhibited a map showing the location and explained details thereof. The Commission approved the survey by unanimous vote. (See ahead in this set of minutes for resolution formally adopting this survey along with other location surveys.)

The Commission discussed with the Engineer the bids received earlier in the session for highway construction and took the following action thereon by unanimous vote:

Contracts for the following projects were awarded to the low bidder in each instance:

(1) Grading and oil-mat surfacing the West Unit of the Love Bridge-Black Bridge Section of the Baker-Homestead Highway, Baker County; low bidder, J. C. Papin, Baker.

(2) One mile of landscaping on the Ocean Lake Section of the Oregon Coast Highway, Lincoln County; Knight Pearcy Nursery, Salem, low bidder.

(3) Construction of a rock revetment in the Santiam River at Sanderson Bridge on the Albany-Lyons Secondary Highway, in Linn County; Dobyns and Webb, Salem, low bidder.

The bid received for the grading and paving of the Jantzen Beach Section of the Pacific Highway, in Multnomah County, was referred to the Engineer and the Chief Counsel with authority to award the contract to the only bidder when certain conditions have been satisfied, including the clearing up of right of way matters and an agreement with the Portland General Electric Company with respect to power poles. The bids received for the construction of the Tutuilla Section of the Pendleton-John Day Highway, Umatilla County, were referred to the Engineer with authority to award the contract to the low bidder when Umatilla County has agreed to the abandonment of the old highway right of way.

The Commission rejected all bids received for the grading and oil-mat surfacing of the Cove-Union Section of the Cove Secondary Highway in Union County.

The Engineer reported on the request of the City of Newberg for the rerouting of the Hillsboro-Silverton Secondary Highway through this town via 4th and College Streets. He advised that this is a desirable change since it provides a direct route through Newberg for this highway and will require maintenance of only three more blocks of pavement. He estimated the cost to provide a satisfactory improvement on this route at approximately $6,000, of which amount, he said, the city has offered to contribute the sum of $2,500 and has also agreed to construct curbs and sidewalks. He recommended approval

of the project. The Commission approved the recommendation by unanimous vote and ordered that the matter be covered by an appropriate agreement between the city and the state.

In conformity with instructions given by the Commission at the previous meeting the Engineer reported the need of repairs to the large residence building located in Cape Arago State Park, Coos County. He advised that this building is two stories high with an attic and is approximately 25 feet wide and 200 feet long. Portions of the building, he said, have deteriorated and repairs necessary to prevent further deterioration consist of waterproofing on the ocean side of the building; waterproofing the center brick chimney; replacement of the decayed house framing; patching plaster on walls and ceiling where damaged by rain and leakage; replacement of gutters, down spouts, broken windows, and outside doors; repairs to the furnace and plumbing fixtures; and spot painting of woodwork, all of which is estimated to cost about $1,655. Such repair work, he said, does not include the reconditioning of the building so that it could be used by the public or leased out to a concessionaire, so should it be decided to operate a concession at this place, additional work, which is estimated to cost about $14,000, would be needed. It was the thought of the Commission that the repair work should be limited to that immediately necessary in order to keep the building in good condition, and that a decision as to the future use of the building should be deferred until later. Motion was thereupon made by Commissioner Schaupp that the repair work immediately necessary, and estimated by the Engineer to cost about $1,655, be approved. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Chief Counsel reported the status of the proposed agreement with Marion and Polk Counties concerning the construction of a bridge over the Willamette River at Independence and explained the contents thereof. It appeared to the Commission that the agreement has been prepared in conformity with previous understandings, whereupon the Commission approved it by unanimous vote. (The agreement was signed by the Commission on the following day.)

At 4:30 p.m. Chairman Banfield announced the awards of contracts, as follows, bids for which were received at 2:00 p.m.:

"Grading and oil-mat surfacing the West Unit of the Love Bridge-Black Bridge Section of the Baker-Homestead Highway, in Baker County. J. C. Papin, Baker, submitted the low bid for this job in the amount of $332,918. E. C. Hall Co., Portland, submitted the next low bid in the amount of $339,273. There were two higher bidders. The Commission has awarded the contract to the low bidder, J. C. Papin.

"Landscaping the Ocean Lake Section of the Oregon Coast Highway, in Lincoln County. The low bid for this project was submitted by Knight Pearcy Nursery, Salem, at $4,661.31. Miner & Co., Portland, submitted the next low bid at $6,220.54. There were two higher bidders. The Commission has awarded the contract to the low bidder, Knight Pearcy Nursery.

"Construction of a rock revetment in the Santiam River at Sanderson Bridge on the Albany-Lyons Secondary Highway, in Linn County. Dobyns & Webb, Salem, submitted the low bid for this project in the amount of $13,700. The second low bid was submitted by Stevenson Construction Co., Salem, in the amount of $13,750. There were four higher bidders. The Commission has awarded this contract to the low bidder, Dobyns & Webb.

"Pavement widening and grading and paving of connecting roads on the Jantzen Beach Section of the Pacific Highway, Multnomah County. The Commission received only one bid for this project being that of Edlefsen-Weygandt Co., Portland, at $117,813.30. The Commission has referred the bid to the Engineer and the Chief Counsel with authority to award the contract to the bidder when certain conditions have been satisfied.

"Grading and oil-mat surfacing and construction of a bridge on the Tutuilla Section of the Pendleton-John Day Highway, in Umatilla County. The Commission received three bids for this project, the low one being that of John A. Logan, Portland, at $73,960. The second low bid was submitted by Vernie Jarl, Gresham, at $76,560. The third bid was submitted by Porter W. Yett, Portland, at $92,414. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, John A. Logan, when certain conditions have been satisfied.

"Grading and oil-mat surfacing on the Cove-Union Section of the Cove Secondary Highway, Union County. E. C. Hall Co., Portland, submitted the low bid for this work in the amount of $201,622. Morrison-Knudsen Co., Boise, Idaho, submitted the only other bid in the amount of $208,472. The Commission has rejected both bids as being too high."

The Commission had under consideration the adoption of a Biennial Budget Estimate covering the period July 1, 1947, to June 30, 1949, for inclusion in the general state budget prepared by the State Budget Director for submission to the 1947 Legislative Assembly. The Engineer presented a form of budget for this purpose. Following careful consideration of each of the items contained therein the Commission approved the budget as prepared by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler. Two copies of the budget were thereupon signed by the Commission. (See copy of approved budget in general files for details.)

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the same room.

Portland, Oregon
October 29, 1946

The meeting of the State Highway Commission reconvened at 9:00 a.m.

OCT 9 1946

in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m.:

THE DALLES-CALIFORNIA AND FREMONT HIGHWAYS IN DESCHUTES AND KLAMATH COUNTIES
LAPINE ROCK PRODUCTION PROJECT

Oscar E. Joelson, Eugene *	$ 45,000.00
A. H. Saxton & Son, Corvallis	48,000.00

* Bidder will accept only one project

JOHN DAY-BURNS HIGHWAY IN GRANT COUNTY
CANYON CITY-SODA MOUNTAIN ROCK PRODUCTION PROJECT

Jack R. Taggart Co., Salem	$ 30,000.00

KIMBERLY-LONG CREEK SECONDARY HIGHWAY IN GRANT COUNTY
KIMBERLY-DRY CREEK SECTION

J. A. Terteling & Sons, Inc., Boise, Idaho *	$ 38,712.50
Sound Constr. & Engr. Co., Seattle, Wn. *	41,836.00
Vernie Jarl, Gresham	43,722.00
A. H. Saxton & Son, Corvallis	47,229.00
O. C. Yocom Co., McMinnville *	48,115.00
E. C. Hall Co., Portland *	49,197.00
Homer G. Johnson, Portland	65,992.00

* Bidder will not accept award of this project alone

KIMBERLY-LONG CREEK SECONDARY HIGHWAY IN GRANT COUNTY
DRY CREEK-MONUMENT SECTION

Sound Constr. & Engr. Co., Seattle, Wn. *	$219,456.75
O. C. Yocom Co., McMinnville *	221,477.50
E. C. Hall Co., Portland *	246,663.00
J. A. Terteling & Sons, Inc., Boise, Idaho *	274,554.00
Natt McDougall Co., Portland	292,451.25

* Bidder will accept award of this project only in combination with award of Kimberly-Dry Creek Project.

OCT 9 1940

COMBINATION BIDS FOR ABOVE TWO PROJECTS

	(1)	(2)	Reduc.	Comb. Bid
Sound Constr. & Engr. Co.	$ 41,836.00	$219,456.75	None	$261,292.75
O. C. Yocom Co.	48,115.00	221,477.50	None	269,592.50
E. C. Hall Co.	49,197.00	246,663.00	None	295,860.00
J. A. Terteling & Sons, Inc.	38,712.50	274,554.00	None	313,266.50

JOHN DAY-BURNS HIGHWAY IN HARNEY COUNTY
NORTH UNIT, GRANT COUNTY LINE-CROW FLAT SECTION

E. C. Hall Co., Portland $290,143.00

SHERARS BRIDGE SECONDARY HIGHWAY IN SHERMAN COUNTY
CONSTRUCT 189-FOOT CONCRETE BRIDGE OVER BUCK HOLLOW CREEK

No bids received

FULTON CANYON-WASCO SECONDARY HIGHWAY IN SHERMAN AND WASCO COUNTIES
NORTH UNIT, FULTON CANYON SECTION

Vernie Jarl, Gresham	$ 65,973.00
A. H. Saxton & Son, Corvallis	70,920.00
Porter W. Yett, Portland	73,333.50
Homer G. Johnson, Portland	80,884.00

SUNSET HIGHWAY IN WASHINGTON COUNTY
NORTH PLAINS - BARNES ROAD SECTION

	Using Asphalt	Using Tar
Porter W. Yett, Portland	$739,472.00	- - - - - -
Babler Bros., Portland	849,528.00	- - - - - -
J.N. & M.J. Conley, Portland	897,264.75	- - - - - -
E. C. Hall Co., Portland	909,910.75	- - - - - -
Edwin C. Gerber, Oregon City	910,143.00	- - - - - -
McNutt Bros., Eugene	948,180.50	- - - - - -
Parker-Schram Co., Portland	982,237.00	$983,337.00

JOHN DAY HIGHWAY IN WHEELER COUNTY
SERVICE CREEK-KIMBERLY ROCK PRODUCTION PROJECT

A. H. Saxton & Son, Corvallis	$23,200.00
Vernie Jarl, Gresham	23,200.00
O. C. Yocom Co., McMinnville *	23,840.00
Oscar K. Joelson, Eugene **	24,000.00
J. A. Terteling & Sons, Inc., Boise, Idaho *	24,000.00
Jack R. Taggart Co., Salem	24,800.00

* Bidder will accept award of this project only in combination with the Kimberly-Dry Creek and Dry Creek-Monument Projects.
** Bidder will accept only one project.

SEP 9 1946

Mr. Cecil J. Hammond, log hauler, Roseburg, was present at the request of the Commission regarding the reinstatement of his log-hauling permit, which was canceled by the Commission on September 23, 1946, for transporting over the Elkton-Sutherlin Secondary Highway a load of logs weighing 39,000 pounds in excess of the weight allowed, and being 14 feet overall in height, and 10 feet wide. Mr. Hammond acknowledged his guilt, however, stated that he did not realize that his load was so violently in excess of the prescribed limits. Chairman Banfield admonished Mr. Hammond for bringing a load of such size and weight onto any highway, and advised that it is the most flagrant violation ever to come to the attention of the Highway Commission. He pointed out the seriousness of the offense and gave as his feeling that it would be a just penalty if Mr. Hammond were not allowed to resume his operations for at least a month. Commissioner Schaupp stated that it is difficult to reconcile such conduct of an operator who has had as many years experience truck-hauling logs as has Mr. Hammond. Commissioner Chandler pointed out that it is the responsibility of the State Highway Commission to protect highway surfaces for general public use, and, in order to provide such protection, it must take action accordingly.

Mr. Hammond pleaded for the immediate reinstatement of his permit, advising that hereafter he would comply strictly with the laws, rules and regulations in every respect; otherwise, he said, if he had to wait a month, he would be forced to sell his equipment, because he could not stand such a loss in income. Following further discussion Mr. Hammond was told to reappear before the Commission at 2:00 p.m. when he would be given an answer. (The Commission later approved the reinstatement of Mr. Hammond's permit on the condition that he will furnish to the Commission a written statement assuring the Commission of his willingness hereafter to comply with all the laws, rules and regulations governing his operations, and with the understanding that his permit will be canceled permanently if the offense is repeated. See additional paragraph ahead.)

Mr. Ronald Burr, log hauler, Coquille, appeared before the Commission regarding the reinstatement of his log-hauling permit, which also was canceled on September 23, 1946, for two overweight violations on the Coos Bay-Roseburg Highway, one of which involved a load weighing 88,400 pounds and another weighing 97,980 pounds. Chairman Banfield explained the seriousness of the offenses and inquired if Mr. Burr knows reason why his permit should not be canceled permanently, it appearing to the Commission that the violations were deliberate. He also inquired, if the permit were reinstated, what assurance Mr. Burr would give the Commission that the offense will not be repeated. Mr. Burr admitted the overloads and assumed full responsibility for them notwithstanding that he was not present when they occurred. He explained that the drivers of the trucks previously had been operating over roads where the loads were not restricted, and permitted the overloads in this instance as a matter of habit in order to make a good showing. He agreed hereafter to comply with the requirements in so far as is possible. Chairman Banfield advised that the Highway Commission is reluctant to put any log hauler out of business or to impose a severe penalty unless that is necessary in order to secure compliance with the regulations; also that the Commission would hold

Mr. Burr personally responsible for the conduct of his drivers, so it is entirely up to him whether or not he continues operating. Following further discussion Mr. Burr was told to return at 2:00 p.m. to receive his answer. (The Commission later approved the reinstatement of Mr. Burr's permit on the same basis that the reinstatement of Mr. Hammond's permit was approved. See ahead for additional paragraph.)

Mr. Jon R. Titcomb, Manager of the Springfield branch of the Weyerhaeuser Timber Company, and Mr. Walter Ryan, Engineer, were present to discuss a proposed logging railroad grade crossing of the Pacific Highway in the town of Sutherlin, Douglas County. Mr. Titcomb explained that his Company is in the process of opening up a new large-scale project in the Calapooya Creek area which it plans to operate on a sustained yield basis. The timber, he said, will be transported by rail to Sutherlin where the railroad will cross the Pacific Highway on a location selected by the Coos Bay and Eastern Railroad in 1915 and approved by the former State Railroad Commission. He presented a map showing the location of the proposed crossing and explained that their purpose in coming before the Commission at this time is to secure the Commission's approval of their plan so no objections will be interposed when the matter comes up for hearing before the Public Utilities Commissioner.

Mr. Titcomb gave as their understanding that the State Highway Commission has selected a new route for the Pacific Highway through Sutherlin and that the Government is planning to deepen Sutherlin Creek at this point and provide a new bridge. He expressed a desire to know the detailed plans of the Highway Commission in this respect in order that their operations might be designed to fit in with the proposed construction work. He felt that the expense of constructing a grade separation at the Pacific Highway would be too great for the traffic on the railroad to bear, as there would be only one round trip each day at low speed, which, in their estimation, would not endanger the public to any great extent.

The Engineer advised that the traffic on the Pacific Highway at this point averages approximately 3,000 vehicles per day with a maximum of approximately 5,500 vehicles per day; also, that the sight distance for southbound traffic 300 feet in advance of the crossing would be approximately 150 feet, while for northbound traffic 300 feet south of the crossing the sight distance would be approximately 170 feet. He also stated that plans for the proposed realignment of the Pacific Highway through this area are far from complete, but in general, the highway will remain in its present location. He predicted that it would take 25 years to complete the highway revision. The Engineer recommended that the Highway Commission resist the grade crossing when the matter comes before the Public Utilities Commissioner, because of the hazard that it would create to highway traffic, and suggested that another location could be found that would better suit a separation structure.

Mr. Titcomb asked the Commission to complete the survey for the new highway location and advised that the Company would then make its plans in harmony therewith. The Commission refused to authorize such survey now, however, upon the suggestion of Chairman Banfield, instructed the Engineer to investigate the matter in company with Mr. Titcomb and to report back first-hand information.

A delegation from Waldport, representing the Waldport Garden Club and consisting of Mrs. Daisy Overlander; Mrs. Ethel Birrel, President; and Mrs. Alice Johnson, was present and urged the Commission to purchase for park purposes a 32-acre tract of timber land situate on the west side of the Oregon Coast Highway about three miles north of Waldport. Mrs. Overlander headed the group. She explained the purpose of their visit. Chairman Banfield advised that this matter had previously been brought to the attention of the Commission by the State Parks Superintendent who considers that $15,000, the price that the owner of the property, Mr. Johnson, is asking for it, is exorbitant; moreover, the property would not fit into the state park picture unless the Commission also acquired the Howe tract, which abuts on the Johnson tract on the south and contains a number of small lakes. The Commission refused the offer, he said, on the basis of the Parks Superintendent's recommendation.

Mrs. Overlander expressed surprise that there were no lakes situate on the Johnson property, it being their understanding that the property does contain a lake which provides the only warm water swimming hole in this area and is very popular from that standpoint. She gave as her thought that the establishment of a state park on this property is fully justified from this point alone and advised that they would not have asked the Highway Commission to purchase it were they not certain that this swimming hole is located on the property. She also urged the Commission to acquire the property in order to preserve the natural beauty and to avoid its being sold in small parcels and developed for commercial purposes. She offered the suggestion that the Commission could acquire the property now and develop it as a state park later on when funds are available to finance the work.

The matter was discussed at some length, and as a result thereof, the Engineer was instructed by the Commission to have the State Parks Superintendent make a further check as to the location of the lakes and to prepare a written report to the Commission covering the entire matter. A copy of the report is to be sent to the Waldport Garden Club.

The Engineer brought to the Commission's attention the Highway Department Budget that was adopted for the calendar year 1946 based on the assumption that there would be $35,372,000 available. He advised that with the exception of two items the amounts provided for expenditure are satisfactory, however, it appears necessary to add $20,000 to the amount previously set up for administration and general supervision, to cover unanticipated expenses such as the hiring of additional employees and salary increases, and to provide an additional $20,000 for miscellaneous general operating expense to pay extra costs incident to the administration of the Civil Service Law. Following a lengthy discussion of this matter motion was made by Commissioner Schaupp that both increases be approved. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Secretary reported that a delegation from Warrenton and Clatsop County, consisting of County Judge Guy Boyington; Thomas T. Chave, Jr., City Attorney; and E. R. Baldwin, City Manager, was present to discuss with the Com-

mission the maintenance of the old state highway route through the City of Warrenton, future maintenance of the Ft. Stevens Road, and the maintenance of a one-block section of Fifth Street in Warrenton that is used by log haulers. The Engineer and the Chief Counsel were instructed to discuss these matters with the delegation prior to their conference with the Commission and to ascertain if a satisfactory compromise agreement can be reached. This was done and the following report was rendered by the Engineer: He advised that this delegation is primarily interested in the state taking over the old highway route and the Ft. Stevens Road, and will withdraw its request for the improvement of Fifth Street if the Commission will place the other two sections on the state highway system. He pointed out that the old highway route contains two bridges that are in a bad state of repair and which the city will close entirely to public use unless the state will pay the repair expense, which he estimated would amount to about $15,000. He also estimated the cost to recondition the paved surface over the balance of this section at approximately $2,500. He recommended approval of the proposition and that both sections be placed on the state secondary highway system for state maintenance. As justification therefor, the Engineer advised that a large percentage of the traffic that uses both sections is state-wide in character, so it appears that it is the state's obligation to maintain them. The Chief Counsel concurred in the Engineer's recommendation. Following discussion of the matter Commissioner Schaupp expressed his approval of the recommendation under existing circumstances. Commissioner Chandler gave as his thought that that is the only thing to do. Chairman Banfield expressed himself similarly, making the decision unanimous, subject, however, to the adoption by the county and the city of appropriate resolutions relative thereto. Such resolutions are to be presented to the Highway Commission and if considered satisfactory then the Commission will adopt an appropriate resolution placing both roads on the state highway system. The Chief Counsel was instructed to convey this information to the members of the delegation. The delegation did not confer with the Commission.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

Chairman Banfield and Commissioner Schaupp approved the minutes of the Commission meeting held on September 23 and 24, 1946, subject to approval by former Highway Commissioner M. R. Chessman, who was present at such meeting. (Mr. Chessman approved and signed the minutes later.)

Messrs. William A. Bowes, Commissioner of Public Works; Fred T. Fowler, Traffic Engineer; and Ben R. Morrow, City Engineer, Portland, appeared before the Commission regarding three traffic problems that involve state highways, as follows:

(1) Designation of Jefferson Street and Columbia Street as one-way traffic streets between Harbor Drive and 14th Street,

(2) Installation of traffic signals and synchronization of the same for a 40-miles-per-hour speed limit along Barbur Boulevard from Hamilton Street south about three miles,

(3) Installation of traffic signals and construction of traffic separators along McLaughlin Boulevard between Ross Island Bridge and the south city limits of Portland.

Commissioner Bowes headed the group. Regarding the first of these projects, he pointed out that Jefferson Street west of 14th Street to a connection with Canyon Road is now sufficiently wide to allow for two-way traffic, but easterly from 14th Street it is narrow and, owing to the large volume of traffic and commercial developments along this section, the accident rate is high. He urged the immediate designation of Jefferson Street as a one-way street for westbound traffic and Columbia Street as a one-way street for eastbound traffic east of the 14th Street intersection, and the construction of a suitable connection between the two at 14th Street, such arrangement to be of a temporary nature until a traffic circle interchange can be constructed to connect both streets at 18th Street, when the temporary connection at 14th Street will be abandoned. A map was exhibited showing the suggested lay-out. The State Highway Engineer endorsed the plan, which he estimated would cost between $30,000 and $50,000, including a channelized intersection at 14th Street. He recommended approval of the project on the basis that the city will pay 50 percent of the costs involved.

Regarding the second project, Commissioner Bowes pointed out that Barbur Boulevard carries a large volume of fast-moving traffic and that at present there is unlimited access from side streets without signal protection. He urged approval of the installation of appropriate signals at certain points, such as Slavin Road and several school crossings, and construction of a center line divider between opposing lanes of traffic in order to eliminate left-hand turns at all points except where the signals have been installed. He also suggested the synchronizing of the signals for a 40-miles-per-hour speed limit. Chairman Banfield expressed the Commission's desire to cooperate with the cities in their efforts to reduce traffic hazards and gave as his feeling that the state might cooperate in this instance on a 50-50 basis if the Commission is convinced that the system suggested will give satisfactory results. Mr. Fowler advised that the plan as suggested should be very effective, inasmuch as cross traffic would be eliminated entirely except at the intersections where traffic signals are installed; moreover, it would eliminate the necessity for the maintenance of police officers at certain intersections, which are now required. Chairman Banfield expressed a belief that the Commission should cooperate with the city on this project to the extent of adding such signals and lights as are necessary and the construction of dividers to control traffic at intersections and suggested, before taking definite action to that end, a joint investigation by the State Highway Engineer and the Portland Traffic Engineer, and the filing of a detailed report thereon. The suggestion was approved, and it was so ordered.

Concerning the third project, Commissioner Bowes stated that the city's Traffic Department has designed a system of synchronized signal installation along McLaughlin Boulevard extending from the Ross Island Bridge to the south city limits, which is estimated to cost approximately $250,000. Traffic along this thoroughfare, he said, is also very heavy and, according to

the Traffic Engineer's studies, the plan suggested is the only method that can be devised to reduce traffic hazards. The plan, he said, does not limit itself to stage construction, so the entire section must be revised in order to permit a satisfactory synchronization of the signals. Chairman Banfield expressed objection to spending such a large sum of money for this project and inquired what might be done to eliminate the hazards by an expenditure of $50,000. He was informed by Commissioner Bowes that the entire project would have to be undertaken at one time or none of it considered. The State Highway Engineer advised that traffic along McLaughlin Boulevard has increased enormously in the last two years, the increase being far in excess of that anticipated, and that such volume of traffic, when applied to the standard signal installation formula, indicates a definite need for a system of synchronized signals.

All three projects were discussed at considerable length with the result that the Commission, by unanimous vote, definitely approved the temporary plan for designation of Jefferson Street and Columbia Street east of 14th Street as one-way traffic streets but deferred final action on the other two projects pending a detailed report from the Engineer following a joint investigation with Traffic Engineer Fowler of the City of Portland, such action being taken subject to the condition that the state's share of the entire expense shall not exceed 50 percent of the total and in no event shall it exceed $75,000 for the immediate undertaking. Commissioner Bowes stated definitely that the City of Portland would pay 50 percent of the cost of the Jefferson-Columbia Street Project and would contribute to the extent of its ability to the other project but he could not state definitely what that would be without first consulting with the City Council.

Mr. Cecil J. Hammond reappeared before the Commission at this time, as requested, to receive the answer to his request for the reinstatement of his log-hauling permit. Chairman Banfield reiterated that the Highway Commission does not wish to rule any log hauler out of business, but insists on compliance with the rules and regulations. He inquired what cooperation will Mr. Hammond give the Commission if it reinstates his hauling privileges. Mr. Hammond assured the Commission that he would not again commit a violation. With this assurance, Chairman Banfield stated that the Commission had discussed his case and is agreeable to restoring Mr. Hammond's permit if he will present a letter to the Engineer stating his willingness to abide by the laws, rules and regulations and that he will not again violate them. He added that a repetition of the offense will result in the permanent cancellation of his permit. Commissioners Schaupp and Chandler confirmed Chairman Banfield's statement. The Secretary was thereupon authorized to recommend to the Public Utilities Commissioner the reinstatement of Mr. Hammond's permit when he has furnished the letter mentioned by the Chairman.

Mr. Ronald Burr reappeared before the Commission to receive an answer to his request for the reinstatement of his log-hauling permit. Chairman Banfield inquired what assurance Mr. Burr can give the Commission that he will not again violate the laws, rules and regulations governing his operations if the Commission will reinstate his permit. He advised that the Com-

mission cares not to put any log hauler out of business and when the permit of an operator is canceled the operator can blame no one but himself because the responsibility is his own and he must assume it, not only as covering his personal conduct, but also that of the men who operate his equipment. Mr. Burr assured the Commission that hereafter he would be more strict in giving orders to his drivers and that, insofar as he possibly could, he would abide by the rules and regulations.

Mr. Burr inquired whether or not the Commission would grant a hearing before putting him out of business for an additional offense and was informed by Chairman Banfield that the Commission cannot put up a defense in his behalf, so it would be to his advantage to keep his loads within the requirements. Commissioners Schaupp and Chandler concurred, Commissioner Chandler adding that it is Mr. Burr's responsibility to see that his loads come within the requirements and that the loaders do not overload his equipment. Chairman Banfield thereupon informed Mr. Burr that the Commission has agreed to restore his permit if he will send in a letter assuring the Commission that he will not again violate the laws, rules and regulations governing his operations. Such decision is being made, he added, with the understanding that a repetition of the offense will result in the permanent cancellation of Mr. Burr's permit. Commissioners Schaupp and Chandler confirmed the statement.

...

The Engineer reported on the need to increase the amount approved in the Postwar Construction Program for financing completion of the Sunset Highway between Davies and Portland. He stated that through error the original estimate for this project was made on the basis of 1940 prices, whereas, in all other cases 1940 prices were increased by 50 percent to meet present-day conditions; so, as a consequence, there is needed to complete this project an additional amount of $600,000, of which amount $100,000 represents the cost of the proposed traffic interchange in the Commonwealth Inc. subdivision. He expressed regrets that the oversight occured, however, suggested, in view of the fact that the Commission is committed to the completion of the Sunset Highway, the continuance of the program as presently planned and that the overrun be paid by the state with contingency funds. Commissioner Schaupp pointed out if such suggestion were followed it would mean the unbalancing of the program in that the Commission would be spending in this district about $600,000 more than was originally planned; however, he favored proceeding on such basis, because of the Commission's commitment to the completion of the Sunset Highway improvement, with the understanding that the overexpenditure would be adjusted in the formulation of future programs. Chairman Banfield expressed himself similarly. Following considerable discussion the Commission approved the Engineer's suggestion, subject to the condition that adjustments are to be made in future construction programs to provide a balance of funds throughout the state to take care of the overexpenditure in this instance.

The Commission discussed with the Engineer the bids received at the morning session for construction work and took the following action thereon by unanimous vote:

The contract for the Lapine Rock Production Project on the Dalles-California and Fremont Highways, in Deschutes and Klamath Counties, was awarded to the low bidder, Oscar E. Joelson.

The bid received for the Canyon City-Soda Mountain Rock Production Project on the John Day-Burns Highway, in Grant County, was rejected.

Contract for surfacing and oiling the Kimberly-Dry Creek Section of the Kimberly-Long Creek Secondary Highway, in Grant County, was awarded to Sound Construction and Engineering Company on the basis of its combination bid for this project and for grading and oil-mat surfacing the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, in Grant County. Grading and oil-mat surfacing the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, in Grant County. The Commission awarded this contract to Sound Construction and Engineering Company, the low bidder, on the basis of its combination bid for this project and the Kimberly-Dry Creek Project.

The Commission rejected the bid of E. C. Hall Co., being the only bid received for the grading and oil-mat surfacing of the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County.

No bids were received by the Commission for construction of a concrete bridge on the Sherars Bridge Secondary Highway east of Tygh Valley, in Sherman County.

The Commission awarded to Vernie Jarl the contract for the grading and oil-mat surfacing the North Unit of the Fulton Canyon Section of the Fulton Canyon-Wasco Secondary Highway, in Sherman and Wasco Counties. The contract for paving and bridge construction on the North Plains-Barnes Road Section of the Sunset Highway, in Washington County, was awarded to the low bidder, Porter W. Yett, Portland. The Commission decided to award the contract for the Service Creek-Kimberly Rock Production Project on the John Day Highway, in Wheeler County, to one of the two contractors who submitted identical low bids for the job and to select the successful bidder by lot, publicly.

At 3:30 p. m. Chairman Banfield publicly announced the award of contracts, as follows:

"Lapine Rock Production Project on The Dalles-California and Fremont Highways, in Deschutes and Klamath Counties. The Commission received two bids for this work, the low one being that of Oscar E. Joelson, Eugene, in the amount of $45,000. The other bid was submitted by A. H. Saxton & Son, Corvallis, at $48,000. The Commission has awarded the contract to the low bidder, Oscar E. Joelson.

"Canyon City-Soda Mountain Rock Production Project on the John Day-Burns Highway, in Grant County. The Commission received only one bid for

this project, being that of Jack R. Taggart, Salem, at $30,000. The bid has been rejected.

"Surfacing and oiling the Kimberly-Dry Creek Section of the Kimberly-Long Creek Secondary Highway, in Grant County. The low bid for this job was submitted by J. A. Terteling & Sons, Inc., Boise, Idaho, at $38,712.50. This bidder stated that it would not accept the award of this contract unless also awarded the contract for the grading and oiling of the Dry Creek-Monument Section of this highway. The next low bidder was Sound Construction and Engineering Company, Seattle, at $41,836. This bidder also stated that it would not accept the award of this contract unless also awarded the contract for the Dry Creek-Monument Project. There were five higher bidders. A tabulation of the bids for this project and for the Dry Creek-Monument Project reveals that the combination bid for both projects submitted by Sound Construction and Engineering Company to be low. In view thereof, the Commission has awarded both contracts to that company on the basis of its combination bid price of $261,292.75.

"Grading and oil-mat surfacing the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, in Grant County. The low bidder for this project was Sound Construction and Engineering Company, of Seattle, at $219,456.75. The contractor qualified its bid by stating it would accept the award of this contract only in the event that it was also awarded the contract for the Kimberly-Dry Creek Project. The next low bid was submitted by O. C. Yocom Co., McMinnville, at $221,477.50. This bidder also stated that he would not accept the award of this contract unless also awarded the contract for the Kimberly-Dry Creek Project. There were three higher bidders. The Commission has awarded the contract to the low bidder, Sound Construction and Engineering Co., on its combination bid for both projects.

"Grading and oil-mat surfacing the North Unit, Grant County Line-Crow Flat Section of the John Day-Burns Highway, in Harney County. The Commission received only one bid for this project, being that of E. C. Hall Co., Portland, at $290,143. The bid has been rejected.

"Construction of a concrete bridge on the Sherars Bridge Secondary Highway eight miles east of Tygh Valley, in Sherman County. The Commission received no bids for this job.

"Grading and oil-mat surfacing the North Unit of the Fulton Canyon Section of the Fulton Canyon-Wasco Secondary Highway, in Sherman and Wasco Counties. Vernie Jarl, Gresham, submitted the low bid for this job at $65,973. The next low bid was submitted by A. H. Saxton & Son, Corvallis, at $70,920. There were two higher bidders. The contract has been awarded to the low bidder, Vernie Jarl.

"Paving and construction of four bridges on the North Plains-Barnes Road Section of the Sunset Highway, in Washington County. The low bidder was Porter W. Yett, Portland, at $739,472, based on the use of asphalt.

The next low bidder was Babler Bros., Portland, at $49,528, based on the use of asphalt. There were five higher bidders. The Commission has awarded the contract to the low bidder, Porter W. Yett.

"Service Creek-Kimberly Rock Production Project on the John Day Highway, in Wheeler County. A. H. Saxton & Son, Corvallis, and Vernie Jarl, Gresham, submitted identical low bids of $23,200 for this project. The next low bid was submitted by O. C. Yocom Co., McMinnville, at $23,840. There were three higher bidders. The Commission has decided to award this contract to one of the two low bidders by lot."

The names of both contractors were thereupon placed in a hat and one was publicly withdrawn by Mr. Ralph Watson, Staff Writer for the Oregon Journal, being that of A. H. Saxton & Son. Chairman Banfield thereupon announced the award of the contract to A. H. Saxton & Son.

The matter of appointing Mr. Merle R. Chessman, former State Highway Commissioner, a member of the Advisory Board on Travel and Information Matters as suggested by that Board was discussed by the Commission. The Commission indicated a favorable attitude with respect thereto but deferred a definite decision pending information from the Chief Counsel whether or not there is a limitation placed on the number of individuals on the Board, either by law or by action of the former Highway Commission. The Chief Counsel was instructed to look into the matter and report his findings.

The Chief Counsel again brought up for discussion the question of penalizing the Mountain States Power Company and Mr. F. D. Errion for destroying oak trees growing on state highway rights of way. He advised that he has given this matter considerable thought since it was first discussed on the previous day and now is ready to recommend that Mr. Errion be prosecuted to the full extent of the law, but that the offense by the Mountain States Power Company be overlooked in this instance because it is questionable that any action the Commission might take would reach the Company, but rather might be limited to action against the Company's employees; moreover, there is a question, if the matter were taken to court, whether or not a decision favorable to the Commission would be handed down in view of the allegation of the owner of the adjoining property that the roots of this oak tree were destroying his filbert orchard. The Commission adopted the Chief Counsel's recommendations by unanimous vote and instructed him to send an appropriate notification to each of the parties.

A letter was presented from Mr. Asa W. Battles, County Judge, Crook County, in which the Commission was requested to construct a connecting road between the old and new routes of the Madras-Prineville Secondary Highway about three miles northwest of Prineville, to serve the Pine Products Mill after the old road has been abandoned as a state highway. Judge Battles states that the present road between the Pine Products Mill and Prineville is in bad condition and that the county is unable to maintain it in a condition that will serve the mill satisfactorily. The Engineer advised that the road pro-

posed by Judge Battles is about 0.65 mile in length. He estimated that it would cost about $45,000 to construct it because it crosses the McKay Creek and Ochoco Creek bottoms where in the past the Highway Department has encountered severe drainage problems. He recommended that the request be denied because it does not appear to him that the project has sufficient merit to justify the expense, particularly in view of the fact that existing roads could be improved at approximately one-half the cost of the new road and, in addition, would serve another sawmill. The Commission approved the recommendation unanimously, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

A letter was presented from Fort Klamath Grange in which the Commission is asked to give consideration in the formulation of its next three-year building program to the improvement of the West Side Klamath Lake Secondary Highway and the connecting road leading to the Lake of the Woods. The Secretary was instructed to inform the Grange that the Commission will be pleased to consider the project, but will do so without any obligation to make any commitment or promise relative to it.

The Secretary presented a request from School District No. 55, Linn County, for sidewalk construction along the Santiam Highway at Sweet Home for the benefit and safety of school children; also, a letter from The Westdale Mothers' Club, Beaverton, requesting sidewalk construction along the Bertha-Beaverton Highway from Westdale Addition to Beaverton. The Engineer was instructed to include these projects in the list of sidewalk projects for consideration by the Commission in the adoption of its Minor Betterment Budget for 1947.

The Engineer reported that the Cities of Condon, Jacksonville, Summerville, and Turner have fulfilled the legal requirements with respect to the expenditure of 1945 State Tax Street Funds that they received in 1946 and that the plans of each have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:
>
> | | |
> |---|---|
> | Condon | $1,285.72 |
> | Jacksonville | 1,143.03 |
> | Summerville | 120.16 |
> | Turner | 621.83 |
>
> AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, con-

formed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Condon - 3rd Street, Lincoln Street, Church Street, Oregon Street, Trimble Street, Pennoyer Street

Jacksonville - 3rd Street, 4th Street, Oregon Street, Elm Street, 2nd Street, Spruce Street, "C" Street, "D" Street, "E" Street, "L" Street

Summerville - Main Street, Patton Street, Jefferson Street, First Street, Second Street, Third Street, Fourth Street

Turner - "B" Street, 5th Street, east end of Sunnyside Road (two blocks)

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 29th day of October, 1946.

The Engineer also reported that the town of Bonanza has fulfilled the legal requirements with respect to the expenditure of 1944 State Tax Street Funds that it received in 1945 and that the plans for the proposed improvements to be financed with such funds have been examined and found satisfactory. He recommended approval of the same by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by the Oregon State Highway Commission apportioned to the city and/or town hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the sum or amount set opposite the name of said city or town:

Bonanza - - - - - - - - - - - - - - - - - $ 325.68

AND, WHEREAS, said city or town has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify it for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named city or town:

Bonanza - North Street, Market Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named city or town hereby are approved.

3. That the action taken by said city or town, as evidenced by appropriate resolutions adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city or town so as to qualify said city or town to receive and use the funds to it apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in said city or town a duly certified copy of the resolutions adopted by the city or town together with a copy of the resolution approving the plans submitted by said city or town.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 29th day of October, 1946.

A letter was presented from the McNary Development Association, Umatilla, Oregon, requesting the early construction of a bridge across the Columbia River near the proposed McNary Damsite and stating their preference for a bridge entirely separate from the dam. The Secretary was instructed to inform the Association that the Commission has definitely approved the location of the bridge on the dam and to explain the reasons that prompted this action.

A petition was presented from residents of Klamath County requesting the early oiling of a 3.47 miles unoiled section of the Klamath Falls-Midland Secondary State Highway in order to eliminate the dust nuisance which, they state, constitutes both an accident and a health hazard. The Engineer advised that an amount of $130,000 was originally set up in the Postwar Program to finance the improvement of this road, but the County Court of Klamath County was dissatisfied with the allocation and requested that it be transferred to the Lower Klamath Lake Secondary Highway, which was done. Since that time, he said, the State of California has built a secondary highway along the state line easterly from Cal-Ore to Hatfield, which will carry more through traffic than the Lower Klamath Lake Secondary Highway, in view of which, the County Court has requested that the contracting of the Lower Klamath Lake Secondary Highway improvement be held in abeyance for the time being. He advised that he considers the Klamath Falls-Midland Secondary Highway of more importance than the Lower Klamath Lake Secondary Highway since it affords a by-pass south of Klamath Falls for residents living in the thickly-populated section southeast of the city. He recommended, therefore, that the petition be referred to the Klamath County Court for its consideration. The Commission approved the recommendation.

A petition was presented from citizens of Monument, Oregon, urging the improvement of the Kimberly-Long Creek Secondary Highway along the proposed new alignment rather than along the existing route. The Engineer advised that the survey was made several years ago but was not adopted by the Highway Commission until this meeting, when the Commission approved the location up to the west edge of the town. The reason that the town section was not included was because of the exorbitant prices being asked for the right of way, it being considered that people might reduce their demands later on. He pointed out that the bridge over the North Fork John Day River at the eastern city limits was built on permanent alignment, using Federal funds, and can be used on either location, although it fits better the new route. The matter was discussed at considerable length, but a decision was deferred by the Commission until later. The Commission authorized the taking of options for right of way along the proposed route and ordered a report thereon at the next meeting. The Commission will then decide the question of the route.

The Engineer reported completion of location surveys for revisions of the following sections of state highways:

Grant County Line-Forest Boundary Section of the John Day Highway, in Harney County

Hermiston-Umatilla Section of the Old Oregon Trail, in Umatilla County

Hardman Hill Section of the Heppner-Spray Secondary Highway, in Morrow County

Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County.

McMinnville Section of the Three Mile Lane Secondary Highway, in Yamhill County

He exhibited maps and explained each survey in detail. Following discussion and careful consideration of each survey the Commission approved all surveys except that for the revision of the Hermiston-Umatilla Section of the Old Oregon Trail, which was postponed for later consideration. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of each of the following sections of state highways, to wit:

Grant County Line-Forest Boundary Section of the John Day Highway, in Harney County;

Hardman Hill Section of the Heppner-Spray Secondary Highway, in Morrow County;

Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County;

McMinnville Section of the Three Mile Lane Secondary Highway, in Yamhill County,

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file a report and record with the Commission; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map File Nos. 6B-20-20 and 6B-20-21, 6B-19-4, 6B-21-8, and 6B-18-22, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are premanently

constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 29th day of October, 1946.

The Commission had under discussion the following requests for extensions of time within which to complete construction of certain highway projects:

C. J. Montag & Sons, Contract No. 2737, for construction of bridges on the Steiwer Hill-Albany Section of the Pacific Highway East, in Marion and Linn Counties, requested an extension of time from September 30, 1946, to March 31, 1947, within which to complete this project. They attributed their failure to complete the project within the specified time limit to shortage of labor; difficulties in securing equipment, materials, and supplies; and extreme difficulty in excavation for the footings. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He pointed out that the contractor was promised delivery of treated lumber for this project in November 1945, but the last of the lumber was not delivered until the middle of October 1946, a delay of almost a year. He recommended, in view of the circumstances, that the extension of time requested by the contractor be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

J. R. Maginnis, Contract No. 2749, for clearing the Circle Bridge-Hug Point Section of the Oregon Coast Highway, in Clatsop County, requested an additional extension of time of 92 days, from September 30 to December 31, 1946, within which to complete this project. He advised that his operations were handicapped by an unusual amount of wet weather during the current year, which retarded burning operations; also, that such burning work was restricted by the Forest Service, which placed a limit on burning operations during periods of low humidity. The Engineer advised that work under this contract was delayed because of a lack of labor and unsuitable weather conditions. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Sound Construction and Engineering Co., Contract No. 2750, for furnishing crushed rock in stockpiles for the Lake County Line-Silver Creek-Cinder Butte Section of the Central Oregon and Lakeview-Burns Highways, in Harney County, requested an extension of time of 17 days, from August 31 to September 17, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to

difficulties in securing labor, the job being located an extreme distance from centers of labor supply. The Engineer advised that the contractor's delay in completing the project has not materially increased the cost of the job to the state, the contractor having, previous to the specified completion date, furnished sufficient oil rock to permit the oiling contractor on this section to start his work. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Rogers Construction Co., Contract No. 2757, for surfacing and oiling the Malheur River-Juntura Section of the Central Oregon Highway, Harney County, requested an extension of time of 92 days, from September 30 to December 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure a sufficient number of employees to operate their equipment. The Engineer advised that the reason given for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Sound Construction and Engineering Co., Contract No. 2772, for grading the Berger Ranch-Barnes Road Section of the Wolf Creek (Sunset) Highway, in Washington County, requested an extension of time from October 31, 1946, to July 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to excavation difficulties, the materials encountered in cuts greater than six feet deep containing a high moisture content, making it impractical to haul or to obtain satisfactory compaction in embankments. Such condition necessitated the limiting of excavation to the six-foot level and then allowing the cuts and fills to dry out before completing the excavation. The Engineer advised that this job would have been completed within the specified time limit had it not been for the condition mentioned by the contractor. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission considered such extension of time excessive and thereupon, by unanimous vote, approved an extension of time to June 15, 1947, without penalty.

R. O. Dail (Harrisburg Sand and Gravel Company), Contract No. 2775, for furnishing crushed gravel in stockpiles for the Halsey-Holley Section of the Halsey-Sweet Home Secondary Highway, in Linn County, requested an extension of time of 38 days from July 31 to September 7, 1946, within which to complete this job. They alleged that the gravel bar which they were using as a source of materials could not produce a sufficient amount of rock to complete the project, which accounted for their failure to complete the job on time; also, that they experienced numerous breakdowns in their equipment. The Engineer advised that the reasons given by the

contractor for overrunning the specified time limit are correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Sound Construction and Engineering Co., Contract No. 2778, for grading the Davies-North Plains Section of the Wolf Creek (Sunset) Highway, in Washington County, requested an extension of time from October 31, 1946, to July 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to moisture content of materials encountered in cuts greater than six feet deep, which made it impractical to haul or to obtain satisfactory compaction in embankments. In order to remedy this situation it was necessary to limit the excavation to six feet and permit the remainder to dry out before disturbing it. They also alleged that they were delayed by inability of the contractors on the structures to obtain materials with which to complete their projects. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission considered that an extension of time to July 15, 1947, is excessive and accordingly ordered that the contractor be required to complete the job by June 15, 1947. An extension of time to June 15, 1947, without penalty, was thereupon approved by the Commission by unanimous vote.

Sound Construction and Engineering Co., Contract No. 2779, for grading the North Plains-Gardner Ranch Section of the Wolf Creek (Sunset) Highway, in Washington County, requested an extension of time from October 31, 1946, to July 15, 1947, within which to complete this job. They gave the same reasons for failure to complete this project within the specified time limit as were given for failure to complete the adjoining section between Davies and North Plains, Contract No. 2778. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission considered that the time requested is excessive and that the job should be completed by June 15, 1947, rather than July 15, 1947. Accordingly, the Commission voted unanimously to extend the time limit without penalty to June 15, 1947.

A. D. Ford & Son, Contract No. 2801, for construction of the Mountaindale County Road Grade Separation Project on the Sunset Highway, in Washington County, requested an extension of time of six months, from September 15, 1946, to March 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the fact that grading work at the site, which was supposed to have been completed by another contractor by May 31, 1946, had not been completed by August 28, the date of their request for the

extension of time. The Engineer advised that the reason given by the contractor for his failure to complete the project within the specified time limit is correct, the fact being that the grading work at the bridge site, which was being done by another contractor, was delayed because of material shortages and difficulties in securing labor. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

J. C. Papin, Contract No. 2810, for grade widening on the Mill Gulch-Salisbury Section of the Baker-Unity Highway, in Baker County, requested an extension of time of 182 days, from November 30, 1946, to May 31, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in obtaining labor and in obtaining equipment, materials, and supplies. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He further stated that the state has not incurred any extra expense for engineering supervision by reason of the delay and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Del R. Beebe, Contract No. 2818, for construction of an oil-mat surface on the Hampton-Suntex-Juniper Ridge Sections of the Central Oregon and Lakeview-Burns Highways, in Deschutes, Lake, and Harney Counties, requested an extension of time of 30 days, from September 30 to October 31, 1946, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing equipment and labor. The Engineer advised that the contractor was slow in getting this job started for reasons stated by him. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Porter W. Yett, Contract No. 2825, for pavement resurfacing on the Sandy Boulevard (12th Avenue-44th Avenue) Section of the Columbia River Highway, Portland, Multnomah County, requested an extension of time of 10 days, from September 30 to October 9, 1946, within which to complete this project. He attributed his failure to complete the project within the specified time limit to inclement weather and to a truckers' strike. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously,

Porter W. Yett, Contract No. 2826, for pavement widening on the West Gresham Section of the Mt. Hood Highway, Multnomah County, requested an extension of time of 109 days, from October 15, 1946, to February 1, 1947, within which to complete this job. He alleged that his work was handicapped by re-establishment of public utility facilities along the

section and was further delayed by inclement weather and shortage of materials, particularly cement. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Berke Bros., Contract No. 2830, for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County. This is a force account project awarded to Berke Bros. as a result of default by White Bros. Co., contractors, Walla Walla, Washington, as a result of taking of bids on May 16, 1946. The Engineer advised that Berke Bros. have been handicapped in their work by unavoidable interruptions in their drag line operations, many days being lost by the breaking of cables which in most instances was caused by falling boulders of tremendous size; also, their drag line hoist was badly damaged by a large boulder, requiring more than two weeks to repair. The work was further slowed down, he said, by reason of the fact that loading and dragging operations cannot be conducted at the same time because of the hazard of rolling rocks while the drag is in use. According to the contract, he said, the work was to have been completed by November 30, 1946; however, he estimated, under the circumstances, that it would not be done until January 30, 1947, and he recommended the granting of an extension of time to such date without penalty, notwithstanding that there will be a slight additional cost to the state for extension of the railroad protective bond. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2718, 2724, 2730, 2750, 2755, 2756, 2787, 2798, 2807, and 2825 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2718, with Guerin Bros., for furnishing crushed rock in stockpiles on the Union Creek Section of the Crater Lake and West Diamond Lake Highways in Jackson County; completed August 7, 1946.

Contract No. 2724, with Tom Lillebo, for construction of bridge over Duval Creek on the Duval Creek Section of the Willamette Highway in Lane County; completed August 25, 1946.

Contract No. 2730, with Watson & Morris, for painting the Coos Bay Bridge No. 1823, on the Oregon Coast Highway in Coos County; completed August 24, 1946.

Contract No. 2750, with the Sound Construction & Engineering Co., for furnishing crushed rock in stockpiles on the Lake County Line-Silver Creek-Cinder Butte Section of the Central Oregon and Lakeview-Burns Highways in Harney County; completed September 17, 1946.

Contract No. 2755, with Archie R. Averill, for construction of overpass and culverts on the Troutdale-Wahkeena Creek Section of the Columbia River Highway in Multnomah County; completed October 10, 1946.

Contract No. 2756, with Rogers Construction Co., for surfacing and oiling on the Buchanan-Malheur River Section of the Central Oregon Highway in Harney County; completed September 5, 1946.

Contract No. 2787, with E. C. Hall Co., for regrading, surfacing and oiling on the Weston Mountain-McDougal Section of the Weston-Elgin Secondary Highway in Umatilla County; completed October 18, 1946.

Contract No. 2798, with T. W. Thomas, for grading and bituminous macadam surfacing on the Oceanlake Section of the Oregon Coast Highway in Lincoln County; completed September 25, 1946.

Contract No. 2807, with J.N. & M.J. Conley, for surfacing on the Eddyville-Blodgett Section of the Eddyville-Blodgett Secondary Highway in Benton and Lincoln Counties; completed September 12, 1946.

Contract No. 2825, with Porter W. Yett, for pavement resurfacing on the Sandy Boulevard (12th Ave.-44th Ave.) Section of the Columbia River Highway in Multnomah County; completed October 9, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer reported receipt of a letter from the U. S. War Department calling attention to a Presidential directive which holds up all flood-control projects until further notice, and requesting the cessation of the survey that the State Highway Department is now conducting for relocation of roads and highways at the Meridian Damsite in Lane County, at Army expense.

The Engineer advised that the survey is being conducted under agreement with the U. S. War Department and that in conformity with this letter he has called off the survey party and is billing the War Department for expenses already incurred. The Commission approved the report.

A letter was presented from the Multnomah County Council of the American Legion requesting the closing of Swift Secondary Highway to all traffic during a short period of time on one day prior to November 8 to allow the landing of two small airplanes which are to be exhibited at the Northwest Aircraft Show in the Livestock Pavilion from November 8 to 11, 1946. The Chief Counsel advised that it would be illegal to allow the closing of the highway for this purpose, whereupon the Commission denied the request.

The Secretary advised that the American Legion also will want authority to transport six airplanes across the Interstate Bridge from Vancouver to Portland for exhibition at the Aircraft Show, each of which will be 22 feet wide. The Commission, by unanimous vote, authorized the granting of a permit for this purpose, subject to the condition that the movements are made in the early morning hours when there is the least amount of traffic on the bridge.

The Engineer reported that, in conformity with authority granted him by the Commission's resolution of October 24, 1944, he has posted the bridge over the Coast Fork of the Willamette River at M.P. 2.57 on the Willamette Highway, Lane County, for a speed limit of 15 miles per hour for trucks, pending completion of certain repair work. He anticipated that the reduced speed limit would be in effect for about a week. The Commission confirmed such posting by unanimous vote.

A letter was presented from Anderson Bros., Portland, regarding their bid submitted in Salem on August 26, 1946, for the purchase of certain used equipment stored at Salem. They alleged that their offer was based on receiving all or none of the 16 items offered for sale whereas, the Commission accepted their offers for only three of them, and stated their preference to forfeit their bid deposit rather than to accept only the three items. The Secretary advised that careful inspection of Anderson Bros.' bid reveals that they submitted an offer for each of the items separately, totaling $149.94, with an alternate proposal to pay $160 for all or none of the items. The bid, he said, did not contain any information to the effect that Anderson Bros. would not accept a portion only of the items offered for sale. Following discussion the Commission declared forfeit the bid deposit submitted by Anderson Bros.

The Secretary presented three letters from the Oregon Council, American Pioneer Trails Association, by Arthur R. Kirkham, Vice President, and Walter Meacham, Secretary, in one of which exception is taken to the action of the Commission adopting the recommendation of the Memorials Committee of the Oregon Historical Society with respect to the naming of the southern pioneer route into Oregon. The second letter suggests that the Highway Commission appoint a Memorials Committee of three members, one each from different qualified organizations, to pass upon requests concerning the erection

of markers and monuments on state highway rights of way, and the third letter offers objections to the wording for the Barlow Trail marker that is to be erected on the Mt. Hood Highway at Laurel Hill. The Commission voted unanimously not to change its decision with respect to the naming of the southern pioneer route leading to Oregon nor to change the wording recommended by the Memorials Committee of the Oregon Historical Society for the Barlow Trail marker. The Commission also voted unanimously not to change the set up of the committee that it has appointed to pass on recommendations covering historical subjects.

The Engineer brought up for discussion the claim of the Union Pacific Railroad Company in the amount of $134,571, for damages that the Company alleges occurred to its facilities as the result of a slide on the Columbia River Highway near Oneonta on February 5, 1946. (See copy of Engineer's report directed to the State Highway Commission, dated October 19, 1946, in general files for details.) He recommended that the claim be denied. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The Engineer asked the Commission to confirm the telephonic authority previously granted permitting Mr. Mark H. Astrup, Assistant Parks Superintendent, to go to Eureka, California, at state expense, on September 28 and 29 in connection with the entertainment of a group representing the National Conference of State Parks that inspected state parks along the Oregon Coast Highway during the following three-day period. The Commission approved such expense by unanimous vote.

The Commission had under discussion the scheduling of its next three regular meetings and decided unanimously to hold all of such meetings in Portland, the first one on Monday and Tuesday, November 25 and 26; the second tentatively on Monday and Tuesday, December 30 and 31, 1946; and the third on Monday and Tuesday, February 3 and 4, 1947. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building.

The Engineer and the Chief Counsel reported on the following matters of unfinished business:

1. Proposal to include in the 1947 Budget the sum of $1,000,000 to finance minor betterments. The Engineer advised that this matter will be reported at the Commission's next meeting.

2. Request of the City of Hood River for improvement of the Columbia River Highway at three points in Hood River County. The Engineer advised that the report on this subject will be presented at the next meeting.

3. Proposed purchase of public liability and property damage insurance covering accidents at the Interstate Bridge. The Engineer submitted a schedule of premiums that will have to be paid for such insurance. The Com-

mission decided not to take action at this time but to await the outcome of a damage case which is now pending before making a decision.

4. Proposed rerouting of the Oregon Coast Highway through the City of Seaside. The Engineer advised that his report is not ready on this subject.

5. Acquisition of right of way for a proposed service road through Kellogg Park Housing Project, Milwaukie. The Engineer and the Chief Counsel advised that there is nothing to report at this time.

6. Status of right of way negotiations along the waterfront in the City of Coos Bay. The Chief Counsel advised that there is a question whether or not the Commission definitely authorized negotiations for this right of way, and he had it in mind to ask the Commission for instructions. Chairman Banfield stated that it is his recollection the Commission left it with the Engineer and the Chief Counsel to decide which properties there is urgent need to acquire and to negotiate with the owners of such properties. Commissioner Chandler gave as his understanding that the highway location has not as yet been settled and advised that this is important because people cannot develop their holdings until the location has been decided. The Engineer confirmed Commissioner Chandler's statement regarding the survey and requested authority to conduct the survey at this time. The request was approved by the unanimous vote of the Commission.

7. Naming of a bridge in honor of the late C. B. McCullough. The Engineer advised that he has nothing to report on this matter at this time.

8. Request of Otto J. Kraemer for right of access to the Oregon Coast Highway from streets of his subdivision at Cannon Beach. The Chief Counsel advised that he and the Engineer investigated Mr. Kraemer's original request but could not approve it, and since then they have heard nothing from Mr. Kraemer. He recommended that the matter be deleted from future agendas until Mr. Kraemer revives it. The Commission approved the recommendation.

9. Settlement with W. H. Gonyea for right of way required across his property for construction of the Pacific Highway between Judkins Point and Goshen. The Engineer and the Chief Counsel both advised that there is nothing to report at this time.

10. Request of the City of Eugene for the rerouting of the Pacific Highway for a short distance along the Mill Race. The Engineer decided that there is nothing to report on this subject except that he anticipates that a delegation from Eugene will appear before the Commission in the not distant future regarding the project.

11. Question of securing reimbursement from the State Restoration Fund for losses incurred, notwithstanding that the property damaged is not restored to its original condition. The Chief Counsel advised that this matter was referred to him to consult with the Board of Control but that he has nothing to report at this time.

12. Request for the improvement of the Fox Hollow Secondary Highway from Eugene south about four miles. The Engineer advised that he has nothing new to report on this subject but will present it for consideration by the Commission in the adoption of its 1947 Minor Betterment Budget.

The question of the action to take against White Bros. Co. for failure to accept the contract that was awarded to them on May 16, 1946, for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County, was again brought up for discussion, but action thereon was deferred until a later meeting.

The Chief Counsel brought up for discussion the matter of acquiring wayside strips along the Oregon Coast Highway between Newport and Waldport, particularly a tract owned by a Mr. E. C. Newell which lies approximately midway between two strips already owned by the state on the ocean side of the highway. In this particular instance, he said, an agreement could not be reached with Mr. Newell as to the price to be paid for his property, so the Commission authorized acquisition by condemnation, and the case is still pending. He exhibited a map showing the location of the property and advised that several thousand dollars are involved in the deal. He pointed out that there is a possibility that the jury will set a price on the property in excess of the amount the Commission is willing to pay for it, and, in that event, the Commission may decide not to acquire it, which leaves the property owner in the position of having to spend a considerable sum in defending his position. He inquired whether or not the Commission would be willing to reimburse Mr. Newell for such expense in the event it is decided not to purchase the property. He mentioned also that there are several other tracts in this locality which the Commission contemplates acquiring, so the Commission's decision with respect to the pending case probably would have some bearing on the Commission's action with respect to the others. The matter was discussed at some length but a decision relative thereto was deferred by the Commission until its next meeting. The Chief Counsel was instructed to complete the present condemnation case and report the results thereof.

The Engineer brought up for discussion a controversy with Mr. E. L. Dickson, Eugene, concerning the routing of traffic past his market building at Springfield Junction. He advised that Mr. Dickson caters to the general public and is very desirous of having people come to his place of business from all directions, which cannot be done under the present arrangement of channelized traffic, so that people living in Eugene who wish to patronize his market are obliged to drive across the river into the town of Springfield and return. He advised that the situation could be helped by construction of a turn-around under the westerly approach to the Willamette River Bridge, which he estimated would cost approximately $10,000, and that he so informed Mr. Dickson and suggested to him that the matter would be considered if he would acquire the necessary right of way because the improvement would be of no particular benefit to the state. Mr. Dickson, he said, has not acquired this right of way but has taken a very threatening attitude against the State Highway Department and other State officials. He pointed out that the improvement of the highway at this location is not included in

the present construction program and recommended that nothing be done toward the proposition at this time unless the property owners offer to give the right of way. The Commission approved the recommendation by unanimous vote.

The Commission considered and signed agreements, etc., as follows:

Agreement with the National Hospital Association covering services beginning January 1, 1947.

Agreement with Oregon Physicians' Service covering services beginning January 1, 1947.

Agreement with The Pacific Telephone and Telegraph Co. covering pole line installation on the Glendale Junction-Wolf Creek Section of the Pacific Highway, Douglas and Josephine Counties.

Agreement with Silica Products, Oreg. Ltd. covering service road construction and access restrictions on the Eugene-Veneta Highway, Lane County.

Agreement with Bonneville Administration covering attachment of a guy wire on the Marion-Polk County Bridge across the Willamette River at Salem.

Agreement with James H. Imbrie covering relinquishment of a cattle pass on the Gardner Ranch-Berger Ranch Sectionof the Sunset Highway, Washington County.

Agreement with L. M. Christensen covering removal of smelt sand from the ocean beach near Yachats State Park, Lincoln County.

Agreement with Arnold Berger covering a change in point of access from his property to the Sunset Highway, in Washington County.

Agreement with Marion and Polk Counties covering construction of a bridge across the Willamette River on the Salem-Independence County Road at Independence.

Agreement with Tidewater Associated Oil Company covering the transfer of properties on the Columbia River Highway (15th and Commercial Streets), in Astoria.

Agreement with Grant County covering abandonment of certain sections of the Kimberly-Long Creek Secondary Highway, in Grant County.

Agreement with Crook County covering future abandonment of the old route of the Ochoco Highway between Marks Creek and Jones Ranch, Crook County.

Agreement with Wheeler County covering future abandonment of the old route of the Ochoco Highway between Marks Creek and Jones Ranch, in Wheeler County.

Agreement with John O. Paulsen covering easement for road across a stockpile site acquired from D. P. Jenkins on the Oregon Coast Highway in Coos County.

Amendatory Agreement with Del R. Beebe covering modification of Contract No. 2831 for the Smithfield-Elmira Section of the Territorial Secondary Highway, in Lane County.

Agreement with Nellie and Adeline Sather covering temporary lease of the Sullivan Building, in Astoria.

Lease Agreement with I. J. Rossman covering lease of Lots 11 and 12, Chicago Addition to the City of Florence.

Bill of sale to J. C. Wilson covering purchase of building at Union Maintenance Station, Union County.

Bargain and sale deed conveying to the Port of Newport certain property on the south side of Yaquina Bay.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

T. B. Barnett
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
November 25, 1946

The State Highway Commission met in regular session at 9:00 a.m. in Room 715 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of its meeting held on October 28 and 29, 1946.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Suggestion of the State Board of Control that the State Highway Department assume jurisdiction over Sodaville State Park, in Linn County: The State Parks Superintendent pointed out that this park now is under the jurisdiction of the Board of Control, and if such jurisdiction were transferred to the State Highway Commission it would have to be done by Legislative act. Inspection of the premises, he said, reveals that the park is in bad condition and that it would cost about $1,500 to improve it; moreover, it would cost about $1,000 annually to maintain a caretaker on the premises. He also pointed out that the park is about one and one-half miles removed from the Santiam Highway. In the discussion of the matter the Commission indicated a reluctance to take over this park because of its condition and instructed either the Chief Counsel or the Parks Superintendent to so inform the Board of Control. The Board also is to be informed as to the cost involved in reconditioning and maintaining the park, and, that while the Highway Commission hesitates to assume jurisdiction, it will do so if the Legislature makes the transfer.

2. Request of Gen. Ira Baker that the Commission withdraw its application for a 200-foot freeway along the banks of the Rogue River and Butte Creek within the boundaries of Camp White: The Parks Superintendent advised that Gen. Baker, through his representative, Col. Glen L. Jackson, of Medford, has asked the state to withdraw its application filed with the Surplus Property Board for a 200-foot strip of land along the banks of the Rogue River and Butte Creek where they join in Lot 3 of Section 7, Township 36 S., Range 2 W., W.M., Jackson County. Gen. Baker, he said, wants to construct a home on the property and states a willingness to grant the state an easement along both streams so that the public will not be barred from fishing privileges if the Highway Commission will withdraw its filing. He further stated that the original purpose of the Commission's application was to preserve the right of access to both streams for fishermen; however, a strip 25 or 50 feet wide probably would

serve the purpose. It was the thought of the Commission that if a right of way 25 feet wide above high water is sufficient to satisfy the purpose for which the application was filed, then that is all that should be acquired. The Chief Counsel and the Parks Superintendent were instructed to notify Col. Jackson as to the Highway Commission's position in the matter and to obtain his reaction thereto.

3. Offer of Hansen Bros. Logging Co. to exchange cut-over lands for standing timber in Joaquin Miller State Park: The Parks Superintendent advised that Hansen Bros. own timber land which lies on the north side of this park. They would like to extend their logging operations to the park area if the Commission is willing, and have offered to deed their cut-over lands to the state if the privilege is granted. He recommended that the offer be refused, particularly in view of the fact that the park was presented to the state as a gift by Lane County. The Commission approved the recommendation.

4. Overnight camping in state parks: The Parks Superintendent submitted a written report on this subject, which was discussed briefly. He was instructed to present a broader report to include information as to what other states are doing along this line.

5. Proposed state park on the Oregon Coast Highway north of Waldport: The Parks Superintendent advised that, pursuant to instructions given to him by the Commission at the previous meeting, he has made certain investigations with respect to lakes that might be on the Johnson property, which the Waldport Garden Club is urging the Commission to acquire for state park purposes. At his request the Secretary read aloud the Parks Superintendent's report to Chairman Banfield on the subject. (See copy of report dated November 20, 1946, in general files for details). It appears that only a small section of the lake referred to by the Garden Club lies within the boundaries of the Johnson property, whereas in the opinion of the Parks Superintendent if a state park is established it should include the entire lake; moreover, half of the area consists of blow sand, which is not worth $500 an acre, which Mr. Johnson demands for the same. The balance of the lake, he said, is located on property owned by a Mr. H. C. Howe, which is not available for purchase. The Parks Superintendent advised that he still is of the opinion that the expense of acquiring the property in question is not justified, and he recommended that it not be purchased. The Commission approved the recommendation by unanimous vote, upon motion of Commissioner Schaupp, which was seconded by Commissioner Chandler.

6. Request of R. C. Moulton for permission to remove down timber and burned timber along the Sunset Highway near Quartz Creek Bridge: The Parks Superintendent advised that a satisfactory agreement has been reached with Mr. Moulton with respect to the removal of this timber and that Mr. Moulton has executed an agreement covering the matter which contains a termination date of June 30, 1948. He recommended approval of the agreement. The Commission approved the arrangement by unanimous vote. (The agreement with Mr. Moulton was signed by the Commission on the following day.)

7. Resolution from Portland Chamber of Commerce urging acquisition of timbered and scenic wayside strips along state highways: The Parks Superintendent pointed out that a delegation is scheduled to appear before the Commission on the following day concerning this matter. The Commission unanimously approved the suggestion of Chairman Banfield that this delegation be referred to the State Parks Superintendent whom, the Commission holds responsible on matters of this kind.

8. Consideration was given by the Commission to the adoption of a park budget for the calendar year 1947. After considerable discussion the following budget was adopted in principle by the unanimous vote of the Commission with the express understanding that each individual project will first be approved by the Commission before an expenditure of funds is made in connection therewith:

"Parks Department

Acquisition of Park Properties - - - - - - - - -	$200,000
Buildings and Other Improvements in Parks- - -	265,000
Park Operation and Maintenance - - - - - - - - -	175,000
	$640,000"

In the discussion of the park budget, particularly the item of park maintenance, the Commission authorized continuance of the present practice with respect to regular park maintenance but ordered that express approval for such items shall be obtained from the Commission before expenditures are made in connection with them. The Commission also ordered that all such work shall be done by park maintenance crews especially employed for the purpose, but not until men and equipment are available, and that highway maintenance crews shall not do any work whatsoever in state parks except that necessary to construct and maintain roadways. The Commission's decision was by unanimous vote. (See copy of 1947 budget for the Parks Department in general files for details of the proposed expenditure under the three classifications shown above.)

The Commission also had under consideration the adoption of a budget for the calendar year 1947 for additional activities. After careful consideration the following budget was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

"OREGON STATE HIGHWAY COMMISSION

BUDGET - CALENDAR YEAR 1947

As Recommended by the State Highway Engineer

	Expenditures of Previous Years 1944 (Actual)	1945 (Actual)	1946 (Estimated)	Recommended Budget 1947
RECEIPTS				
State Funds:				
Motor vehicle license fees	$ 3,300,093	$ 3,416,141	$ 3,715,000	$ 4,150,000
Gasoline tax	9,637,960	11,033,246	15,508,000	16,000,000
Diesel fuel tax	224,891	230,292	260,000	265,000
Motor transportation fees	1,897,873	1,962,431	2,278,000	2,400,000
Fines for traffic law violations	79,347	92,047	120,000	125,000
Astoria-Megler ferry receipts	--	--	130,000	210,000
Miscellaneous cash receipts from rentals, discounts, etc.	3,274	4,334	60,000	45,000
County cooperation	8,550	1,550	14,000	--
Miscellaneous cooperative funds	30,113	861	27,000	--
Gross receipts, State Funds	$15,182,047	$16,740,902	$22,112,000	$23,195,000
Less contributions to State Police	380,663	428,112	338,000	466,000
Less contributions to Counties (15.7%)	2,311,569	2,340,748	2,598,000	3,394,000
Less contributions to Cities (5%)	736,168	745,461	828,000	1,081,000
Net receipts, State Funds	$11,753,647	$13,226,581	$18,348,000	$18,254,000
Federal Cooperative Funds	3,108,858	2,290,000	2,800,000	7,200,000
Net receipts for highway purposes	$14,862,505	$15,516,581	$21,148,000	$25,454,000
First of year balance	4,662,458	7,878,011	13,466,000	17,138,000
Estimated Total available funds	$19,524,963	$23,394,592	$34,614,000	$42,592,000

(Con't)

EXPENDITURES

Capital Outlays: (See Footnote #1)

Federal cooperative projects	$ 2,546,867	$ 1,603,418	$ 5,970,000	$12,700,000
State construction projects	155,655	216,918	900,000	2,500,000
Cooperation in forest road work	Cr. 36,824	--	136,000	465,000
Minor betterments (primary)	45,278	103,382	150,000	650,000
Minor betterments (secondary)	10,783	47,183	85,000	350,000

November 15, 1946"

Footnotes:

#1. In the discussion of the items under the heading "Capital Outlays" the Commission considered that it previously had approved the amounts shown for Federal Aid and State construction projects when it adopted resolutions providing its Three-Year Postwar Construction Programs for Federal and State monies; and that it also approved by such resolutions amounts for surveys and for right of way acquisition as may be required to undertake such construction programs. In view thereof, the Commission approved the amounts contained in the foregoing budget subject to the condition that final approval of construction projects will be given at the time contracts are awarded, and final approval of right of way purchases shall be given when the options covering such purchases have been passed on by the Commission.

All other items under the heading "Capital Outlays" were approved in principle with the understanding that the individual projects shall be submitted to the Commission for approval or rejection before the work is started.

#2. All items under the heading "Maintenance", totaling $7,200,000, were approved by the Commission as recommended.

#3. The amount recommended for planning and traffic surveys, under the heading "Operation", was $275,000, of which approximately $172,000 represents cooperation with the Public Roads Administration for types of traffic studies that are required by the Federal Government, and approximately $103,000 represents entirely state funds. The Commission ordered a reduction in the amount set up for state financed projects from $103,000 to $50,000 but made no change in the amount set up for Federal cooperative projects. The Engineer was instructed to review the program of proposed State financed projects — in case he is unable to arrange the program to fit the reduced amount of $50,000, he is to report back to the Commission why he cannot do so.

The amount of $250,000 for the "Travel and Information Department" was previously approved by the Commission at its meeting on October 28, 1946. (See Page 13406 of the minute book.)

The amounts recommended for "Research and Special Investigations" and for "Miscellaneous General Expense", also under the heading "Operation", were $15,000 and $90,000 respectively. The Commission ordered these amounts reduced to $10,000 and $75,000.

#4. The Commission approved without change the amounts recommended under the heading "Service and Clearing Accounts", including an increase of $350,000 in the revolving fund. The Chief Counsel was instructed to do what is necessary to secure legislative approval for such increase.

#5. Items included under the heading "Debt Service" were approved by the Commission without question.

During the discussion of the budget the Engineer requested authority to continue without interruption certain extra gang maintenance work, specifically drainage operations on the Siskiyou Section of the Pacific Highway, on the Wilson River Highway, and on the Santiam Highway, which work, he said, is being carried on as a continuous operation; also, to continue without interruption minor items of drainage betterment work which are performed by maintenance crews as a matter of routine. The Commission approved the request by unanimous vote. (On the following day the Engineer requested like authority in connection with maintenance and betterment of bridges which work is performed by special bridge maintenance crews. The Commission announced that it did not wish to stop any repair or maintenance work that is of a routine nature, and accordingly approved the request by unanimous vote, with the understanding that all new work must be reported to the Commission for approval or rejection before expenditures are made in connection with them.)

The Engineer pointed out that the budget as approved contains no provision for an expenditure to maintain the county roads at Warrenton and the county roads between Estacada and Milwaukie which have been proposed for the State Secondary Highway System, so the budget will have to be increased in the event the Commission later on accepts jurisdiction over these roads. The Commission decided to pass on such matter at a later date.

The Engineer requested approval of increases in the amounts approved for certain items in the 1946 Budget, totaling $128,000, as follows:

Item	Initial Budget	"Previously Approved Increases	Recommended Additional Increase
1. Engineering county construction	$ --	$ --	$ 1,000
2. Property acquisition, general expense	50,000	--	5,000
3. District maintenance superintendence	154,000	--	6,000
4. Administration and general supervision	525,000	20,000	90,000
5. R-W, quarry and stockpile leases	5,000	--	3,000
6. Truck load inspection	87,000	--	23,000
		Total	$128,000"

He explained the necessity for such increases (See Engineer's letter to the Oregon State Highway Commission dated November 22, 1946, in general files for details.). Following discussion the Commission approved such budget changes by unanimous vote.

The Assistant Counsel, Mr. George W. Neuner, reported a compromise settlement with respect to the acquisition of a gravel bar which is needed as a source of materials for improvement of the Tiller-Trail Secondary Highway, in Douglas County. He advised that this gravel bar is located about three miles off the highway, and it was originally thought that it would not be needed; however, it appears now that supplies from other locations are not sufficient for the purpose intended, so this property will have to be acquired. He further stated that agreement with the owner of the property could not be reached, so it was necessary to condemn; however, subsequent to the filing of the proceedings a compromise settlement was reached whereby the owner has agreed to accept the sum of $100 per acre for the 12.55 acres involved in order to avoid the condemnation suit. He recommended approval of the settlement. The Chief Counsel concurred, stating that, in his opinion, the state would not be able to make any better settlement if the condemnation suit were consummated. The Commission approved the recommendation by unanimous vote.

The Assistant Counsel, Mr. J. W. DeSouza, reported results of further negotiations for right of way needed on the proposed relocation of the Kimberly-Long Creek Secondary Highway through the town of Monument. He advised that satisfactory settlements have been reached with all of the property owners except one, and it appears that the right of way needed from such owner will have to be condemned. The total amount of the options secured, he said, is $7,000, and he estimated that the remaining property would cost the state about $1,500, making the maximum cost of the right of way $8,500. He pointed out, however, that such settlement would not include the cost of moving buildings, which is estimated to cost an additional $3,000 or $4,000. The right of way being acquired, he said, is 80 feet in width and the buildings encroach only about five or six feet, and it would be the obligation of the state to move the buildings when necessary. The Chief Counsel recommended purchase of the right of way on the basis of leaving the buildings where they now are, subject to the condition that the state would retain the right to move the buildings whenever it wants to. The matter was discussed at some length and was referred back to the Chief Counsel to ascertain whether or not a clean-cut arrangement can be worked out whereby the state can acquire the right of way and allow the buildings to remain in their present location without incurring any obligation in the event that damage to the buildings should result.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with the offer

that he recommended in connection with each parcel. Following careful consideration of each item on the list the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Footnotes:

* Items Nos. 11781, 12660, and 12567 covering acquisition of property at Wallowa Lake for park purposes: The Commission approved such settlements following discussion of a report from the Chief Counsel on results of a condemnation action to acquire additional land from Mr. T. H. Williamson. The Chief Counsel advised that, as a result of the

condemnation suit to acquire the Williamson property, the Williamsons have agreed to accept the sum of $17,500 for the 55 acres that the state wants, provided they are allowed to keep five cabins now located on the property. The Commission approved such settlement by unanimous vote.

Regarding the Wiggans property, the Chief Counsel advised that Mrs. Wiggans owns the lodge, which is not included in the transaction, and that she desires to have the exclusive right for a period of five years to rent boats on the lake and that provision for the same be made in their deed of conveyance. Mrs. Wiggans, he said, is willing to enter into an agreement with the Highway Commission to safeguard the state in the event that she disposes of other land which she has in this locality. During the discussion of this matter the Commission approved such arrangement subject to the condition that Mrs. Wiggans will maintain during the first year a minimum of fifteen boats and will increase the number up to a maximum of 20, and with the further understanding that the Highway Commission retains the privilege of selling a concession for additional boats in the event that she does not comply with the arrangement. The matter was referred back to the Chief Counsel to work out the details.

** Item No. 4447 concerning right of way being acquired from L. K. Pearson, Jr. for the Siletz Bay-Newport Section of the Oregon Coast Highway. The Chief Counsel advised that Mr. Pearson would like to continue in business at this location until the state absolutely needs his property. He recommended approval of the request. The Commission approved the recommendation unanimously subject to the condition that the payment to be made to Mr. Pearson at this time shall be for the land only, the balance to be paid when the building is moved.

*** Items Nos. 2057, 2059, 2050, 2044, 2059-B, 2047-A, 2043-A, 2059-A, 2055-A, 2042, and 2059 concerning acquisition of right of way for the Umatilla-Hermiston Section of the Old Oregon Trail: The Commission by unanimous vote approved the settlement mentioned in the foregoing resolution after adoption of the relocation survey as reported by the Engineer. In this connection the Engineer advised that, as instructed by the Commission at the previous meeting, he made further investigations to ascertain whether or not it would be possible to arrange a satisfactory connection with the Columbia River Highway at the northern end of this relocation without encroaching upon the land owned by Oscar C. Hopkins and Carl Secaur, who are demanding an exorbitant amount for their property. Investigations reveal, he said, that it will not be necessary to take any of the property of these men. In view of this report the Commission approved the survey and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Umatilla-Hermiston Section of the Old Oregon Trail in Umatilla County, and in connection therewith to prepare a map or maps showing the route and location of said section of

highway and file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Umatilla-Hermiston Section of the Old Oregon Trail, together with the map, which for identification purposes bears the map file No. 6B-2-1, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 25th day of November, 1946.

The Assistant Counsel also requested authority to institute condemnation proceedings to acquire certain properties concerning which satisfactory settlements with the owners could not be reached by negotiation. He presented a list of such properties, together with the offers that he recommended in condemnation, as follows:

		Recommended Offer
HAY CREEK-CONDON SECTION OF WASCO-HEPPNER HIGHWAY		
File 13129	R. E. Myers, et ux.	$3,750.00
EAGLE CREEK-SANDY SECTION OF WOODBURN-SANDY HIGHWAY		
File 12942	Guy Wilcox, et ux.	2,775.00
DEPOE BAY SECTION OF OREGON COAST HIGHWAY		
File 4134	Mrs. William Moore, et al.	4,000.00

After careful consideration the Commission approved the request and the offers. The following resolutions authorizing condemnation were thereupon adopted by the Commission by unanimous vote:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by R. E. Myers, et ux., which property is located in the north half ($N\frac{1}{2}$) of Section 7 and the northwest quarter ($NW\frac{1}{4}$) of Section 8, Township 4 South, Range 21 East, W.M., Gilliam County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2, and is further identified in the records of the Highway Commission as file R 13129, which property is being acquired for right of way purposes in connection with the Wasco-Heppner Highway; and (*)

Real property owned by Guy Wilcox, et ux., which property is located in the northeast quarter (NE¼) of the southwest quarter (SW¼) of Section 13, Township 2 South, Range 4 East, W.M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4, and is further identified in the records of the Highway Commission as file R 12942, which property is being acquired for right of way purposes in connection with the Woodburn-Sandy Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

Footnote:

(*) The names of the property owners and the detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 70, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation, or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, in the opinion of the Highway Commission the real property hereinafter described is scenic in character, adjoins other real property owned by the State, and possesses possibilities of development as a scenic area and likewise affords opportunity for roadside development; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real property and the development of the same will contribute to the convenience of the general public and to the general welfare and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Highway Commission does hereby find and declare that the real property hereinafter described is scenic in character and is suitable for development as a scenic area or viewpoint and for roadside development.

2. That this Commission does hereby find and declare that the acquisition of fee title to said real property, free and clear of all interests of every kind and character, is necessary in order to make possible the preservation and development of the same for the convenience of the public and so that said area may be developed and maintained for its scenic value or public view qualities as well as for roadside development, all of which the Commission does find and declare to be for the general welfare and pleasure of the motoring public and road user.

3. That the real property the acquisition, preservation, and development of which the Commission now finds necessary for the purposes heretofore stated is described as follows, to wit:

> All that portion of Lot 1, Section 8, in Township 9 South, Range 11 West of the Willamette Meridian, in Oregon, lying west of the Roosevelt Coast Highway (now known as the Oregon Coast Highway), excepting that portion deeded to the State of Oregon, dated February 11, 1929, said parcel of land being more particularly described as follows, to wit:
>
> Beginning at a point on the westerly right of way line of the Roosevelt Coast Highway (now known as the Oregon Coast Highway), approximately 535.7 feet westerly from the quarter corner between Section 5 and Section 8, Township 9 South, Range 11 West of the Willamette Meridian; thence Sough 9° 21' East 610 feet along said right of way line to a point; thence South 60° 45' West parallel to the U. S. meander line of the Inner Depoe Bay to the high tide mark of the Pacific Ocean; thence in a southerly direction along the high tide line of the Pacific Ocean a distance of approximately 150 feet; thence in a northeasterly direction, following the high tide line of the Pacific Ocean to a point on the westerly right of way line of the Roosevelt Coast Highway (now known as the Oregon Coast Highway); thence North 9° 21' West along said right of way line a distance of approximately 30 feet to the point of beginning, containing 0.2 acre, more or less, save and except the portion of said lands heretofore conveyed to the State Highway Commission for right of way purposes, deed of conveyance thereof being recorded on page 422 of Volume 78, Record of Deeds for Lincoln County, Oregon.

4. That the survey of said area heretofore made by the State Highway Engineer and the description prepared hereby are approved by the Commission and the Commission does hereby order and direct that said description be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, or persons in possession if there be any, with respect to the compensation to be paid for the acquisition of said property and damage to the

remaining property, if there be any remaining property, and in the event that the title to said property cannot be acquired by agreement then it is hereby ordered that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. That this resolution be entered in the minutes and records of this Commission as of November 25, 1946.

The Assistant Counsel reported that in connection with the acquisition of property needed as extra right of way for state highways within the boundaries of Camp Adair applications for the acquisition of such properties must be executed and filed with the Government authorities within ten days after notification. He particularly pointed out that extra right of way is needed for U.S. 99W and for the Tampico Secondary Highway; also, that the Highway Department needs a quarry site that is located within the area. He suggested, in view of the circumstances, that the Secretary be authorized by the Commission to execute applications when necessary in order to avoid delays incident to contacting the members of the Highway Commission individually between regular meetings of the Commission. The Commission approved the suggestion with the condition that the applications are first approved by the Chief Counsel and the Engineer. The following resolution relative thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission has heretofore found and declared that the acquisition of certain real property, title to which is now vested in the United States of America, is necessary and is needed in connection with the permanent improvement of the Pacific Highway West, U.S. 99W, and in particular that portion of said highway located in Benton and Polk Counties; and

WHEREAS, the Commission has heretofore authorized and directed J. M. Devers, its Chief Counsel, to apply to the proper agency of the United States of America for the purchase or transfer of certain real properties and for a disclosure on the part of the Federal Government as to the terms and conditions upon which said properties can be purchased or otherwise acquired by the State of Oregon; and

WHEREAS, it appears that the rules, regulations and procedure pursuant to which the Federal Government disposes of surplus properties require a petition or application to be executed by the applicant; and

WHEREAS, the Commission is in session regularly only once a month and therefore it is not always convenient for the members of the Commission to execute a formal application;

NOW, THEREFORE, the Commission does hereby authorize and empower H. B . Glaisyer, the duly appointed, qualified and acting Secretary to the Commission to execute for the Commission all necessary applications, petitions, or other papers required in connection with the acquisition of the real properties owned by the United States of America and offered for sale as surplus properties, which said real properties are located in Benton and Polk Counties in the State of Oregon and the acquisition of which the Highway Commission has heretofore authorized.

The form of such execution by said Secretary on behalf of the Highway Commission shall be: Oregon State Highway Commission, By H. B. Glaisyer, Secretary.

This resolution shall be entered in the minutes and records of the Commission as of the twenty-fifth day of November, 1946.

The Commission discussed briefly the establishment of a rule or policy restricting access to state highways from abutting land but deferred action in the matter pending a report from the Chief Counsel. The Secretary was instructed to delete this item from future agendas until such time as the Chief Counsel is ready to report.

The Commission approved and authorized the mailing of a letter prepared by the Chief Counsel, dated November 20, 1946, and directed to Mr. Z. E. Merrill, President, Mountain States Power Company, Albany, Oregon, concerning the destruction of an oak tree on the Monmouth-Independence Highway.

The Chief Counsel reported a settlement of a controversy involving the acquisition of right of way for the proposed improvement of the Oregon Coast Highway in the town of Gold Beach. He explained that in order to provide a satisfactory-width right of way it was necessary to move the Curry County Bank building and an adjoining barber shop building and that E. W. Lebeck & Son, house-moving contractors, Portland, were engaged to do the work at an agreed price of $4,500. In addition to the work required to be done by the state, he said, the bank engaged the moving contractor to do additional work, for which it agreed to pay the sum of $500. In the course of moving operations, he said, certain damage was done to the building, the amount of which has been the matter of controversy, although now mutual agreement has been reached among all parties whereby the state is to pay the moving contractor the agreed sum of $4,500 less $160, which deducted amount is to be paid

direct to the Curry County Bank as partial payment of its claim for damages. The contractor has agreed to release the bank from payment of the $500 due for performing the extra work. In other words, the bank's claim is being settled on the basis of being relieved from paying the contractor for the extra work and by being paid the sum of $160 by the state from the amount due the contractor for moving the bank. He advised that this controversy is of long standing, and, in his opinion, the settlement reached is fair and reasonable. He recommended approval of the settlement. The Commission approved the recommendation by unanimous vote. (A three-party agreement covering the entire matter was signed by the Commission on the following day.)

The Commission had under discussion the suggestion of the Advisory Committee on Travel Matters that Mr. Merle R. Chessman, former State Highway Commissioner, be reappointed a member of that Committee. The Commission deferred action on the matter pending information as to Mr. Chessman's attitude with respect thereto.

The Chief Counsel presented a form of agreement with the City of Portland covering use, as a guest center by the Portland Chamber of Commerce, of certain city-state-owned property adjacent to Harbor Drive, being bounded by S.W. Front Avenue, S.W. Harbor Drive, S.W. Salmon Street, and S.W. Main Street. The Commission approved the form of agreement, it appearing that it has been prepared in conformity with previous understanding. (The agreement was signed by the Commission on the following day.)

The Chief Counsel reported his efforts to secure the removal of a building owned by Mr. E. H. Lamport in Casey State Park, Jackson County. In this connection he read aloud a letter received from Mr. Charles W. Reames, attorney, Medford, who represents Mr. Lamport, stating that Mr. Lamport is agreeable to leasing the land upon which the building is situate or will sell the building to the state. The State Parks Superintendent, who was present, advised that he does not need the building in connection with the operation of this park. Following discussion the Commission, by unanimous vote, authorized the Chief Counsel to offer Mr. Lamport the sum of $500 for this building, the owner to be given the privilege of salvaging it if he so desires, and will remove it piece by piece inasmuch as it cannot be removed whole without destroying tree growth.

The Chief Counsel also reported on the request of the Deschutes County Advertising Committee for permission to erect rustic-type signs on state highways in the Central Oregon Recreational Area. He advised that the Commission has authority to maintain such type of sign and to delegate such authority to others if it so desires; however, he would not recommend that such authority be transferred except to a public agency. He pointed out that the sponsor of the project is an "advertising" committee which, he understands, is composed of members of the Deschutes County Chamber of Commerce, and, although there is no direct evidence that this is a public agency, he suggested, in view thereof, that if the Commission acts favorably on the request the privilege be granted to Deschutes County and the Chamber of Commerce, which are public agencies, if they will assume the responsibility for the signs.

The Commission approved the recommendation and referred the matter to the Chief Counsel and the Engineer for further handling.

The Engineer reported on investigations of three Columbia River Highway improvement projects requested by a delegation from Hood River at the meeting on September 23 and 24, 1946 — Cascade Locks-Herman Creek Section, Shell Rock Mountain-Warren Creek Section, and a section one mile in length east from Viento. He estimated the cost to construct the first of these projects, 2.93 miles in length, at $360,000; the second, one mile in length, at $250,000; and the third at $200,000. He recommended that the request be denied because there is no way to finance the work at the present time and because, in his estimation, the traffic hazard would be increased rather than relieved, particularly at each end of each of the improved sections by reason of the transition from an improved section of highway to an unimproved section. The projects are meritorious, he said, but he suggested, because of the hazard feature, that the request be denied and in lieu thereof that the Commission extend the presently-improved highway easterly from its present terminus at Cascade Locks as soon as funds can be spared to finance the work. The Commission approved the Engineer's recommendation.

The Engineer reported that, in conformity with authority previously given by the Commission, the sale of a building at Cannon Beach was advertised for bids to be received in Salem on November 12; however, no bids were received. The Commission took no action.

The Commission discussed briefly matters pertaining to furnishing additional ferry service across the Columbia River at Astoria. In this connection the Engineer reported receipt of offers from three different concerns to supervise the design and construction of a new ferry boat. Representatives of the three concerns, he said, will appear before the Commission on the following day to discuss details. The Commission expressed a willingness to confer with the applicants, however, decided that a decision with respect thereto should be deferred until a later date. (See further discussion on following day when applicants were present.)

The Secretary presented a letter from the Hood River County Court recommending a location north of the Union Pacific Railroad for the permanent location of the Columbia River Highway through the town of Hood River. The Commission ordered the communication filed for future reference.

The Commission had under discussion a resolution from the Clackamas County Court requesting the designation as a state secondary highway of the county road which extends from Estacada to Milwaukie, which request was presented to the Commission orally by a delegation which appeared before the Commission on August 7, 1946. It appears that Clackamas County is not financially able to maintain this road, which is used extensively by log haulers in truck hauling logs to Portland and dumps in the Willamette River from the upper reaches of the Clackamas River, so unless some other agency furnishes funds with which to keep this road in repair all log hauling thereover must cease. It also appears that the Federal Government is particularly interested in the project because of the sale of National Forest timber in the Clackamas

district; moreover, a considerable amount of Federal funds is now being expended to finance timber access road construction within the borders of the National Forest, which expenditure will be of no particular benefit unless the roads outside of the National Forest are also improved.

The Engineer advised that about six miles of the road is now a secondary state highway and the balance, about 20 miles, is county road; also, that investi ation reveals that to improve the entire route to proper standards would cost abeut $550,000. The Federal Housing Authority, he said, has agreed to contribute the sum of $275,000 toward the expense on the condition that either the state or the county will contribute a like amount and will assume future maintenance of the road. He estimated that the maintenance expense for the first year would amount to about $75,000 and the cost of the survey about $25,000, so in the event the Commission should accept the offer of the Federal Housing Authority it would mean committing state funds to the extent of approximately $375,000 for the first year. The maintenance cost thereafter, he said, would be from $10,000 to $15,000 annually. He advised that the matter has been discussed with the county court, which has agreed to furnish a right of way 60 feet wide throughout the entire section and additional right of way as may be required at sharp curves. He pointed out that there are approximately 2,400 miles of state highways that are used by log haulers and that there is a serious shortage of equipment to maintain such mileage. He further stated that after inspecting the road and consulting with Chairman Banfield he informed the Federal Housing Authority that he would recommend to the Commission acceptance of its offer if the Federal Housing Authority would make arrangements for the state to purchase from Government surplus property road-building equipment sufficient to maintain 2,400 miles of highway that are used by log haulers throughout the state.

Chairman Banfield advised that he informed County Judge E. L. Pope that if the Highway Commission took over jurisdiction of this road it would insist that the county furnish a 60-foot right of way throughout and additional right of way at curves so that long logs and piling could be transported around these points without taking up more than half the traveled portion of the roadway. He gave as his thought that the Commission should give serious consideration to the assumption of this obligation if the right of way is furnished and if equipment can be obtained from the Federal Government; however, in his estimation, the Commission should defer its decision until it is known just what the other interested people will do. Following discussion Commissioners Schaupp and Chandler approved the suggestion offered by Chairman Banfield, making it unanimous. The Engineer was thereupon instructed to convey to the Federal authorities the action taken and to make it clear that as a first condition the Commission insists that its equipment requirements be satisfied.

A letter was presented from the City of Umatilla requesting improvement of the Columbia River Highway through this town by widening for four lanes of traffic in order to relieve traffic congestion and the hazards incident thereto. The Engineer advised that the proposed improvement requested is about one mile in length and is being requested by the city in anticipation of a very large growth during construction of the McNary Dam, so it has merit. He requested authority to make a survey of the project which he estimated would cost about $600. The Commission, by unanimous vote, authorized the sur-

vey on the condition that it is assuming no obligation whatsoever as to construction. The Secretary was instructed to so inform the City of Umatilla.

The Engineer presented for the Commission's consideration a list of roadside landscaping projects prepared by the Landscape Department for financing for the most part with Federal funds, totaling approximately $140,000, and representing about 75 percent of the total of the projects that are being studied. The estimated cost of the major projects, he said, is $127,000, which will be paid with Federal Aid Funds on the customary basis, and the cost to construct the minor projects is estimated at $13,000, to be paid with state funds. He requested authority from the Commission to prepare plans and specifications for the work which he estimated would cost approximately five percent of the cost of construction. In the discussion of this matter it was pointed out that because of Federal requirements it is mandatory that the Commission perform a certain amount of this type of work. In view thereof, the Commission referred the matter to the Parks Department to work up these projects along with the other projects in the park program.

The Commission by unanimous vote confirmed the Engineer's award of the following contracts, bids for which were received by the Commission at its meeting on October 28, 1946, upon assurance by the Engineer that the conditions of the awards have been satisfied:

> Grading and paving the Jantzen Beach Section of the Pacific Highway, Multnomah County; contract awarded on November 8 to Edelfsen-Weygandt Co., low bidder;
>
> Grading and oil-mat surfacing and construction of a bridge on the Tutuilla Section of the Pendleton-John Day Highway, Umatilla County; contract awarded on November 21 to John A. Logan, low bidder.

A letter was presented from H. T. Botts, attorney, Tillamook, requesting, in behalf of Casper Robitsch, construction of a cattle pass across U.S. Highway No. 101 nine miles south of Tillamook. The Engineer advised that this matter has been before the Commission on two previous occasions and each time the Commission denied the request because it appeared to be a private matter, the Commission being averse to an expenditure of state funds for private gain. He recommended that the request be denied but that Mr. Robitsch be allowed to construct a cattle pass on his own account and at his own expense if he desires to do so and will do the work in conformity with a design approved by the State Highway Department. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion a plan submitted by the City of McMinnville for the cooperative improvement of the Pacific Highway West (U.S. 99W) in the City of McMinnville. The Engineer explained that, according to this plan, the state is obligated to spend approximately $473,000 for construction and the city, approximately $25,000 for reconstruction of water, gas, electric, and other public and private utilities and for the removal of

encroaching signs and other facilities, such as gas tanks, etc. In addition thereto, the city wants the state to construct a pedestrian underpass, estimated to cost an additional $15,000, which was not contemplated under the original arrangement, such underpass to be for the benefit and use of Linfield College. He advised that the improvement is scheduled for construction in the Postwar Program, the sum of $500,000 having been provided therefor, but it does not include the extra work proposed by the city. He was instructed by the Commission to inform the city and Linfield College authorities that the Commission previously approved the project on a certain basis and is not inclined to change the "setup" or to do the extra work.

A petition was presented from residents of Lane County requesting repairs to the Alsea-Deadwood Secondary Highway so as to permit the truck hauling of logs. The Engineer advised that this road is crooked and narrow, never having been improved to state highway standards. He estimated that it would cost about $22,500 to construct turn-outs so vehicles could pass safely and to do other necessary work. He gave as his understanding that a delegation is to appear on the following day concerning the project. In view thereof the Commission deferred a decision in the matter pending a conference with this delegation. (The delegation did not make an appearance at this meeting.)

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

J. F. Johnston, Contract No. 2748, for construction of a bridge over Pudding River on the Pacific Highway East at Aurora, in Clackamas and Marion Counties, requested an extension of time of 273 days, from October 31, 1946, to July 31, 1947, within which to complete this job. He gave no reason for his failure to complete the project within the specified time limit. The Engineer advised that work on this structure will be far enough advanced by May 31, 1947, to permit traffic to use the new bridge and all work, including the removal of the old structure and the cleaning up of the site, should be completed by July 31, 1947. He attributed the failure of the contractor to complete the project within the specified time limit to shortage of men and materials, and in view thereof he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Del R. Beebe, Contract No. 2760, for re-oiling and rock production on the Flight Strip-McDermitt Section of the I.O.N. Highway, in Malheur County, requested an additional extension of time of seven days, from October 10 to October 17, 1946, within which to complete this job. He attributed his failure to complete the project within the previously-extended time limit to difficulties in securing equipment and efficient skilled labor. The Engineer recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Adler Construction Co., Contract No. 2791, for grading the Mill Creek-Miller Flat Section of the Warm Springs Highway, in Jefferson and Wasco Counties, requested an extension of time of 30 days, from October 31 to November 30, 1946, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: (1) More solid lava rock in shallow cut sections than was anticipated, (2) Difficulties experienced in obtaining skilled labor, and (3) Delays in delivery of culvert pipe. The Engineer advised that the reasons given for overrunning the time limit are substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. S. Risley, Contract No. 2817, for oiling and rock production on the Robertson Bridge-Hayes Hill-Shattuck Corner Section of the Rogue River Loop Secondary Highway and the Redwood Highway, in Josephine County, requested an extension of time of 212 days, from November 30, 1946, to June 30, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to delays in getting the work started, it being necessary for him to complete the contract with the State Highway Commission at Parkdale before starting the new work. He explained, however, that all of the work except the actual oiling will be completed before December 15, 1946. The Engineer advised that the reasons given by the contractor for delay in performing the work on time are substantially correct. He further stated that the delay will not increase the expense of engineering supervision, and he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

A. D. Ford & Son, Contract No. 2800, for construction of the Vadis Overcrossing on the Sunset Highway, in Washington County, requested an extension of time of 150 days, from November 30, 1946, to April 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to labor and material shortages. The Engineer advised that the contractor expedited this project as much as possible but could not complete it within the specified time limit for reasons stated. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2757, 2760, 2781, 2783, 2784, 2811 and 2828 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2757, with Rogers Construction Co., for surfacing and oiling on the Malheur River–Juntura Section of the Central Oregon Highway in Harney County; completed November 6, 1946.

Contract No. 2760, with Del R. Beebe, for re-oiling and rock production on the Flight Strip McDermitt Section of the I.O.N. Highway in Malheur County; completed October 17, 1946.

Contract No. 2781, with Philpott and Buckingham, for placing of new timbers in two 105' truss spans in Vine Maple Bridge over Nehalem River on Fishhawk Falls Secondary Highway in Clatsop County; completed August 13, 1946.

Contract No. 2783, with Porter W. Yett, for grading, surfacing and oiling on the Campbell Bridge–Hazeldale Section of the Farmington Secondary Highway in Washington County; completed November 14, 1946.

Contract No. 2784, with Babler Bros., for grading and oil-mat surfacing on the Woodworth Acres–Parkdale Section of the Hood River Secondary Highway in Hood River County; completed September 28, 1946.

Contract No. 2811, with M. C. Lininger and Sons, for furnishing crushed rock in stockpiles on the Ashland–State Line Section of the Pacific Highway in Jackson County; completed October 5, 1946.

Contract No. 2828, with Loyd Calkins, for slide correction on the Hogg Rock Section of the Santiam Highway in Linn County, completed October 29, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer asked the Commission to confirm the telephonic authority given him to purchase four motor repair buildings at Camp Adair for $450 each, totaling $1,800, which have been offered to the state by the War Assets Administration on the condition that they are removed within 45 days, and to confirm the telephonic authority to purchase, move and re-erect these buildings, which is estimated to cost a total of $12,000. The Commission by unanimous vote confirmed the telephonic authority previously given with respect to both matters.

A letter was presented from the Klamath County Chamber of Commerce suggesting the erection of a marker on The Dalles-California Highway near Algoma giving information concerning Upper Klamath Lake. Motion was made by Commissioner Schaupp that the matter be referred to the Memorials Committee of the Oregon Historical Society for recommendation. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

The Engineer reported that the towns of Grass Valley, Ocean Lake, Scio, Sumpter, and Wallowa have met the legal requirements with respect to the expenditure of 1945 State Tax Street Funds which they received in 1946 and that the plans for the several improvements have been checked and found satisfactory. He recommended approval of the plans as required by statute. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Grass Valley	$ 306.41
Oceanlake	836.62
Scio	527.21
Sumpter	630.84
Wallowa	1,258.68

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Grass Valley - Market Street, 2nd Street

Oceanlake - Oregon Avenue, Nob View Drive, Summit Avenue, Darrell Avenue, Broadway, Lincoln Street, Floral Avenue, Hoyt Street, Jackson Street, August Avenue

Scio - Main Street, North Street, West Street, Smith Street, Wheeler Street, Mill Street

Sumpter - Mill Street, West High Street, Cracker Street, Granite Street, Austin Street, Auborn Street

Wallowa – Greenwood Street, 4th Street, 3rd Street, 2nd Street, Pine Street, Douglas Street, Clairemont Street, Spruce Street, alley between Alder Street and Pine Street south of First.

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Scio and approved by the State Highway Commission on June 26, 1946 shall be canceled, in accordance with the request of the City of Scio on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 25th day of November, 1946.

The Commission had under discussion resolutions from the Clackamas County Court requesting the rerouting of the Woodburn-Sandy Secondary Highway from Main Street to First Avenue in the town of Sandy. The Engineer recommended approval of the request because it would provide for a more direct connection between this highway and the Mt. Hood Highway and would relieve the state of maintenance of one-quarter of a mile of city streets. The Commission approved the recommendation and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, under the provisions of Sec. 100-115, O.C.L.A., the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

13483

WHEREAS, the State Highway Commission, by mutual agreement with the Clackamas County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Woodburn-Sandy Secondary State Highway No. 161, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Clackamas County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Sec. 100-115 O.C.L.A., the hereinafter described section of the Woodburn-Sandy Secondary Highway No. 161, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the County Court of Clackamas County of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Woodburn-Sandy Secondary Highway No. 161 shall, under the provisions of the laws of Oregon, become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Clackamas County or the Town of Sandy, as the county and town authorities may agree;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Woodburn-Sandy Secondary State Highway No. 161, is hereby eliminated and removed from the Secondary State Highway System, to wit:

A Section of the Woodburn-Sandy Secondary State Highway No. 161

Beginning at the intersection of Main Street and First Avenue in the Town of Sandy, Clackamas County, Oregon; thence in a northeasterly direction via Main Street to the intersection of Main Street and Belmont Street, also being the intersection of Main Street with the Mt. Hood State Highway, a distance of 0.19 mile.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road or city street, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Clackamas County or the Town of Sandy, as the county and town authorities may agree, and as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Clackamas County.

WHEREAS, under the provisions of Sec. 100-115 O.C.L.A., the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Clackamas County Court of the State of Oregon, has selected the road, street or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said road, street or highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described section of city street in the Town of Sandy, Clackamas County, Oregon, shall be added to and become a part of the state secondary highway system, to wit:

A Section of the Woodburn-Sandy Secondary State Highway No. 161

Beginning at the intersection of Main Street and First Avenue in the Town of Sandy, Clackamas County, State of Oregon; thence north via First Avenue to the intersection of First Avenue and Belmont Street, also being the intersection of First Avenue with the Mt. Hood Highway, a distance of 0.07 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Sec. 100-115, O.C.L.A.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Clackamas County.

The Commission discussed a proposed agreement with the Clackamas County Court concerning the abandonment of portions of the old right of way of the Woodburn-Sandy Secondary State Highway when this highway has been reconstructed on permanent alignment. The Engineer advised that this highway improvement is scheduled for construction in the near future and that the agreement is simply to provide a mutual understanding with the county court with respect to the disposition of those portions of the present right of way which will no longer be of benefit for state highway purposes when the proposed improvement is completed. He recommended approval and execution of the agreement as prepared. The Commission approved the recommendation by unanimous vote. (The agreement was signed by the Commission on the following day.)

The Secretary presented a request from the Albany Junior Chamber of Commerce and the City of Albany for use of Waverly Lake in connection with its Timber Carnival, which is scheduled to be held on July 2, 3 and 4, 1947. The Engineer recommended approval of the request. The Commission approved the request by unanimous vote subject to the same conditions under which a similar privilege was granted this year.

The Secretary presented requests for the establishment of reduced speed zones in Roseburg and at Twin Rocks. Action on these matters was deferred by the Commission pending receipt of more information from the Engineer.

The Commission also considered a request for the establishment of a "no parking" zone in the City of Eugene. The Commission deferred action thereon pending adoption by the city of an ordinance approving such "no parking" zone.

The Commission had under discussion the advisability of penalizing Mr. W. H. Hawes, log hauler, who refused to allow his load to be weighed by Highway Department Weighmasters. The Engineer explained the violation in detail and reported the record of Mr. Hawes' operations for this year. It appeared from the evidence submitted that the Weighmasters did not follow through when they first observed Mr. Hawes "laying out" by the side of the road, so there is a question whether or not there is full justification for the cancellation of Mr. Hawes' permit. In view of this question the Commission decided not to cancel this permit for this violation, however, instructed the Secretary to inform Mr. Hawes that a repetition of the offense will mean the cancellation of his permit. The Engineer was instructed to have the Weighmasters follow through in cases of this kind and ascertain why the driver of the truck refuses to allow his load to be weighed.

The Commission discussed a proposed agreement with Gilliam County concerning the abandonment of a portion of the right of way of the Wasco-Heppner Secondary Highway west of Condon when this section has been reconstructed on revised alignment. The Engineer advised that the Commission is taking bids on the following day for this highway improvement. He recommended, if a satisfactory bid is received, that the award of the contract be held pending execution of the agreement by the county, inasmuch as it is the standard practice of the Commission to have such agreements completed in advance of the contract awards. Following discussion the Commission approved the agreement by unanimous vote but deferred signing it until it first has been signed by the Gilliam County Court. The Commission decided not to award the contract for this project unless and until the County Court signs the agreement.

The Engineer brought up for discussion the matter of continuing the weight concessions heretofore extended to transporters of petroleum products during the wartime period when there was a shortage of gasoline. He explained that the Commission, in January 1944, adopted two resolutions authorizing the issuance of revocable permits covering such movements wherein the overall length of the combination of vehicles shall not exceed 60 feet and the gross

weight shall not exceed that determined by the formula W = 800 (L+40) plus a two percent gross weight tolerance. The oversize concession, he said, was granted in order to allow operation over Oregon highways of equipment that is legal in California; however, the reasons that prompted the concession no longer exist. He recommended the revocation of all outstanding permits that allow the continuous operation of loads having a gross weight based on the formula W = 800 (L+40) but that the two percent tolerance be continued. The Commission concurred in the Engineer's viewpoint and thereupon ordered the cancellation of all such permits effective January 1, 1947.

The Commission discussed the setting of a date for its next two regular meetings and decided definitely to hold the first of such meetings in Portland on Monday and Tuesday, December 30 and 31, 1946, and tentatively to hold the next meeting in Portland on Monday and Tuesday, February 3 and 4, 1947. The Secretary was instructed to make the usual arrangements for the meeting place.

The Engineer brought up for discussion matters pertaining to the preparation of the 17th Biennial Report of the State Highway Commission to the Governor covering the period July 1, 1944, to June 30, 1946, but action thereon was deferred by the Commission pending study.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. the following day in the auditorium of the Public Service Building.

Portland, Oregon
November 26, 1946

The meeting of the State Highway Commission reconvened at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

NEHALEM SECONDARY HIGHWAY IN COLUMBIA COUNTY
BIRKENFELD-WASHINGTON COUNTY LINE ROCK PRODUCTION PROJECT

A. H. Saxton & Son, Corvallis	$ 36,080.00
Jed Wilson, Seaside	38,430.00
J. S. Risley, Milwaukie	38,435.00

COOS RIVER SECONDARY HIGHWAY IN COOS COUNTY
ENEGREN FERRY SECTION

Coos Bay Dredging Co., Coos Bay	$ 35,954.00
Dobyns & Webb, Salem	44,911.00

PACIFIC HIGHWAY IN DOUGLAS COUNTY
JOHNS–GLENDALE JUNCTION SECTION
BRIDGES OVER COW CREEK AND QUINES CREEK

Sleeper & Keyes, Bend	$ 65,770.00
Lockyear & White, Inc., Seattle, Wn.	92,880.00
R. A. Heintz - Constr., Portland	97,000.00

WASCO–HEPPNER SECONDARY HIGHWAY IN GILLIAM COUNTY
HAY CREEK–CONDON SECTION

E. C. Hall Co., Portland	$148,069.00
Babler Bros., Portland	156,957.00
O. C. Yocom Co., McMinnville	161,951.00
Vernie Jarl, Gresham	166,766.00
Natt McDougall Co., Portland	208,804.05
Sound Constr. & Engr. Co., Seattle, Wn.	212,666.00

JOHN DAY–BURNS HIGHWAY IN GRANT COUNTY
CANYON CITY–SODA MOUNTAIN ROCK PRODUCTION PROJECT (1)

Newport, Kern & Kibbe, Portland *	$ 28,320.00
Jack R. Taggart, Salem	29,600.00

* Bidder will not accept this project alone.

JOHN DAY ROCK PRODUCTION PROJECT IN GRANT COUNTY
ON FOUR STATE HIGHWAYS (2)

Struss & McCoy, Redmond	$ 41,990.00
Jack R. Taggart, Salem	43,350.00
Newport, Kern & Kibbe, Portland	45,730.00
A. H. Saxton & Son, Corvallis	46,660.00

COMBINATION BIDS FOR ABOVE TWO PROJECTS

	(1)	(2)	Reduc.	Comb. Bid
Jack R. Taggart	$29,600.00		None	$71,590.00
Struss & McCoy		$41,990.00	None	
Newport, Kern & Kibbe	28,320.00	45,730.00	None	$74,050.00

GREEN SPRINGS HIGHWAY IN JACKSON AND KLAMATH COUNTIES
SISKIYOU JUNCTION-LONG PRAIRIE CREEK ROCK PRODUCTION PROJECT

M. C. Lindinger & Sons, Medford $ 42,815.00

I. O. N. HIGHWAY IN MALHEUR COUNTY
JORDAN CREEK-ROCK CREEK ROCK PRODUCTION PROJECT

No bids received

HEPPNER-SPRAY SECONDARY HIGHWAY IN MORROW COUNTY
HARDMAN HILL SECTION

J. S. Risley, Milwaukie	$117,718.00
E. C. Hall Co., Portland	126,784.00
Leonard & Slate Oreg. Ltd., Portland	128,010.00

COVE SECONDARY HIGHWAY IN UNION COUNTY
COVE-UNION SECTION

E. C. Hall Co., Portland $201,622.00

Consideration was given by the Commission to the request of White Bros. Co. for release of the bid bond which they furnished on May 16, 1946, in connection with their proposal for the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County, which matter was deferred from the previous meeting. Chairman Banfield gave as his thought that the bond should be forfeited because, in his estimation, sufficient information was given the contractor to enable him to submit a bona fide bid. Commissioners Schaupp and Chandler concurred, whereupon the Commission, by unanimous vote, instructed the Chief Counsel to do what is necessary to collect the amount of the bid bond.

The Engineer reported briefly on the request of the Weyerhaeuser Timber Co. to construct its logging railroad at grade across the Pacific Highway at Sutherlin. He advised that he inspected the premises in company with a representative of the Company and ascertained no facts that would justify him to change his previous recommendation that railroad and highway traffic be separated at this point; also, that the Company is now making further investigations and when the results thereof have been reported to him a full report will be rendered to the Commission.

The Commission discussed the offer of Judge E. C. Latourette to purchase a small parcel of state-owned land situate between U.S. 99E and the Willamette River at the end of Fifth Street in Oregon City. The Engineer recommended against the sale of this property for reasons stated at the previous meeting. Commissioner Schaupp gave as his opinion that the area should not be used as a parking lot because cars entering and leaving it would create

a definite hazard for highway traffic. Chairman Banfield pointed out that no special hazard exists under present conditions but that a hazard could be created by improper use of the area. He expressed himself in favor of keeping the area if the Engineer and the Chief Counsel recommend against its sale. The Engineer and the Chief Counsel recommended retention of the property by the state in view of the circumstances. The Commission approved the recommendation by unanimous vote. The Secretary was instructed to convey the action to Judge Latourette and to explain to him that the Commission is now considering the advisability of establishing a "no parking" zone in front of the property as an additional safeguard to highway traffic at this point.

Chairman Banfield brought up for discussion the question of whether or not the State Highway Commission, in approving the designation of Columbia Street in the City of Portland as a one-way traffic street, assumes a responsibility to maintain such street which, prior to such designation, was maintained by the City of Portland as are other city streets that are not state highway routes. The Chief Counsel advised that if the State Highway Commission takes the initiative in routing traffic over any city street then it automatically assumes the obligation to maintain such street; however, if the initiative in such matters is taken by the city and the State Highway Commission simply approves the action taken by the city, as occurred in this instance, then the responsibility to maintain the street rests solely with the city because it is only a solution of one of the city's traffic problems. The Commission ordered that this point be made perfectly clear to the city authorities.

The Commission discussed a proposed agreement with Mr. Henry Zorn for the renewal of the agreement covering the rental of property in Champoeg State Park. The State Parks Superintendent advised that the Chief Counsel and he have gone into the rental feature as instructed by the Commission at the previous meeting and are of the opinion that the $3.00 per acre rental charge should not be increased because Mr. Zorn has gone to considerable expense in clearing and draining the property and otherwise keeping it in good condition. It was his thought that Mr. Zorn should be given credit for such improvements and that the agreement should be continued on the previous basis. The Chief Counsel stated he felt that Mr. Zorn is entitled to such consideration. He suggested, in order that the record may be clear, that a paragraph be added to the form of agreement in explanation of the low rental rate. The Commission approved the suggestion by unanimous vote. Execution of the agreement was deferred pending revision of the agreement in that respect.

The Chief Counsel reported an inquiry from a property owner on the Oregon Coast Highway south of Waldport as to the Commission's plans for the improvement of this highway along his property frontage, which is about 1,500 feet in length. It appears that this party wishes to subdivide his property in harmony with the plans for the highway. The Chief Counsel requested instructions to enable him to negotiate with the property owner for extra width right of way if needed and at the same time to acquire right of access to the highway from the property. The Engineer suggested that it would be advisable to acquire a small strip of land in any event in order to control access pro-

vided the cost is not exorbitant. The Commission ordered a joint report from the Engineer and the Chief Counsel on the subject.

In addition to other matters of unfinished business the Commission considered the following:

(1) Request for the improvement of the Fox Hollow Secondary Highway from Eugene south about four miles,

(2) Request for sidewalk construction along the Santiam Highway at Sweet Home,

(3) Request for sidewalk construction along the Bertha-Beaverton Highway from Westdale Addition to Beaverton,

(4) Request for sidewalk construction along the Beaverton-Aurora Secondary Highway from Aurora westerly a distance of about one-half mile.

The Engineer advised that provision for these improvements is made in the 1947 Minor Betterment Budget which the Commission considered at its meeting on the previous day.

Mr. Gustave E. Martin and his attorney, Mr. F. Leo Smith, Portland, appeared before the Commission in response to the Commission's request to show cause why his log-hauling permit should not be canceled because of his repeated violations of the rules and regulations which govern his operations. The Secretary read aloud a letter from the Assistant Maintenance Engineer reciting Mr. Martin's offenses, which include a "lay-out" in order to avoid having his load weighed.

Attorney Leo Smith stated that the information as given in the report is substantially correct but that Mr. Martin's position is such that he has little choice in the size of the load placed on his truck by the loaders, and even though he might desire to fully comply with the law he does have to take overloads occasionally in order to avoid being loaded short.

Chairman Banfield pointed out the seriousness of the offenses and inquired what steps Mr. Martin plans to take in order to assure the Commission that he will not overload in the future, adding that the loading should be controlled in such a manner that there should never be any overloads. Mr. Martin replied that he has no discretion in the matter because the Vancouver Plywood Corporation, which owns the timber, has charge of the loading operations. He suggested that it might be advisable to take up the matter with the Vancouver Plywood Corporation. He also said that he wants to comply with the law and is not desirous of having overloads because they are injurious to his equipment and because of the possibility of his being forced out of business.

In the discussion that followed Chairman Banfield pointed out that the weights allowed are set by the Legislature and must be respected, that all

operators must comply with the requirements, and that the Commission will expect Mr. Martin to do so in connection with his future operations. Commissioner Chandler reminded Mr. Martin that the responsibility from this time forward with respect to violations is entirely with him and that any future violations will result in the permanent cancellation of his permit. Commissioner Schaupp asserted that an unpardonable sin among log haulers is for them to "lay-out" along the highways with their loads to avoid being weighed. It was the Commission's considered opinion that Mr. Martin's permit should not be canceled for the present offense if he will write a letter to the State Highway Engineer outlining his position in this matter and stating his willingness hereafter to comply with the requirements in his future operations.

In the discussion of the foregoing matter, the Commission noted the log-hauling record of the Vancouver Plywood Corporation which reveals six overweight loads of sixteen weighed by state weighmasters. The Secretary was instructed to ask the company to appear before the Commission at its next meeting to explain the reason for the overloads and to give reasons why its permit should not be canceled.

Also, in connection with the foregoing matter, the Commission ordered that hereafter the weighmasters be directed to continue the checking of trucks observed "laying-out", and if necessary, to wait over long periods of time in order to obtain the exact weight of their loads.

A delegation from Hood River, consisting of R. E. Steele, Manager, Chamber of Commerce; Arthur Howell, County Judge, Hood River County; R. W. Arens, County Commissioner; and F. V. Garrabraut, Councilman, appeared before the Commission regarding the designation of a permanent route for the Columbia River Highway through this town. Mr. Steele headed the group. He advised that both the Hood River City Council and the County Court of Hood River County have gone on record in favor of the route north of the Union Pacific Railroad tracks, and in support thereof presented a letter from Hon. J. C. Meyer, Mayor of Hood River; a letter from the Hood River County Court; a letter from the Apple Growers Association; a resolution from the Upper Valley Booster Club, a letter from Mr. C. O. Bunnell, Hood River Chamber of Commerce; and a resolution from the Hood River Chamber of Commerce, all of which favor such routing.

Chairman Banfield recalled that the Highway Commission, some two years ago, told the people of Hood River that it would decide the permanent highway location when the people of Hood River made it known which location they preferred. He advised that the Commission is still of the same mind, and, if the letters presented fulfill the requirements, the Commission will then authorize a survey, but it will not make any commitment whatsoever as to construction. The letters presented by Mr. Steele were thereupon referred by the Commission to the Chief Counsel for scrutiny and report.

The question as to the selection of a location for this highway west from Hood River to a point near the Columbia Gorge Hotel was also discussed. The Engineer exhibited a map showing two locations under considera-

tion, one of which involves the crossing of the Union Pacific Railroad Company's tracks, the other following a lower alignment and involving construction in deep water in the Columbia River. Both locations involve the acquisition of right of access to the highway. He advised that he has not yet analyzed the alternate locations thoroughly but will do so and render a report and recommendation later if the Commission approves. As a result of discussion the Engineer was authorized by the Commission to investigate the alternate routes.

Mr. Steele inquired what action the Commission has taken on their request previously made for the improvement of the Columbia River Highway at three points in Hood River County -- at Herman Creek, at the east end of Shell Rock Mountain, and a section one mile in length east from Viento. He was informed by Chairman Banfield that the Commission had this matter under discussion on the previous day and decided not to make the improvements because of the cost involved and for the further reason that, in the minds of the Commission and the Engineer, were the improvements undertaken it would mean increasing the traffic hazards rather than reducing them, inasmuch as they would introduce into the alignment several abrupt changes from a completed highway section to an incompleted section, which would be conducive of accidents. Mr. Steele then brought up for discussion the general improvement of the Columbia River Highway and suggested, since bids for dredging work contemplated in connection with projects heretofore advertised have been excessive, that the Commission change the program by substituting projects located on higher ground, between Dodson and Hood River. He was informed that the program for this highway has already been arranged and the Commission is not inclined to revise it at this time.

Mr. Steele also asked the Commission to preserve standing timber along the Columbia River Highway and urged favorable action soon to that end because the timber is now being cut. He was informed that the Commission has placed matters of this kind in the hands of the State Parks Superintendent, and is holding him responsible. The Commission, he said, has not yet received a recommendation from the Parks Superintendent that such timber strips should be acquired, and until such recommendation is made the Commission will not act.

A delegation from Eugene, consisting of Hon. Earl McNutt, Mayor; Deare Seeger, City Manager; William Davis, City Councilman; William East, City Attorney; William Tugman, Eugene Register-Guard; Ed Turnbull, Chairman, Highway Committee, Chamber of Commerce; Hon. Clinton Hurd, County Judge, Lane County; County Commissioners Allen Wheeler and W. J. Holland; and P.M. Morse, County Engineer, appeared before the Commission regarding the proposed three-party project for the rerouting of the Pacific Highway along the Mill Race from Broadway to 6th Avenue, and including construction of a connection with the county road which extends northerly from the City of Eugene on the east side of the Willamette River. Mr. McNutt headed the group. He advised that the city has authorized a fund amounting to $500,000 to pay the city's share of the cost of this improvement, a bond issue of such amount having been voted for such a purpose, but that is the limit of funds available from city sources. He asked the Commission to give the city assurance that it would not be called

upon to contribute in excess of such amount, notwithstanding that, as they understand it, the present-day estimate of the city's share is in excess of the $500,000.

County Judge Clinton Hurd advised that Lane County does not have sufficient funds to pay for its portion of the work, including the new bridge over the Willamette River. He suggested an allocation of Federal Secondary Highway monies to this project and advised that the county would also look favorably on the exchange of this county road for the Alsea-Deadwood Road, which is now on the secondary highway system.

In the discussion of this matter it appeared to the Commission that the city and the county are asking the state to contribute the sum of approximately $100,000 more than was anticipated under the original agreement. Chairman Banfield recalled the original arrangement and gave as his understanding that the project was to be a city-county project and that the state was simply being asked to help out by contributing a certain sum to improve a section which was to be designated the route of the Pacific Highway. The Highway Commission, he said, is inclined to proceed on the original basis, but the question whether or not it will contribute an additional $100,000 of state money is one that cannot be answered until it has been studied thoroughly. The suggestion was made by Mr. Tugman that the state might advance funds in behalf of the city and the county with assurance that the state would be reimbursed later from funds that are apportioned to the city and the county by law from state highway revenues. He was informed that such matter also would have to be studied before an answer can be given and will be given consideration when the Commission checks with the Engineer and the Chief Counsel all matters pertaining to this project. This concluded the conference.

Mr. Ray Boals, Superintendent of the Eugene Water Board, and Mr. William Tugman also appeared before the Commission regarding the installation of a water pipe line on the Federal Secondary Highway between Coburg Road Junction and Marcola. Mr. Boals advised that the city is about to construct a new water main along this section and wants to make certain that the installation is in the proper location so that it will not have to be moved later on when the highway is improved, so will appreciate it if the Commission will authorize a survey to definitely locate the highway. The Commission authorized the Engineer to make a reconnaissance survey of the section. The information gathered is to be reported back to the Commission and the Eugene Water Board is to be advised of the action taken thereon.

The following representatives of L. S. Baier & Associates appeared before the Highway Commission regarding their offer to render service to the Commission in connection with the design and construction of a new ferry boat for use in connection with the state ferry operation across the Columbia River at Astoria:

L. S. Baier, President
J. M. Dyer, Member
Bruce Yergen, Member
Richard Schroeder, Member

They were informed by Chairman Banfield that the Commission has not yet had time to study the proposal so is not in position today to make a decision with respect to it. Various phases of the matter were discussed at considerable length but action on the proposal was deferred until the Commission has had an opportunity to discuss it with the Engineer and the Chief Counsel.

Messrs. L. R. Hussa, Claude Butler, and H. Davies, representing the Albina Machine and Engine Works, Inc., Portland, also appeared before the Commission regarding the design and construction of a new ferry boat for the ferry operation across the Columbia River at Astoria. They were informed by Chairman Banfield that the Commission feels that this is a matter which should be given very careful consideration and study, and that the Commission is not in position to make its decision until it has had an opportunity to discuss it thoroughly with the Engineer and the Chief Counsel, which the Commission hopes to do in the immediate future.

The Engineer requested authority for Construction Engineer H. G. Smith, Maintenance Engineer E. A. Collier, Bridge Engineer G. S. Paxson, and Acting Traffic Engineer, F. B. Crandall to attend, at state expense, the annual meeting of the American Association of State Highway Officials which is to be held in Los Angeles in December. Chairman Banfield recommended approval of the request. Commissioners Schaupp and Chandler concurred, making the decision unanimous.

The Commission recessed for luncheon at 12:15 p.m. and reconvened the meeting at 2:00 p.m. with the same persons present and participating.

Mr. Earl L. Dickson, Eugene, was present and asked the Commission to make three changes in the recently-completed highway improvement at the junction of the Pacific Highway and the McKenzie Highway just south of Eugene for the accommodation of people who desire to patronize his business establishment at this location — (1) "Clip off" the end of the traffic separator on the Eugene side of the intersection to allow traffic from Eugene access to his premises without first driving across the bridge to Springfield and returning. (2) Take off the end of the long concrete section in front of Mr. Dickson's store building so as to allow traffic to cross the highway in the face of Eugene-bound traffic at a point where visibility is clear. (3) Cut the main island at the center of the intersection to allow people access to a 30-foot street which he has provided for their use on his property.

In regard to Mr. Dickson's first request the Engineer advised that he has ascertained from personal inspection that it would be possible to take care of the matter by constructing a turn-around under the approach to the Springfield Bridge and that he so informed Mr. Dickson and advised him that he would present the matter to the Highway Commission if Mr. Dickson would secure the necessary right of way free of cost to the state; however, he has not heard anything from Mr. Dickson since then. He estimated the cost of constructing a turn-around in such location at approximately $10,000 and advised that, while it would serve the purpose, there are times when it would be flooded by

high water. He recommended construction of such a turn-around as a solution for Mr. Dickson's problem.

As to Mr. Dickson's second request, the Engineer recommended against removal of the divider strip because of the hazard that would be created if traffic were allowed to cross the highway directly in front of Springfield-Eugene traffic. Mr. Dickson declared that many people now either drive their cars over the barrier or around it and back up to the front of his building. It was his thought that the cutting of the barrier would stop such practice. The Engineer again pointed out the hazard that would be created were traffic permitted to cross the highway in the face of traffic from Springfield to Eugene. He advised that reports received from Springfield indicate that traffic at this point is now working the smoothest that it ever has. It was his thought that if people are doing the things mentioned by Mr. Dickson the solution is more efficient policing of the intersection. He suggested, in view of the fact that the new arrangement has been operating for only about three weeks, continuation of such use as now provided, under observation, and that changes be made later if deemed advisable. Commissioner Chandler expressed himself in favor of constructing the turn-around under the bridge approach, stating that in his estimation such a provision would satisfy the condition. Mr. Dickson agreed that that would help. The Commission's Chief Counsel advised that the Commission's prime and serious obligation is to the general public, which always must be given first consideration. Abutting land owners, he said, have no vested right on the highway, and, if the Commission were to adjust the highway facilities to accommodate a property owner, then the members of the Commission could be held personally liable in the event of accidents occurring.

Chairman Banfield concluded the discussion by advising Mr. Dickson that the Commission will analyze his request and ascertain what can be done to remedy the situation of which he speaks. (The matter was reconsidered by the Commission later in the session, at which time the Engineer was instructed by the Commission to investigate the conditions and report back regarding the feasibility of doing some of the things that have been requested by Mr. Dickson. The Chief Counsel was instructed to report on the cost to acquire the right of way for the turn-around proposed under the end of the Willamette River Bridge.)

A delegation from Clackamas County, including County Judge E. L. Pope; County Commissioner George Randall; Jimmie Olson, Manager-Editor, Oregon City Enterprise; and Ralph Milln, Assistant County Engineer, came before the Commission regarding the maintenance of the Estacada-Milwaukie County Road, which is being damaged by log-hauling traffic. Judge Pope was spokesman for the group. He pointed out the county's problem and explained what they have in mind as a solution therefor. The Engineer advised that inspection of the road reveals that it would cost about $550,000 to place it in first-class condition. In addition thereto, he said it would cost about $75,000 to strengthen and maintain it this year and approximately $25,000 to conduct a location survey that is required. Thereafter, he said, the maintenance cost would amount to from $10,000 to $15,000 annually. He mentioned the

offer of The Federal Housing Authority to contribute $275,000 toward the construction expense if either the state or the county will contribute a like amount. On such basis, he said, if the state assumes the obligation, it would mean a total contribution by the state for the first year of $375,000. He also advised that Clackamas County has agreed to finance a 60-foot right of way throughout and a wider right of way at turns in order to allow long loads of poles and piling to negotiate these turns with safety to other traffic.

Chairman Banfield advised that in a discussion of this matter he informed Judge Pope he would look with favor on the state assuming this obligation if the Federal Government will contribute $275,000 toward construction and will arrange so the state can purchase from Government Surplus Property a sufficient amount of equipment to maintain 2,400 miles of state highways over which logs are being hauled, it being impossible for the state properly to maintain these highways with equipment that is now on hand, and on the further condition that the county will acquire right of way as is needed. Commissioners Schaupp and Chandler expressed themselves as being in agreement with the plan suggested by Chairman Banfield, whereupon Chairman Banfield advised that the Commission would designate the road a state secondary highway if an when the conditions are fulfilled. The Engineer was thereupon authorized to make a location survey of the highway when the conditions are satisfied.

Mr. Sherman S. Smith, Attorney, Grants Pass, headed a delegation of property owners along the Johns-Glendale Junction Section of the Pacific Highway who asked the Commission to grant them right of access to the highway from their properties. The group included Jay B. Moore, George Dean, Wayne Johnson, and George Martin. Mr. Smith advised that the highway is now being constructed on the newly-adopted location which passes through the properties of the members of this group and, according to the present arrangement, these people are not going to be allowed access to the highway except in a limited way. He alleged that the highway as located passes through the several properties in such a manner that several holdings are severed, rendering valueless and unsalable the portions lying on the east side of the highway unless right of access to the highway from such portions is granted by the Commission. This matter was discussed at considerable length during which individual attention was given to property owned by each member of the delegation. The Chief Counsel explained that the question before the Commission is whether or not to grant access to the highway from these properties for commercial purposes and for development. Chairman Banfield pointed out that the State Highway Commission is guided and governed to a great extent in the building of highways by the rules and regulations promulgated by the Public Roads Administration in cases where Federal monies are involved, and accordingly, the Commission must obtain the approval of such Federal agency before it can authorize changes in the adopted plans. Unless the rules and regulations are met, he said, the state would stand to lose the Federal monies for the project. He advised that the Commission is not in position to pass on the request at this time but will discuss the matter with the Engineer and the Chief Counsel and then will take action. This concluded the conference except that Mr. Smith stated that some of the property owners feel, if they cannot have access to the highway from their properties, that the state should acquire their entire holdings rather than right of way only.

1240

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

Birkenfeld-Washington County Line Rock Production Project on the Nehalem Secondary Highway, in Columbia County; the bids were referred to the Engineer with authority to award the contract to the low bidder when certain conditions are satisfied.

Grading and surfacing the Knegren Ferry Section of the Coos River Secondary Highway, in Coos County. All bids received for this job were rejected.

Construct bridges over Cow Creek and Quines Creek on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County. This contract was awarded to the low bidder, Sleeper & Keyes.

Grading, surfacing, and oiling the Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County. The Commission approved the low bid but deferred the award of the contract pending execution of an agreement with Gilliam County with respect to the abandonment of a portion of the old right of way. The bids were referred to the Engineer with power to award the contract to the low bidder when this condition has been satisfied.

Canyon City-Soda Mountain Rock Production Project on the John Day-Burns Highway, in Grant County. The contract was awarded to Jack R. Taggart, the second low bidder, in view of the fact that the low bidder, Newport, Kern & Kibbe, qualified their bid by stating that they would not accept the award of this contract unless also awarded the contract for the John Day Rock Production Project, which was awarded to another contractor.

John Day Rock Production Project on four state highways, in Grant County. The Commission awarded this contract to the low bidder, Struss & McCoy.

Siskiyou Junction-Long Prairie Creek Rock Production Project on the Green Springs Highway, in Jackson and Klamath Counties. This contract was awarded to M. C. Lininger & Sons, the only bidder.

Jordan Creek-Rock Creek Rock Production Project on the I.O.N. Highway, in Malheur County. The Commission received no bids for this job.

Grading, surfacing, and oiling the Hardman Hill Section of the Heppner-Spray Secondary Highway, in Morrow County. The Commission rejected all bids for this job.

Grading and oil-mat surfacing the Cove-Union Section of the Cove Secondary Highway in Union County. The Commission approved the low and only bid received for this job but deferred the award of the contract pending approval by the Public Roads Administration. The bid was referred to the

Engineer with authority to award the contract when this condition has been satisfied.

At 3:15 p.m. Chairman Banfield publicly announced the awards, as follows:

"Birkenfeld-Washington County Line Rock Production Project on the Nehalem Secondary Highway, in Columbia County. The Commission received three bids for this job, the low one being that of A. H. Saxton & Son, Corvallis, in the amount of $36,080. The next low bid was that of Jed Wilson, Seaside, at $38,430. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Grading and surfacing the Enegren Ferry Section of the Coos River Secondary Highway, in Coos County. Coos Bay Dredging Co., Coos Bay, submitted the low bid for this job in the amount of $35,954. The only other bid was submitted by Dobyns & Webb, Salem, at $44,911. The Commission has rejected both bids.

"Construct bridges over Cow Creek and Quines Creek on the Johns-Glendale Junction Section of the Pacific Highway, in Douglas County. Sleeper and Keyes, Bend, submitted the low bid for this job at $65,770. Lockyear & White, Inc.,Seattle, submitted the next low bid in the amount of $92,880. There was one higher bidder. The Commission has awarded the contract to the low bidder, Sleeper & Keyes, at their bid price.

"Grading, surfacing, and oiling the Hay Creek-Condon Section of the Wasco-Heppner Secondary Highway, in Gilliam County. E. C. Hall Co., Portland, submitted the low bid for this job in the amount of $148,069. Babler Bros., Portland, submitted the next low bid in the amount of $156,957. There were four higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, E. C. Hall Co., when certain conditions are satisfied.

"Canyon City-Soda Mountain Rock Production Project on the John Day-Burns Highway, in Grant County. The low bidder for this project was Newport, Kern & Kibbe, Portland, at $28,320. They qualified their bid by stating that they would not accept the award of this contract unless also awarded the contract for the John Day Rock Production Project. Jack R. Taggart, Salem, submitted the next low and only other bid in the amount of $29,600. The Commission has awarded this contract to Jack R. Taggart in view of the fact that Newport, Kern & Kibbe were not the successful bidders for the John Day Rock Production Project.

"John Day Rock Production Project on four state highways, in Grant County. Struss & McCoy, Redmond, were the low bidders at $41,990. Jack R. Taggart, Salem, was the second low bidder at $43,350. There were two higher bidders. The Commission has awarded this contract to the low bidder, Struss & McCoy, at their bid price.

"Siskiyou Junction–Long Prairie Creek Rock Production Project on the Green Springs Highway, in Jackson and Klamath Counties. The only bid received for this job was that of M. C. Lininger & Sons, Medford, at $42,815. The Commission has accepted the bid and has awarded the contract to M. C. Lininger & Sons at their bid price.

"Jordan Creek–Rock Creek Rock Production Project on the I.O.N. Highway, in Malheur County. The Commission received no bids for this project.

"Grading, surfacing, and oiling the Hardman Hill Section of the Heppner–Spray Secondary Highway, in Morrow County. J. S. Risley, Milwaukie, submitted the low bid for this project in the amount of $117,718. The next low bid was that of E. C. Hall Co., Portland, at $126,784. There was one higher bidder. The Commission has rejected all bids for this job.

"Grading and oil-mat surfacing the Cove–Union Section of the Cove Secondary Highway, in Union County. The only bidder for this project was E. C. Hall Co., Portland, at $201,622. The Commission has referred the bid to the Engineer with authority to award the contract to this bidder when certain conditions have been satisfied."

Mr. Robert A. Smith, representing Kaiser Co., Inc., Portland, came before the Commission in regard to rendering service to the state in connection with the design and supervision of construction of a new ferry which the Commission contemplates purchasing for use in connection with the Columbia River ferry operation between Astoria, Oregon, and Megler, Washington. He was informed by Chairman Banfield that the Commission has not had an opportunity to discuss the offers received for the rendering of such service and until that has been done the Commission will not be in position to act. There followed a general discussion of the matter which was concluded by Chairman Banfield, who stated that the Commission will make its decision after consulting with the Engineer and the Chief Counsel as to details.

A group representing the Recreational Resources Committee of the Portland Chamber of Commerce was present. Arthur Kirkham, Chairman of the Committee, headed the group which included Mrs. Daniel Heffner, Portland, President, Oregon Roadside Council; and A. N. Weir, Manager of the Oregon State Motor Association. Mr. Kirkham presented a resolution adopted by the Portland Chamber of Commerce in which the Commission is urged to vigorously pursue a program of preservation of timbered and scenic roadside strips. He particularly mentioned a section of the Columbia River Highway through the Columbia Gorge where, he said, timber is now being cut, and a section along U.S. Highway No. 101 in Douglas and Lane Counties. Chairman Banfield advised that the Commission has been doing considerable along the line suggested during the last three or four years, through the State Parks Superintendent, Mr. S. H. Boardman, whose recommendations so far have been approved by the Commission. He suggested that the proper procedure to be followed in matters of this kind should be to first consult with Mr. Boardman, who would make such investigations as are necessary and report to the Commission his recommendation. Mr. Kirkham advised that they would pursue such course in the future.

Mr. Kirkham also suggested the naming of a park for Mr. Boardman, the State Parks Superintendent, and suggested that one located along the Oregon Coast Highway in the vicinity of Chetco River, Curry County, would be appropriate. The Commission took the matter under advisement.

Mr. J. S. Burres, stockman, and Mr. A. K. York, farmer, both of Moro, Oregon, came before the Commission and urged the further improvement of the Cottonwood Canyon Section of the Wasco-Heppner Secondary Highway. Mr. Burres alleged that the condition of the grade through this canyon is very bad, and that it is hazardous for one to drive his car over it. He inquired as to the Commission's plans for improvement of the road. He was informed that the improvement of this section is now contained in the Commission's Three Year Postwar Program, and the Commission contemplates awarding a contract for the work some time during the spring or fall of 1947, preferably in the spring of the year, if that is possible. He was also informed that the approved project is at the easterly, or Condon, end and that when the work is completed the Commission will then select the next best project for monies which may then be available. Mr. Burres alleged that the most dangerous part of the road is at the west end. He stated that he has equipment of his own which is suitable for road work and inquired whether or not the Commission would object if he would use this equipment for improvement of this highway. He was instructed to take the matter up with the Engineer. The Engineer advised that he would have someone call on Mr. Burres in the near future relative thereto.

Mr. Burres also complained of the condition of the bridge over the John Day River on this highway. He advised that the bridge is now posted for a five-ton maximum load limit, and, in view thereof, he does not consider it safe to transport his equipment over the structure, which is necessary in connection with the conduct of his farming operations. The Engineer was instructed to investigate the complaint and to report back whether or not anything feasible can be done to improve the condition.

Mr. C. E. Stewart, District Engineer, Federal Works Agency, Bureau of Community Facilities, appeared before the Commission regarding the moving of some large buildings over the state highway from Camp Adair to the Oregon State College campus at Corvallis. He advised that the buildings are 25 feet wide and about 150 feet long, but the plan is to cut them up into shorter sections, although the width would still be 25 feet. He estimated that it would take about one hour to move each section, of which there are six to be moved. Following discussion the Commission referred the matter to the Engineer for investigation and report. Mr. Stewart was informed that if the report indicates that it is feasible to move the buildings without inconveniencing general highway traffic and subjecting such traffic to extreme hazards, then the Commission will be inclined to authorize the movements if other traffic is properly safeguarded, although the Commission is not in position to state definitely at this time what action it will take. It was then arranged that Mr. Stewart would contact the Engineer in Salem within the next few days for a joint inspection of the routes. The information that is gathered is to be conveyed to the members of the Commission by telephone in order to expedite action. Mr. Stewart advised that they probably would want to start moving the buildings about the middle of December.

Chairman Banfield brought up for discussion the three-way project in Eugene, concerning which a delegation appeared before the Commission during the morning session. He suggested that the Engineer and the Chief Counsel should discuss the matter further with the sponsors of the project and ascertain definitely, if possible, the final position that Lane County and the City of Eugene are going to take with respect to the work, because it appears to him that until the Commission receives adequate information as to need for the project it should not contribute state funds for the construction. His suggestion was approved by Commissioners Schaupp and Chandler and it was so ordered.

Chairman Banfield then brought up for discussion the request of Mr. E. L. Dickson for changes in the recently-completed highway improvement at the junction of the Pacific Highway with the McKenzie Highway in West Springfield. He gave as his thought that there may be some justification for Mr. Dickson's complaint, and in view thereof, suggested that the Engineer make further investigation regarding the feasibility of doing some of the things which Mr. Dickson has requested, including the possibility of constructing a turn-around under the bridge approach. His suggestion was approved by Commissioners Schaupp and Chandler, whereupon the Engineer and the Chief Counsel were instructed to make such investigation and report back at the next meeting.

Mr. Dickson, who was in the audience as an interested spectator, was then called before the Commission and informed by Chairman Banfield of the action that had been taken. He was also informed that the Commission would make a definite decision in the matter at its next meeting, when he would be informed of the action taken. Mr. Dickson advised that he has signed agreements with property owners for right of way that is needed for the turn-around under the bridge structure. He was informed that the Commission's Chief Counsel would look them over.

The Astoria ferry matter was also brought up for discussion by Chairman Banfield, who gave as his feeling that the Commission should have a definite recommendation from the Engineer whether or not it is feasible to repair the present ferry adequately to take care of needs for several years to come, and if not, the Engineer should make a definite recommendation as to what type of a ferry the Commission should construct as a new ferry and whether or not it would be possible to convert one of the Government-owned boats into a type of ferry that is needed. It was also his thought that in studying the matter the Engineer should keep his conversations with the naval architects and the builders entirely separate so that the Commission would not be placed in an embarrassing position in arriving at its decision with respect to the employment of the services of architects and the contracting of the ferry construction. Commissioners Schaupp and Chandler expressed their concurrence in the viewpoint of Chairman Banfield, whereupon the Engineer was instructed to govern his actions accordingly.

The Engineer requested authority to carry on certain minor work in connection with bridge maintenance and betterment in addition to similar work that the Commission authorized on the previous day with respect to road maintenance.. He explained that such work is performed by special bridge maintenance crews and includes, among other things, the widening of narrow bridges when they are being redecked, which work should be done simultaneously, the replacement of wooden box culverts which have failed, and such betterment work around foundations as is necessary to safeguard the structure pending approval by the Commission of the projects making up the minor betterment budget. The Commission stated that it did not want to stop any repair or maintenance work that is of a routine nature and accordingly approved the request. The Commission ordered, however, that all new work must be approved by the Commission before construction starts.

The Chief Counsel requested further instructions regarding his dealings with the property owners who are demanding access to the Pacific Highway between Johns and Glendale Junction. He was instructed to follow the desires of the Commission as heretofore expressed and to secure a freeway if possible and to use judgment and give consideration to these property owners as the existing conditions justify. Chairman Banfield explained that the Commission does not want to approve crossings for business activities, but on the other hand, the Commission would not object to a farm crossing that would enable a farmer to cross the highway from one of his tracts to another. The Chief Counsel then advised that his greatest trouble has been with the property owners who desire to lay a foundation for the future commercial development of their holdings. He was informed by Chairman Banfield that the Commission is not in favor of such development and if that is the reason that they are requesting access to the highway, then the Commission's answer will be no. Commissioners Schaupp and Chandler concurred, whereupon the Chief Counsel was instructed to negotiate with the owners on such basis and report back his findings.

The Chief Counsel reported that the municipal authorities of Sweet Home have been trying to protect the state with respect to the right of way of the Santiam Highway in Sweet Home, it being the thought of the city that the right of way should be 80 feet wide at this point, and in this connection the city has had considerable difficulty with one of the property owners who, it appears, is planning to improve his property, and if he carries out his plan, will make it more difficult for the state to secure right of way of standard width. The city, he said is asking the state to institute condemnation proceedings to obtain the right of way now and has agreed to join in the expense involved. He recommended approval of the request. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote..

The Commission considered and signed agreements, etc., as follows:

Permit agreement granting to Bonneville Power Administration permission to occupy a portion of state-owned land in Tillamook County

Agreement with the City of Portland covering use by the Portland Chamber of Commerce of state-city-owned land adjacent to Harbor Drive bounded by S. W. Front Ave., S. W. Harbor Drive, S. W. Salmon Street, and S. W. Main Street, Portland, as a guest center.

Agreement with Clackamas County covering the abandonment of certain sections of the old route of the Woodburn-Sandy Secondary Highway between Eagle Creek and Sandy when the new route is completed.

Agreement with R. C. Moulton covering removal by him of burned and down timber on state-owned property on the Sunset Highway.

Agreement with A. W. Lebeck & Sons and the Curry County Bank disposing of a claim arising out of the moving of the bank building and the acquisition of right of way for the Oregon Coast Highway through Gold Beach.

Agreement with John T. Blow, et al. covering release of a cattle pass at Mile Post 33.7 on the Enterprise-Lewiston Highway, in Wallowa County.

Agreement with Gilliam County covering erection of directional road signs.

There being no further business to come before the Commission at this time the meeting adjourned at 5:00 p.m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1946	Subject
13504	Dec.30	Minutes approved. November 25 and 26, 1946.
		Parks. Parks Supt. reports on following:
		Wayside strips. Umpqua Hwy. Report on acquisition of wayside strips ordered filed.
		Sale of timber. Oregon Coast Hwy. North of Gardiner. Parks Supt. authorized to negotiate sale to Doernbecher Mfg. Co.
		Champoeg State Park. Installation of electric stove approved.
13505		Dallas-Coast Secondary Hwy. at Buell, Polk County. Offer of proposed park area declined.
		Silver Creek Falls State Park. Sale of concession to Ralph Nohlgren. Chief Counsel to work out agreement with Mr. Nohlgren and report.
13506		Jackson County. Camp White area. Request of Gen. Ira Baker for withdrawal of state's application for Government-owned lands along Rogue River refused.
		Washington County. Wilson River Hwy. Glenwood. Encroachment of residence on state wayside strip. Referred to Chief Counsel.
		Sale of timber. Oregon Coast Hwy. Otter Crest. Sale of wayside timber to Doernbecher Mfg. Co. disapproved.
		Wayside strips. Oregon Coast Hwy. Otter Crest. Negotiations for acquisition of timbered waysides authorized. Report ordered.
13507		Cape Sebastian State Park. Renewal of J. H. Turner sheep grazing lease approved.
		Betterment work in state parks. Supt. to submit plans in detail.
		Budget. Park construction and betterment program for 1947 approved.
13508		Real Property. Resolution authorizing acquisition adopted.
13531		Surveys. Dry Creek - Monument Sec., Kimberly-Long Cr. Secdy. Hwy. Survey approved. Resolution adopted.
13532		Klamath County. Airport Access Road. Altamont Drive Sec. Settlement of condemnation case against Ellen A. Hannon approved.
		Multnomah County. Columbia River Hwy. Dodson-Bonneville Sec. Settlement for r/w with Harriet M. Lockwood approved.
13533		Clackamas County. Woodburn Sandy Hwy. Eagle Cr.-Sandy Sec. Re-adjustment of City of Sandy water main approved.
		Condemnation. Offers approved. Resolution adopted.
13538		Portland. McLaughlin Blvd. Purchase of several small parcels of land to prevent billboard erection. Purchase refused.
13539		Multnomah County. Canyon Road. Acquisition of property on N.W. side to prevent restaurant development. Investigation ordered.

Page	Date 1946	Subject
13539	Dec.30	Morrow County. Boardman. Acquisition of state-owned gravel pit and stockpile site by School District #25. Engr. to report.
		Wayside strips. Improvement urged by Oregon Roadside Council. Action deferred.
		Josephine County. Right of access. Request of J.M. Poe for commercial access to Pacific Hwy. denied.
13540		Bids. No construction projects to be advertized for bids until all right of way has been acquired.
		Cattle. Chief Counsel to prepare bill for 1947 Legislature to prohibit stock running at large on public highways.
		Tillamook County. Oregon Coast Hwy. Brighton. Nehalem Telephone Co. denied right to erect poles on west side of hwy.
		Parks. Casey State Park. Removal of privately owned bldgs. Negotiations with owner to continue.
13541		Gravel from navigable streams. Chief Counsel to prepare bill for 1947 Legislature exempting state from payment of royalties.
		Portland. Jefferson and Columbia Sts. One-way street designation. Chief Counsel to prepare resolution in conformity with Commission's decision at Oct. 28 and 29 meeting.
		Pole line facilities. Pacific Hwy. Roseburg-Medford Sec.
13542		Purchase of Postal Telegraph Co. facilities authorized.
		Eugene. Pacific Hwy. and Eugene-Coburg Co. Rd. Revised estimate of cost of improvement. Agreement with co. and city approved conditionally.
		Sale of buildings. Cilliam County. Columbia River Highway near Quinton. Offer of D.L. Zimmerlee accepted.
13543		Lincoln County. Oregon Coast Hwy. north of Yachats. Request for betterment of drainage conditions along highway denied.
		Lane County. Junction Pacific Hwy.-McKenzie Hwy. Traffic light installation approved. Decision re turn-around deferred.
		Meeting recessed at 12:00 noon for luncheon and reconvened at 2:00 p.m.
		Lane County. Pacific Hwy.-McKenzie Hwy. Junction. Construction
13544		of turn-around. Action deferred.
		Eugene. Pacific Hwy. and Eugene-Coburg Co. Rd. Agreement with city and county re improvement approved. Cooperation limited.
		Survey. Klamath County. Klamath Falls. Integration of hwy.
13545		traffic from north with connecting hwys. Engineer to work out survey plan.
		Lake of the Woods Rd. Survey requested. No action.
		Clackamas County. Canby. Pacific Hwy. E. Traffic control. Engr. to discuss matter with city officials.
		Portland. Harbor Dr. Lighting Project a city responsibility. Engr. to discuss with city officials.

Page	Date 1946	Subject
13545	Dec.30	Astoria Ferry. Construction of new ferryboat L.R. Hussa to
13546		furnish report on service needs and estimate of cost.
		Astoria Ferry. Inspection of ferryboats "Tourist No. II" and "Tourist No. III" by American Bureau of Shipping authorized.
		Wasco and Hood River Counties. Improvement of county road from Dufur to jct. with Mt. Hood Hwy. denied.
		Lane County. Alsea-Deadwood Secdy. Hwy. Minor improvement authorized.
		Umatilla County. Pilot Rock. Cooperation in repairing bridge on city street approved conditionally.
13547		Yamhill County. Carlton. Repair of streets damaged by log hauling authorized on cooperative basis.
		Umatilla County. McNary Damsite. Construction of bridge across Columbia River, but not on the dam. Action deferred.
		Umatilla County. Weston-Elgin Secdy. Hwy. Construction of parking areas. Action deferred.
		Awards. Engr's. award of contracts approved.
13548		State Tax Street Funds. Resolution adopted.
13549		State Tax Street Funds. Resolution adopted.
13550		Wasco County. The Dalles. Brewery Grade-Columbia River Hwy. intersection. State cooperation in improvement approved conditionally.
13551		Surveys. Completed and adopted. Resolution adopted.
13552		Extensions of time granted as follows: Contracts Nos. 2717, 2732, 2749, 2767, 2770, 2785, 2786, 2794, 2808, 2814, 2818, 2821, 2822, and 2841.
13556		Contracts completed and accepted as follows: (Resolution adopted) Nos. 2717, 2775, 2777, 2793, 2812, 2819, 2838, and 2848.
13557		Hood River County. Hood River Secdy. Hwy. Woodworth Acres-Parkdale Sec. Abandonment approved. Resolution adopted.
13559		Josephine County. Abandonment of portions of Pacific Hwy. Wolf Creek-Sexton Mountain Sec. Action deferred. Referred to Engr.
		Malheur County. Nyssa-Adrian Secdy. Hwy. No. 450 and Homedale Spur Secdy. Hwy. No. 455. Designation as one secondary hwy. Action deferred. Attitude of Co. Ct. to be ascertained.
		Signals. Multnomah County. Canyon Road jct. at Sylvan. Installation of traffic signal. Matter to be discussed with
13560		County Commissioners.
		Speed Zones. Lane County. McKenzie Hwy. east of Springfield.
13561		Zone established. Resolution adopted.
		Travel and informational matters. Appointment of Merle Chessman to Advisory Board. Letter from Mr. Chessman ordered filed for future consideration.
		Historical markers. The Dalles-Calif. Hwy. Upper Klamath Lake.
13562		Erection of markers approved. Memorials Com. of Ore. Historical Soc. to furnish factual data.

Page	Date 1946	Subject
13562	Dec. 30	Linn County. Albany. Willamette River Bridge. Relief from payment of annual fee for maintenance of pipelines on hwy. bridges. Referred to Chief Counsel.
		Log hauling. Trial load permits granted to Linden Alvin Jenkins, Albert Henry Strain, and Jess W. Walton conditionally.
		Log hauling. E.L. Hilterbrand to be warned to comply with requirements or have his permit cancelled.
		Log hauling. Overlength movements. Engr. to grant permits if cause no undue hazards.
13563		Tillamook County. Oregon Coast Hwy. near Manzanita. Request of Barney Lucas to "daylight" a cut bank denied.
		Barricades. Erection on hwys. where weather requires use of chains. Referred to Chief Counsel. Engr. to be governed by Chief Counsel's decision.
		Signals. Columbia River Hwy. Mosier Tunnel. Installation of stop and go signals approved.
		Lincoln County. Road leading to Devil's Punchbowl State Park ordered repaired. Decision deferred re placing road on state secdy. hwy. system.
		Sale of scrap materials stored at Coquille to R.C. Patterson approved.
13564		Service Club Sign Racks. Request of 20-30 Club for panel on racks at state highway entrances to Portland denied.
13566		Clatsop County. Warrenton Secdy. Hwy. No. 105 and Ft. Stevens Secdy. Hwy. No. 104 placed on state secondary hwy. system. Resolutions adopted.
		Meeting date. February 3 and 4, 1947, set as tentative date for next meeting. Mar. 18 and 19 set tentatively for second meeting.
13567		Insurance. Blanket fidelity bond for Hwy. Dept. employees. Offer of the Ohio Casualty Insurance Co. to furnish bond accepted.
		Multnomah and Washington Counties. Sunset Hwy. Improvement through Commonwealth subdivision. Advertising for bids deferred.
		Unfinished business:
		Clackamas Co. Designation as state secdy. hwys. of certain co. rds. between Estacada and Milwaukie deferred.
13568		Speed zones. Douglas Co. Pacific Hwy. Roseburg. Speed zone established. Resolution adopted.
		Tillamook County. Ore. Coast Hwy. Twin Rocks. Speed zone established. Resolution adopted.
13570		"No Parking Zone". Pacific Hwy. Eugene. Establishment of zone approved conditionally.
		Lincoln County. Oregon Coast Highway south of Waldport. Acquisition of additional right of way. No action.

Page	Date 1946	Subject
13570	Dec.30	Unfinished business (cont.)
		Hood River County. Columbia River Hwy. Hood River. Permanent location of hwy. through city. Letters from Hood River County and City officials presented. No action.
13571		Gilliam County. Wasco-Heppner Secondary Highway. Cottonwood Bridge over John Day River. Request for strengthening denied.
		Gilliam County. Wasco-Heppner Secdy. Hwy. Cottonwood Grade Sec. Widening on bad turns. Engr. to investigate and report.
		Parks. Naming of state park in honor of S.H. Boardman. Action deferred.
		Clatsop County. Oregon Coast Highway. Seaside. Proposed rerouting along Roosevelt Dr. No action.
13572		Coos County. Oregon Coast Hwy. Naming of Coo Bay Bridge in honor of C.B. McCullough. Attitude of residents of North Bend and Coos Bay to be determined.
		Meeting adjourned at 5:00 p.m. to reconvene at 9:00 following morning.
	Dec.31	Bids received on following highway construction projects and purchase of concession privileges.
13573		Construct "Love" Bridge over Powder River Klamath Falls Rock Production Project Ironside-Jamieson Rock Production Project Hardman Hill Section Rhea Creek-Hardman Hill Section
13574		Umatilla Dam-Hermiston Section Concession Privileges at Corwn Point.
		Log Hauling. Overweight violations. Vancouver Plywood Corp. Charles Hovey appeared to answer charges. Permit not
13575		cancelled.
		Sherman County. Maryhill Ferry. New approach to ferry requested by Capt. C.T. Smith. Engr. to report.

		Meeting adjourned at 6:45 p.m.

Portland, Oregon
December 30, 1946

The State Highway Commission met in regular session at 9:00 a.m. in Room 715 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. H. Dewers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting of the Commission held on November 25 and 26, 1946.

The State Parks Superintendent was present and reported on the following park matters:

1. Progress report on acquisition of wayside strips along the Umpqua Highway: The Parks Superintendent made a general report on this subject, explaining details. The Commission took no action on the report.

2. Cutting of wayside timber along the Oregon Coast Highway north of Gardiner: The Parks Superintendent advised that the state owns only a right of way through this district, the lands on both sides of the highway being owned by the Doernbecher Manufacturing Company, which is now cutting the timber for market, and would also like to acquire the timber on the highway right of way if the Commission is disposed to sell it. He pointed out that if the offer of the Doernbecher Manufacturing Company is not accepted the timber standing on the highway right of way would become a hazard to highway traffic when the company has logged its adjacent lands. He suggested that the timber be sold to the Doernbecher Manufacturing Company; otherwise, that the Commission acquire sufficient timbered waysides to protect the timber standing on the right of way. The Engineer concurred in the suggestion. Commissioner Schaupp expressed himself in favor of selling the timber to the Company. Commissioner Chandler expressed himself similarly, advising that, in his estimation, this would be a very picturesque section of highway even if the timber is cut because of the lakes and ocean views. Following further discussion motion was made by Commissioner Chandler that the State Parks Superintendent be authorized to negotiate the sale of the timber on the highway right of way with full power to act in the best interests of the state. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

3. Installation of an electric stove in Champoeg Park: The Parks Superintendent recommended installation of an electric stove which he

DEC 30 1946

estimated could be purchased for about $1,000. He pointed out that in the past the state has furnished stove wood for public use, which, at $20 per cord, is quite costly. He estimated that about 170 cords of wood would be needed this year and advised that this will have to be provided by caretakers whose services could be used to much better advantage doing other things; moreover, if an electric stove were installed and the public was charged a nominal sum for the use of electrical energy a saving of about $3,000 would be effected. The matter was discussed at some length and as a result thereof the Commission approved the purchase and installation of a stove at this place as a trial proposition.

4. Proposed park on the Dallas-Coast Secondary Highway at Buell, Polk County: The Parks Superintendent presented the offer of Buell Grange to present to the state as a gift for park purposes a 10-acre tract of land situate near Buell which has been used for park purposes for a number of years. He advised that the area does not particularly fit into the state park picture, and he recommended that the offer be declined. The Commission approved the recommendation unanimously.

5. Sale of concession in Silver Creek Falls State Park: The Chief Counsel, Mr. J. M. Devers, reported on this matter on behalf of the State Parks Superintendent. He advised that, in conformity with authority previously granted the Parks Superintendent and himself, negotiations have been carried on with Mr. Ralph Nohlgren, Salem, to take over this concession. Mr. Nohlgren, he said, has investigated the possibilities thoroughly and has stated a willingness to spend about $5,000 of his own funds to provide a proper-functioning concession, if a satisfactory working arrangement can be effected with the Commission on a minimum five-year basis. The Chief Counsel recommended an agreement with Mr. Nohlgren on such basis which would include provision that no consideration shall be paid for the first year in view of the expenditure to be advanced by Mr. Nohlgren, unless revenues he receives exceed a certain sum hereafter to be agreed upon; if the revenues exceed such agreed sum then the state is to charge a certain percentage which also is to be agreed upon later. The charge for the second and following years, he said, would be a certain percentage of the gross revenues to be decided as a result of further negotiations. The Chief Counsel advised that Mr. Nohlgren is experienced in this class of business and guarantees to conduct the concession in a manner satisfactory to the State Highway Commission, and he has agreed also to vacate the premises in the event the Commission is not satisfied with the way in which he is operating the concession. Following discussion the Commission authorized the Chief Counsel to continue the negotiations with Mr. Nohlgren and to work up an agreement with him in conformity with his suggestions. He was instructed to report back to the Commission when negotiations are completed.

6. Request of Gen. Ira Baker for withdrawal of the State's application for Government-owned lands along the Rogue River in the Camp White area, Jackson County: The Parks Superintendent advised that there is considerable agitation in Jackson County over this matter and that people

generally are opposed to the State relinquishing any of its rights in favor of an individual to the impairment of the rights of the general public. At his request the Secretary read aloud a letter and a resolution from the Issac Walton League of America and a number of telegrams, in all of which objections are voiced to the state giving up any of its rights to the property in question. The Parks Superintendent pointed out that the Commission at the previous meeting authorized the filing of an amended application for a 25-foot strip of land along the river rather than a 200-foot strip; however, that has not yet been done. He recommended, in view of the objections, that no change whatsoever be made in the previous application. Mr. Frank B. Wire, State Game Supervisor, was present and advised that the State Game Commission also objects to the state modifying its original application and suggested that the State Highway Commission complete the acquisition of the 200-foot strip in accordance with its original plan. In view of the objections the Commission decided that it would be inadvisable to modify in any way its previous application for a 200-foot strip of land along this stream and instructed the State Parks Superintendent not to file the modified application that was authorized at the previous meeting.

7. Encroachment of the residence of Roy A. Gould on State Highway property near Glenwood: The Parks Superintendent advised that Mr. Gould owns the land adjoining the state's property at this location and when constructing his residence building inadvertently placed it on land owned by the state, beyond the limits of the standard-width highway right of way. Mr. Gould, he said, anticipates continuing his residence at this place for about five years and would like very much to maintain the residence building in its present location during this period. He further advised that the land occupied by the building is a wayside strip obtained as a gift from the Consolidated Timber Company, which recommends that Mr. Gould be allowed to occupy the premises as requested. In the discussion that followed it was pointed out that the Commission has an established policy which will not permit encroachments of this kind. In view thereof, the Commission deferred its decision pending advice and recommendation from the Chief Counsel, to whom the matter was referred.

8. Proposed purchase of timber strips along US101 between Otter Crest State Park and the junction with the road leading to Devil's Punch Bowl State Park: The Parks Superintendent advised that the highway is to be realigned along this section and that the right of way on the new location contains considerable timber which the Doernbecher Manufacturing Company would like to cut if it is agreeable with the Highway Commission, inasmuch as the land adjoins the timber tract which the Company now owns and is logging in this vicinity. He particularly pointed out that there are two tracts of land, now privately owned, on the west side of the highway which contain good stands of virgin timber and are desirable in order to preserve the timbered waysides. One of these adjoins Otter Crest State Park and the other is located a short distance south therefrom. He recommended that the request of the Doernbecher Manufacturing Company be denied and that the Commission authorize acquisition of the two other tracts. The Engineer concurred in the recommendation. Follow-

ing discussion the Commission decided not to sell to the Doernbecher Manufacturing Company the timber growing on the new highway right of way. A cruise of the timber and negotiations for the purchase of the two other tracts under discussion were authorized by the Commission. The results thereof are to be reported back to the Commission when a decision with regard thereto will be rendered.

9. Renewal of the lease with J. H. Turner for the grazing of sheep in Cape Sebastian State Park, Curry County: The State Parks Superintendent recommended renewal of this lease for another year at the former rate of 50 cents per head per year. The Commission approved the recommendation.

10. Plans for betterment work in certain state parks: The State Parks Superintendent reported that plans for development work in a number of state parks have been completed and that he is now ready to report the details to the Commission in order to secure the Commission's approval for the beginning of the work. Action on this matter was deferred until the next meeting of the Commission. The Parks Superintendent was instructed to submit his plans in detail to the individual members of the Commission in the meantime for study.

In the discussion of park matters the Engineer submitted a program for construction and betterment of roads and parking areas in state parks that are chargeable to Maintenance Department funds. He advised that the 1947 Budget provides an amount of $45,000 for such purposes, and he submitted for the Commission's consideration a partial program for the funds as follows:

"Park		Amount
Bradley	Oil parking area	$ 500.00
Cascadia	Construct roadway and parking area - - - - - - - - - - $2,500.00	
	Construct log span over creek - - - - - - - - - - 500.00	3,000.00
Collier	Construct entrance road and parking area	1,500.00
Cove-Palisades	Grade and surface with cinders about 4 miles of park roadways	3,750.00
Dorris	Surface roadway	250.00
Saddle Mountain	Grade roadway in park	12,500.00
Silver Creek Falls	Place and roll 1,300 cu. yds. rock - - - - - $1,800.00	
	Oil 40,000 sq. yds. of parking areas and roads - - - - - - - - 10,000.00	11,800.00
Tou Velle	Oil 5,000 sq. yds. roadway	1,500.00
Troutdale-Sandy River	Grade and gravel road and parking area	2,680.00
Yachats	Oil road and parking area	900.00
Yachats Ocean Park	Oil road and parking area	2,400.00
	TOTAL	$40,780.00"

DEC 0 1946

After careful consideration the Commission approved the program as presented by unanimous vote.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of the individual items composing the list the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Footnotes:

* All of the parcels listed in the above resolution under the heading Dry Creek-Monument Section, Kimberly-Long Creek Secondary Highway, were approved by the Commission on the recommendation of the Commission's Chief Counsel, Mr. J. M. Devers, who advised that the requirements of the Commission as set forth at the previous meeting have been satisfied. In view of this information the Commission approved the survey for the permanent location of this highway through the town of Monument. The

following resolution with regard thereto was thereupon adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

WHEREAS, on October 28, 1946, the Commission adopted a resolution by which the Commission approved the survey of the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, the termini of which adopted survey were Engineer's Stations 290+00 and 739+98.8; and

WHEREAS, subsequent to the adoption of said survey it was found advisable to make the easterly terminus Engineer's Station 701+85 and therefore the survey deemed approved was the survey which employed as the easterly terminus said Engineer's Station 701+85; and

WHEREAS, it now has been determined by the Commission, after obtaining further information with respect to the cost of right of way through the town of Monument, that the original survey should be approved;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting as follows:

1. That the original survey for the relocated route of the Dry Creek-Monument Section of the Kimberly-Long Creek Secondary Highway, the termini of which are Engineer's Stations 290+00 and 739+98.8, hereby is finally approved as the survey of said relocated section of said secondary highway and when said section of said highway is improved it shall be improved in conformance with said survey and location.

2. That this resolution be entered in the minutes and records of the Commission as of the 30th day of December, 1946.

** Item 11168, acquisition of right of way from Ellen A. Hannon for the Altamont Drive Section of the Airport Access Road, Klamath County: This item appears in the resolution as confirmation of the settlement of a condemnation case that was approved by the Commission over the telephone on December 3, 1946.

*** Item No. 13317, acquisition of right of way from Harriet M. Lockwood for the Dodson-Bonneville Section of the Columbia River Highway: This settlement was approved by the Commission on the recommendations of the Chief Counsel, the State Highway Engineer, and the State Parks Superintendent, it being reported that sufficient savings will accrue in constructing the highway on this property to pay the cost of the land; moreover, the state will also secure the advantage of being able to control access to the highway along this section.

++ In connection with the consideration of right of way acquisitions for the Eagle Creek-Sandy Section of the Woodburn-Sandy Highway the Engineer advised that he proposed to advertise this project for bids to be received at the next meeting of the Commission, but there are two places where the two-inch water main which serves the City of Sandy must be moved because of interference. The new highway location, he said, crosses and recrosses the pipeline in such a way that it would be practically over the pipeline for a large portion of the distance. He gave as his opinion that it is the state's obligation to readjust the pipeline, which he estimated would cost about $1,000, and he requested authority to arrange with the city officials for such readjustment as may be necessary at state expense. The Commission approved the request by unanimous vote.

The Assistant Counsel also requested authority to institute condemnation proceedings to acquire property needed as right of way for the Rock Creek-Monument Section of the Kimberly-Long Creek Secondary Highway through the holdings of a Mr. G. E. Jones, and for the Umatilla-Hermiston Section of the Old Oregon Trail through the holdings of Eloise Van Slatte. He recommended an offer of $1,250 in condemnation for the Jones property and an offer of $1,600 in condemnation for the Van Slatte property. Following discussion the Commission approved the request and the offers and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close prosimity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tract or parcel of land hereinafter described is necessary for the specific and particular purpose hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcel of real property hereinafter described is necessary for right of way purposes in connection with the Kimberly-Long Creek Highway, which real property is owned by G. Edwin Jones, is identified in the records of the Highway Commission as file R 12911, and is more particularly described as follows:

A parcel of land lying in Lot 3, Block 1, of old town of Monument, in Section 1, Township 9 South, Range 27 East, W. M., Grant County, Oregon, the said parcel being described as follows:

Beginning at the intersection of a line which is 40 feet northerly of and parallel to the relocated center line of the Kimberly-Long Creek Highway and the west line of Lot 3, Block 1, of the old town of Monument; thence South 47° 17' 30" East along said line 40 feet northerly from and parallel to said center line a distance of 182.64 feet; thence South 87° 07' 30" West along the south line of Lot 3 a distance of 135.52 feet to the southwest corner of Lot 3; thence North 0° 30' East a distance of 130.68 feet to the point of beginning.

The parcel of land to which this description applies contains 0.203 acre.

2. That the Commission does hereby find and declare that the said described parcel of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said property is being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of said real property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested,

authorized, and directed to attempt to agree with the owner of said real property and/or with the tenants or persons in possession, if there be any, with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property.

5. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

6. That this resolution be entered in full in the minutes and records of this Commission as of the 30th day of December, 1946.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, the Old Oregon Trail (State Highway No. 6, U.S. Route No. 30) is a state highway under the jurisdiction and control of the State, and said highway is, in addition to being a part of the state highway system, a part of the federal highway system; and

WHEREAS, for the purpose of providing a highway with better alignment and one the construction of which will more adequately serve the traveling public, the Highway Commission relocated the section of said highway known as the Umatilla-Hermiston Section, and for the purpose of constructing a highway over said relocated line it is necessary that real properties be acquired for rights of way and that other real properties be acquired for other highway purposes; and

WHEREAS, pursuant to the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to determine and fix the widths of right of way for any and all state highways and is authorized to acquire the necessary rights of way therefor; and

WHEREAS, pursuant to the provisions of said section, the Commission is authorized, when acquiring real property for highway purposes, to acquire and take fee title to the same; and

WHEREAS, said Commission is likewise authorized to acquire, in addition to fee title to the real property needed for right of way purposes, all right of access from abutting property to the highway; and

WHEREAS, the Old Oregon Trail, as one of the major highways of the State, carries a large volume of traffic, both state and interstate, and it therefore is the judgment and opinion of the Commission that wherever possible access to and from said highway should be controlled;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that the property hereinafter described is needed and required for right of way purposes in connection with the construction and maintenance of the section of the Old Oregon Trail known and designated as the Umatilla-Hermiston Section, which said property is owned by Eloise Van Slatte and is particularly described as follows:

A parcel of land lying in the southwest quarter ($SW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) and the northwest quarter ($NW\frac{1}{4}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 15, Township 5 North, Range 28 East, W. M., Umatilla County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Eloise Van Slatte recorded in Book 151, Page 319, of Umatilla County Record of Deeds; the said parcel being described as follows:

Beginning at a point which is the intersection of the south line of the Columbia River Highway and the west line of Section 15, said point being 50 feet southerly from (when measured at right angles to) the center line of the Columbia River Highway at Engineer's Station 64+40, said point also being 3524 feet north and 8 feet east of the southwest corner of Section 15; thence South 0° 08' East a distance of 0.4 feet to a line which is 50 feet southwesterly from and parallel to the 1946 relocated center line of the Old Oregon Trail; thence parallel to said relocated center line on a 522.96 foot radius curve right (the long chord of which bears South 48° 40' 30" East for 647.23 feet) a distance of 697.87 feet and South 10° 26' 45" East 1808.29 feet to the south line of the northwest quarter of the southwest quarter of Section 15; thence South 88° 51' 45" East along said south line 102.08 feet to a line which is 50 feet northeasterly from and parallel to said relocated center line of the Old Oregon Trail at a point opposite Engineer's Station 30+73.24; thence North 10° 26' 45" West parallel to said relocated center line a distance of 1771.38 feet to a point opposite Station 13+03.86; thence North 79° 33' 15" East approximately 90 feet to the southerly extension of the west line of that tract of land conveyed to Oscar C. Hopkins and Carl Secaur by that certain deed recorded in Book 178, Page 178, of Umatilla County Record of Deeds; thence northerly along said west line and its southerly extension approximately 440 feet to the south line of the Columbia River Highway; thence westerly along said south line of the Columbia River Highway approximately 640 feet to the point of beginning.

The parcel of land to which this description applies contains 6.66 acres.

2. That the section of said highway has been relocated, planned, and the specifications for the construction and improvement of the same made in a manner which will be most compatible with the greatest public good and will in the opinion of the Commission do the least private injury.

3. The Commission does hereby find and declare that, in addition to the acquisition of the real property above described, it is, in the judgment and opinion of the Commission, necessary that there be acquired all rights of access from abutting property to the parcel of real property herein described and the highway which is to be constructed thereover, except at such points or places as may be designated by the State Highway Commission.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department the necessary description of the said real

property, which said description shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcel of land, all rights of access thereto except at such points or places as may be designated by the State Highway Commission, and in the event that no satisfactory agreement can be reached then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said parcel of real property and all rights of access thereto except at such points or places as may be designated by the State Highway Commission.

6. That in the trial or prosecution of any action instituted for the purpose of acquiring by condemnation or otherwise the said described real property, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

7. This resolution shall be entered in full in the minutes and records of this Commission as of the 30th day of December, 1946.

The Engineer reported a suggestion from the Portland City Planning Commission that the Highway Commission purchase several small parcels of land along McLoughlin Boulevard in order to prevent their use for commercial billboards. He advised that he cannot recommend purchase of these properties, notwithstanding that they are small in area, because they are quite expensive; moreover, the City of Portland now has the authority to prevent the use of the properties for the purpose intended if it wants to exercise it. It was the Commission's unanimous decision that the City of Portland should handle this matter under the authority which it now has.

The Engineer also advised that the Portland City Planning Commission has suggested that the State Highway Commission acquire certain property on the northwest side of Canyon Road in order to prevent use of the property for restaurant purposes. The Planning Commission, he said, suggests that the state acquire this for park purposes. He pointed out that this highway no doubt will have to be widened some time in the future, but there is no knowing at the present time whether or not the property in question will be needed as right of way. Following discussion the Commission ordered an investigation of the matter in order to determine whether or not the state is obligated in any way.

The Engineer reported a request from School District No. 25, Boardman Public Schools, Morrow County, for acquisition of a state-owned gravel pit and stockpile site which the school district wishes to use as an athletic field and for other building purposes. According to information received from the superintendent of the school a portion of the property which includes the gravel pit is essential to the school and its future. The matter was discussed at some length, but a decision was deferred by the Commission pending investigation and report from the Engineer whether or not there is another satisfactory gravel pit available in the community.

A letter was presented from Mrs. Eva Heffner, President, Oregon Roadside Council, complimenting the Commission on its "splendid network of rural roads" and urging action by the Commission "to take full advantage of Oregon's natural attractions". Mrs. Heffner suggested several things that might be done by the Commission to provide more attractive waysides. The Commission deferred action in this matter until the following day when Mrs. Heffner is scheduled to appear before the Commission regarding this and other matters.

The Assistant Counsel, Mr. George Neuner, presented a request from Mr. Joseph M. Poe, defendant in a highway condemnation case, for unrestricted access at Engineer's Station 552 and for restricted access at Engineer's Station 541 on the Pacific Highway, in Josephine County. He advised that in the original dealings with Mr. Poe provision was made for two private access roadways, but since that time Mr. Poe has changed his attitude and now wants access to the highway for commercial purposes and also wants a higher price for his property. Mr. Poe's property, he said, is not in a commercial area, and he recommended that his request be denied. The Commission took the attitude that if it granted Mr. Poe's request in the present instance it would then be necessary to take similar action in connection with other cases. Accordingly, his request for commercial access was denied.

The Commission had under discussion a suggestion from the Chief Counsel that the Commission adopt an order prohibiting the advertising for bids of any highway construction project until all right of way for the project has been acquired and other matters in connection with the project have been disposed of satisfactorily. Chairman Banfield gave as his thought that the objective which would be obtained were the Chief Counsel's suggestion approved is satisfied by the resolution which the Commission adopted when the

Postwar Program was arranged and that now it is simply a matter of checking the details, which should be done by the Engineer and the Chief Counsel before any job is advertised. Commissioners Schaupp and Chandler concurred, whereupon it was ordered that the matter be handled in that manner.

The Chief Counsel brought up for discussion the question of control of stock running at large on public highways. He advised that some counties have herd laws and others do not, and he suggested that the Legislature be requested to enact a law prohibiting stock running at large on any state highway in view of the hazards that this stock creates for the traveling public. The Commission approved the suggestion and authorized the Chief Counsel to prepare a bill in conformity therewith for presentation to the 1947 Legislature.

The Chief Counsel also brought up for discussion a controversy between the Nehalem Telephone Company and the Mountain States Power Company relative to pole line construction on the Oregon Coast Highway in the vicinity of Brighton, Tillamook County. He made reference to the law which grants to pole line companies the right to place their poles on the right of way of public roads but which reserves to the State Highway Commission, in the case of state highways, the right to state where the poles shall be placed. In the present instance, he said, the Mountain States Power Company maintains its poles on the easterly side of the highway, and the Nehalem Telephone Company wants to occupy a location on the westerly side of this highway, alleging that it is unable to effect a joint-use pole agreement with the Mountain States Power Company. The westerly side of the highway, he said, overlooks the ocean, and were the telephone company allowed to place its poles on that side of the highway it would detract from the oceanic view. The Secretary recalled that the former Highway Commission emphatically denied a request from the Nehalem Telephone Company for permission to maintain its poles on the westerly side of the highway. Following discussion the Commission voted unanimously to uphold the action of the former Commission and not permit pole line construction on the ocean side of the highway at this point. The Nehalem Telephone Company is to be required to place its poles on the easterly side of the highway under a joint-user agreement with the Mountain States Power Company. If such an agreement cannot be effected the telephone company is to obtain a private right of way for its facilities.

The Chief Counsel rendered a progress report on the matter of securing removal of a privately-owned building in Casey State Park. He recalled that the Commission at the previous meeting authorized him to offer Mr. Lamport, the owner, the sum of $500 for the building; however, the offer has not been accepted and Mr. Lamport considers that he is entitled to payment for a power line which he alleges was constructed at his expense in order to furnish electrical energy to his property. Mr. Lamport, he says, is of the opinion that the power line can be used to good advantage by the state. The State Parks Superintendent, who was present, advised that the power line will be of no benefit whatsoever to the park. The Commission took no action in the matter except to instruct the Chief Counsel to continue negotiations in conformity with previous instructions.

The question of payment of a royalty on gravel taken from the beds of navigable streams for use in connection with state highway construction was brought up for discussion by the Chief Counsel. He advised that the State Land Board, which is concerned, would appreciate action by the Legislature to relieve the state from the payment of such royalty; however, there is some question whether or not the Legislature would take appropriate action because funds from this source are used for school purposes, and it is probable that the school authorities would offer objections. He pointed out that were the Legislature to approve a bill of this nature it would mean a saving of a large sum of money for highway construction, particularly in cases where material is dredged from navigable rivers for construction of highway embankments. He recommended, nevertheless, that the Legislature be requested to relieve the Commission from payment of such royalties, particularly where the material is to be used in construction of highway grades. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote and instructed the Chief Counsel to prepare an appropriate bill covering the matter for presentation to the Legislature.

The Commission discussed matters pertaining to the designation of Jefferson Street and Columbia Street, Portland, as one-way traffic streets which was approved conditionally at the meeting held on October 28 and 29, 1946. The Chief Counsel advised that the City of Portland has adopted a resolution relative to such designation which, in his opinion, does not entirely reflect the attitude of the Highway Commission as expressed when the matter first came up for discussion. He read aloud the city's resolution, being Resolution No. 23106, and a tentative resolution that he has prepared for adoption by the Commission in the event the Commission approves the city's resolution. The Commission considered that the city's resolution is not in conformity with the understanding reached with city officials at the previous meeting and accordingly disapproved it. The Chief Counsel was instructed to revise the form of resolution for adoption by the Highway Commission in conformity with the Commission's decision as expressed at the meeting on October 28 and 29, 1946.

The Commission had under discussion the proposal that the state acquire the abandoned pole line and facilities of the Postal Telegraph Company between Roseburg and Medford. It was represented to the Commission that the relocated Pacific Highway takes in territory on which is located portions of the pole line, which line has been abandoned by reason of the consolidation of the Postal Telegraph Company with Western Union; and it was further represented that if the Postal Telegraph Company's pole line is left in private ownership the state will be required, at considerable expense, to pay for re-establishing the line on a proper place within the highway limits. It was also represented that the abandoned pole line can be purchased for much less than it will cost to remove and re-establish it.

The Engineer advised that, whereas the entire relocation of the highway between Roseburg and Medford has not been completed, he is definitely certain that 11.6 miles of pole line will require readjustment in order to avoid the new highway construction. He estimated the cost of such readjust-

ment work at about $2,500 per mile, or a total of $29,000. The cost to acquire the facilities he said, is $17,000, of which amount $9,400 represents the purchase price of 94 miles of line at $100 per mile and the balance, a charge for dismantling 38 miles of line at $200 per mile. He pointed out the possibilities of selling 56 miles of pole line to private concerns at $2,600 and of selling materials salvaged on the remaining 38 miles at $50 per mile, or $1,900, thus realizing a saving to the state of $4,500. Such saving, he said, would reduce the purchase price from $17,000 to $12,500 and would result in a saving of $16,500 under the estimated cost of readjusting the line. Following discussion and in view of the report, the Commission, by unanimous vote, authorized the purchase of the pole line at the price quoted.

The Chief Counsel brought up for discussion a proposed agreement with the City of Eugene and Lane County covering the construction of a city-county project which involves the rerouting and improvement of the Pacific Highway for a short distance within the City of Eugene and the improvement of the county road which extends northerly from Eugene on the east side of the Willamette River. He advised that, pursuant to instructions from the Commission, he and the State Highway Engineer consulted further with the city and county officials and have reached an agreement which provides that the county shall contribute $550,000 and the city shall contribute $550,000 toward the costs, which is substantially the same as the arrangement originally proposed. The Engineer advised that the revised estimate of the state's share of the cost of the project is $229,000, which is about $62,000 higher than the original estimate. He pointed out that, according to the revised agreement, the county is asking the state to advance to the county the sum of $300,000, which it will repay within five years from its share of the state gasoline and license revenues, and the city is asking the state to advance the sum of $50,000 on its account and has agreed to repay the amount in full within a five-year period from its share of such state revenues. A decision in the matter was deferred until the afternoon session. (The matter was reconsidered later in the session, at which time the Commission voted unanimously to proceed on the basis of the revised agreement, with the understanding that the Commission is in no way obligated to proceed with the project if it considers the bids that may be received for construction as too high, and in that event the Commission shall be free to reject all bids if it so desires. The Commission ordered that the city and the county be advised there is a limit to which the Commission can go with respect to this project, and that if bids are excessive the city and county should not expect the state to go beyond such limit. With this understanding the Commission signed the agreements which previously had been signed by the city and county officials. The Chief Counsel was instructed to convey the above information to the city and the county by letter.)

The Engineer reported the results of the taking of bids in Salem on December 9, 1946, for the purchase of a service station building located on the right of way of the Columbia River Highway near the town of Quinton, Gilliam County. He advised that two bids were received, the high one being that of D. L. Zimmerlee at $51 and the other being that of Kenneth I. Sauter at $12.50 The estimated value of the building, he said, is $50. He recommended acceptance of the offer of Mr. Zimmerlee. The Chief Counsel concurred

in the recommendation. The Commission approved the recommendation by unanimous vote.

The Engineer also reported on the request of property owners for the betterment of drainage conditions along the Oregon Coast Highway about one mile north of the town of Yachats, Lincoln County. He advised that this matter involves the policy of the State Highway Commission in that it concerns the development of property abutting state highway right of way. The present request, he said, is a renewal of previous requests, which have been denied. It appears that the development work consisted of filling in certain property in connection with which no provision was made for keeping open the natural drain from the highway, and as a consequence drainage water from the highway flows on to the privately-owned land on which tourist cabins have been constructed, causing an undesirable condition. As a solution for the problem the property owners are asking the state to divert the drainage water several hundred feet along the highway to Salmon Creek, which would cost approximately $350. It appeared to the Commission that the responsibility for correcting the situation rests with the property owners because they should have made provision to take care of the drainage water when the development work was under way. Motion was made by Commissioner Schaupp that the request be denied. Commission Chandler seconded the motion, which carried by the unanimous vote of the Commission.

Chairman Banfield reported on his inspection with the Engineer of the recently-completed highway improvement at the intersection of the Pacific Highway and the McKenzie Highway at West Springfield. He stated that, in his estimation, were the barriers cut, allowing traffic access to Mr. Dickson's premises as he desires, unjustified hazards would be created for other highway traffic, of which there is a large volume. Inspection of the proposed turn-around under the Willamette River Bridge approach, he said, raises a question in his mind whether or not much advantage would be gained or the problem solved were such turn-around constructed. The Engineer estimated the cost of constructing the turn-around under the bridge at approximately $12,000, and gave as his thought that such turn-around might be helpful except in periods of high water. He definitely recommended as helpful the installation of three additional traffic lights between the bridge and the overcrossing through the little community known as Glenwood so as to slow down traffic and permit safe turns at street intersections. He estimated the cost of the traffic light installations at $5,000. The Commission, by unanimous vote, approved the installation of the extra traffic lights but deferred its decision with respect to the turn-around until information is available as to the frequency of the high water conditions. (This concluded the discussion during the morning session; however, it was resumed immediately following the luncheon period. See ahead for additional paragraph.)

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission resumed discussion of the request of Mr. Earl L. Dickson for revisions in the recently-completed highway project at the Pacific

Highway-McKenzie Highway Junction. Chairman Banfield advised that, in his estimation, the highway improvement as constructed does not affect Mr. Dickson's business any more than it does the businesses of others at the same location. Commissioner Schaupp gave as his thought that the construction of a turn-around under the end of the bridge is not a practical solution to the problem and declared that he was not in favor of constructing such a turn-around if the cost is a considerable sum. The Engineer presented a letter signed by himself and the Chief Counsel recommending against the cutting of the barrier strips at any of the points requested by Mr. Dickson because of the hazard that would be created for the traveling public, also recommending acquisition of right of way and construction of a turn-around under the end of the bridge at an estimated cost of $12,000, and recommending further the installation of three additional traffic lights at an estimated cost of $5,000. The Commission confirmed the action taken previously approving installation of the traffic lights but deferred its decision with respect to construction of the turn-around under the bridge pending a report from the Engineer as to the frequency of floods that would effect such a turn-around, and whether or not Mr. Dickson is harmed more than others at this location by reason of the highway as constructed. (Mr. Dickson appeared before the Commission on the following day regarding this matter. See ahead for results of the discussion.)

The Commission resumed discussion of the proposed city-county project in Eugene. Mr. Deane Seeger, the City Manager, was present. Chairman Banfield inquired what the attitude of the city and the county would be if bids received for construction were higher than the estimated cost of doing the work. Mr. Seeger replied that the City Council feels the project is so urgent that it was willing to pledge future city revenues to pay for its share of the cost and accordingly executed the revised agreement. It is the feeling of the Council members, he said, that the cost estimates as prepared by the Engineer are based on present-day conditions which may change for the better within the next two or three years, when some relief will be realized. Chairman Banfield then advised that if the state proceeds with the project the people of the city and the county must realize and must consider that the Commission is extending itself to the limit in cooperating under the present arrangement and that it retains the privilege of rejecting the bids in the event satisfactory prices are not received. There is a limit, he said, to which the state can go and the Commission is willing to contribute to such limit, but no further. Commissioners Schaupp and Chandler expressed their approval of the arrangement on such basis. The Chief Counsel was instructed by the Commission to convey such information to the city and the county authorities by letter, explaining clearly the extent or limit to which the state will join with the city and the county in this undertaking. (The revised agreement covering the matter was signed by the Commission on the following day.)

A letter was presented from the City Planning Commission, Klamath Falls, suggesting, in view of the prospective new highway entrances to Klamath Falls from the north through Alameda Street and the present completion of the South Sixth Street highway development, that the time is propitious for a restudy of the possibility of integrating this highway traffic with other

connecting arterial highways. Commissioner Schaupp gave as his thought that it would be a good idea to work up some sort of a plan for coordinating this traffic, although he is not in favor of an expensive survey. It was his thought that desired results could be obtained by a "car-count" survey rather than by what is known as an "origin and destination" survey. He also stated that the sponsors of the survey want included a survey of the Lake of the Woods road; however, he is not in favor of doing anything with that road at the present time. The Commission referred this matter to Commissioner Schaupp and the Engineer to work out a survey plan.

The Engineer brought up for discussion the request of the City of Canby for some sort of traffic control on US99E through this town to eliminate danger that exists under present conditions. The Engineer advised that the highway through Canby is three lanes wide, whereas the adjoining sections are only two lanes wide, which induces excessive speed through the town, resulting in a dangerous condition for pedestrians. He suggested that some solution of the problem might be worked out if the city is willing to pay 50 percent of the cost involved. He was authorized by the Commission to discuss the matter with the city officials. The matter is to be handled by personal contact rather than by letter.

The Engineer brought up for discussion the lighting of Harbor Drive in the City of Portland. He advised that he had received a request from the Federation of Community Clubs for the immediate lighting of this thoroughfare involving the installation of lighting units at 14 specific locations. He estimated the cost involved at $3,010; however, he explained that this does not include the lighting of the entire section from Couch Street to Barbur Boulevard, the completion of which is estimated to cost approximately $91,328. He further advised that there is no understanding with the City of Portland, either in writing or otherwise, with respect to the lighting of this street. The Commission voted unanimously not to spend any state money for this type of lighting in any municipality, there being a question whether such lighting is beneficial. The Commission considered that if such lights are installed it is a city responsibility. The Engineer was instructed to discuss the matter with the city officials.

The Engineer discussed with the Commission matters pertaining to the proposed construction of a new ferry boat for operation across the Columbia River between Astoria, Oregon, and Megler, Washington, particularly the question of employing someone to design a new ferry boat and to supervise construction of the same. (See Engineer's letters dated December 12 and December 26, 1946, directed to the Oregon State Highway Commission containing recommendations and details of the matters discussed.) Chairman Banfield advised that the Commission discussed this matter during the noon-time period and concluded that "outside" advice should be secured and that the designing and the construction of the ferry boat should be handled separately. The Commission, he said, feels that it should have a complete report as to just what is needed to satisfy the traffic requirements at this place before it makes any decision with respect to the type of ferry boat to be furnished. He further stated that the Commission has approved the recommendation of the

Engineer that Mr. L. R. Hussa, of the Albina Engine and Machine Works, Inc., be employed to furnish such report on service needs and estimate of cost. Commissioners Schaupp and Chandler confirmed the statement made by Chairman Banfield whereupon the employment of Mr. Hussa for this purpose was authorized.

The Engineer then brought up for discussion the matter of inspecting the two existing ferry boats, "Tourist No. II" and "Tourist No. III". He advised that the American Bureau of Shipping has offered to survey these boats for a proposed classification for a fee of between $500 and $700 each, the object of the classification being to determine the general condition of the boats. He recommended acceptance of the offer. The Commission approved the recommendation by unanimous vote.

The Commission discussed a petition from the Wasco County Pomona Grange requesting the early improvement of a county road which extends from the town of Dufur westerly to a junction with the Mt. Hood Highway in Hood River County. The Engineer advised that the road referred to is a county market road approximately 29 miles in length and that it has a very low priority rating; in fact, the westerly 17-mile section, which lies within the borders of Mt. Hood National Forest, has had very little development. There is some travel over the road during the summer, he said, but during the winter months about half the road would be entirely closed by snow. He recommended that the request be denied. The Commission approved the recommendation by unanimous vote.

The Engineer asked the Commission to confirm the telephonic authority granted him since the meeting on November 26 to spend approximately $2,000 in cooperation with certain Lane County log haulers for minor improvements of the northerly six-mile section of the Alsea-Deadwood Secondary Highway in the vicinity of Alpha and Paris, so as to facilitate the truck hauling of logs. The Engineer advised that an agreement has been reached with a Mr. Jess Brown, one of the log haulers, to do this work under state supervision. The arrangement provides that Mr. Brown is to furnish and operate equipment which he owns and the state is to pay him $10 an hour for his services. The Commission by unanimous vote approved the arrangement and confirmed the authority for the expenditure.

A letter was presented from the City of Pilot Rock requesting the assistance of the State Highway Department in repairing a bridge located on a city street which is subject to considerable heavy log hauling. The Engineer advised that this matter has been investigated, and it is estimated that the repair work will cost about $1,220. He recommended approval of the city's request on the condition that the city will contribute 20 percent of the estimated cost, or about $244. The Commission approved the recommendation by unanimous vote on the condition that by so contributing toward this improvement the State Highway Commission admits no liability or responsibility whatsoever for the structural capacity of the bridge now or in the future. The Commission ordered the matter covered by appropriate agreement with the city and that such condition be included therein.

The Commission also discussed a request from the City of Carlton for state aid in the maintenance of certain city streets that are being damaged by log-hauling traffic. The Engineer gave as his thought that approval of this request is in conformity with the Commission's established policy of assisting small cities and towns in the financing of repair work on city streets that are being damaged by log haulers. He recommended, however, that the improvement in this instance should be limited to making serviceable only the center portion of the street. He estimated the total cost involved at $1,695, of which amount the city would pay about $400, which is the estimated cost of normal maintenance. The Commission approved the request by unanimous vote on the basis of the Engineer's recommendation.

A letter was presented from the McNary Development Association, Umatilla, Oregon, requesting early construction of a bridge across the Columbia River near the site of the proposed McNary Dam, but not on the dam itself. The Secretary was instructed to reply that the Commission, in conjunction with the State of Washington, has applied for special Federal monies with which to finance bridge construction on the dam, and until it is known definitely whether or not such Federal aid is to be obtained the Commission will make no definite statements or take any definite action with respect to a new bridge.

The Commission discussed a request from the Tollgate Recreation Council, Pendleton, for the construction of parking areas along the Weston-Elgin Highway at Tollgate and at Spout Springs Mountain, for the benefit of people who wish to engage in winter sports at these locations. The Commission deferred a decision in this matter pending discussion of the Minor Betterment Budget for 1947.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting on November 26, 1946, the conditions of the awards having been satisfied:

(1) Grading and oil-mat surfacing the Cove-Union Section of the Cove Secondary Highway, Union County; contract awarded on December 3, 1946, to E. C. Hall Company, Portland, the low bidder;

(2) Birkenfeld-Washington County Line Rock Production Project on the Nehalem Secondary Highway, in Columbia County; contract awarded on December 24, 1946, to A. H. Saxton & Son, Corvallis, low bidder.

The Commission by unanimous vote confirmed the awards as reported upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler.

The Engineer reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of 1945 State

Tax Street Funds which they received in 1946 and that the plans for improvements to be undertaken with such funds have been examined and found satisfactory:

Banks	Eagle Point	Empire	Imbler
Canyon City	Eastside	Florence	Yamhill

He recommended approval of the plans by the Commission as is required by law. The Commission approved the plans and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Banks	$ 371.00
Canyon City	468.63
Eagle Point	364.99
Eastside	958.28
Empire	1,061.92
Florence	908.71
Imbler	273.37
Yamhill	627.84

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Banks - Wilkes Avenue, Parmley Street, Woodman Street
Canyon City - Washington Street, Main Street, Park Street, Izee Street, Bridge Street, Clay Street
Eagle Point - Hamilton Avenue
Eastside - First Avenue
Empire - Washington Street, Broadway Street, Newmark Avenue
Florence - Washington Street, Lincoln Street, Josephine Street
Imbler - Second Street
Yamhill - Olive Street, Laurel Street, Elm Street, 1st Street, 3rd Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Banks, and approved by the State Highway Commission on April 4, 1946, shall be canceled, in accordance with the request of the City of Banks on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

6. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 30th day of December, 1946.

The Engineer also reported that the City of Waldport has fulfilled the legal requirements with respect to the expenditure of 1944 State Tax Street Funds which it received in 1945; also, that the city's plans for the improvements to be financed with such funds have been examined and found satisfactory. He recommended approval of the plans by the Commission. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there has been by the Oregon State Highway Commission apportioned to the city or town hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the sum or amount set opposite the name of said city or town:

Waldport - $880.58

AND, WHEREAS, said city or town has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify said city for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following street in the following named city or town:

Waldport - Hospital Hill Road, from Alsea Highway to hospital

2. That the type, plan and character of improvement proposed in the resolution filed with the State Highway Commission by the above named city or town hereby are approved.

3. That the action taken by said city or town, as evidenced by appropriate resolution adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said city or town so as to qualify said city or town to receive and use the funds to it apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in said city or town a duly certified copy of the resolution adopted by the city or town together with a copy of the resolution approving the plans submitted by said city or town.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 30th day of December, 1946.

The Engineer brought up for discussion a request from The Dalles City for state cooperation in the improvement of a city street known as Brewery Grade at its intersection with the Columbia River Highway in The Dalles. He advised that the city is widening Brewery Grade at this intersection, and in connection therewith, has stated a willingness to deposit the excavated materials along the north slope of the state highway embankment as may be directed by State Highway engineers, and to place on the widened embankment a layer of selected roadbed topping rock if the state will channelize this intersection and widen the existing pavement. He estimated the total cost of the state's share at $8,900 and the cost to the city at upwards of $6,600, and advised that the city work would be done by city forces and the state's work by state forces. He recommended approval of the project. Following discussion the Commission approved the recommendation by unanimous vote, subject to the condition that the city shall complete its portion of the work before the state's portion is started. In this connection the Chief Counsel advised that the city does not care to enter into a formal agreement with the Commission covering the matter. The Commission agreed to the waiver of the formal agreement and authorized the matter covered by exchange of letters; however, reiterated that the state's share of the work, under the circumstances, shall not be started until the city's portion of the work is completed.

The Engineer reported that the surveys for the relocation of the Oregon Coast Highway between Youngs Bay Bridge and Lewis and Clark River, in Clatsop County, and for the relocation of the Albany-Lyons Secondary Highway between Crabtree Creek and Scio, in Linn County, have been completed. He presented maps showing the revised locations for the Commission's consideration and approval. He recalled that the relocation survey for the above-mentioned section of the Oregon Coast Highway was ordered by the Commission when Senator M. R. Chessman was a member, and he particularly recommended that this survey be adopted by the Commission and that the Commission authorize descriptions furnished the Right of Way Department to secure right of way options. The Commission deferred adoption of the survey for this project pending a report from the Engineer and the Chief Counsel as to the probable cost of the right of way; however, approved the survey for the relocation of the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway. The following resolution approving the Crabtree Creek-Scio survey was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway, in Linn County, and in connection therewith to prepare a map showing the route and location of said section of highway and file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Crabtree Creek-Scio Section of the Albany-Lyons Secondary Highway, together with the map, which for identification purposes bears the map file No. 6B-21-18, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the thirtieth day of December, 1946.

The Commission considered the following requests for extensions of time within which to complete highway contracts:

Guerin Bros., Contract No. 2717, for the Prospect-Antelope Creek Rock Production Project on the Crater Lake Highway, in Jackson County, requested an additional extension of time of 92 days, from June 30 to October 1, 1946, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to conditions beyond their control. The Engineer advised that the contractor was handicapped by an extraordinary number of breakdowns of his equipment. The delay, however, he said, did not cause any inconvenience, although the cost of engineering supervision exceeded by a small amount the anticipated expenditure for this purpose. He recommended that the extension of time requested be granted to September 27, 1946, the day the job was actually completed, rather than to October 1, without penalty. The Commission approved the recommendation by unanimous vote, however, not for the reasons given by the contractor for overrunning the specified time limit.

McNutt Bros., Contract No. 2732, for construction of the Coyote Creek-Grave Creek Section of the Pacific Highway, in Josephine County, requested an extension of time of 94 days, from July 31 to November 2, 1946, within which to complete this job. They attributed their failure to complete this project within the specified time limit to inclement weather, which necessitated closing down the work earlier in the fall than was anticipated and delayed resuming operations later in the spring, slide conditions caused by storms, delays encountered in securing asphalt paving materials for the job, shortage of labor and skilled operators, and extra time required for foundation excavations than was anticipated. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote; not, however, on the basis of the reasons given by the contractor for overrunning the specified time limit.

J. R. Maginnis, Contract No. 2749, for clearing right of way on the Circle Bridge-Hug Point Section of the Oregon Coast Highway, in Clatsop County, requested an additional extension of time of 243 days, from December 31, 1946, to August 31, 1947, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit but advised that the work left to be done on the contract consists merely of burning a few charred piles of refuse which it is impractical to burn until the summer of 1947. The Engineer recommended that the extension of time requested be granted without penalty. He advised that the contractor would be held responsible for completion of the clearing and burning of the material piled on the north end of the first section which is to be placed under contract for grading so that

there would be no interference with the grading contractor's operations; however, if the work is not completed by that time the grading contractor will be required to do it for an amount not to exceed $500, which amount will be deducted from the amount the state owes the clearing contractor. A letter was presented from the Public Roads Administration concurring in the Engineer's recommendation. The Commission approved the recommendation by unanimous vote, however, not on the basis of the reasons given by the contractor for failure to complete the project within the specified time limit.

Morrison-Knudsen Co., Inc., Contract No. 2767, for construction of the Arthur Street Overcrossing on Front Avenue, in Portland, requested an extension of time of 180 days, from December 31, 1946, to June 30, 1947, within which to complete this job. The following reasons were given by the contractor for overrunning the specified time limit: Delay in the award of the contract; delay in obtaining steel piling because of steel mill strikes; inability to secure a sufficient number of competent workmen and materials to keep the work going at correct speed; difficulties encountered in driving foundation piling because of unanticipated obstructions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not however, for reasons stated by the contractor for overrunning the specified time limit.

Struss and McCoy, Contract No. 2770, for the Redmond Rock Production Project on the McKenzie, The Dalles-California, Ochoco, and O'Neil Highways, in Crook and Deschutes Counties, requested an additional extension of time of 74 days, from January 1 to March 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to equipment breakdowns which required six week's time to repair. The Engineer advised that progress on this job has been slow for reasons stated by the contractor; however, the state has suffered no particular loss to date. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote. Such approval, however, was not granted on the basis of the reasons given by the contractor for overrunning the specified time limit.

Newport, Kern & Kibbe, Contract No. 2785, for regrading and oil-mat surfacing on the Lexington-South Springs Section of the Lexington-Echo Secondary Highway, in Morrow County, requested an extension of time of 215 days, from November 30, 1946, to June 30, 1947, within which to complete this job. They based their request on the following reasons: Inability to secure skilled labor which prevented double shift operations during favorable weather conditions; and serious handicaps in the use of equipment caused by difficulties in securing repair parts and supplies.

The Engineer advised that this contract was awarded on February 26, 1946, but the contractor did not begin operations until April 8, 1946, because he was busily engaged on another state highway contract, and it, therefore, was not possible for the contractor to complete this work within the specified time limit. He recommended, nevertheless, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, however, not on the basis of the reasons given for overrunning the time limit.

Newport, Kern & Kibbe, Contract No. 2786, for regrading and oil-mat surfacing on the South Springs-Umatilla County Line Section of the Lexington-Echo Secondary Highway, in Morrow County, requested an extension of time of 215 days, from November 30, 1946, to June 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure skilled labor, which prevented double shift operations when working conditions were favorable; and to difficulties in securing repair parts and supplies for their equipment. The Engineer advised that this contract was awarded on February 26, 1946, but the contractor did not start operations until June 18, 1946, because he was engaged in work on another state highway contract. He recommended, nevertheless, that the extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, however, not for the reasons given by the contractor for overrunning the specified time limit.

W. R. Grasle Company, Contract No. 2794, for installation of the lighting system on the Interstate Bridge between Portland, Oregon, and Vancouver, Washington, requested an extension of time of 59 days, from December 31, 1946, to February 28, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure definite information or a commitment from suppliers as to delivery of materials required for the work. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct, and he recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, not, however, for the reasons given by the contractor for overrunning the time limit.

Archie R. Averill, Contract No. 2808, for construction of a trestle bridge on the Pacific Highway at Junction City, Lane County, requested an extension of time of 121 days, from November 30, 1946, to April 1, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to shortages of material and labor. The Engineer advised that the reason given by the contractor for overrunning the time limit is substantially correct and recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, not, however, for the reasons stated by the contractor.

Angelo A. Doveri, Contract No. 2814, for construction of the Chiloquin Bridge on The Dalles-California Highway, in Klamath County, requested an extension of time of 243 days, from November 30, 1946, to July 31, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to a shortage of skilled labor and of material, which delayed construction until the winter season when concrete cannot be placed satisfactorily. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, for the reasons given by the contractor for overrunning the time limit.

Del R. Beebe, Contract No. 2818, for re-oiling the Hampton-Suntex-Juniper Ridge Section of the Central Oregon and Lakeview-Burns Highways, in Deschutes, Lake and Harney Counties, requested an additional extension of time from October 31, 1946, to August 15, 1947, within which to complete this job. He alleged that labor and material shortages encountered during the summer season on other construction projects forced commencement of this contract too late in the season for completion within the specified time limit. He also advised that work was delayed because of unfavorable weather conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, not, however, for the reasons given by the contractor for failure to complete the job on time.

John A. Logan, Contract No. 2821, for construction of the Prineville Grade Separation structure on the Madras-Prineville Secondary Highway, in Crook County, requested an extension of time of 60 days, from December 31, 1946, to March 1, 1947, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to delays in securing materials. The Engineer recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, not, however, for the reason stated by the contractor.

Warren Northwest, Inc., Contract No. 2822, for grading, paving, widening, and curb construction on the Pacific Highway East and on the Hillsboro-Silverton Secondary Highway, in Woodburn, Marion County, requested an extension of time of 227 days, from November 30, 1946, to July 15, 1947, within which to complete this job. The contractor alleged that the delay in awarding this contract and unusually wet weather during the last half of October and November, which prevented construction of a satisfactory paving job, were the reasons why the contract was not completed within the specified time limit. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit

are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, not, however, for reasons stated by the contractor.

Harr and Horton, Contract No. 2841, for pavement widening on the Forest Grove Section of the Wilson River and Nehalem Secondary Highways, in Washington County, requested an extension of time of 31 days, from November 30 to December 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays caused by new water main construction and service installations by the City of Forest Grove, and by the relaying of gas pipe services and mains by the Portland Gas & Coke Company, also, to heavy rains during November which caused unworkable conditions. The Engineer advised that conditions beyond the contractor's control delayed construction operations on this job so that it was impossible for the work to be completed within the specified time limit. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the reasons given by the contractor.

The Engineer reported that Contracts Nos. 2717, 2775, 2777, 2793, 2812, 2819, 2838, and 2848 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2717, with Guerin Brothers, for producing crushed gravel in stockpiles on the Prospect-Antelope Creek Section of the Crater Lake Highway in Jackson County; completed September 27, 1946.

Contract No. 2775, with Harrisburg Sand & Gravel Company, for furnishing crushed gravel in stockpiles on the Halsey-Holley Section of the Halsey-Sweet Home Secondary Highway in Linn County; completed September 7, 1946.

Contract No. 2777, with Newport, Kern & Kibbe, for regrading, surfacing and oiling on the Gilliam County Line-Eightmile Section of the Wasco-Heppner Secondary Highway in Morrow County; completed September 17, 1946.

Contract No. 2793, with Curtis Gravel Company, for regrading and oil-mat surfacing on the Mill Creek Forks-The Dalles Section of the Mill Creek County Road in Wasco County; completed November 29, 1946.

Contract No. 2812, with Porter W. Yett, for grading and paving on the Judkins Point-Springfield Junction Section of the Pacific Highway in Lane County; completed November 26, 1946.

Contract No. 2819, with A. H. Saxton & Sons, for furnishing crushed rock in stockpiles on the Dairy Section of the Klamath Falls-Lakeview and Dairy-Bonanza Highways in Klamath County; completed November 30, 1946.

Contract No. 2838, with Edlefson-Weygandt Company, for topsoiling on the Front Avenue (Alder St.-Sheridan St.) Section of the Pacific Highway West in Multnomah County; completed November 29, 1946.

Contract No. 2848, with Dobyns & Webb, for revetment on the Sanderson Bridge Section of the Albany-Lyons Secondary Highway in Linn County; completed November 25, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer reported that construction of the relocated section of the Hood River Secondary Highway between Woodworth Acres and Parkdale has been completed and consequently the old route of the highway between these points no longer is of value for state highway purposes. He recommended that the Commission take appropriate action abandoning the old highway and allowing it to revert to Hood River County for future maintenance. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Hood River Secondary Highway known as the Woodworth Acres-Parkdale Section in Hood River County, the northerly terminus of which is at Highway Engineer's Station 203+00 of the reconstructed line and the southerly terminus of which is at Highway Engineer's Station 319+15.1 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway a portion or unit of the right of way of the highway as formerly located has been eliminated from the boundaries of the new location, which eliminated section or area is no longer needed for highway purposes, but is needed and must be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be

made of the area and section of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY this Commission as follows:

1. The section of the old right of way of the Hood River Secondary Highway which is known as the Woodworth Acres-Parkdale Section, the beginning point of which is Engineer's Station 205+15 and the ending point of which is Engineer's Station 315+70 of the reconstructed line, hereby is abandoned as a part of the right of way of said secondary highway.

2. The section of said highway hereby abandoned is shown colored in red on the map attached hereto, marked Exhibit A, and by this reference made a part hereof. *

3. Said abandoned section of the right of way of said highway shall be continued and maintained as a county road by the County Court of Hood River County pursuant to agreement heretofore executed by the Highway Commission and the County Court of Hood River County.

4. The area shown colored in green on said Exhibit A includes right of way acquired for the location and construction of said highway. In connection with all the area colored in green it is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit A shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

5. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

6. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Hood River County a duly certified copy hereof, and shall file with the Clerk of Hood River County a like certified copy; and said County Court is hereby respectfully requested to take appropriate official action by resolution or otherwise by which the County shall accept the said abandoned section of the said old right of way shown colored in red on the map attached hereto and marked Exhibit A, and shall assume jurisdiction thereover as a county road and shall maintain the same for public purposes. *

Footnote:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 135, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission had under discussion the adoption of resolutions abandoning portions of the old right of way of the Pacific Highway between Wolf Creek and Sexton Mountain, in Josephine County, since the new highway between these points has been constructed. The Engineer exhibited a map showing in red the sections of the old right of way that are to be abandoned as a state highway and that are to be maintained as a county road by Josephine County, showing in brown the sections which are to be abandoned as parts of the state highway and hereafter will be under the jursidiction and control of Josephine County for maintenance as a county road or for vacation purposes as the County Court may determine, and showing in green the portions of the old right of way that are to be retained by the Highway Commission for highway right of way and other public purposes and uses. Inspection of the map indicated to the Commission that certain sections of the old route would be isolated or "dead-ended", which raised the question whether or not definite action with respect to such parcels should be taken without first consulting with the Josephine County Court. The Commission decided to defer action on the matter until it has been brought to the County Court's attention and its attitude ascertained. The matter was referred back to the Engineer for handling.

The Engineer brought up for discussion the matter of combining two state secondary highways in Malheur County — Nyssa-Adrian Secondary Highway No. 450, which extends from the town of Nyssa southerly a distance of 20.95 miles to the intersection of Homedale Spur Secondary Highway No. 455 with the Jordan Valley County Road, about 8.7 miles south of Adrian; and Homedale Spur Secondary Highway No. 455, which extends easterly a distance of about 1.95 miles from the intersection of the Nyssa-Adrian Secondary Highway No. 450 with the Jordan Valley County Road. He advised that the combination of these two secondary highways is proposed to simplify and to improve the records and that no change whatsoever is contemplated or is intended. The question arose whether or not the County Court of Malheur County has been consulted with respect to this change. It appearing that this has not been done, the Commission decided to defer action until the County Court's attitude has been ascertained.

The Engineer presented a petition signed by numerous parents who have children attending the grade school at Sylvan at the head of Canyon Road, Portland, and a letter from Mr. James Landye requesting the installation of a traffic signal on the Sunset Highway at its junction with the county road at Sylvan for the benefit and safety of school children who are obliged to cross

this intersection going to and from school. It is alleged that this is a very dangerous intersection and that fatal accidents will occur unless something is done to protect pedestrians at this point. The Engineer advised that this intersection was investigated about a year ago and traffic conditions at that time did not warrant the installation of a signal; however, since then traffic has increased, and now it is his recommendation that a standard signal be installed when one is available and that in the meantime he be authorized to install, as a temporary expedient, a simple signal assembled from odds and ends that are now in stock. In the discussion the question arose who is responsible for the installation of this signal, inasmuch as the intersection is formed by the junction of a state highway with a county road. The Commission appeared favorably inclined to contribute toward the installation of the signal but evidenced a reluctance to assume the full responsibility. Chairman Banfield gave as his thought that counties should be asked to join in the expense of installations at such locations. Commissioners Schaupp and Chandler concurred, whereupon the Engineer was instructed to discuss the matter with the Board of County Commissioners of Multnomah County.

The Engineer reported that it would be advisable for the Commission to establish a reduced-speed zone on the McKenzie Highway east of the town of Springfield, particularly between Mile Post 1.81 and Mile Post 3.47, because of the many accidents that have occurred along this section. He recommended a 25-miles-per-hour speed zone extending from the east city limits of Springfield, Mile Post 1.81 to Mile Post 2.40, which is just east of the railroad crossing; and a 35-miles-per-hour speed zone for the section between Mile Post 2.40 and the junction with the Springfield-Crestall Secondary Highway at Mile Post 3.46. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts, and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said dif-

ferent speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: .....McKenzie Highway.....

Highway number: .....15.....Route number: ..US28.....

Location of Termini		Established Speed
M.P. 1.81 (east city limits, Springfield)	to M.P. 2.40 (east side of R.R. crossing)	25 miles per hour
M.P. 2.40 (east side of R.R. crossing)	to M.P. 3.47 (junction with Springfield-Creswell Secondary Highway)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Secretary presented a letter from Mr. Merle R. Chessman, former State Highway Commissioner, relative to his appointment as a member of the Advisory Committee on Travel and Informational Matters. The Commission ordered the communication filed for future consideration.

A letter was presented from Mr. Phillip H. Parrish, Chairman of the Memorials Committee of the Oregon Historical Society, advising that the Memorials Committee favors the erection and maintenance of signs along The Dalles-California Highway at Upper Klamath Lake, giving historic data with respect to the lake, and offering to furnish data with respect to the lake if the Commission desires it. In view of this communication the Commission voted unanimously to erect appropriate signs at this location bearing inscriptions

which meet the approval of the Memorials Committee. The Secretary was instructed to convey such information to Mr. Parrish and to ask him to furnish the factual data that the Committee has available concerning the subject matter.

The Engineer brought up for discussion a request from the Portland Gas & Coke Company for relief from the payment of a fee for maintaining its gas pipe line on the Willamette River Bridge at Albany. He advised that the company is installing a six-inch gas main on this bridge and that the permit that was issued authorizing the company to install its facilities on the bridge provides that the company shall pay $100 annually for the privilege, which is the amount that The Pacific Telephone and Telegraph Company has been paying since 1926 for a similar privilege. He further advised that, with the exception of the Interstate Bridge between Portland and Vancouver, the Albany Bridge is the only one for which an occupancy fee is charged and that the fee was charged the telephone company because of extra expense which the state incurred during the construction of the bridge to provide space thereon for the telephone facilities. The question arose whether or not the Portland Gas & Coke Company should be relieved of the payment of this charge and whether or not The Pacific Telephone and Telegraph Company should be required to continue annual payments. It was the thought of the Commission that the matter should be studied from a state-wide standpoint, whereupon it was referred to the Chief Counsel for investigation and recommendation.

The Commission discussed the overweight log-hauling violations committed by Linden Alvin Jenkins, Albert Henry Strain and Jess W. Walton, and a request from Mr. T. L. Weaver, Justice of the Peace, Canyonville, that these operators be given trial load permits which would enable them to load their trucks within allowable weight limits. The Commission authorized the granting of permits for such trial movements with the understanding that thereafter the operators will be expected to keep their loads within the maximum weight limits allowed or suffer the penalty of having their permits canceled.

The Commission also discussed the log-hauling violations of Mr. E. L. Hilterbrand for transporting overweight loads and for "laying-out" in order to avoid having his truck weighed by state weighmasters. Mr. Hilterbrand's record for the first ten months of 1946 indicates seven overweight violations out of 127 loads weighed, which places him in Class II. The Commission ordered that Mr. Hilterbrand be warned to comply with the requirements and that a repetition of these offenses or the committing of any other will result in the cancellation of his P.U.C. permit.

The Engineer requested instructions relative to the granting of permits for log movements 12½ feet overall in height. The Commission ordered that each application for overheight log-hauling permits shall be given individual attention and authorized the granting of such permits if it is ascertained that the movements can be made without causing undue hazard to other traffic.

A letter was presented from Mr. Barney Lucas, Seaside, requesting permission to "daylight" a cut bank on the Oregon Coast Highway near Manzanita. The Engineer advised that Mr. Lucas owns land at this location with considerable

frontage on the highway, and it appears that he now is developing this property and wants to remove the material from the highway, presumably to enable him to lay out streets which would connect with the highway. He further stated that approval has been given to an access at one point for a proposed county road, but he did not believe that access to the highway should be given at additional points along Mr. Lucas's frontage because of the hazard that would be created for traffic on this important highway. He pointed out that the state has not acquired right of access from the property owners along this section and that the only means of controlling right of access would be to deny Mr. Lucas's request for permission to "daylight" the cut. The Commission voted unanimously denying Mr. Lucas's request unless a satisfactory arrangement can be worked out by the Engineer and the Chief Counsel.

The Commission discussed a letter from the Oregon Motor Transport Association suggesting "that the Highway Commission be encouraged to erect barricades on all highways where weather conditions dictate the use of chains for safe passage;" also, requesting that stop and go signals be installed at Mosier Tunnel on the Upper Columbia River Highway as an aid to the prevention of accidents. The Commission referred to the Chief Counsel the Association's suggestion relative to the maintenance of barricades and instructed the Engineer to be guided by the Chief Counsel's decision with respect thereto. The Engineer recommended approval of the request for the installation of stop and go signals at Mosier Tunnel. The recommendation was approved by the Commission by unanimous vote on the condition that the signal aprons shall be set far enough ahead of the tunnel entrances that ample warning may be given traffic entering the portals.

The Commission had under discussion the authorizing of repairs to and the maintenance of the road which extends from the Oregon Coast Highway to Devil's Punch Bowl State Park, Lincoln County. It appears that this road was quite badly damaged by storms during the period December 9 to 15, 1946, because of inadequate drainage, and the question now arises who is responsible for the repairs, the state or the county, such repair being estimated to cost about $6,000. The Engineer advised that the former Highway Commission, on August 14, 1935, authorized an expenditure of a nominal sum to maintain this road in a fair condition because it is the main road leading to a state park, and that it has been maintained by the state since that time, notwithstanding that the road is not on the state highway sytem. It was his thought that the road should be designated a state secondary highway if the Commission decides to continue maintaining it. The Chief Counsel advised that, inasmuch as the state has been maintaining the road for the past ten years, it is the state's responsibility to make repairs. Following discussion the Commission, by unanimous vote, authorized the immediate repair of the road at state expense but deferred until a later date its decision with respect to placing it on the state highway system.

The Engineer asked the Commission to confirm the telephonic authority given him to sell privately to Mr. R. C. Patterson, Independence, an accumulation of scrap steel, cast iron, bronze, radiators and batteries stored

at the Highway Shops in Coquille at the following unit prices:

Scrap Steel	$ 6.00 per ton
Scrap cast iron	8.00 per ton
Scrap bronze	.05 per pound
Scrap radiators (large)	1.50 each
Scrap radiators (small)	1.00 each
Scrap batteries	.50 each

The Commission by unanimous vote confirmed the authority to sell this material to Mr. Patterson at such unit prices.

The Commission had under discussion a request from the 20-30 Club, Portland, for the installation of service club sign racks at state highway entrances into Portland similar to those that have been erected at some of the smaller cities and towns of the state. The request was denied by the Commission because there is not enough room on a single sign rack to accomodate a panel for each of the many service clubs in Portland, and were more than one sign rack permitted the purpose for which the racks were authorized would be defeated.

The Commission had under discussion a resolution from the City of Warrenton requesting that there be placed on the state secondary highway system for future state maintenance the city streets over which the Columbia River Highway was originally routed — Chapman Street from 19th Street to Everett Avenue, thence on Everett Avenue to Wheeler Street, thence on Wheeler Street to Albany Avenue, thence on Albany Avenue and Second Street to the intersection of Second Street with Main Street, route of the Ft. Stevens County Road, a distance of 1.60 miles; also, that the Commission designate as a state secondary highway the Ft. Stevens County Road from its junction with the present Oregon Coast Highway near Skipanon, in Warrenton, via Main Street, Massachusetts Avenue, Clatsop Street, East Pacific Street, and Pacific Street to the Ft. Stevens boundary in Hammond, a distance of 4.48 miles. The Commission also considered, in connection with this subject, a resolution from the County Court of Clatsop County requesting that the Ft. Stevens Road, as above described, be designated a state secondary highway. In the discussion of this matter it appeared to the Commission that the requirements of the Commission with respect to such designations have been fulfilled, in view of which the Commission approved the requests and by unanimous vote adopted the following resolutions designating as state secondary highways both the roads and the city streets described in the resolutions of the city and the county:

WHEREAS, under the provisions of Title 100 O.C.L.A. and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Clatsop County Court of the State of Oregon, has selected the road, street, or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said road, street or highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, street, route, or location of a highway in Clatsop County be and the said market road, county road, highway, street, route, or location, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Warrenton Secondary State Highway No. 105:

Beginning at the intersection of Chapman Street with 19th Street in the Town of Warrenton, Clatsop County, Oregon, said point also being in the Oregon Coast Highway; thence northerly and westerly via Chapman Street, Everett Avenue, Wheeler Street, Albany Avenue and 2nd Street, to the intersection of Main Street and 2nd Street in Warrenton, a distance of approximately 1.60 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Title 100 O.C.L.A., Subsection 36, Section 115.

WHEREAS, under the provisions of Title 100 O.C.L.A., and in particular, Subsection 36 of Section 115 of said Title, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Clatsop County Court of the State of Oregon, has selected the road, street, or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said road, street or highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be

added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, street, route, or location of a highway in Clatsop County be and the said market road, county road, highway, street, route, or location, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Fort Stevens Secondary State Highway No. 104:

Beginning at the junction of the Fort Stevens Road with the Oregon Coast Highway near Skipanon in Warrenton; thence northerly via Main Street, Massachusetts Avenue, Clatsop Street, East Pacific Street, and Pacific Street, to the Fort Stevens boundary in Hammond, being a distance of 4.48 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Title 100 O.C.L.A., Subsection 36, Section 115.

The Commission had under discussion the setting of a definite date for its next regular meeting heretofore tentatively scheduled for Monday and Tuesday, February 3 and 4, 1947. The Commission, by unanimous vote, approved such tentative date as its next meeting date and instructed the Secretary to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building. The Commission also tentatively set Tuesday and Wednesday, March 18 and 19, as the date for its next following regular meeting, in Portland.

The Commission considered the offers of The Ohio Casualty Insurance Company and the United Pacific Insurance Company to furnish a blanket bond covering all State Highway Department employees in the amount of $2,500 each, with an additional premium for excess coverage over and above $2,500. The Engineer advised that for the past several years The Ohio Casualty Insurance Company has furnished a bond covering certain Highway Department employees in responsible positions, the amount of coverage for each employee depending on such employee's responsibility. There are 312 employees bonded at the present time, he said, with coverages ranging from $1,000 to $20,000, and at the rate of $2.10 per $1,000 per year the premium amounts to $1,883.70. This company, he said, now proposes to furnish a blanket bond covering all State Highway Department employees in the amount of $2,500 each for a premium of $439.39,

with excess insurance at the rate of $1.75 per $1,000 if the total excess is over $182,500. At such rate, he said, the total premium, based on excess coverage for 312 employees, would be $995.03. This company, he said, also offers to write a blanket bond covering each employee in the amount of $5,000 with excess bond at the rate of $1.625 per $1,000, which would result in a total premium of $656.38 for the entire coverage. The United Pacific Insurance Company, on the other hand, has offered, through two separate agencies in Salem, to furnish a blanket bond covering each Highway Department employee in the amount of $2,500 for $969.97, and excess coverage at the rate of $2.50 per $1,000, or a total of $1,807.47, based on excess coverage for 312 employees. It was his thought that the offer of The Ohio Casualty Insurance Company is by far the best and recommended that this company be requested to furnish a blanket bond on the basis of its proposal to furnish such a bond containing $5,000 coverage for each employee. The Commission approved the recommendation by unanimous vote subject to the condition that the provisions of the bond meet with the approval of the Chief Counsel.

The Engineer brought up for discussion matters pertaining to the construction of the Sunset Highway through the Commonwealth, Inc. subdivision west of Portland and in connection therewith exhibited a model of the proposed improvement showing in perspective the proposed highway grade separation structures, one of which is within the limits of the Commonwealth, Inc. subdivision and the other, at the intersection of the Sunset Highway with the Tualatin Valley Highway, being two miles apart. He requested authority to advertise for bids for the construction of this last completing link of this highway. In the discussion that followed it appeared that final agreement with Commonwealth, Inc. concerning the right of way through its subdivision has not been reached. In view thereof, the Commission ordered that this project be postponed until this right of way matter, and any other pending matters concerning the project, have been satisfactorily disposed of.

Consideration was given by the Commission to the following matters of unfinished business:

1. Proposed designation as state secondary highways of certain county roads in Clackamas County extending from Estacada to Milwaukie: The Engineer advised that the Commission agreed to so designate these county roads if the Federal government would contribute the sum of $275,000 toward the cost of constructing the roads to proper standards and if Army equipment were made available to maintain all highways in the state over which log hauling is being carried on. Concerning the equipment, he said that a certificate has been received from the Federal government providing some equipment, but nothing definite has been received, so the matter is still status quo. He was instructed to follow up the matter, to keep a record of what he does in connection therewith, and to present the matter to the authorities in Washington, D.C., if necessary, through Oregon's delegation in Congress.

2. Establishment of reduced-speed zones in Roseburg and Twin Rocks: The Engineer advised that he has contacted the State Police Department with respect to designating a 35-miles-per-hour speed limit between Mile Post

197.68 and Mile Post 198.32 on the Pacific Highway at the north city limits of Roseburg and the designation of a 35-miles-per-hour speed limit between Mile Post 61.41 and Mile Post 62.20 through the Twin Rocks District just south of the Town of Rockaway and that the Superintendent of State Police approves the establishment of such reduced-speed zones. He recommended approval of such reduced-speed zones by the Commission as an accident-prevention measure. The Commission approved the recommendation and by unanimous vote adopted the following resolutions relative thereto:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: ..... Pacific Highway .....

Highway number: .....1.....Route number: ..US99.....

Location of Termini	Established Speed
M.P. 197.68 to M.P. 198.32 (North CL of Roseburg)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in suffi-

cient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: .....Oregon Coast Highway.....

Highway number: .....9.....Route Number: ..US101.....

Location of Termini	Established Speed
M.P. 61.41 (South City Limits of Rockaway) to M.P. 62.20 Covers section of US101 through Twin Rocks (unincorporated)	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

---

3. Establishment of a "no parking" zone on the Pacific Highway (Franklin Boulevard) between Highway Engineer's Stations 123+20 and 127+40 at the north end of University Street in the City of Eugene: The Engineer advised that the establishment of a "no parking at any time" zone at this location is in the interests of traffic safety and is in accord with the viewpoint of the Eugene city officials; moreover, the city has agreed to cooperate to the extent of improving the entrance into University Street, which is in bad shape at the present time, and by making other improvements. Further, the city police have pledged their cooperation in the matter of enforcing the parking restrictions. The Commission voted unanimously approving the establishment of such "no parking" zone provided the City of Eugene will adopt an ordinance declaring such zone and provided further that the proceedings meet with the approval of the Commission's Chief Counsel.

4. Report of the Engineer and the Chief Counsel on an inquiry relative to the plans of the Commission for the improvement of the Oregon Coast Highway south of Waldport: The Assistant Counsel, Mr. George Neuner, reported that the person making the inquiry owns property along the highway at this point which he wishes to develop in harmony with the highway, that, pursuant to instructions by the Commission at the previous meeting, this person was contacted relative to the purchase of extra right of way along this frontage, but the offer received to date, in his estimation, is exorbitant and he cannot recommend it to the Commission. Negotiations are continuing, he said, and further report will be rendered later. The Commission took no action in the matter.

5. Adoption of a permanent location for the Columbia River Highway through the City of Hood River: The Chief Counsel advised that he has studied the letters received from the City of Hood River, the Hood River County Court, and others, endorsing the location north of the railroad tracks, and it is his opinion that the letters are sufficient to indicate the attitude, both official and otherwise, of the writers with respect to the proposed and requested relocation of the highway within the Hood River corporate limits. He added that the letters could not be construed as official expressions except perhaps the statement made by the county court, but they are sufficient to indicate and to express an approval of the proposed location. It was his thought that the letters meet the requirements of the Commission with respect to adoption of the permanent route of this highway through the City of Hood River when the Commission is ready to act on the matter. The Commission took no action on the matter.

6. Request of Mr. J. S. Burres, Moro, for the strengthening of the Cottonwood Bridge over the John Day River on the Wasco-Heppner Secondary Highway: The Engineer recalled that Mr. Burres, who appeared before the Commission on November 26, 1946, declared that this bridge is posted for a five-ton maximum load limit; however, investigation of the records reveals that, whereas such reduced load limit was ordered in 1938, the former Commission, on December 5, 1940, lifted the restrictions following completion of repairs, and the reduced load limit signs were taken down. Personal inspection of the premises recently, he added, do not reveal any reduced load limit signs on the structure, contrary to the statements made by Mr. Burres when he was present at the Commission meeting.

7. Request of Mr. J. S. Burres, Moro, for permission to make certain repairs to the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway, using his own equipment: The Engineer advised that this matter has been investigated by Division Engineer Wm. E. Chandler, who states that the condition of the road now is no worse than it has been for many years and that improving it to facilitate the transportation of a large number of wheat trucks over the section, as is contemplated, would necessitate a major improvement, costing more money than the Commission has available for the purpose. He suggested that a small amount of state force work at points particularly desired by Mr. Burres would be helpful and recommended approval of such a project rather than that Mr. Burres be allowed to do the work on his own account because of the possibilities of accidents occurring, unless, perchance, Mr. Burres is willing to enter into an agreement with the Commission and will indemnify the Commission should accidents occur. Chairman Banfield expressed himself in favor of doing a small amount of widening on some of the bad turns and suggested a maximum expenditure of about $2,000 for this purpose. Commissioners Schaupp and Chandler approved the suggestion, whereupon the Engineer was instructed to make further investigation to determine just what can be done for such amount. The Engineer is to report back to the Commission when the investigation is completed, at which time the Commission will take definite action.

8. Suggestion of the Recreational Resources Committee of the Portland Chamber of Commerce that a state park be named in honor of Mr. S. H. Boardman, State Parks Superintendent: The Commission deferred action on this matter pending a conference with members of the Oregon Roadside Council, which is to appear before the Commission on the following day.

9. Proposed rerouting of the Oregon Coast Highway along Roosevelt Drive through the City of Seaside: The Chief Counsel reported briefly the present status of this matter and advised that he would render a complete report as soon as possible. The Commission took no action pending the filing of such report.

10. Naming of a bridge in honor of the late C. B. McCullough: The Engineer advised that he followed the previous instructions of the Commission regarding this matter, but to date has received no definite information as to the attitude of the people of the cities of Coos Bay and North Bend rela-

tive to so naming the Coos Bay Bridge on the Oregon Coast Highway. He suggested that it might be helpful if Commissioner Chandler would make some inquiry along that line since he is a resident of the City of Coos Bay. Commissioner Chandler consented to make such inquiry, whereupon the Commission approved the suggestion.

The meeting adjourned at 5:00 p.m. to reconvene on the following morning in the auditorium of the Public Service Building.

T H Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
December 31, 1946

The State Highway Commission reconvened the meeting at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. H. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp was excused.

Bids, as follows, for highway construction work and for the purchase of concession privileges in Vista House at Crown Point on the Upper Columbia River Highway were opened and read in conformity with previously-published notices, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

13573

BAKER-HOMESTEAD HIGHWAY NEAR RICHMOND IN BAKER COUNTY
CONSTRUCT "LOVE" BRIDGE OVER POWDER RIVER

Lindstrom Bros., Portland	$ 23,931.50

FOUR STATE HIGHWAYS IN KLAMATH COUNTY
KLAMATH FALLS ROCK PRODUCTION PROJECT

Gladney & Adams, Klamath Falls	$ 38,367.00

JOHN DAY HIGHWAY IN MALHEUR COUNTY
IRONSIDE-JAMIESON ROCK PRODUCTION PROJECT

Jack R. Taggart, Salem	$ 33,655.00
A. H. Saxton & Son, Corvallis	37,217.50
Rogers Construction Co., Portland	37,973.00
Frank N. Parsons, Forest Grove	44,470.00

HEPPNER-SPRAY SECONDARY HIGHWAY IN MORROW COUNTY
HARDMAN HILL SECTION

J. S. Risley, Milwaukie (2)	$118,448.00
E. C. Hall Co., Portland (1)	120,348.00
O. C. Yocom Co., McMinnville (3)	123,271.00
Homer G. Johnson, Portland (1)	128,104.00
Sound Constr. & Engr. Co., Seattle, Wn. (1)	129,631.90

(1) Bidder will accept award only in combination with the Rhea Creek-Hardman Hill Project.

(2) Bidder will make lump sum reduction of $2,730.00 if also awarded Rhea Creek-Hardman Hill Project.

(3) Bidder will make lump sum reduction of $5,520.00 if also awarded Rhea Creek-Hardman Hill Project.

HEPPNER-SPRAY SECONDARY HIGHWAY IN MORROW COUNTY
RHEA CREEK-HARDMAN HILL SECTION

J. S. Risley, Milwaukie	$ 76,590.00
Homer G. Johnson, Portland	80,475.00
Sound Constr. & Engr. Co., Seattle, Wn. *	81,893.00
E. C. Hall Co., Portland *	84,555.00
O. C. Yocom Co., McMinnville *	91,050.00

* Bidder will accept award of this project only in combination with Hardman Hill Project.

1946

COMBINATION BIDS FOR ABOVE TWO PROJECTS

(1) Hardman Hill Section of the Heppner-Spray Secondary Highway.
(2) Rhea Creek-Hardman Hill Section of the Heppner-Spray Secondary Highway.

	(1)	(2)	Reduc.	Comb. Bid
J. S. Risley	$118,448.00	976,590.00	$2,730.00	$192,308.00
E. C. Hall Co.	120,348.00	84,555.00	None	204,903.00
Homer G. Johnson	128,104.00	80,475.00	None	208,579.00
O. C. Yocom Co.	123,271.00	91,050.00	5,520.00	208,801.00

CONCESSION PRIVILEGES

	PER CENT OF GROSS SALES
Multnomah Falls Gift Shop, Multnomah Falls	10.5%
Joseph V. Tompkins, Salem	06.5%
Edwin L. Dimmitt, Portland	02.0%

Mr. Charles Hovey, Manager of the Logging Department of the Vancouver Plywood Corporation, was present in response to the Commission's request to show cause why the company's log-hauling permit should not be canceled in view of the record of overweight violations that have been charged against his company's equipment. Chairman Banfield recited for Mr. Hovey's benefit the record of the company's violations and inquired what the company intends to do to correct the situation. He advised him that the overloading must stop; otherwise, the Commission will cancel the company's permit. He suggested that the company either purchase scales for the weighing of its loads before they enter a state highway or secure the services of a new loader if

the man now so employed cannot or will not keep the weight of loads within the specified limits. Mr. Hovey admitted the violations, which, he said, have occurred notwithstanding definite instructions to the men in charge of loading to keep loads within the prescribed limits. He further stated that the company wishes to cooperate with the Highway Commission in every way and to that end is now purchasing scales for the weighing of its loads so hereafter definitely no overloads will occur. In view of the assurances given by Mr. Hovey, the Commission decided unanimously not to cancel the permit of the company for past offenses. It was understood, however, that a repetition of the offenses would result in the cancellation of the permit regardless of the number of trucks that are being operated under it.

Captain C. T. Smith, owner of the Columbia River ferry boats at The Dalles and at Maryhill, and Mr. Bert Geer, his manager, came before the Commission regarding construction of a new approach road to the Maryhill ferry landing. Captain Smith advised that he proposed to construct a new ferry landing about 740 feet downstream from the present ferry landing, which will necessitate construction of a new approach thereto from the Columbia River Highway. Surveys have been made, he said, which disclose that a new connection with the highway can be constructed that will meet the requirements of the State Highway Commission and will overcome objections previously offered by the Commission and its engineers. He exhibited a plan of the proposed improvement, which includes construction of a retaining wall parallel with the highway for a distance of about 300 feet and the construction of roadway ramps leading from the highway up to the ferry road junction from the east and from the west. Such ramps, he said, are to be on a three percent grade, the top to be level with the railroad, so that traffic would cross the railroad at grade. He further advised that the ramps and the ferry road will be paved 20 feet wide, and that it is proposed to construct a concrete ramp 230 feet long at the ferry landing.

Mr. Geer advised that the new road will provide a saving of 3/4 of a mile to the traveling public, and, based on an estimated number of 82,067 cars that crossed the Maryhill Ferry in 1946, such saving would amount to about 54,000 miles a year. He predicted that traffic crossing the ferry in 1947 would reach 100,000 cars. He also said that the use of the proposed landing would shorten by about ten minutes the time now required to cross the river.

The Engineer questioned the safety features of the proposed connection and requested time to make investigations and studies before passing judgment. He pointed out that the approach to the present ferry is a county road, which the state oiled but does not maintain; also, that it will be necessary to secure an order from the Public Utilities Commissioner authorizing the new railroad crossing. He also mentioned that the highway grade at this point is some four and one-half feet below the railroad tracks, and there are possibilities that the highway would have to be raised. Chairman Banfield remarked that the present ferry approach is the route of US97, and if the new approach is constructed, it probably will mean the rerouting of this Federal highway. The Chief Counsel advised that if the Commission routes

traffic over the new approach it would be the state's obligation to maintain it. The matter was discussed further but action thereon was deferred pending additional study and report from the Engineer, to whom it was referred.

The Chief Counsel brought up for discussion a settlement with Mr. W. H. Gonyea for right of way needed for the proposed improvement of the Pacific Highway across Mr. Gonyea's land between Judkins Point and Goshen. At his request Mr. Ray Landon, right of way buyer who has been carrying on the negotiations with Mr. Gonyea, explained details. It appears that Mr. Gonyea owns land on both sides of the highway location and has plans for the construction of a tourist motel on one side of the highway and in connection therewith he will need commercial access to the highway at two points. Mr. Gonyea also wants one private access to his home on the opposite side of the highway. It appears, also, that Mr. Gonyea owns frontage on the highway nearly 3/4 of a mile long, and he has agreed to sell the right of way to the state for $1,000 if given the access to the highway which he considers he needs; but he will not settle on any other basis and will go to court if the state will not meet his terms. The Engineer stated that he is inclined to recommend refusal of Mr. Gonyea's terms until he has had time to study the situation. It was Chairman Banfield's thought that if negotiations are continued they should be on a no-access basis, which is in conformity with the Commission's established policy. As a result of discussion the Commission deferred action pending a complete report by the Engineer. The Engineer was instructed to render such a report at the next meeting. In the meantime negotiations with Mr. Gonyea are to be discontinued.

The Commission had under consideration additional matters of unfinished business, as follows:

1. Possibility of securing reimbursement from the State Restoration Fund for losses incurred, notwithstanding that the property damaged is not restored to its original condition: The Chief Counsel advised that the law, as written, does not permit the Board of Control to reimburse state departments for losses unless the property damaged is restored, and that it would take an action of the Legislature to change it. Chairman Banfield suggested that the Legislature should not be requested to change the law and that, if the Commission has any property which it considers should be covered by special insurance, such special insurance should be purchased. The suggestion was approved by Commissioner Chandler and it was so ordered.

2. Proposed acquisition of the Cliff House property on the Oregon Coast Highway at Depoe Bay for park purposes: The Assistant Counsel, Mr. George Neuner, reported that a formal offer to pay $4,000 was made for this property but the owner was not interested in selling it at that price and indicated that the property would cost the state in excess of $7,500. In view thereof, he said, a condemnation action was filed but the case has not yet come to trial. The Commission took no action on the matter.

3. Question of leasing a narrow strip of state property in Astoria to Foster and Kleiser Company on which to maintain a platform for the use of

workmen in erecting advertising signs: The Chief Counsel advised that he has nothing to report on this matter except that he has arranged to discuss the sale of the property to the owner of the adjoining land, the results of which he will report to the Commission at the next meeting.

A delegation from Portland representing the Oregon Roadside Council and including Mrs. Daniel Heffner, President, Miss Julia Hobday, Vice-President; Mrs. Cora Murney, Treasurer; and Mr. O. C. Roehr, Counsel, was present and urged the Commission to purchase for park purposes a strip of land lying along the Oregon coastline north of the Chetco River, in Curry County, and to name this park "Samuel H. Boardman Park" in honor of Mr. S. H. Boardman, State Parks Superintendent. Mrs. Heffner headed the group. All members of the delegation spoke in behalf of this request. Chairman Banfield advised that the Commission recognizes the service which has been rendered the State of Oregon by Mr. Boardman, but the purchase and naming of the park in his honor are two different matters and cannot be considered at the same time. He further stated that it is the policy of the Commission not to acquire state park areas until they have been inspected by the State Parks Superintendent and his recommendation has been received. The Commission, he said, has not received a recommendation from Mr. Boardman with regard to the piece of land mentioned by the delegation, but the Commission will discuss it with Mr. Boardman and secure his recommendation as to its feasibility as a state park area. The naming of the park for Mr. Boardman is something that the Commission will have to consider at a later date. This concluded the discussion.

Mrs. William T. Lambert, Legislative Chairman, State Garden Clubs of Oregon, came before the Commission regarding the erection of markers and the ornamentation of US99 in recognition and commemoration of the services and achievements rendered by men and women who served in the armed forces of the United States in World War II. Mrs. Lambert advised that the National Council of State Garden Clubs is sponsoring a "Blue Star Memorial" program in connection with which the Federation of Garden Clubs of Oregon, and other state federations of garden clubs, have been asked to cooperate, the object of which is, as stated, to commemorate the services and achievements of those who served in the last war. The State Garden Club of Oregon, she said, has endorsed this program and has prepared a joint resolution for adoption by the Oregon Legislature in which US99 is designated as "The Blue Star Drive" and in which the State Highway Commission is instructed to file with the Secretary of State a description of the particular section of US99 so designated and to cause to be erected along this highway suitable tablets and/or ornamentation to perpetuate the resolution. Mrs. Lambert explained that the State of Oregon will not be called upon to appropriate any money for the proposed plantings, inasmuch as that feature will be taken care of wholly by the state garden clubs, although the State Highway Commission might be asked to contribute a small sum for signs. The planting, she said, will be done under the supervision of the State Highway Commission and will be in locations that meet with the Commission's approval. Mrs. Lambert filed with the Commission a copy of the joint resolution which the Legislature is to be asked to adopt. She explained that the Garden Clubs are not asking the State Highway Commission to do anything at the present time but are simply bringing the matter to the

Commission's attention prior to presenting their resolution to the Legislature in order that the Commission may know just what they have in mind. Chairman Banfield advised that he did not believe the State Highway Commission will oppose the bill or object to carrying out any instructions the Legislature may see fit to give the Commission in regard to this subject. This concluded the conference.

The Assistant Counsel, Mr. George Neuner, presented a map showing an area along the Johns-Glendale Junction Section of the Pacific Highway in Douglas County where the state is purchasing right of way from a Mr. W. A. Martin, et al. He advised that Mr. Martin owns several hundred acres at this place which are severed by the new highway location, leaving two isolated pieces on the south side of the highway, one of which contains 14.6 acres, and the other 53 acres. Mr. Martin, he said, wants to utilize both tracts, which necessitates the granting to him of two farm crossings; moreover, it will necessitate construction of an underpass and considerable fencing. In order to avoid this expense he recommended that the state purchase both tracts at $50 per acre, which is the value placed on them by the appraisers. He pointed out that there would be some salvage, inasmuch as the state can resell the excess property; and, that by purchasing the property the state would be able to control access to the highway from the property. The Chief Counsel concurred in the recommendation. The Commission approved the purchase of the property at the price quoted.

The Engineer brought up for discussion a request from Senator E. R. Fatland, Condon, for the rerouting of the Wasco-Heppner Secondary Highway through the property of a Mr. R. A. Meyers, west of the town of Condon. He advised that the new highway location severs Mr. Meyers' property in a manner that is objectionable to him and that Senator Fatland is asking that the location be given further study, which will mean deferring indefinitely the award of the contract for constructing the new section, bids for which were received at the meeting on November 26. The Commission deferred action on the matter pending a full written report on the subject from the Engineer.

Messrs. J. J. Gard and R. B. Ebersole, Assistant Secretary and Treasurer, and Government Sales Agent, respectively, of the Interstate Tractor and Equipment Company, Portland, appeared before the Commission with regard to the delivery of the third of three motor graders which were ordered from the company in May 1945 as the result of competitive bidding. Mr. Ebersole explained that the company has already delivered two of the graders at the price stipulated in its quotation; however, they have been unable, because of scarcity of equipment, to deliver the third grader. He inquired whether or not the Highway Commission would insist that they do so, notwithstanding that the company stands to lose a considerable sum because of the increased price that the manufacturers are now demanding. He pointed out that the company delivered the second grader to the state at its bid price of $7,341.23, less $250 allowance for an old grader, notwithstanding that the allowable price under the O.P.A. regulations at the time was $8,462.30, so the company stands to lose $1,121.07 in that transaction. The present price for the same equipment, he said, is $9,087.30, which is $1,746.07 more than the purchase price

in 1945. He pointed out that the quotation they submitted in 1945 was predicated upon the ability of the State of Oregon to obtain release from the War Production Board Order L-192 covering this type of equipment and advised that it would not have been possible for the company to have guaranteed its price unless the state obtained such release. Such release, he said, was, or has not, been obtained, which partially accounts for the nondelivery of the equipment to date. He asked the Commission to reimburse the company for its loss on delivery of the second grader and to relieve the company from its obligation to deliver the third grader; however, he added, the company will complete delivery of this equipment and assume the loss if the Commission insists.

Mr. Card stated that the company accepted the order in good faith, and its failure to complete the delivery of the graders was for reasons beyond its control. He confirmed Mr. Ebersole's statement that the company would deliver the third grader if the Highway Commission insists but could not promise when that would be because deliveries are very slow from the factory.

The Chief Counsel inquired whether or not the company could have protected its price from the factory if it had paid cash when the order was placed. Mr. Card replied that the company had tried to do that but without success, whereupon the Chief Counsel remarked that the company has a good "talking point" were the matter to be tried in court. Mr. Card again stated that the company will abide by the Commission's decision and will deliver the third grader when it can, even at a loss to the company, if the Commission insists but will also accept cancellation of the order without obligation if the Commission approves disposition of the case in that manner.

The Engineer recommended, under the circumstances, the cancellation of the order. Following further discussion motion was made by Commissioner Chandler that the company be relieved from furnishing the third grader without obligation, either to the state or to the company, but that the company will be required to assume its loss on the delivery of the second grader. Chairman Banfield seconded the motion and declared it carried. The Engineer was thereupon authorized by the Commission to obtain quotations for the delivery of another grader.

Mr. Earl L. Dickson, Eugene, came before the Commission with reference to his request for certain revisions in the newly-constructed highway improvement at the Pacific Highway-McKenzie Highway Junction in West Springfield, in order to allow the traveling public freer access to his business establishment at this place. Chairman Banfield advised the results of his inspection of the premises on Saturday, December 21, 1946, particularly pointing out that, in his estimation, there is no way to remove any portion of the channelization strips that have been installed without creating a hazardous condition for other traffic, of which there is a large volume. He suggested the possibilities of constructing a turn-around under the approach to the Willamette River Bridge at this place if Mr. Dickson would provide parking space off the highway right of way, perhaps in back of his store building. The Commission, he said, might look with favor on granting two entrances to such parking area if that can be done without

creating a hazardous condition, and if Mr. Dickson will provide the roadway leading to the area. He added that it is necessary that one-way traffic be maintained in front of Mr. Dickson's store building as a matter of safety to other highway traffic. Mr. Dickson was further informed that it is contrary to the policy of the Commission to do anything that would react harmfully to private interests if that can be avoided, but sometimes it is necessary for the Commission, as a public duty, to do certain things that adversely affect private business when the interests and safety of the general public demand it. He reiterated that the Commission might look with favor on granting two entrances to Mr. Dickson's property, one at each side, if satisfactory points of entrance can be found, but definite action in that regard cannot be taken until further investigations have been made, and that the Commission is definitely opposed to making the changes requested by Mr. Dickson.

Mr. Dickson declared that this is a matter which is beyond the handling of traffic and that it is his intention to keep working on the matter regardless of the stand taken by the Highway Commission.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. with the same persons present and participating.

The Commission discussed with the Engineer the bids received at the morning session for contract work and took the following action thereon by unanimous vote:

The contract for the Klamath Falls Rock Production Project on four state highways in Klamath County was awarded to the low and only bidder, Gladney & Adams, Klamath Falls.

The contract for the Ironside-Jamieson Rock Production Project on the John Day Highway, in Malheur County, was awarded to Jack R. Taggart, Salem, the low bidder.

The awards of the contracts for the remaining projects were held pending approval by the Public Roads Administration. The bids for these projects were referred to the Engineer with authority to award the contracts to the low bidder in each instance when such approval has been obtained.

The Commission also considered the three offers received for the purchase of concession privileges at Vista House, Crown Point. The award of this contract was deferred until the next meeting of the Commission. The bids were referred to the State Parks Superintendent and the Chief Counsel to analyze and report their recommendation at that time.

The Commission had under discussion the offer of the Southern Pacific Company to sell to the state for the sum of $420 a small tract of land containing 14,797 square feet that is needed as right of way in the town of West Linn. The Chief Counsel recommended purchase of the property at such figure. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote. (See Voucher No. 18638).

The Chief Counsel brought up for discussion a request from the owners of property in Block 32, Bennett's Addition to the City of Coos Bay, that Fifth Street North, which has been vacated by city ordinance at the request of the Highway Commission, be reopened so as to allow them access to the highway from this street. He advised that the street was vacated by City Ordinance No. 1547 in 1941 in order to preserve the freeway characteristic of the highway at this point. The Engineer advised that, were the street to be reopened, it would defeat such freeway characteristic and would introduce a definite hazard to highway traffic. He recommended that the reopening should be opposed, particularly since the people residing along Fifth Street now have access to their properties from other city streets. In the discussion that followed the Commission indicated that it considered it unwise to grant the request of the property owners; however, definite action on the matter was deferred pending further study.

The Engineer presented a status report on expenditures to date for highway equipment. He pointed out that the Commission heretofore authorized an expenditure of $450,000 for emergency purchases, of which amount $270,819.92 has actually been spent for equipment received, and $176,510.68 has been committed by orders, leaving a balance of only $2,669.40 to finance additional purchases that are badly needed. He requested authority to spend an additional $100,000 for this purpose. The request was approved by the unanimous vote of the Commissioners present.

The Engineer presented to the Commission for approval a list of Minor Betterment projects for undertaking during 1947, totaling $258,390 for highways and $153,325 for bridges; grand total, $411,715. He advised that this is only a partial list of projects and that others would be submitted to the Commission for approval later. He explained briefly the details with respect to each of the projects presented. The Commission deferred action on the matter until its next meeting when Commissioner Schaupp is present.

In the discussion of this matter the Engineer pointed out that there was omitted from this list an item of $13,000 for construction of parking areas along the Keston-Elgin Highway at Tollgate and at Spout Springs Mountain, which tentatively has the approval of the Commission. He was instructed to include this item in the list for consideration by the Commission at the next meeting.

The Commission had under discussion matters pertaining to the Legislative Assembly which will be in session beginning Monday, January 13, 1947. The Commission ordered that no Highway Department employee whomsoever shall engage in lobbying at this session; further, that if information concerning highways is requested by any member of the Legislature such information shall be given in writing and all such information shall be the Highway Department's official information and shall be signed by the highway official who furnishes it. A copy of all information furnished the Legislature shall be retained for the Commission's records and files.

The Engineer brought up the matter of maintaining the newly-designated secondary highways in the town of Warrenton. He advised that inasmuch as the State Highway Department has assumed jurisdiction over these roads, provision will have to be made to finance maintenance and betterment work which may be required, since no provision was made for such work in the 1947 Budget which the Commission adopted at the previous meeting. The Commission deferred action on this matter pending a report from the Engineer as to the costs involved. The Engineer was instructed to furnish such information at the next meeting.

Chairman Banfield brought up for discussion matters pertaining to the ferry boat "North Beach" which has been used as an auxiliary boat in connection with the ferry operation between Astoria, Oregon, and Megler, Washington. He inquired as to the condition of this boat, which it is proposed to replace with a new one. The Engineer advised that, according to investigations, it would cost between $40,000 and $80,000 to put this boat in serviceable condition, and even then it would be too small to provide the service that would be demanded of it, if last year's record can be taken as an indication of what the future requirements will be. Inspection of the boat, he said, reveals much rotten wood in the hull, and, according to marine architects, the boat could not be reconditioned to provide service for more than five years. He gave as his thought that it would be a waste of funds to spend so much money in the repair of the old boat for such a short period of time when what is really needed is a faster boat with double the capacity. He pointed out that the engines in this boat are in fair condition and probably could be salvaged for at least $10,000, provided they cannot be used in the new boat.

Chairman Banfield suggested that it would be advisable to secure expert advice from the American Bureau of Shipping as to the seaworthiness of this boat before it is disposed of and the engines removed. The Engineer estimated the cost of such inspection at about $500 and requested authority to have the American Bureau of Shipping inspect the boat along with its inspection of the other ferry boats. The Commission approved the request and ordered that only one of the boats shall be inspected at one time so as to insure that at least one ferry boat will be operating at all times.

At 3:00 p.m. Chairman Banfield announced the awards of contracts for which bids were received at the morning session, as follows:

"Construct 'Love Bridge' over the Powder River on the Baker-Homestead Highway near Richmond, Baker County. The Commission received only one bid for this project, being that of Lindstrom Bros., Portland, at $23,931.50. The bid is satisfactory, but award of the contract is being deferred pending satisfaction of a certain condition. The bid has been referred to the Engineer with authority to award the contract when this condition has been satisfied.

"Klamath Falls Rock Production Project on four state highways in Klamath County. The only bid received for this project was that of Gladney & Adams, Klamath Falls, at 38,367. The Commission has awarded

the contract to the bidder at their bid price.

"Ironside-Jamieson Rock Production Project on the John Day Highway, Malheur County. Jack R. Taggart, Salem, submitted the low bid for this job at $33,655. The second low bid was that submitted by A. H. Saxton & Son, Corvallis, at $37,217.50. There were two higher bidders. The Commission has awarded the contract to the low bidder, Jack R. Taggart, at his bid price.

"Grading, surfacing and oiling the Hardman Hill Section of the Heppner-Spray Secondary Highway, Morrow County. The Commission received five bids for this work, the low one being that of J. S. Risley, Milwaukie, at $118,448. Mr. Risley agreed to a lump sum reduction of $2,730 if also awarded the Rhea Creek-Hardman Hill Project, bids for which were also received at this meeting. The second low bidder was E. C. Hall Co., Portland, at $120,348. This contractor qualified his bid by stating that he would not accept the award of this contract unless also awarded the contract for the Rhea Creek-Hardman Hill Project. The low bidder for the Rhea Creek-Hardman Hill Project, consisting of widening, surfacing and oiling, and furnishing crushed rock in stockpiles, was J. S. Risley, Milwaukie, at $76,590. Homer G. Johnson, Portland, submitted the next low bid at $80,475. There were three higher bidders. A tabulation of the bids received for both projects, in combination, reveals the bids of J. S. Risley to be low. The bids are satisfactory, but the Commission has deferred the award of the contract pending the satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award both contracts to J. S. Risley, the low combination bidder, on the basis of his combination bid which totals $192,308, when the conditions are satisfied.

"Grading, surfacing and oiling the Umatilla Dam-Hermiston Section of the Old Oregon Trail in Umatilla County. The low bidder for this project was O. C. Yocom Co., Mcminnville, at $141,478. The second low bidder was K. F. Jacobson Co., Portland, at $142,692.50. There were eight higher bidders. The low bid is satisfactory to the Commission, but the award of the contract is being held pending satisfaction of certain conditions. The bids have been referred to the Engineer with authority to award the contract to the low bidder, O.C. Yocom Co., when the conditions have been satisfied.

"Sale of concession privileges at Vista House, Crown Point, on the Columbia River Highway, Multnomah County. The high bidder for this concession was Multnomah Falls Gift Shop, Multnomah Falls, at 10.5 percent of gross sales. The next high bidder was Joseph V. Tompkins, Salem, at 6.5 percent of gross sales. The third, and only other, bid was received from Edwin L. Dimmitt, Portland, at two percent of gross sales. The Commission has referred the bids to the State Parks Superintendent and the Chief Counsel to analyze and report back to the Commission at its next meeting when final action will be taken thereon."

The Commission considered and signed agreements, etc., as follows:

Cooperative agreement with Public Roads Administration and U.S. Forest Service covering forest highway construction.

Agreement with E. J. Lindvick, et al. covering lease of property for roadbuilding materials.

Agreement with Henry Zorn covering rental of portion of Champoeg State Park for farming purposes.

Easement deed authorizing Bonneville Power Administration to maintain a stub pole with anchors and guys on state highway property in Tillamook County.

Agreement with the City of Salem covering installation of a flashing beacon on Pacific Highway East at the intersection of Mission and South Commercial Streets, Salem.

Agreement with the City of Eugene covering installation of traffic signals at the intersections of Sixth Avenue and Sevenue Avenue (state highway routes) with Blair Boulevard, in Eugene.

Agreement with the City of Eugene and Lane County covering a proposed three-way project along the old mill race in the City of Eugene.

Project statement with the P.R.A. covering improvement of the Albany-Lyons Secondary State Highway.

Project statement with the P.R.A. covering improvement of the Hillsboro-Newberg Section of the Hillsboro-Silverton Secondary Highway.

Project statement with the P.R.A. covering improvement of the Pittsburg-Scappoose Road in Columbia County.

There being no further business to come before the Commission at this time the meeting adjourned at 3:00 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Portland, Oregon
February 3, 1947

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission by unanimous vote approved the minutes of the meeting held on December 30 and 31, 1946.

The State Parks Superintendent was present and reported on the following matters:

1. Offer of Denny Logging Company to purchase "down" timber along the Salmon River Highway wayside strips: The Parks Superintendent advised that there are about 68 fir trees, containing approximately 200,000 board feet of timber, which the company would like to purchase and for which they have offered to pay the sum of $400. He advised that this timber was advertised for sale at one time, but the Commission received no bids for it. He recommended acceptance of the offer from a standpoint of improving the appearance of the roadside. The Commission approved the recommendation unanimously, subject to the condition that the loading of the timber on the highway right of way shall be strictly prohibited.

2. Request of Marine Parks Committee of the Columbia River Yachting Association for establishment of landing areas along navigable waterways of Oregon: The Parks Superintendent advised that approval of this request would eventually result in the expenditure of a large sum of money which is not available for purposes of this kind. He pointed out that landing areas are now available at a number of locations, such as at Champoeg State Park on the Willamette River, and he exhibited a map showing the location of such places. He recommended that the request be denied. The Commission approved the recommendation unanimously, however instructed the Parks Superintendent to prepare a report with maps showing state parks that are located on streams having boating facilities.

3. Establishment of a policy regarding overnight camping in state parks: The Commission discussed this matter at some length but deferred action for about six months, there being a question as to the advisability of inaugurating a program of this nature.

4. Sale of concession in Vista House at Crown Point: The Chief Counsel reported this matter on behalf of the Parks Superintendent. He

advised that he and the Parks Superintendent have carefully considered the bids received at the previous meeting for the purchase of this concession and recommend acceptance of the offer of the Multnomah Falls Gift Shop, which submitted the high bid therefor at 10.5% of gross revenues. He further advised that he has consulted with Mr. Edwin L. Dimmitt, present caretaker at Vista House, regarding the vacation of the premises, and Mr. Dimmitt advises that 30 days' time is sufficient for him to vacate the premises. The Commission deferred a decision in the matter pending consultation with Mr. Frank L. McGuire, Portland, who is interested in the matter on behalf of Mr. Dimmitt and who is scheduled to appear before the Commission at this meeting with regard thereto. (See ahead for further discussion---The Commission later in the session awarded the contract to the Multnomah Falls Gift Shop.)

5. Proposed establishment of a state park along the Oregon Coastline south of Gold Beach, Curry County: The Parks Superintendent exhibited a map showing the location and boundaries of this proposed park, which he stated contains about 2,600 acres of land, all of which is privately owned. He recommended purchase of the property as being very desirable from a park standpoint and to provide right of way for the future location of the Oregon Coast Highway along this section. It was his thought that the land could be purchased for about $10 per acre. The Commission by unanimous vote authorized investigations to ascertain the possibilities of acquiring the property and the probable cost thereof, such investigations to be made without obligating the Commission in any way to establish a state park at this location.

6. Approval of orders for state park betterment work for 1947 performance: The State Parks Superintendent presented a list of projects proposed to take up the full amount of $265,000 budgeted for state park development work this year together with maps showing a number of the parks and work orders showing details of contemplated improvements, as follows:

OREGON STATE PARKS DEPARTMENT

Proposed Betterment Orders - 1947 ++

	Work Order Details	For Present Approval	For Later Approval	Total
I. FOR CONSIDERATION FEBRUARY 3:				
1. With Maps:				
Armitage		$ 300.00	$7,000.00	$ 7,300.00
* 1- 20 picnic tables	$ 200.00			
* 2- Fireplace	100.00			
** 3- Caretaker's house	7,000.00			

(Con't)

	Work Order Details	For Present Approval	For Later Approval	Total
Bradley		$ 648.00		$ 648.00
* 1- 6 picnic tables	$ 48.00			
* 2- 1 stove	100.00			
* 3- 1 5000-gal. wooden water tank, pipe and fittings	500.00			
Cascadia		$2,900.00		2,900.00
* 1-Water system - reservoir, pipe, material	1,800.00			
* 2- Latrine	1,000.00

Footnotes:

++ In order to conserve space some of the individual items have been abbreviated. A true copy of the complete program as presented by the State Parks Superintendent is available for inspection in the office of the State Highway Commission in Salem, being file No. 15 under the heading "Special Matters".

The Parks Superintendent advised that the plans for all of the work contemplated under the heading "I. FOR CONSIDERATION FEBRUARY 3:" have been prepared and that he is ready to proceed with construction upon approval of the details by the Commission. He suggested, however, that work in connection with the double-starred items, such as building construction, be postponed until conditions are more favorable for such work. The Parks Superintendent further advised that the details with respect to work contemplated in the parks listed under the heading "II. FOR LATER CONSIDERATION" have not been worked up but will be ready for the Commission's approval at the next meeting.

Preliminary to discussion of this program Chairman Banfield inquired whether or not the Parks Department has sufficient equipment on hand to perform the work contemplated by the orders. He stated that the park work, except roadway construction and maintenance, must be performed without any conflict whatsoever with highway construction and maintenance or to the detriment of state highways, and if the Parks Department has

the equipment and the crews to perform the proposed park work on such basis, then that work should proceed; otherwise, not. Chairman Banfield also inquired if the entire state had been considered in the preparation of the park-development program. He explained that, as a matter of policy, all parts of the state should be considered in the allocation of the funds and should be included in any program for state park development so that expenditures will be divided throughout the state on an equitable basis. The Parks Superintendent advised that he has sufficient equipment on hand, or will have within the near future, to carry on satisfactorily all of the work contemplated in the work orders as submitted; also, that he has given consideration to all of the parks of the state in preparation of the park-development program. He said that the entire state is not represented in detail by the work orders presently submitted, but additional projects are being prepared and will be presented to the Commission for approval at its next meeting.

There followed careful consideration and discussion of the park-improvement program as presented. As a result thereof, motion was made by Commissioner Schaupp that all of the work listed under the headings "I. FOR CONSIDERATION FEBRUARY 3: 1. With Maps: 2. Without Maps:", except the double-starred items, be approved and that the Parks Superintendent be authorized to proceed with the construction of the same. The motion was duly seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

In the discussion of the details of the foregoing park-development program, the Commission gave special consideration to the following matters: Sale of concession privileges at Silver Creek Falls State Park, purification of water in state parks, construction of buildings, and distribution of the funds throughout the state.

Concerning the operation of the concession in Silver Creek Falls State Park, the Chief Counsel reported on the proposed arrangement with Mr. Ralph Nohlgren, of Salem, covering these operations. He advised that Mr. Nohlgren is spending about $4,500 for equipment, etc. and gave as his feeling the Commission should consider this feature in determining the amount that Mr. Nohlgren should pay as compensation for the concession privileges. He recommended a minimum of $25 per month for rental plus an additional two percent of gross sales if revenues exceed $4,000 but are not more than $5,000, three percent of gross sales if revenues exceed $5,000 but are not more than $7,500, four percent of gross sales between $7,500 and $10,000, and five percent of the gross revenues in excess of $10,000, and that when the gross revenues amount to $10,000 monthly, that the arrangement be reviewed by the Commission. The arrangement also provides, he said, that Mr. Nohlgren shall be furnished a building to be used as living quarters for his hired help, none at present being available for such purpose, and in this connection he mentioned that the State Parks Superintendent has a building at the old CCC camp situate nearby which could be moved to the park and used for this purpose. He recommended approval of the arrangement, including the furnishing of the building, in view of the expenditure that Mr.

Nohlgren has to make before he can start operating. The Commission by unanimous vote authorized the Chief Counsel and the Parks Superintendent to work up an agreement with Mr. Nohlgren on the basis of the recommendation. The Commission made it clear that it did not wish to be bothered with complaints and other details of the operation and ordered that all such matters be referred to the State Parks Department for handling.

As to the purification of water in state parks the Commission was of the opinion that the people generally consider that water made available for their use in public places is pure and accordingly ordered that the water in all state parks be tested for purification and the public properly informed.

Concerning the construction of buildings in state parks, the Commission ordered that no building shall be constructed until the plans for the same have been presented to the Commission and its approval obtained.

Concerning the distribution of park-development funds the Commission ordered an equitable distribution throughout the state as a matter of policy.

7. Request of service clubs of Ontario, Vale and Nyssa for establishment of a state park at Owyhee Reclamation Dam: The State Parks Superintendent reported very briefly on this matter. He was instructed by the Commission to render a detailed report at the next meeting.

8. Resolution from the Central Point Grange protesting the sale of any part of the land heretofore presented to the state as a gift by Mr. F. L. Tou Velle, former State Highway Commissioner: The Commission ordered that the Grange be informed that information it has received to the effect that the Highway Commission is considering the sale of any portion of this property is erroneous---that the State Highway Commission is not considering the disposal of any of this land, but rather is discussing the matter of increasing its holdings at this point.

Mr. Frank L. McGuire, Realtor, Portland, came before the Commission at this time regarding the sale of concession privileges in the Vista House at Crown Point on the Upper Columbia River Highway. Mr. McGuire stated that he is appearing on behalf of Mr. Edwin L. Dimmitt, who has acted as caretaker at this place for a number of years and who would like to continue in business at this location. Mr. Dimmitt, he said, did not fully understand just what the Commission wanted when it advertised for bids for the purchase of the concession and, consequently, made a token offer to pay the state two percent of gross revenues. Mr. McGuire gave as his thought that this should be given consideration by the Commission in making its decision and that Mr. Dimmitt should be allowed to meet the proposal of the high bidder or that the Commission should cancel all bids received and readvertise the concession for new bids. Action on the matter was deferred by the Commission until later in the session following consultation with the Chief Counsel. (The matter was reconsidered on the last day of the meeting, and the contract was at that time awarded to the Multnomah Falls Gift Shop, which submitted the high bid of 10.5% of gross revenues for the concession. See ahead for details.)

The Assistant Counsel, Mr. J. W. DeSouza, was present and requested authority to acquire certain parcels of real property that are needed for

various highway improvements throughout the state. He presented a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of the individual items the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FOOTNOTES:

* In the discussion of Item No. 12909, acquisition of land from the First Presbyterian Church of Monument needed as right of way for the new location of the Kimberly-Long Creek Secondary Highway through the town of Monument, the Secretary presented a petition signed by 32 residents of the town urging retention of the present route of this secondary highway rather than the proposed route. The Engineer recalled that the Commission at the previous meeting formally adopted the revised route and that right of way along such route for the most part has already been obtained. He pointed out that the construction of the route on the proposed alignment has been approved by the Public Roads Administration, which would have to concur in any change that might be made. Mr. T. M. Davis, District Engineer of the Public Roads Administration, was present and expressed himself as being opposed to any change in the adopted location. In view of this information the Commission decided unanimously not to change its previous decision as to the permanent location of this highway.

** Item No. 3294-A, acquisition of right of way from O. F. Cooke and Ella M. Cooke. In the discussion of this item it was explained that the right of way originally acquired for this highway was only 160 feet wide, but later on it was decided to obtain a standard-width right of way of 220 feet; further, that because of this decision it is now necessary to re-establish the Cooke's winery buildings, which are located within the proposed widened section; otherwise, the right of way at this point will be considerably narrower than that on each side of this property. It appeared to the Commission after considerable discussion that it is now too late to make any change in the highway alignment to avoid these buildings and that it has no alternative but to pay the expense of providing the standard-width right of way at this point. In view thereof the Commission approved the purchase of the Cooke property on the basis of the option reported; however, ordered that, hereafter, all cases where right of way acquisitions are to be less than the standard width for the particular project, the matter be brought to the special attention of the Commission for instructions. The Commission will then decide the question of width on the basis of the findings.

In this connection the Commission also discussed the proposed agreement with Commonwealth Inc. for right of way needed for the Sunset Highway across its holdings south of Cedar Mills. The Engineer reported that indications are a satisfactory agreement will be reached in the near future so the project can be advertised for bids to be received at an early meeting. The Commission instructed the Engineer not to advertise this project for bids until all matters pertaining to its arrangement with Commonwealth Inc. have been satisfactorily consummated and the agreement executed by both parties.

*** In the discussion of right of way acquisitions for the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway it was pointed out that, whereas the survey for the permanent location of this highway had been completed for a considerable time, it appears that the Commission has not adopted the survey by formal resolution, which action is now needed in connection with a right of way condemnation case. The Engineer presented a map showing the proposed permanent location between Eagle Creek and Sandy, together with other information pertaining thereto. Following careful consideration of such matters the Commission approved the survey and by unanimous vote adopted the following special resolution prepared by the Chief Counsel relative thereto:

WHEREAS, the Commission on the twenty-ninth day of May, 1945, adopted by formal resolution a postwar program of highway construction, reconstruction and improvement, which program contained along with other highways therein designated the Woodburn-Sandy Highway in Clackamas County; and

WHEREAS, in furtherance of said program of highway projects and in response to the order and direction of the Commission the Engineer surveyed the said highway, including such changes, modifications and relocations as in the opinion of said Engineer should be made with respect to the existing route and on the 24th day of September, 1945, filed his report and recommendation covering said route and location; and

WHEREAS, the Commission approved said survey and directed the Engineer to prepare the descriptions of all real properties the acquisition of which was deemed and found necessary for and in connection with the accomplishment of said highway construction; and

WHEREAS, pursuant to instructions, options covering the real properties needed were procured from most of the respective owners and with respect to properties which could not be acquired by agreement the Commission directed that such properties be acquired by condemnation; and

WHEREAS, it now appears that by inadvertence and oversight formal approval and adoption of said survey, route and location was not entered in the minutes and records of the Commission other than such approval and adoption as is found in the Commission's resolution by which the said postwar program was adopted and in the Commission's resolution by which condemnation proceedings were authorized,

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the survey, route and location made, reported and recommended by the Engineer covering and pertaining to the Eagle Creek-Sandy Section of the Woodburn-Sandy Highway in Clackamas

County and the field notes and other related engineering data be and the same are hereby approved and adopted.

2. That the construction, reconstruction and improvement of said highway shall, when accomplished, be in accordance with said survey, route and location unless changed, modified or altered by order of the Commission.

3. That the descriptions of real properties prepared by the Engineer covering real properties needed for such project be and they hereby are approved.

4. That this resolution be entered in the minutes and records of the Commission as of the third day of February, 1947, but the action hereby taken shall be deemed and considered an approval and adoption of said survey, route and location as of the 24th day of September, 1945.

**** Item No. 13185, purchase of right of way from Linfield College needed in connection with the improvement of the Salmon River Highway and the Pacific Highway West between Pringle Corner and McMinnville. In the discussion of this item, which the Commission approved, the Commission also discussed matters pertaining to the proposed channelization of traffic at the intersection of the Pacific Highway West and the Salmon River Highway a short distance west of McMinnville, and acquisition of additional parcels of land needed as right of way. The Commission deferred its approval of the channelization project and of the acquisition of the additional right of way until later in the session. The Engineer was instructed to have on hand when discussion of the subject is resumed a map of the highway alignment showing the plan of the proposed channelization project and right of way needed to effect the same. (Discussion of this matter was resumed during the afternoon session, at which time the Assistant Counsel presented a map showing the plan for the proposed channelization of the highway junction. The Commission questioned the need for such channelization project at this location and at the suggestion of Commissioner Schaupp decided not to acquire the right of way needed for the same until he has had an opportunity to inspect the site and to satisfy himself as to the need of the channelization. See ahead for minute entry.)

Also, in the discussion of right of way acquisitions the Commission ordered that hereafter small-scale alignment maps showing highway locations as approved and adopted by the Commission shall be available for inspection by the Commission when right of way matters are discussed.

The Assistant Counsel also requested authority to institute condemnation proceedings to acquire right of way needed in connection with a number of highway improvements. He presented a list of such properties and the offer that he recommended in condemnation for each parcel, as follows:

Following careful consideration the Commission approved the respective offers and authorized condemnation of the properties as requested. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the

safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Wilson Title & Abstract Company, et al., which property is located in Block 25 in Eldorado Heights, an addition to Klamath Falls, situated in Section 20, Township 38 South, Range 9 East, W.M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11523, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway; (*)

Real property owned by Rowland S. Kemp, which property is located in Lot 9, Block 24, Hot Springs Addition to Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 11399, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway; (*)

Real property owned by Neoma Morton, which property is located in Lots 4 and 5, Block 18, Sunnyside Addition to Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 11341, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway; (*)

Real property owned by C. L. Lowe, which property is located in Lot 17, and Lot 18, Block 29, Hot Springs Addition to Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 11366, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway; (*)

Real property owned by Margaret Baker Walker, which property is located in the southwest quarter (SW¼) of Section 20, Township 10 South, Range 1 West, W.M., Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 13283, which property is being acquired for right of way purposes in connection with the Albany-Lyons Highway; (*)

Real property owned by Ernest H. Krebs, et ux., which property is located in the southeast quarter (SE¼) of the southwest quarter (SW¼) of Section 13, Township 2 South, Range 4 East, W.M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 12945, which property is being acquired for right of way purposes in connection with the Woodburn-Sandy Highway; (*)

Real property owned by Ruth Lindau and Milton A. Lindau, which property is located in the southeast quarter (SE¼) of the southwest quarter (SW¼) of Section 13, Township 2 South, Range 4 East, W.M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7, and is further identified in the records of the Highway Commission as file R 12944, which property is being acquired for right of way purposes in connection with the Woodburn-Sandy Highway; (*)

Real property owned by J. E. Mooney, et ux., which property is located in the southwest quarter (SW¼) of the southwest quarter (SW¼) of Section 2, Township 4 North, Range 28 East, W.M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 13319, which property is being acquired for right of way purposes in connection with the Old Oregon Trail Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission as of the third day of February, 1947.

FOOTNOTES:

(*) The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 72, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Assistant Counsel also requested authority to condemn property owned by G. E. Walling, et ux, as an addition to Short Sand Beach State Park on the Manzanita-Arch Cape Section of the Oregon Coast Highway. He advised that this tract contains 112 acres of land which is appraised by the Highway Department appraiser at $10 per acre, or a total of $1,120. He also said that the property has been appraised by D. O. Fisher, Appraiser, Cannon Beach, at $1,200, and by Charles Henrys, Appraiser, Seaside, at $1,570. He recommended an offer of $1,500 in the condemnation proceedings. The State Parks Superintendent, who was present, urged acquisition of this property as essential for the proper development of the present park, advising that it is the only place where a road can be constructed giving access to the park. He explained his long-range plan for the development of this park, which includes the acquisition of land back as far as Sugar Loaf Mountain, and declared that eventually this would be the most spectacular park in the State of Oregon. The acquisition of the ocean frontage, he said, is most important at this time and, in his estimation, the Walling tract, which is a key to the situation, should be acquired now while it can be obtained at minimum cost. He pointed out that were the present owners to construct a building on the property it would not be possible for the state to acquire the land without paying an exorbitant sum for it. He gave as his thought that the property could be purchased for about $2,500. The Assistant Counsel, Mr. George Neuner, gave as his thought that the property could not be purchased for less than $5,000. Following considerable discussion the Commission deferred its decision until later. The Parks Superintendent was instructed to render an additional report within the next month or two.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the award of contracts would be made at 4:00 p.m. in the same room:

COOS RIVER SECONDARY HIGHWAY IN COOS COUNTY
EVERGREEN FERRY SECTION

Dobyns & Webb, Salem	$ 34,331.00
Coos Bay Dredging Co., Coos Bay	35,704.00

OREGON COAST HIGHWAY NEAR NEWPORT IN LINCOLN COUNTY
CONSTRUCT 182 FT. REINFORCED CONCRETE VIADUCT OVER SPENCER CREEK

Archie R. Averill, Portland	$ 41,650.00
Tom Lillebo, Reedsport	44,530.00
J. P. Brittan & Co., Portland	49,500.00
Walder & Kenworthy, Milwaukie	49,640.00
Grimstad & Vandervelt, Astoria	64,790.00

HILLSBORO-SILVERTON SECONDARY HIGHWAY IN WASHINGTON AND YAMHILL COUNTIES
SCHOLLS-NEWBERG SECTION

	USING ASPHALT	USING TAR
O. C. Yocom Co., McMinnville	$103,736.00	$104,092.00
J.N. & M.J. Conley, Portland	107,371.00	- - - - - -
Porter W. Yett, Portland	109,327.85	- - - - - -
Rogers Constr. Co., Portland	109,862.00	- - - - - -
E. H. Itschner, Molalla	110,070.00	- - - - - -
A. H. Saxton & Son, Corvallis	111,376.00	- - - - - -
Homer G. Johnson, Portland	113,532.00	- - - - - -
R. O. Dail, Portland	118,423.00	- - - - - -
Sound Constr. & Engr. Co., Seattle, Wn.	133,002.00	- - - - - -

OLD OREGON TRAIL IN UNION COUNTY
MEACHAM-HILGARD ROCK PRODUCTION PROJECT

La Grande Concrete Pipe Co., La Grande	$ 12,145.00

The Chief Counsel reported a proposed settlement of a condemnation action to acquire right of way for a revision of the Oregon Coast Highway across property owned by Charlotte M. Thomas, Lincoln County. He advised that Mrs. Thomas owns certain property situate between the old highway and the ocean upon which she has constructed a number of tourist cabins far enough back from the highway so that her patrons would not be disturbed by the noises of highway traffic; however, the present plans of the Commission provide for the relocation of the highway in close proximity to her development, and Mrs. Thomas alleges $20,000 damages on that account. He further advised that he was unable to reach a satisfactory settlement with Mrs. Thomas, in view of which the Commission authorized condemnation and an offer of $7,500 for her land, which was appraised at $7,800. Mrs. Thomas, he said, refused the offer but now has agreed to accept the sum of $8,250 as payment in full. He recommended authority from the Commission to close the transaction for such sum. The Commission approved the recommendation by unanimous vote.

The Assistant Counsel, Mr. George Neuner, reported on the condemnation case of the State vs. Poe concerning acquisition of right of way for the

relocation of the Pacific Highway across Mr. Poe's premises in Josephine County. He advised that he has reached a settlement with Mr. Poe on the basis of a cash payment in an amount less than that which the Commission approved as an offer in condemnation but it involves a question of access to the highway from Mr. Poe's property. Mr. Poe, he said, is of the opinion that he has a fine location for a number of housing units which he wants to rent on a month-to-month basis, which requires the right of access to the highway for each one of his tenants, of whom there will be seven, such right of access to be over a private roadway heretofore authorized for the owner's private use. This roadway, he said, will be at one end of Mr. Poe's premises, and Mr. Poe also wants a private roadway access to the highway from the other end of his premises. Mr. Neuner gave as his thought that the granting of two entrances would not be a deviation from the Commission's established policy with respect to such matters, and he recommended approval of the request which, he said, would obviate the necessity to complete the condemnation case. The Chief Counsel concurred in the recommendation, advising that, in his estimation, the use of two entrances would not impair the capacity of the highway. The Commission approved such compromise settlement by unanimous vote.

The Assistant Counsel, Mr. DeSouza, again brought up for discussion the matter of acquiring right of way for the proposed traffic channelization project at the junction of the Pacific Highway West and the Salmon River Highway just west of McMinnville. He exhibited a map showing the plan. The question arose in the minds of the Commission as to the need for such channelization. The Engineer advised that this is a very important highway junction point and eventually the channelization of traffic will be needed in order to avoid accidents. It was his thought that the right of way for such a project should be obtained now while it can be purchased at reasonable expense, before costly developments take place. Commissioner Schaupp stated that he would like to inspect the site before passing on the matter, whereupon the Commission voted unanimously to defer its decision until Commissioner Schaupp has made such inspection. (This matter was discussed further by the Commission, along with other channelization projects, immediately before the meeting adjourned on Wednesday, February 5, 1947. See minute entry ahead.)

The Assistant Counsel, Mr. J. W. DeSouza, reported the results of negotiations to acquire timber tracts adjacent to the Oregon Coast Highway between Otter Crest and Otter Rock, in Lincoln County. He advised that the Oregon Pulp and Paper Company owns a 25.4-acre tract on the east side of the highway which contains 740,000 board feet of spruce and 330,000 board feet of hemlock which it is willing to sell to the state at the rate of $4 and $5 a thousand board feet, respectively, which means that if the state traded the timber growing on the highway right of way for the company's timber the state then would have to buy approximately 898,000 board feet of timber from the company. He also stated that he contacted Mr. W. F. Badley, the owner of timber on the west side of the highway, and ascertained that his property is not for sale, although Mr. Badley stated he would give the state first opportunity to buy it should he decide later on to sell it. It appeared to the Commission that the report did not cover the two tracts which the Commission

had in mind at the previous meeting when it authorized negotiations, in view of which action on the matter was deferred until its next meeting. The matter is to be reconsidered at that time, together with a recommendation from the Engineer and the State Parks Superintendent.

The Assistant Counsel also brought up for discussion the application of The Pacific Telephone and Telegraph Company for land on which to maintain two of its repeater stations, one of the stations to be located on property acquired by the Commission from Lydia Powers at the Town of Talent, in Jackson County, and the other on land acquired from W. A. Weideker south of the Town of Wolf Creek, Josephine County. He presented maps showing the location of both tracts. Inspection of the map of the Wolf Creek property revealed that the tract desired by the company is situate some distance from the highway right of way. As the result of discussion the Commission authorized the granting of a ten-year lease to the company for the use of a site abutting the highway right of way rather than removed therefrom, the consideration to be $10 per year. Inspection of the map of the site near Talent revealed that the property lies at the junction of the highway with a county road and is triangular in shape, each side being about 110 feet long. The Engineer pointed out the possibilities of widening the highway at this point at some time in the future for four lanes of traffic, in which event the property in question would be needed for highway purposes. In view thereof the Commission deferred action with respect to this particular tract and referred the matter to the Engineer and the Chief Counsel for report at the next meeting as to what should be done to protect the state's interests in the event of the future widening of the highway at this point.

The Executive Committee of the Association of Oregon Counties appeared before the Commission at this time regarding a bill now before the Oregon Legislature which provides for increasing the allocation of state highway revenues to counties from 15.7 percent to 20 percent. The group was headed by Mr. F. L. Phipps, Executive Secretary of the Association, and included County Judge J. H. Allen, Grant County; County Judge A. H. Boice, Curry County; County Judge Nelson B. Higgs, Harney County; County Judge Grant Murphy, Marion County; County Judge E. L. Pope, Clackamas County; County Judge C. L. Allen, Deschutes County; County Judge T. A. Power, Jefferson County; and Frank L. Shull, Member, Board of County Commissioners, Multnomah County. Mr. Phipps presented a resolution that was adopted by the Association of Oregon Counties at its annual meeting in Portland on December 10, 1946, in which the State Highway Commission is requested to cooperate with the counties in requesting the Oregon State Legislature to pass legislation increasing the allocation of state highway revenues to the counties to an amount not less than 20 percent of such revenues in any calendar year and that such amounts be paid to the counties monthly or quarterly. In support of this resolution Mr. Phipps advised that the counties are asking such increase in funds because of the increased cost of county road construction and maintenance that has resulted from the heavy hauling that the roads are obliged to carry and because of the decrease in revenues from tax sources. The Association, he said, wants an agreement with the State Highway Commission on this matter which it can submit to the Legislature. He pointed out that

the Interim Tax Study Committee appointed by the Governor made a recommendation that the counties' share of the state highway revenues be increased to 20 percent and that the cities' share be increased to ten percent. The cities are not satisfied and are demanding 15 percent of the highway revenues for their purposes. As to such allocations, he said that the Association of Oregon Counties feels that the cities' demand for 15 percent of the funds is not justified, but the majority of the counties feel that there is justification for increasing the county share to 20 percent.

Judge Higgs gave as his thought that the present allocation to the counties is satisfactory and should not be disturbed; however, if any money is to be taken away from the State Highway Commission, the counties should receive the benefit of it rather than the cities. Judge Allen, of Grant County, expressed himself similarly.

Chairman Banfield explained at considerable length why the Commission cannot approve increasing the allotment to the counties and the cities. He pointed out that the State Highway Commission was handicapped during the wartime period because of the "freeze" order of the Federal Government which would not permit highway construction except on those projects that were absolutely needed in connection with the war effort, and, as a result, the Highway Commission has accumulated funds to match the Federal funds that are now being used in postwar construction. The Postwar Construction Program, he said, was prepared by the Commission as the result of careful study, with the approval of the counties. This calls for a definite program of $36,000,000 for three postwar years; however, in contracting the first year's program, it has been found that the actual costs are about $1,500,000 more than was estimated, so if the Highway Commission is able to complete this program it will probably mean an expenditure of $39,000,000. He pointed out that heavy traffic has been excessive, which is reflected in maintenance costs, maintenance alone, without any betterments, being now approximately $1,000 a mile compared with $400 per mile prior to the war, so, the Commission has found it necessary to budget $7,200,000 annually for maintenance alone.

Chairman Banfield went on to state that the Commission, after preparing its program, allocated available funds to various districts of the state as evenly and as fairly as it could; however, it was found that there were numerous sections of highway which needed improvement badly but which could not be constructed because Federal funds could not be used, so the Commission provided an additional program of state money, amounting to about $6,500,000, for these projects. He also mentioned right of way acquisition which, he said, is now costing the state two and three times as much as it did before the war, and as a result, it was necessary for the Commission to provide for an expenditure of about $1,000,000 a year for this purpose. To keep the program as presently formulated, he said, would require about $4,000,000 more money than is now available, so the Commission cannot say that it can let the counties and the cities have larger shares of state highway revenues without jeopardizing the state highway program.

Chairman Banfield mentioned that there are reports that the State

Highway Commission has a surplus of from $10,000,000 to $15,000,000 on hand and advised that this impression is not correct because the accumulated revenues have been allocated to various jobs as match money in securing Federal funds. If the percentage of highway revenues to counties and cities is not increased, he said, then the entire construction program will be carried through to completion; but, on the other hand, if additional monies are taken away from the Commission, the projects cannot go forward as planned, and it then will be necessary to re-arrange the program to fit the funds available. He also explained the procedure required to secure Federal funds, advising that the Federal Government does not advance the money for construction of projects that are approved for Federal aid, but these projects must be financed in the first instance by the state which secures reimbursement from the Government when the job is completed.

There followed a general discussion, during which Judge Pope inquired if it is not true that the state's revenues have increased. Chairman Banfield replied in the affirmative; however, he added that the counties and the cities share in such increase; moreover, the increase in revenue is more than offset by the increase in construction costs. He reiterated that if the Legislature sees fit to give the cities and the counties greater shares of the highway revenues, the construction program will have to be cut back accordingly, so there will not be much highway construction except that which is financed with Federal funds, although if an emergency job arises the Commission will take care of it in some manner. He also mentioned the possibility of selling bonds to finance highway construction and advised that the Commission does not look with favor on selling bonds while the counties have the same privilege. He expressed appreciation for the counties' position but stated that facts are facts, and it is the feeling of the Commission that it should go before the Legislature and give it the information it is now giving this delegation.

Mr. Phipps inquired how much the actual revenues received in 1946 exceed these estimated prior to the beginning of that year. The Engineer advised that he is not in position to give actual figures, but in the contracting of the projects in the first year postwar program, it has been found that costs have risen 58 percent, which exceeds greatly the actual percentage increase in revenues coming into the Highway Department.

In summing up the situation Chairman Banfield advised that highway construction is now at the crossroads, and if the counties and the cities receive more money than they are now receiving, new state highway construction will have to cease or will have to be financed by the sale of bonds. He suggested, that if the Commission were sure that its revenues would continue, it might be possible to advance construction of secondary highway improvements that are included in the present program. There is only a certain amount of money available, he said, regardless of which agency spends it — the state, the counties, or the cities. It was his thought that there is a middle ground that could be followed in keeping highway revenues in a position where they are flexible enough to maintain a balanced program. The five-percent increase that the counties are requesting, he said, will amount to about $1,000,000

annually. He advised that the Highway Commission is of the opinion that it would not be good business to take this money away from the state, but the Commission is willing to spend additional sums for construction on the county road portion of the Federal Secondary Systems up to an amount equal to the difference between the 15.7 percent of the revenues which the counties now receive and the 20 percent of the revenues that they are requesting. Such sum, he said, would be distributed throughout the state so that each district would receive its proportionate share each year. He concluded the conference by stating that the Highway Commission considers that the basis on which the state, counties, and cities are now operating with respect to highway funds should not be changed because there is not sufficient highway money available to satisfy all of the agencies that want additional allotments, including the state police department; however, if the present distribution of highway revenues is changed, then the Commission will be forced to revise the highway program accordingly because it does not intend to commit more funds than it has available.

The Commission discussed with the Engineer the bids received at 2:00 p.m. for highway construction projects and took the following action thereon by unanimous vote:

All bids for the grading and surfacing of the Enegren Ferry Section of the Coos River Secondary Highway, in Coos County, were rejected by the Commission as being too high.

The bids received for the construction of the reinforced concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport, Lincoln County, were referred to the Engineer with authority to award the contract to the low bidder, Archie R. Averill, upon approval by the Public Roads Administration.

The Commission awarded to O. C. Yocom Co., McMinnville, the contract for surfacing and oiling the Scholls-Newberg Section of the Hillsboro-Silverton Secondary Highway on the basis of its bid using asphalt.

The Commission awarded to La Grande Concrete Pipe Company contract for the Meacham-Hilgard Rock Production Project on the Old Oregon Trail, in Union County.

At 4:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Grading and surfacing the Enegren Ferry Section of the Coos River Secondary Highway, in Coos County. The Commission received two bids for this project, the low one being that submitted by Dobyns & Webb, Salem, at $34,331, and the other being that submitted by Coos Bay Dredging Co., Coos Bay, at $35,704. The Commission has rejected both bids.

"Construction of a reinforced concrete viaduct over Spencer Creek on the Oregon Coast Highway near Newport, Lincoln County. The low bidder for this work was Archie R. Averill, Portland, at $41,650. Tom Lilleho,

Reedsport, submitted the next low bid at $44,530. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Archie R. Averill, when certain conditions have been satisfied.

"Surfacing and oiling the Scholls-Newberg Section of the Hillsboro-Silverton Secondary Highway, in Washington and Yamhill Counties. The low bidder for this work was O. C. Yocom Co., McMinnville, at $103,736 based on the use of asphalt, and $104,092 based on the use of tar. J.N. & M.J. Conley, Portland, submitted the next low bid at $107,371 based on the use of asphalt. They submitted no bid based on the use of tar. There were seven higher bidders. The Commission has awarded the contract to the low bidder, O. C. Yocom Co., at its bid price of $103,736 based on the use of asphalt.

"Meacham-Hilgard Rock Production Project on the Old Oregon Trail, in Union County. The Commission received only one bid for this project, being that of La Grande Concrete Pipe Co., La Grande, at $12,145. This bid is satisfactory and the Commission has awarded the contract to this company at its bid price."

The Assistant Counsel reported an offer from Captain John H. Graham, North Bend, to pay $200 for State Highway property in North Bend, described as fractional lots 1, 2, 3 and 4 of Block 7, Midland Addition to North Bend. He advised that the Commission authorized the sale of this property in 1945, and the high bid for the same, submitted on November 26, 1945, was $100, which the Commission rejected because the appraised value of the property was $200. Captain Graham, he said, has now offered to pay the amount of the appraised value, and he recommended acceptance of the offer. The Commission approved the recommendation by unanimous vote.

The Assistant Counsel also reported the offer of Mr. Ralph W. Lee, Tolovana Park, Oregon, to pay $50 for an old residence building located on highway right of way situate in Block 3, Silver Point Terraces adjacent to the Oregon Coast Highway at Tolovana Park. He advised that this house was advertised for sale at one time, but no offers were received. He recommended acceptance of Mr. Lee's offer because the building is of no value and it would be advantageous to have it removed from the highway right of way. The Commission approved the recommendation on the condition that Mr. Lee will clear up the site and leave it in a condition satisfactory to the Engineer and that he will not move the house on the highway.

An offer was presented from the Magic Gas and Appliance Company, Eugene, to pay $50 for a small triangular tract of state-owned land, situate near the overcrossing on the Pacific Highway north of Eugene, that is needed in connection with the construction of the company's railroad spur track at this point. The Assistant Counsel advised that the tract is not needed for state highway purposes and recommended acceptance of the offer. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

The Assistant Counsel brought up for discussion a request from a Mr. Joseph Peterkort for right of access to the Sunset Highway from his property at four different places. It appears that Mr. Peterkort owns a considerable frontage on the highway, and that he contemplates dividing his property into four tracts and deeding one tract to each of his four sons. He wants to make certain that each of them has access to the highway for private purposes. The Engineer advised that Mr. Peterkort's land extends for about 3,700 feet along the highway. He recommended approval of Mr. Peterkort's request for private access to the highway at the four points on the condition that later on, if the Commission considers it advisable to eliminate them, Mr. Peterkort will agree thereto and will donate the right of way for a service road. In the further discussion of the matter it was brought out that Mr. Peterkort will accept $1,500 for the right of way if granted access at four points. The Commission considered that such settlement is better from the state's standpoint than incurring an obligation to build a service road later on and thereupon, by unanimous vote, approved settlement on such basis.

The Engineer brought up for discussion the question of extending the time limit set forth in the Commission's agreement with the City of Portland covering the leasing of city-state-owned property for off-street parking of motor vehicles, said property being bounded by S.W. Front Avenue, S.W. Harbor Drive, S.W. Salmon Street, and S.W. Main Street, Portland. He advised that, according to the provisions of the agreement, the property can be rented up to, but not beyond, February 28, 1947. He pointed out that the time is not propitious to landscape the area and suggested, in view thereof, that the arrangement for the use of the property be extended for a period of one year, to, but not beyond, February 28, 1948. The Commission approved the suggestion by unanimous vote on the condition that the city requests such extension.

The Chief Counsel brought up for discussion House Joint Resolution No. 6 of the Oregon Legislature now in session which provides for transfer of the Sodaville Springs Park, Linn County, from the jurisdiction of the State Board of Control to the State Highway Commission. He read aloud the resolution. The Commission took no action on the matter other than to indicate that it would accept jurisdiction over this park if the Legislature makes the transfer.

The Chief Counsel requested instructions whether or not to resume negotiations for right of way needed for the improvement of the Oregon Coast Highway in the town of Gold Beach which the Commission ordered discontinued some time ago because it appeared that the people of this town would not cooperate with the Commission in conformity with previous understanding. The Chief Counsel advised that the matter under controversy in this town now has been settled, and the people have indicated their desire to proceed with the improvement on the original basis. The Commission, by unanimous vote, authorized continuation of the negotiations.

The Chief Counsel reported on a question concerning the Commission's authority to charge public utilities a fee for the attachment of their facili-

ties to bridge structures. He advised that pole line companies are given a right by law to occupy the right of way of public highways free of charge and that by court decision bridges are defined as public highways; however, he knows of no law or court decision which requires the Commission to make highway structures available to public utility companies without charging for it, such matters being committed to the discretion of the Commission. He further stated, if the Commission were to permit such use of a structure which would add an increased financial burden to the state with respect to the particular structure or highway, then, in his opinion, the Commission should require the utility to pay the additional cost, but if the state is not inconvenienced, either in maintenance or operation costs, then the Commission may lawfully grant such use of its structures without charge but it should not in any way assume any responsibility or liability for the safety of the utility or its equipment. Relative to pipe line installations, he advised that he knows of no statute which vests in pipe line companies an absolute right to use the right of way of public highways. He added that the State Highway Commission would be freer of liability if it allowed the use of bridge structures by such utilities without charge. This matter was discussed at some length, but final action thereon was deferred by the Commission until its next meeting. The Engineer and the Chief Counsel were instructed to render a joint recommendation at that time.

The Chief Counsel brought up for discussion a request from the Crown Zellerbach Corporation for an extension of its agreement with the State Highway Commission covering certain riparian rights along the Willamette River at Oregon City. He explained that the former Highway Commission in 1942 entered into such an agreement with this Corporation whereby there was leased to the Corporation certain riparian rights abutting upon the east bank of the Willamette River between the north line of Ninth Street Extended and the south line of Fifteenth Street Extended, such rights permitting the Corporation to boom, brail, and raft logs in the Willamette River at this point. The agreement also provided for payment to the state by the Corporation of a rental charge of $500 per year, payable in two semi-annual payments. This agreement, he said, expires on February 13, 1947, and the Corporation now wishes to extend it for another five-year period. He recommended approval of the request. The Commission approved the recommendation by unanimous vote. (The new agreement was executed by the Commission later in the session.)

The Chief Counsel also brought up for discussion a bill now before the Oregon Legislature which has for its purpose the increasing of the Highway Commission's contribution to the State Police Department by $1,000,000 in order to permit the employment of additional officers and to finance salary increases. He advised that he has already reported to the Commission on this matter in writing and is simply bringing the matter to the Commission's attention at this time for instructions. It was the thought of the Commission that the committee which has this bill under consideration should be informed of the Commission's attitude with respect thereto, whereupon the Chief Counsel was instructed to bring such information to the attention of the committee members.

The Engineer presented a report from the American Bureau of Shipping on its inspection of the ferry "North Beach", which is being considered as an auxiliary vessel for use in connection with the ferry operation between Astoria, Oregon, and Megler, Washington. According to the report of the American Bureau of Shipping, it would cost approximately $85,000 to repair the vessel so that it would be satisfactory to use in this operation, and it is the opinion of its surveyor, Mr. Charles R. Hudson, who signed the report, that, "due to the age of the vessel, the advanced stage of deterioration, her small size for the service intended, and reported alterations to fit changed operating conditions, expenditure of the amount necessary for reconstruction and fitting out would not be justified". Chairman Banfield expressed himself as being opposed to the expenditure of so much money if it is not recommended by the American Bureau of Shipping. The Commission took no action on this particular matter. (See report of American Bureau of Shipping dated January 21, 1947, and Engineer's report to the State Highway Commission dated January 28, 1947, in general files, for details.)

In this connection the Engineer also reported that the ferry boat "Tourist No. II", which was used by the Navy during the wartime period, should be in satisfactory condition, although an inspection of this vessel will be made later to determine definitely what, if anything, should be done to it in the way of repairs. "Tourist No. III", he said, also has been inspected by the American Bureau of Shipping, which reports that repairs should be made that will cost approximately $17,600, some of which can be made by State Highway Forces and the balance by the Astoria Marine Construction Company. He detailed the various items making up the total, quoting aloud from a letter directed to him by Mr. W. W. Stiffler, Assistant Maintenance Engineer, dated February 1, 1947. (See letter in general files for details.) The Engineer recalled that the appraised value of this ferry boat is $90,000 and advised that, if the Commission authorizes the repairs, the vessel will serve satisfactorily for 4 years. He recommended approval of the expenditure. Following discussion the Commission, by unanimous vote, approved the repairing of the vessel "Tourist No. III" as recommended and authorized the Engineer to proceed with the work.

The Engineer then brought up for discussion a report from Mr. L. R. Hussa, President of the Albina Engine and Machine Works, Inc., Portland, on his study of the Astoria-Megler ferry operation. (See signed report in general files for details.) He commented on the report in general and advised that, while Mr. Hussa did not wish to make a formal estimate on the cost of constructing a new ferry boat that would meet the requirements, he roughly estimated that such a boat designed for a 10-knot speed would cost approximately $470,000 and one designed for a 12-knot speed would cost approximately $490,000. (See Engineer's letter directed to the Oregon State Highway Commission dated January 28, 1947, in general files, for details of his report.) In the discussion that followed the Engineer requested authority to have Mr. Hussa complete the design, plans, and specifications for a new ferry boat and to submit them to the American Bureau of Shipping and the U.S. Coast Guard for approval, in order to expedite as much as possible the advertising for bids

for the construction of the ferry boat. The request was approved by the Commission by unanimous vote. The Engineer was also authorized by the Commission to advertise this project for bids as soon as the plans, specifications, etc., have been approved by the proper Governmental agencies.

The Engineer reported on the frequency of high water conditions in the Willamette River at the junction of the Pacific Highway and the McKenzie Highway at West Springfield, as ordered by the Commission at the previous meeting. He advised that during the past 12 years there have been 12 floods which would have inundated the pavement on the proposed turn-around under the approach to the Willamette River Bridge at this point, had it been constructed, and of these 12 floods seven would have inundated the pavement on the main highway; further, that during this period the turn-around would have been rendered unusable for 25 days. In view of this information he recommended construction next spring of the turn-around under the bridge approach, which he estimated would cost about $12,000, including right of way expense. The Commission approved the recommendation by unanimous vote, that appearing to the Commission to be the only solution possible to satisfy the complaint of Mr. E. L. Dickson who alleges that people from Eugene are now obliged to cross the river into the Town of Springfield in order to reach his place of business at the junction of these two highways.

The meeting adjourned at 5:00 p.m. to reconvene the following morning in the same room.

Portland, Oregon
February 4, 1947

The State Highway Commission reconvened its meeting at 9:00 a.m. in the auditorium of the Public Service Building with all Commissioners, the State Highway Engineer, the Chief Counsel, and the Secretary present.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m.:

WOODBURN-SANDY SECONDARY HIGHWAY IN CLACKAMAS COUNTY
EAGLE CREEK-SANDY SECTION

	USING ASPHALT	USING TAR
R. A. Heintz-Constr., Portland	$221,710.75	- - - -
Vernie Jarl, Gresham	243,462.00	- - - -

Natt McDougall Co., Portland	464,319.15

PACIFIC HIGHWAY IN JACKSON COUNTY
ASHLAND (WATER ST.-OAK ST.) SECTION

Scheffel & Gilman, Medford	$ 56,217.50

PACIFIC HIGHWAY WEST IN MULTNOMAH COUNTY
FRONT AVENUE (SHERIDAN STREET-BANCROFT STREET) SECTION

Kuckenberg Constr. Co., Portland	$932,753.50
C. J. Montag & Sons, Portland	971,746.00
Peter Kiewitt Sons' Co., Seattle, Wn.	1,274,225.25
Guy F. Atkinson Co., Portland	1,419,589.00

ROSS ISLAND BRIDGE RAMPS IN MULTNOMAH COUNTY
FRONT AVENUE PROJECT IN PORTLAND

Kuckenberg Constr. Co., Portland *	$ 54,240.00
C. J. Montag & Sons, Portland	59,980.00
Peter Kiewitt Sons' Co., Seattle, Wn.*	68,233.00

* Bidder will accept award only in combination with Front Avenue Project

COMBINATION BIDS FOR ABOVE TWO PROJECTS

(1) Front Avenue (Sheridan St.-Bancroft St.) Section of Pacific Highway West
(2) Ross Island Bridge Ramps on the Front Avenue Project

	(1)	(2)	Reduc.	Comb. Bid
Kuckenberg Constr. Co.	$932,753.50	$54,240.00	- - -	$ 986,993.50
C. J. Montag & Sons	971,746.00	59,980.00	- - -	1,031,726.00
Peter Kiewitt Sons' Co.	1,274,225.25	68,233.00	- - -	1,342,478.25

Messrs. E. F. Butler, Naval Architect, and Jack Carter, Assistant Naval Architect, from the Albina Engine and Machine Works, Inc., were present and exhibited sketches and a model of the hull of a vessel that they have in mind for use in connection with the Astoria-Megler ferry operations. The Commission examined this material but took no action on the matter.

Mr. E. L. Dickson, Albany, owner of a business establishment at the junction of the Pacific and the McKenzie Highways in West Springfield, was present with further reference to his former request for adjustments in the highway improvement recently completed at this intersection so as to give his patrons freer access to his premises. Mr. Dickson stated that he has appeared before the Commission on four different occasions, at the last one of which he was given the Commission's decision relative to his complaint. He inquired if the Commission's decision as expressed at the previous meeting was unanimous. Chairman Banfield replied that Commissioner Schaupp was not present when the matter was discussed but that Commissioner Chandler and he were in mutual agreement on the subject. He explained the action for the benefit of Commissioner Schaupp and inquired whether or not he concurred therein. Commissioner Schaupp replied in the affirmative.

Mr. Dickson then directed inquiries to the Commission concerning certain legal features involved in the case. He was referred by Chairman Banfield to the Commission's Chief Counsel for information with respect thereto. Mr. Dickson then asked the privilege of reading and copying the stenographic notes that were taken at his former meetings with the Commission. He advised that he previously requested copies of the notes but was refused on orders of the Commission. He was informed by Chairman Banfield that there is no authority to give anyone a transcript of any Highway Commission meeting until the minutes have been prepared and have been approved by the Commission. When that has been done, he said, the minutes are then open for public inspection.

There followed a general discussion of other matters, some of which did not concern the State Highway Department. Mr. Dickson requested the establishment of a 15-miles-per-hour speed limit from "Glenwood Junction" to Springfield. It was suggested to him that he present his request to the State Speed Control Board, which has jurisdiction in such matters.

Chairman Banfield concluded the discussion by stating that the State Highway Commission is ready and willing to answer any questions that Mr. Dickson may ask concerning the channelization project, which is the subject of his complaint, and will not deny him any information he wishes which the Commission feels is public information, but the Commission is unwilling to discuss at its public sessions matters that do not concern the State Highway Department.

A delegation from Coos County, representing the Seven Devils Road Association, was present and urged construction of a new highway down the coastline from North Bend to Bandon, via Cape Arago, somewhat paralleling the so-called "Seven Devils Route", and including a bridge across the Coquille River at Bandon. Mr. Hugh G. Lennon, Coquille, Director of the Association, headed the group, which included David R. Philpott, Coquille, President; Don Hultin, Bandon; George Chandler, Bullards, Director; Lans Leneve, Bandon, Director, Chamber of Commerce; J. F. Fitzsimmons, Bullards, Director; Hans Nelson, North Bend, Member; and G. R. Hammond, Portland, representing the Portland Chamber of Commerce.

Mr. Lennon explained the object of the hearing and presented a petition bearing the names of 5,131 people who urge construction of this project. Mr. Lennon asserted that the petition expresses the honest views of the people who signed it and who are affected by the proposed highway. In support of the petition Mr. Lennon advised that the present "Seven Devils" Road between Coos Bay and Bandon is in a very poor condition and that the people residing thereon are hemmed in and are badly in need of an outlet; also, that the ferry service across the Coquille River is not good and that accidents frequently occur. Construction of the proposed new road, he said, would shorten the distance between Bandon and Coos Bay by some 15 or 16 miles and would open up an entirely new district. He urged favorable consideration of the request and advised that people along the route will donate right of way 100 feet wide.

Another speaking in behalf of the project was Mr. Nelson, who advised that the petitioners are in harmony with the road program as prepared by the State Highway Commission, but they are urgently in need of this new road, particularly the bridge across the Coquille River. This road, he said, will open up new vistas and will provide access to numerous scenic parks along the route. He further stated that they do not wish to interfere with the program of construction under which the Commission is now working, but the road under discussion is needed to immediately relieve the people residing along the route who practically have no outlet at the present time. Mr. Hammond endorsed the project from the tourist standpoint. Mr. Leneve declared that there is no improvement which the State Highway Commission could undertake that would be more advantageous to the State of Oregon and would bring more money into the state than the one under discussion. He mentioned three beautiful beaches that would be made accessible to the public if the road were constructed and advised that these are of interest to tourists because they abound in agates, clams, mussels, etc., which are a big tourist attraction. He further stated that the ferry operation at Bandon is now uncertain and that the new road would open up big timber development and be of great benefit to the lumber industry.

The Engineer exhibited a map showing alternate routes of this highway which have been considered. He advised that reconnaissance surveys had been made of each and gave figures as to the advantages and cost of each route.

Chairman Banfield advised that this is an entirely new project to this Commission, which is not in position at this time to pass on it but must first discuss the alternate routes with the Engineer to determine which is the most feasible, and then it will be necessary to study the question of financing construction. In reply to Mr. Nelson's statement that the road would open up additional parks, Chairman Banfield stated that the Highway Commission cannot build roads to state parks as a first consideration because they are of secondary importance; however, the Commission favors development of state parks after the highways are constructed. He explained the Commission's financial set up, particularly pointing out that the Postwar Program, on which the Commission is now working, takes all of the money that is available to the Commission, so it is not in position to make any promises or commitments with

respect to this job. He also pointed out that the counties and the cities are asking for greater shares of the state highway revenues, and if their requests are granted by the Legislature, then the Commission will be forced to make adjustments in its present program. He inquired whether or not the delegation is willing that the monies allotted to the Coos Bay district for highway improvements be reallocated for the construction of the road under discussion, to which Mr. Lennon replied that they are not asking the Commission to delete any project from the program but are simply requesting relief so people of this district will have a better outlet than presently exists.

Chairman Banfield concluded the discussion by stating that at the present time he can see no way to finance the construction of this road because funds definitely are not available for it nor adequate to open up many other districts in a similar category; however, the Commission will refer this matter to the Engineer and the Chief Counsel for a thorough investigation and report. The Engineer and the Chief Counsel were thereupon instructed to render such a report.

A delegation representing the Parkrose Chamber of Commerce and including Harry H. Pearce, Director; Robert A. Freeman, Secretary; R. B. McLaughlin, President; Ray Smith, William A. Manassau, John H. Matney, and C. S. Auger came before the Commission and urged improvement to Sandy Boulevard (Columbia River Highway route) between 107th Avenue and 122nd Avenue. Mr. Pearce headed the group. He urged the widening of this thoroughfare for four lanes of traffic and the construction of concrete curbs and sidewalks along this section between 99th Avenue and 106th Avenue. Mr. Pearce advised that the former Highway Commission, in 1941, authorized this improvement and appropriated the money to finance construction; however, the war came along, and the project was postponed. He exhibited a letter written to their Secretary dated October 2, 1941, advising that the Commission had approved the project and had authorized the Engineer to place it in the program for construction in 1942. He asked the Commission to revive the project so the work could go forward.

The Engineer estimated the cost of the proposed improvement at about $200,000, including an adequate storm sewer system which, he said, is a necessary part of the project. Chairman Banfield advised that this is an entirely new project to the present Highway Commission and that it is now too late to consider it in the present Postwar Construction Program; moreover, there are no unobligated funds available with which to finance the work. He advised the delegation that the Commission will have the records checked to ascertain just what commitment the former Highway Commission made, if any, but in any event the delegation need not expect the Commission to furnish curbs and sidewalks. He added that, if the records disclose that the former Highway Commission definitely promised to do the work, then the present Commission will try to follow through with it. The Engineer was thereupon instructed to render a full report on the subject, and the delegation was informed when this is analyzed it will be informed of the Commission's decision.

Mr. Matney then reported a dangerous condition on Killingsworth

Avenue, Portland, between 89th Avenue and 92nd Avenue, where, he said, drainage conditions are faulty, particularly on the south side of the street. This matter was referred by the Commission to the Engineer for investigation.

A delegation from Benton and Linn Counties, representing the Benton-Linn Flood District, came before the Commission in the interests of the Corvallis-Eastside Secondary Highway. This group was headed by Mr. N. A. Havercamp, President, Corvallis, and included the following: Homer Beach; James C. Wescott; F. E. Bogue, Chairman, Roads Committee, Gilbert Beach; Mrs. Homer Beach; and Mrs. Gilbert Beach, all of Corvallis. Mr. Havercamp read aloud and filed with the Commission a petition urging reconstruction of the grade of this highway to prevent its inundation during periods of high water. In support of this petition Mr. Havercamp advised that during flood periods water overflows the highway and traffic is absolutely blocked for long periods of time. He mentioned that during the high water in December 1946 the road was closed for six days, and it was impossible for the people residing along the road to secure medical care and fire protection; in fact, one house was almost burned down because of the impossibility of bringing in fire-fighting equipment. He added that during this time people residing in this locality were also unable to go to their places of business, their schools, and their market center. He urged the Commission to reconstruct the grade at a higher elevation at certain points between the Willamette River Bridge at Corvallis and Peoria Road intersection and to open up the highway embankment at a point a short distance east of the Willamette River Bridge where it acts as a dam and creates a condition whereby high water flows over the roadway, causing severe damage to valuable farm and residential property. Others speaking in behalf of the improvement were Messrs. Wescott and Gilbert Beach.

Chairman Banfield advised that this is a new problem to the present Highway Commission, which will have to have a complete report from the Engineer before passing on it. The Engineer was thereupon instructed to render such a report in sufficient detail that the Commission may be able to determine whether or not the state is responsible for the conditions that exist.

A delegation from Amity and vicinity was present in the interests of the Bellevue-Hopewell Secondary Highway No. 153, particularly the section thereof which extends from the town of Amity to a connection with Salem-Dayton Secondary Highway No. 150 at Hopewell. This group was headed by Mr. H. W. Torbet, President of the Bank of Amity, and included the following:

Homer Ross, Member, Yamhill County Court
U. S. Alderman, Owner-manager, Alderman Farms
Clyde LaFollette, LaFollette Farms
Vernon Burlingham, of Burlingham-Meeker and E. F. Burlingham & Sons
Howard Stephens, Farmer
O. E. Roth, Merchant, City Recorder of Amity
Frank Finnicum, Farmer, Dayton
L. M. Christensen, President, Coast Land Company

Delbert Smith, Farmer, Dayton
Clark Noble, Farmer, Dayton
Glenn Watts, Partner, Aldridge & Watts
T. C. Richter, School Bus Driver, Member, City Council, Amity
E. M. Jordan, Mayor of Amity
A. L. Matthews, Chairman, Union High School, District No. 5, Yamhill County
H. S. Deedon, Farmer, Salem
L. Scoggins, Farmer, Dayton
Jake Tompkins, Farmer, Dayton
P. E. Meeker, President, Amity Commercial Club
Rex Menegat, Superintendent of Schools, Amity
Freeman Frazer, Manager, Tillamook-Amity Cooperative
G. A. McCullough, President, Amity Nut Growers
Arthur Anderson, Contractor, Member, Amity City Council
H. M. Hawkins, President, Commonwealth Inc.

Mr. Torbet presented a petition signed by numerous residents of this district calling attention to the necessity for improving this highway, particularly the section thereof which crosses the hills east of Amity, by eliminating dangerous curves to provide for safer traveling conditions. He also presented a letter from the Yamhill County Court endorsing the petition. Mr. Torbet presented oral arguments in support of this request, as did also County Commissioner Homer Ross, Vernon Burlingham, and Glen Watts. Mr. Burlingham, who is in the feed business, spoke of the heavy tonnage which is trucked over this road. He advised that the truckers all prefer a highway with eight percent grade rather than the curvature that exists on the present route. Mr. Watts advised that he is in the car repair business, and during the last 30 days five wrecks have been towed into his place of business from this highway, all of which occurred by reason of the excessive curvature in this road. The Engineer estimated the cost to eliminate the curves on one of the summits at about $25,000. He did not have the cost estimate on improvement of the highway across the other summit. He pointed out that there now appears in the construction program an item of $20,000 for the improvement of the West Side Pacific Highway (US99W) in the town of Amity, and were the Commission to approve the Amity-Hopewell Project, excavated materials could be salvaged for use in connection with the Amity Project and a net saving of several thousand dollars might be had. The matter was discussed at considerable length, but a decision thereon was deferred by the Commission until its next meeting. The Engineer was instructed to render a full report on the matter at that time.

The Commission recessed for luncheon from twelve o'clock noon to 1:30 p. m., following which the meeting reconvened with the same persons present and participating.

The County Court of Douglas County, represented by County Judge D. N. Busenbark and County Commissioners H. B. Roadman and Lynn V. Beckley, was present and urged the Commission to cooperate with the county on a 50-50 basis in the replacement of a bridge over Little River on the North Umpqua County Road near a place known as Glide. Judge Busenbark advised that the rebuilding

of this bridge is not in the current highway program, but its replacement is urgent because of the heavy traffic that uses it. He also said that the bridge, which is of light steel construction, was redecked by the County last fall, and if the Commission approves the project, then the County would like to retain the structure and the new deck for use elsewhere. The County's share of the expense, he said, would be made available to the Commission whenever it was needed. The Engineer advised that this project is on the Federal Aid Secondary Highway System but is not in the approved program. He pointed out present difficulties in securing steel, but expressed the belief that there is a good possibility of obtaining such material by the time the project is ready to be placed under contract. He estimated the cost of the structure at $75,000.

Chairman Banfield advised that the Highway Commission would like to cooperate in this work if money were available, but there is a question whether or not the Commission will have any to spare for this purpose since the Legislature is now being asked by certain factions to take away more of the highway revenues for the benefit of other agencies; notwithstanding this, however, he said the Commission will check its financial status and if funds can be found to pay the state's share the Commission will be glad to cooperate. The Commission was assured by the County Court that it does not want to take away any money from the State Highway Department but would like for the Commission to take over jurisdiction of this road. This concluded the hearing, except that the Engineer was instructed by the Commission to report on this matter at the next meeting.

The Engineer reported that, as previously instructed by the Commission, the Board of County Commissioners of Multnomah County has been contacted with respect to contributing county funds toward the cost of installing a traffic signal on the Tualatin Valley Highway at Sylvan, and it appears that the Board members are somewhat divided in their opinion although all are agreed that the traffic signal is desirable. Commissioner Schull, he said, stated frankly that he did not believe the county should be asked to cooperate in the cost, although Commissioner West suggested that possibly the county should contribute on a percentage basis, as determined by the ratio of traffic on the state highway and the intersecting county roads. Commissioner Brown, he said, was of the opinion that the matter should be given further consideration before a decision was reached. He also advised that Commissioner Schull stated his intention to discuss the matter personally with Chairman Banfield and also to confer with the Highway Commission regarding the matter. Chairman Banfield advised that Mr. Schull has not yet contacted him regarding the subject, in view of which the Commission decided to defer further consideration of the matter until its next meeting.

The Engineer reported on investigations that have been made of the rather extensive restaurant development which is planned along the Canyon Road Section of the Sunset Highway. He exhibited a map showing a plan of the highway and the ownership of property abutting thereon, and pointed out that a considerable portion of such abutting land is owned by the City of Portland

and Multnomah County. He also pointed out that the present highway has been constructed for four lanes of travel, which, in his estimation, is too narrow for this thoroughfare, and suggested that right of way sufficiently wide for six traffic lanes should be acquired now before developments occur that would greatly increase the cost to the state if the highway is widened later on. Chairman Banfield suggested that the city and the county should be informed of the requirements of this highway and the need for additional right of way, and that each should be requested to deed to the state the city-and county-owned lands that will be needed. It was his thought that if the city and the county will cooperate by deeding such property to the state without cost, the Commission might then consider the acquisition of the privately-owned land that will be needed. The suggestion was approved by Commissioners Schaupp and Chandler, and it was so ordered.

The Engineer brought up for discussion matters pertaining to the proposed relocation of the Lewis and Clark River-Youngs Bay Bridge Section of the Oregon Coast Highway, Clatsop County, and particularly reported the cost to construct this section and to purchase needed right of way for it as instructed by the Commission at the previous meeting. He estimated the cost to grade and pave the section, which is about three miles in length, at $245,900, and the cost of the right of way, as appraised by the Right of Way Department, at $20,500, or a total of $266,400. He advised that the survey for this section has been completed and suggested, if the Commission is inclined to reroute the highway, that right of way be obtained now because the proposed location extends through a district that is developing rapidly and the cost of right of way will be much more later on. Chairman Banfield stated that the Commission is definitely opposed to making this project a part of the present highway set up, but if the amount of money required to purchase right of way in order to protect future interests of the state is not too great, then the Commission might favor acquisition of the land, however, without any obligation whatsoever to construct the project. He personally favored acquisition of the right of way now if the cost is not exorbitant because of the value it will be to the Highway Commission at some future time when it is ready to start construction. Commissioners Schaupp and Chandler expressed themselves similarly, whereupon the Chief Counsel was authorized and instructed to proceed with the securing of options for right of way 100 feet wide. The following resolution approving the survey of the section was adopted by the Commission by unanimous vote:

> WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of the Lewis & Clark River-Youngs Bay Bridge Section of the Oregon Coast Highway, in Clatsop County, and in connection therewith to prepare a map showing the route and location of said section of highway and file said report and record with the Commission for consideration; and
>
> WHEREAS, the Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and
>
> WHEREAS, after due consideration of said survey, field notes,

maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Lewis & Clark River-Youngs Bay Bridge Section of the Oregon Coast Highway, in Clatsop County, together with the map, which for identification purposes bears the map file No. 6B-21-12, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the fourth day of February, 1947.

Mr. John A. Laing, Chairman, Guest Center Committee, Visitors Service of the Portland Chamber of Commerce, came before the Commission at this time regarding the establishment of a guest center on a block of city-state-owned property bounded by S.W. Harbor Drive, S.W. Salmon Street, S.W. Front Avenue, and S.W. Main Street. He exhibited a blue print drawing of the proposed layout and pointed out that only one approved entrance to the property has been provided, that being from S.W. Salmon Street, which is in conformity with the agreement between the State Highway Commission and the City of Portland covering such use of the property. He explained that this single entrance, which would also be used as an exit, will not properly serve the area and requested the Commission's approval of a second entrance to the property from Front Avenue a short distance north of its intersection with Main Street. The Engineer recommended approval of the request and advised that it previously had been approved by City Commissioner William A. Bowes. The Chief Counsel advised that if the Commission approves the second entrance the agreement between the Commission and the City will have to be modified accordingly. Following discussion the Commission approved the second entrance, from Front Avenue, by unanimous vote and instructed the Chief Counsel to prepare a modified agreement covering the matter.

The Engineer reported on the cost to repair the damage to highway facilities caused by high water in December 1946, particularly pointing out that the expense to date has amounted to $92,325, of which $69,750 represents expenditures on primary highways and $22,625 represents expenditures on secondary highways. The Commission took no action on the matter

The Engineer also reported the results of taking of bids in Salem on January 27 for the purchase of a tract of state-owned land at Albany and for the purchase of used equipment stored at Salem. He advised that only one bid was received for the purchase of the land at Albany, being that of Mr. Theodore Hoflich for the sum of $600. The value of the property as appraised by the Right of Way Department, he said, is $650. He recommended acceptance of Mr. Hoflich's offer. The Chief Counsel concurred therein. The Commission approved the recommendation unanimously.

With respect to the sale of the used equipment stored at Salem, the Engineer presented a list of the high bidder for each of the items advertised, together with his appraised value of each item as follows:

SALE OF USED EQUIPMENT STORED AT SALEM

Item No	Item	High Bidder	High Bid	Eng'rs. Est.
1	Oliver Mower, Dept. No. 35-641	J.R. Harding, Orchards, Wn.	$15.00	$ 2.00

He recommended sale of the property to the high bidder in each instance. The Commission approved the recommendation by unanimous vote, and it was so ordered.

The Engineer reported that, pursuant to authority and instructions given to him by the Commission at its meeting on November 25 and 26, 1946, he has had a reconnaissance survey made of the county road which extends from Coburg Road Junction to Marcola, in Lane County, to determine the approximate permanent location of this highway for the benefit of the Eugene Water Board in connection with the construction of a city water pipeline. The investigation reveals, he said, that the Eugene Water Board wishes the state to join in the purchase of a right of way along which the Water Board already maintains a power transmission pole line under lease from the property owners. The cost to purchase such right of way, he said, would be great because the location is through valuable property; moreover, in his estimation, the road as presently located will satisfy the requirements of the people residing along it. He recommended that the Commission do not join with the city in this project because of the expense involved. Commissioner Schaupp moved adoption of the report and the recommendation. The motion was seconded by Commissioner Chandler and carried by the unanimous vote of the Commission.

A letter was presented from the City of Corvallis requesting a traffic survey to determine the need for installing traffic signals on Third Street at its intersection with Van Buren Street and "A" Street, in Corvallis. The Engineer advised that investigation has been made of these two locations, and, in his estimation, stop and go signals are not required, but flashing beacons would be helpful in the prevention of accidents. He recommended approval of the installation of such type signal at each of these points on the condition that the City of Corvallis will pay 50 percent of the cost involved, which is estimated at $200 each, will maintain the signals after

they are installed, and will furnish the electrical energy required to operate them. The Commission approved the recommendation unanimously. The matter is to be covered by a written agreement between the City and the Commission.

The Engineer reported the need to increase the 1947 budget allotment for maintenance of secondary highways $20,000 to take care of the expense of reconstructing bridges and performance of other maintenance work on the Warrenton and Ft. Stevens Secondary Highways which the Commission recently added to the Secondary Highway System, and he requested authority to increase the budget in such amount. The Commission approved the request by unanimous vote.

The Engineer discussed with the Commission the request of Captain C. T. Smith, owner of the Columbia River Ferry at Maryhill, for state cooperation in the construction of a new roadway extending from the Columbia River Highway to a new ferry landing which he proposes to construct a short distance downstream from the existing landing. The Engineer recalled that Capt. Smith presented to the Commission at its last meeting plans for his proposed improvement. He advised that he has studied the plans very carefully and can see no justification in changing the present approach, particularly in view of the expense involved and the traffic hazard that would be created at the point where the new road will cross the Union Pacific Railroad tracks. He explained that at the railroad crossing Capt. Smith proposes to construct a rock wall paralleling the railroad and the highway to confine the roadway embankment leading from the highway to the railroad tracks, which arrangement he considered highly dangerous because of the short distance between the wall and the railroad. An alternate type of construction, he said, would be to raise the highway grade to an elevation equal to that of the railroad, which would cost approximately $32,000. He recommended that the Commission do not approve Capt. Smith's plan and, if Capt. Smith finds it necessary to change the location of his ferry slip, that he be required to construct a new roadway at his own expense extending from the new landing to a junction with the existing road.

In response to an inquiry from Chairman Banfield, the Chief Counsel advised that the Commission assumes no responsibility for traffic after it leaves a state highway and enters a private or a county road, but, if the Commission, in the present instance, should join with Capt. Smith in construction of a new road to the proposed ferry landing, then it would assume a responsibility for traffic using it up to the ferry landing but not beyond that point. In view of the Engineer's recommendation and the information given by the Chief Counsel, the Commission considered it unwise to join with Capt. Smith in this undertaking and thereupon denied his request.

The Engineer presented for the Commission's information a resume of the 1947 budget for the purchase of equipment. He pointed out that the budgeted amount for this purpose is $1,200,000, including an amount of $350,000 for the purchase of a new ferry boat at Astoria. The Commission, he said, has authorized expenditures totaling $500,000, of which amount $346,270 has been

obligated by purchase orders through the Board of Control, leaving a balance authorized, but unobligated, of $153,730. He estimated the additional truck requirements at approximately 175, which would cost approximately $350,000, and requested, in view thereof, an additional authorization of $200,000 from the unauthorized balance of the budgeted amount. He pointed out that of the total amount authorized for expenditure by the Commission, $223,490 was authorized by Commissioners Schaupp and Chandler over the telephone on January 10, 1947, and asked the Commission to confirm such authorization. In the discussion of this matter Chairman Banfield requested a complete report on the new equipment that has been purchased during the last few months so as to give the Commission a clear picture of the equipment that has been ordered and of that which has been received. It was his thought that the Commission should have the benefit of such information before authorizing an expenditure of any additional money. The report is to be thorough and is to cover all features. The Commission also ordered that the unobligated but authorized balance of $153,730 be not expended until authorized by the Commission. The expenditure of $223,490 as authorized by telephone on January 10, 1947 was confirmed by unanimous vote. (This matter was discussed further on the last day of the meeting, at which time the Commission by unanimous vote authorized an expenditure of approximately $150,000 of the unobligated balance of $153,730 for the purchase of additional Government equipment.)

The Engineer brought up for discussion matters pertaining to the construction of the Oak Hill Railroad Overcrossing on the Richardson-Eugene Secondary Highway, in Lane County. He advised that this project is included in the current Federal Aid Construction Program and, according to Federal Law authorizing the work and the Public Roads Administration rules for administering the program, the state is required to submit, along with plans, specifications, etc., an agreement with the railroad company setting forth, among other things, a portion of the cost that the railroad company is to bear. The railroad's portion of the cost, he said, is supposed to be determined by the state upon an analysis of the benefits to the railroad and is limited to a maximum of 10 percent of the project costs. He advised that he has been unable to reach an agreement with the Southern Pacific Company, which is involved in this instance, the Company alleging that its total maximum net benefit amounts to only $600 as compared with $12,300 which would be its share on the basis of 10 percent of the estimated cost of the project. He further stated that it does not appear possible to reach an agreement with the Company on terms that can be recommended to the Public Roads Administration for acceptance, so in order to expedite the project he suggested that it be withdrawn from the Federal Aid Program and placed on the state program, and the matter re-referred to the Oregon Public Utilities Commissioner for an allocation of costs under state law. Should the Public Utilities Commissioner follow the precedent established in connection with past projects, he said, the probabilities are that the railroad company will be assessed from 30 percent to 40 percent of the project costs. In any event, it could not be less than the amount of cooperation now offered by the Company. He recommended such transfer of this project. The Chief Counsel concurred therein. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, on or about the eleventh day of April, 1941, pursuant to mutual understanding between the State of Oregon, acting by its Highway Commission, and the United States Government, acting by its Public Roads Administration, a petition was filed with the Public Utilities Commissioner for an order authorizing the construction of a grade separation project defined and identified in said petition as a crossing over the tracks of the Southern Pacific Company at a point approximately 5.2 miles west of Eugene, said crossing being for the purpose of carrying the Fisher Road-Oak Hill Section of the Eugene-Swisshome Secondary Highway over the tracks of said company; and

WHEREAS, said petition disclosed and represented that said structure when constructed would be accomplished with Federal grade crossing elimination funds and that the Company would be reimbursed for all necessary and proper expenditures in connection with said project permitted and authorized by General Administrative Memorandum No. 39 and General Administrative Memorandum No. 100 issued by the Public Roads Administration, together with amendments and supplements thereto; and

WHEREAS, the Public Utilities Commissioner after a hearing issued his order dated July 21, 1941, by which order the said grade elimination project was authorized and said order provided among other things that "the structure shall be constructed by the State of Oregon from Federal grade crossing elimination funds and that the Southern Pacific Company shall be reimbursed for all necessary and proper expenditures in connection with said project allowed by and not prohibited by General Administrative Memorandum No. 32 and General Administrative Memorandum No. 100 issued by the Public Roads Administration and amendments and supplements thereto; and

WHEREAS, before said grade elimination project was accomplished the United States became involved in the World War and Federal funds made available for said project and similar projects were withdrawn and have not been reinstated under the terms and conditions in effect when said petition was filed and said order was made; and

WHEREAS, the Federal funds now available for the construction of grade elimination projects are made available on condition that the railroad company contribute to the cost of the project on a basis provided for in said law and in the rules and regulations promulgated pursuant to the law, but said rules and regulations and said Federal law require that before a project can be promoted there must be an agreement between the railroad company and the State, in which agreement shall be set out all of the terms and conditions provided for in the law and in the regulations and in particular an agreement between the railroad company and the State with respect to the amount of contribution to be made by the company; and

WHEREAS, the State and the Company have failed to reach an agreement with respect to the portion of the cost of said grade elimination to be borne by the Company, and therefore the Commission has reached the conclusion that said project cannot be constructed within the meaning and benefits of the Federal law and the Federal rules and regulations now in effect; and

WHEREAS, it is the opinion of the Commission that the grade crossings involved and which may be eliminated by reason of the accomplishment of said grade elimination are still as hazardous as when the matter was first presented to the Public Utilities Commissioner by the Highway Commission, and it is therefore the opinion of the Commission that said project should be accomplished under the State law with State and Railroad funds rather than with State or Federal funds;

NOW, THEREFORE, BE IT RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the Commission does find and declare that the hazard which existed with respect to the crossings at grade of the tracks of the Southern Pacific Company as disclosed in said petition filed with the Public Utilities Commissioner on April 11, 1941, and on which the Public Utilities Commissioner made his order No. F 1984 is still present and, in the opinion of the Commission, should be eliminated.

2. That negotiations carried on over a long period of time have failed to result in an agreement between the State and the Railroad Company with respect to an allocation of costs incident to the construction of said grade elimination.

3. That in the absence of such agreement Federal funds are not available for said project.

4. That in the opinion of the Commission the construction of said overcrossing is necessary and proper for the service, convenience and safety of the public.

5. That the Commission does hereby order and direct that said grade separation project be accomplished under and pursuant to the provisions of Chapter 1, Title 100, O.C.L.A.

6. That the Commission's Chief Counsel be and he hereby is instructed to file with the Public Utilities Commissioner a petition for an order reopening the matter heretofore presented, and in connection with which Order No. F 1984 was made, for the purpose of allocating the cost of said project between the State and the Company on such basis as may to the Commissioner seem proper.

7. That said Chief Counsel be and he is instructed to do such other things, file such other papers and present such evidence as the circumstances and conditions may warrant.

A delegation from Port Orford representing the Chamber of Commerce and the City Council, consisting of Mr. M. E. Kelley, Chairman, and Mr. Frank Shaw, Secretary, (both also members of the City Council) came before the Commission regarding the proposed improvement of the Oregon Coast Highway through their town. Mr. Kelley was spokesman. He advised that the improvement proposed by the Highway Commission now extends from Jefferson Street to 12th Street, but they would like to have the project extended to 20th Street and a sufficient distance beyond that point to eliminate a sharp turn in the present alignment. The Engineer advised that he is not in position to advise the Commission relative to the extension because it was not known in advance of this meeting what the city had in mind. The Assistant Counsel, Mr. George Neuner, advised that when this matter first was under discussion, last year, there was a question whether or not the city would agree to the closure of certain streets at the highway right of way line, and the Legal Department was instructed to investigate. He read aloud a letter from the City Recorder advising that the City Council did not wish these streets closed, and advised, in view thereof, that nothing further was done. Mr. Kelley advised that the City Recorder had misinterpreted the Council's orders, that the City Council was agreeable to the closing off of some of the streets but felt that it was not necessary to take legal action with respect to others because they had never been opened and could not be opened. Following discussion, and in order to clarify the situation, the Commission instructed the Engineer and the Chief Counsel to go to Port Orford and consult with the members of the City Council in an endeavor to reach a satisfactory agreement.

Mrs. Eloise Van Slatte, Umatilla, Oregon, and her attorney, Mr. Robert F. Maguire, Portland, came before the Commission regarding a settlement for right of way that is needed for the Umatilla-Hermiston Section of the Old Oregon Trail (new location) at its junction with the Columbia River Highway near the town of Umatilla. It appears that the highway improvement requires the taking of some of Mrs. Van Slatte's land with 650 foot frontage along the Columbia River Highway, and Mrs. Van Slatte objects thereto unless she is paid the price which she could obtain for her property from private persons. Mr. Maguire, who presented the case, advised that Mrs. Van Slatte recently sold a small tract at this location, 200 feet by 300 feet in dimension, fronting on the Columbia River Highway, for $12.50 per front foot. He suggested that the highway be relocated over an old county road a short distance east of the adopted location, which would allow Mrs. Van Slatte to retain considerable more frontage on the Columbia River Highway where the land is most valuable. It was his thought that this could be accomplished without any construction difficulties and without increasing the cost of construction.

The Engineer explained the reasons for the plan as designed, advising that the highway was located in its present position because it provides a direct connection with the road leading to the McNary Damsite. He further stated that it was necessary to provide a wide wye connection at the highway junction point to accomodate the large volume of oil truck traffic which originates at a depot in the town of Umatilla and which will use this highway in making distributions throughout Eastern Oregon and Idaho. It will be no problem to control eastbound traffic that enters the Columbia River Highway

from points south of Umatilla, he said, because the volume of such traffic will be negligible, but southbound traffic must be controlled in order to avoid accidents. He also pointed out that the contract for the Umatilla-Hermiston Project has already been awarded, and the contractor is well along with his grading construction.

This matter was discussed at considerable length, but a decision thereon was deferred by the Commission until the following day. The Engineer was instructed to have available at that time alignment and topographical maps and other detailed information. (As the result of further discussion on the following day the Commission voted unanimously to make no change in the plans for this improvement. See ahead for minute entry.)

A delegation representing the Marine Parks Committee of the Columbia River Yachting Association was present regarding the development of riverside parks along the navigable waterways of Oregon. Mr. Lawrence Barber, Portland, Chairman of the Committee and Marine Editor of the Oregonian, headed the group, which included Committee members, as follows: Dean B. Webster, Lt. Com., Portland Power Squadron; Jack O'Felt, Vice President, Columbia River Yachting Association and former Commodore of Lake Oswego Yacht Club; Fred A. Nitchy, Cruising Chairman, Portland Yacht Club; Stafford Jennings, representing the Marine Dealers Association; Steven Vranson, Commodore of the Portland Yacht Club; Charles Lundburg, Commodore of Columbia River Yacht Club; Donald A. Schafer, Secretary-Treasurer of Columbia River Yachting Association; and Leon Haskell, District Captain, Coast Guard Auxiliary.

Mr. Barber read aloud a prepared statement by the Marine Parks Committee requesting "That the Oregon State Highway Commission adopt a policy of establishing a number of public parks along navigable waterways of the state where they can be available to motorists who would like to get down to the rivers and lakes to launch their small boats brought in upon car tops or trailers and where they can picnic and swim in season; and also where boaters can have opportunities to land without encroaching upon private property"; also requesting "such park sites be developed in the future for the general comfort of motorists and boaters, with provision for sanitation and at places with some outdoor cooking facilities and possibly some fresh water". (See statement dated February 4, 1947, in general files for details.) Elaborating on this request, Mr. Barber stated that at the present time the Committee has only one park site in mind which they would like to see developed, being located at Rooster Rock Beach on the Upper Columbia River Highway. Mr. Webster spoke on behalf of the small boat owners, Mr. Schafer spoke on behalf of groups who cruise over weekends. Mr. Haskell spoke in behalf of the project from a safety standpoint in the launching of small boats.

Chairman Banfield advised that the Commission discussed this matter on the previous day and, according to the advice of its Chief Counsel, it appears that because of the manner in which the monies available to the Highway Commission are controlled and set up the Commission can only spend the funds for the highway program and for parks which are directly reached by state highways. It appeared to the Commission, he said, in view of this

advice, that any parks which might be made available to boaters would be those that are provided only incidentally. He added that while the Highway Commission is not in position to spend any of its money for purposes requested by this delegation, it might be able to help a little where parks are now located along waterways. Chairman Banfield's remarks were confirmed by the Commission's Chief Counsel, who stated that the Commission's authority is limited to the purchase and development of parks that are located on a state highway or can be conveniently reached by a highway.

There followed a general discussion of the matter. The Commission ordered a report and map from the State Parks Superintendent showing the state parks that are located on waterways and which might be developed as requested.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote:

The Commission referred to the Engineer the bids received for the construction of the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway with authority to award the contract to the low bidder when certain conditions have been satisfied.

The Commission also referred to the Engineer the bids received for the Astoria (Bond Street-Commercial Street and Taylor Avenue-Astor Street) Section of the Columbia River and Oregon Coast Highways with authority to award the contract to the low bidder if the City of Astoria approves construction of the Taylor Avenue-Astor Street unit. If the city will not approve construction of such unit, then the Engineer is authorized to award the contract for the Bond Street-Commercial Street unit only, such disposition of the matter being provided for in the provisions of the contract.

The Commission awarded to the low bidder, Leonard & Slate, Oreg. Ltd., Portland, the contract for the grading and surfacing of the Circle Bridge-Summit Section of the Oregon Coast Highway, in Clatsop County.

The one and only bid received for the construction of the Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County, was rejected by the Commission as being too high.

The Commission referred to the Engineer the bids received for the grading and paving of the Front Avenue (Sheridan Street-Bancroft Street) Section of the Pacific Highway West and the bids received for the improvement of the west end of the Ross Island Bridge on the Front Avenue Project, in Portland, with authority to award the contracts to the bidder submitting the low combination bid therefor when approval of the awards has been received from the Public Roads Administration, which is cooperating in the project.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts, as follows:

"Grading, paving, and oiling the Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. The low bid received for this project was submitted by R. A. Heintz - Construction, Portland, at $221,710.75, based on the use of asphalt. They did not submit a bid based on the use of tar. Vernie Jarl, Gresham, submitted the next low bid at $243,462. He also did not submit a bid based on the use of tar. There were five higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, R. A. Heintz - Construction, when certain conditions have been satisfied.

"Grading, paving, and construction of traffic control structures on the Astoria (Bond Street-Commercial Street and Taylor Avenue-Astor Street) Section of the Columbia River and Oregon Coast Highways, Clatsop County. Heavy Hauling Company, Astoria, submitted the low bid for this project at $62,838.67. Grimstad & Vandervelt, Astoria, submitted the next low bid at $69,994.50. The only other bid received was from Larson & Palmberg Co., Astoria, at $74,460.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Heavy Hauling Company, when certain conditions have been satisfied.

"Grading and bituminous macadam surfacing on the Circle Bridge-Summit Section of the Oregon Coast Highway, in Clatsop County. The low bid for this project was submitted by Leonard & Slate Oreg. Ltd., Portland, at $291,473. The second low bid was submitted by Guy F. Atkinson Co., Portland, at $368,478.50. There were four higher bidders. The Commission has awarded the contract to the low bidder, Leonard & Slate Oreg. Ltd. at its bid price.

"Grading and paving the Ashland (Water Street-Oak Street) Section of the Pacific Highway, in Jackson County. The Commission received only one bid for this project, being that of Scheffel & Gilman, Medford, at $56,217.50. The bid has been rejected.

"Grading and paving and construction of five reinforced concrete structures on the Front Avenue (Sheridan Street-Bancroft Street) Section of the Pacific Highway West, Portland, Multnomah County. Kuckenberg Construction Co., Portland, submitted the low bid for this job at $932,753.50: C. J. Montag & Sons, Portland, submitted the next low bid at $971,746. There were two higher bidders. This project was advertised for combination bids with the reconstruction of the approaches to the Ross Island Bridge, for which Kuckenberg Construction Co., Portland, was also the low bidder at $54,240. C. J. Montag & Sons, Portland, submitted the second low bid for such project at $59,980. There was one higher bidder. A tabulation of the bids received for both projects reveals that the combination bid of the Kuckenberg Construction Co. was low at $986,993.50. The combination bid submitted by C. J. Montag & Sons was second low at $1,031,726. The Commission has referred the bids

received for both projects to the Engineer with authority to award the contracts to the low combination bidder, Kuckenberg Construction Co., when certain conditions have been satisfied."

The Engineer requested authority for an additional expenditure of $30,000 in connection with the Oneonta Borrow Pit Excavating and Shaping Project on the Columbia River Highway, in Multnomah County. He advised that the original force account contract with Berke Bros. provided for the sloping of the west side of the pit, which work can be finished within the amount originally appropriated by the Commission for the work; however, it now appears desirable and necessary to remove a large accumulation of additional material in the approximate center of the pit area, which is estimated to cost $20,000, and to install perforated drain pipes, which is estimated to cost about $10,000, in order to insure complete control of the situation and to safeguard the highway. The Commission by unanimous vote approved the additional $30,000 expenditure as a safety measure.

The Engineer also requested authority for an additional expenditure of approximately $7,000 to complete engineering studies of the proposed highway through Sullivan's Gulch, Portland, in order to obtain complete information that the Commission needs in order to pass on the project. He recalled that the original authorization for this work was $15,000, but, he said, the desired information cannot be obtained without the additional expenditure. Chairman Banfield gave as his thought that the additional expenditure is justified since, if the Commission enters into an agreement with the City of Portland with respect to this project, it will mean a commitment of from $10,000,000 to $12,000,000 over a period of time, so it would be advisable to secure full information in advance. The Commission thereupon by unanimous vote authorized the additional expenditure as requested.

A letter was presented from the Klamath County Court suggesting, if there is a question as to the disposition of funds which the Commission has appropriated to finance the highway approach into the City of Klamath Falls on the First Avenue-Esplanade Section of the Klamath Falls-Malin Highway, that this money be spent for the construction of the Henley-California State Line Section of this highway rather than diverted to some other part of the state. At the suggestion of Commissioner Schaupp the Secretary was instructed to inform the County that the Commission has appropriated the funds for a certain project and does not feel that it should make any change in the allocation at the present time.

A letter was presented from the Cottage Grove Chamber of Commerce inquiring as to the possibilities of securing further improvements to the Pacific Highway (US99) between Springfield Junction and Yoncalla. They urged such improvements from a safety standpoint. The Commission ordered that the Chamber of Commerce be informed that, in view of the limited amount of funds available to the Commission for new construction, the Commission is not now in position to give consideration to additional improvements on this section of highway.

A resolution was presented from Tillamook County Pomona Grange in which the State Highway Commission is urged to take immediate steps to correct the flood-water condition that exists on the Oregon Coast Highway at a point where it crosses the Kilchis River between Tillamook City and Bay City so as to provide adequate and sufficient measures for the uninterrupted passage of motor traffic over the Kilchis River during periods of high water. The Engineer advised that this is a desirable improvement, but no provision has been made for it in the Commission's current construction program. The Commission denied the request because of lack of funds with which to finance the improvement and instructed the Secretary to so inform the Grange.

Consideration was given by the Commission to a letter from George S. Zimmerman, President of the Yamhill Chamber of Commerce, suggesting the re-routing of the Tualatin Valley Highway between Yamhill and McMinnville because of numerous accidents that occur at the junction of this highway with US99W; also, suggesting the possibility of a further extension of this highway north from Yamhill to the town of Gaston. The Engineer exhibited a map showing the proposed route and read aloud Mr. Zimmerman's letter. It appeared to the Commission that the approval of this request would result in a duplication of highways in this district, that it would be a costly project for which funds are not available at the present time and the logical solution of the problem would be the elimination of some of the crooks and turns in the present highway. The request was denied.

The Commission had under discussion numerous requests for the construction of guard fence along the Minam Hill Section of the Wallowa Lake Highway to eliminate possibilities of fatal accidents such as recently occurred at this place. The Engineer advised that the accident referred to occurred on the reconstructed portion of this highway where an extra-width roadbed was provided as a safety measure and it was not thought that a guard fence or sight posts were required; however, he has ordered a guard fence constructed at this particular place as an additional safeguard. He advised that there are many places throughout the state where similar conditions obtain, such as on the Wallowa Lake Highway, the Green Springs Highway, the Siskiyou Section of the Pacific Highway, and the section of the Baker-Unity Highway over Dooley Mountain. He estimated that it would cost approximately $30,000,000 to install guard fences at all such locations on mountain grades. He suggested that it would be helpful to install sight posts only equipped with small reflectors, and he advised that the matter is now being studied and that he will have a complete report for the Commission's consideration in the near future. There followed a general discussion of the matter during which Chairman Banfield gave as his thought that when a accident occurs such as happened on Minam Hill the Commission should be prepared to say what has been done and what is being done as a preventative measure. He also gave as his thought that the reflector buttons should be attached to each sight post and to each guard rail post. The Engineer was instructed to render a complete report on this subject covering the entire state.

In this connection Chairman Banfield brought up the question of installing reflectors in highway tunnels. It was the thought of the Commission

that such reflectors should be installed in each tunnel as a safety measure, and it was so ordered.

The installation of a stop and go traffic signal at the twin tunnels at Mosier on the Upper Columbia River Highway was also discussed. The Engineer recalled that the Commission at the previous meeting authorized the installation of stop and go signals at this place. He advised that the approaches to this tunnel are unsafe because of the character of the slopes above the highway, and so there is a question whether there is a greater hazard to traffic from falling rocks than from collisions in the tunnel. He was instructed to consult with the Chief Counsel with respect thereto and to report back to the Commission when a decision will be made whether or not to install stop and go signals at this place.

A petition was presented from residents of Springfield, Oregon, requesting installation of a warning signal at the point where the McKenzie Highway crosses the Wendling Branch of the Southern Pacific Company at grade east of Springfield; also requesting the installation of a similar signal at the intersection of Third and Main Streets, in Springfield. The Engineer advised that the first of the above-mentioned installations is high on the priority list of signalization projects and that the Southern Pacific Company recognizes the hazard at this point and has offered to contribute 50 percent of the cost of the installation, which is estimated at $2,810. He recommended approval of this installation and requested authority to proceed with the work as soon as equipment is available and an order has been received from the Public Utilities Commissioner covering the matter. He also recommended that the request for the signal installation at Third and Main Streets be denied. The Commission approved both recommendations by unanimous vote.

The Engineer brought up for consideration a request from the City of Klamath Falls for engineering assistance in connection with the preparation of plans for installing a lighting system on South Sixth Street immediately south of a similar installation now being made by Mr. Alfred D. Collier of that city. He recommended approval of the request and that he be authorized to prepare the plans and specifications, which he estimated would cost about $300. The Commission approved the recommendation unanimously.

The Secretary presented a resolution from the Union Avenue Association, Inc., Portland, requesting the illumination of Union Avenue, Portland, as a public safety measure. The Association contends that because of the improper lighting of this thoroughfare a traffic hazard exists, both for vehicles and pedestrians, which could be eliminated if the street were properly lighted. The Commission denied the request, it being the opinion of the Commission that this is a city responsibility.

A petition was presented from residents of East Salem requesting footpath construction along the Silver Creek Falls Secondary Highway south of a place known as "Four Corners" for the benefit of school children and other pedestrians. The Commission deferred a decision in this matter pending action by the State Legislature on legislation concerning the same subject.

The Commission referred to the Engineer for investigation and report a request from the Bay City Chamber of Commerce, Tillamook County, for the improvement of the Oregon Coast Highway through the city similar to the improvement that is being constructed through the Ocean Lake district.

A petition was presented from residents of Corvallis requesting guard fence construction along the Albany-Corvallis Highway from the Corvallis City Limits northeasterly a distance of approximately three-quarters of a mile where the highway is located in close proximity to the Willamette River; also, a letter from Mr. Lynn Gallagher, board member of Fairplay School, requesting sidewalk construction along this highway extending from Corvallis to the school, a distance of about two and one-half miles. The Engineer advised that there is merit in this request and that the improvement should be made as a traffic-safety measure; moreover, the project is included in the tentative Minor Betterment Budget for 1947 and is estimated to cost about $9,000. The Commission deferred action on the matter pending consideration of the projects for the Minor Betterment Program.

The Engineer reported the award of the following contracts, bids for which were referred to him by the Commission on December 31, 1946, with authority to award the contracts when certain conditions have been satisfied:

Construction of "Love" Bridge over Powder River on Baker-Homestead Highway near Richland, Baker County; contract awarded on January 8, 1947, to Lindstrom Bros., the low and only bidder;

Umatilla Dam-Hermiston Section of the Old Oregon Trail, Umatilla County; contract awarded on January 10, 1947, to O. C. Yocom Co., low bidder;

Hardman Hill and Rhea Creek-Hardman Hill Sections of the Heppner-Spray Secondary Highway in Morrow County; both contracts awarded on January 10 to J. S. Risley, the low bidder, on the basis of his combination bid for both jobs.

The Engineer advised that the conditions of the awards have been fulfilled, and he asked the Commission to confirm the awards. The Commission by unanimous vote confirmed the action of the Engineer on this matter.

The Engineer also reported that the following cities and towns have satisfied the requirements with respect to the expenditure of 1945 State Tax Street Funds which they received in 1946 and that the plans for the several improvements which the cities contemplate financing with such funds have been examined and found satisfactory:

Amity	Dayville	Glendale	Oakland	Talent
Columbia City	Falls City	Long Creek	Phoenix	Waldport
Dayton	Fossil	Myrtle Creek	Prairie City	

He recommended approval of the plans by the Commission in order to satisfy the legal requirements. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1946 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Amity	$ 818.60
Columbia City	491.16
Dayton	953.78
Dayville	204.27
Falls City	1,073.94
Fossil	799.07
Glendale	836.62
Long Creek	357.48
Myrtle Creek	662.39
Oakland	551.24
Phoenix	648.87
Prairie City	971.80
Talent	572.27
Waldport	946.27

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Amity - Woodson Street, Oak Street, Sherman Street
Columbia City - 2nd Street, "E" Street
Dayton - Alder Street, Church Street, Ash Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Seventh Street
Dayville - One block south from highway or Franklin Avenue (unnamed street), and one block southwest from highway or Franklin Avenue (unnamed street)
Falls City - Lombard Street, S. Main Street, Mill Street, Pine Street, 2nd Street, 5th Street, Bryant Street, Prospect Street, Wood Street
Fossil - Adams Street, Fifth Street, Main Street, Broadway Street, Rutledge Street, "B" Street, Chase Street, Third Street, Jay Street, Sixth Street

Glendale - Pacific Avenue, Molly Street
Long Creek - 2nd Street
Myrtle Creek - First Street, Hall Street, Second Street, Division Street
Oakland - Oak Street, 3rd Avenue
Phoenix - Church Street, Rose Street, 5th Street, "C" Street
Prairie City - Bridge Street, Main Street
Talent - Gibson Street, "I" Street
Waldport - Mill Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the City.

5. This resolution shall be entered in the minutes and records of the Oregon State Highway Commission as of the 4th day of February, 1947.

The Engineer also reported that the towns of Jordan Valley and Mitchell have fulfilled the legal requirements with respect to the expenditure of 1944 State Tax Street Funds which they received in 1945 and that the plans for the contemplated improvements have been examined and found satisfactory. He recommended approval of the plans by the Commission to satisfy the legal requirements. The Commission approved the recommendation unanimously and thereupon adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by the Oregon State Highway Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Jordan Valley	$ 382.98
Mitchell	306.11

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the State Highway Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That the State Highway Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Jordan Valley - Oregon Avenue, Somnerville Street
Mitchell - Nelson Street, Rosenbaum Street, High Street, Folston Alley, also two unnamed streets from Rosenbaum Street to High Street

2. That the type, plan and character of improvement proposed in the resolutions filed with the State Highway Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with the State Highway Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Highway Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plans submitted by the city.

5. This resolution shall be entered in the minutes and records of the State Highway Commission as of the 4th day of February, 1947.

The Commission had under consideration the adoption of a resolution to accomplish the apportionment to the cities and towns of the state five percent of the 1946 highway revenues. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon the assurance of the Engineer that the respective amounts have been checked and are in conformity with the legal requirements:

WHEREAS, it is provided by Chapter 371, Oregon Laws, 1943, that:

"Beginning with the year 1943 and annually thereafter there shall be and hereby is appropriated out of the state highway fund

such sums of money as will equal 5 percent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year, and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A., and under the provisions of section 115-528, O. C. L. A., and under the provisions of section 110-1705, O. C. L. A., and from fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer, which appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year."

AND, WHEREAS, the moneys which have been credited to the state highway fund by the state treasurer between January 1 and December 31 of the year 1946, and which have accrued from the sources designated in said Chapter 371, Oregon Laws, 1943, amount to $22,334,410.35, being as follows:

Section 115-135, O.C.L.A. (Motor Vehicle License Fees) - -	$ 3,729,610.64
Section 115-528, O.C.L.A. (Motor Transportation Fees) - -	2,505,732.05
Section 110-1705, O.C.L.A. (Gasoline Tax) - - - - - - - - -	15,962,001.35
From fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer	137,066.31
Total - - - - - - -	$22,334,410.35

AND, WHEREAS, the five per cent of this $22,334,410.35 which is available for apportionment to the cities and towns amounts to $1,116,720.52;

AND, WHEREAS, the apportionment of the $1,116,720.52 to the cities and towns of the State is to be based upon the "population" as defined by Chapter 371, Oregon Laws 1943, subject to such changes as have been made under authority of Chapter 122, Oregon Laws 1945;

AND, WHEREAS, by applying the factors of allocation provided for in said Chapter 371, Oregon Laws 1943; and Chapter 122, Oregon Laws 1945; the State Highway Commission has arrived at and made its apportionment of the said $1,116,720.52 to the several cities and towns of the State;

NOW, THEREFORE, the State Highway Commission does hereby certify to the Honorable Robert S. Farrell, Jr., Secretary of State of the State of Oregon, the following apportionment or appropriations out of said state highway fund for the calendar year 1946, to wit:

I. Cities of Populations 1,000 or More

City	Population	Amount
Albany	5,654	$11,339.75
Ashland	4,744	9,514.64
Astoria	10,389	20,836.34

That this resolution be entered in the minutes and records of the Commission as of February 4, 1947.

---

4 1 47

The following persons representing the City of Portland came before the Commission regarding the installation of traffic lights on Front Avenue: City Commissioner William A. Bowes, City Engineer Ben S. Morrow, City Traffic Engineer F. T. Fowler, and City Construction Engineer L. G. Apperson. Mr. Bowes advised that the Oregon Journal has purchased the old market building situate between Front Avenue and Harbor Drive and is now remodeling it as a permanent headquarters for its paper. The Journal, he said, employs in excess of 700 people, all of whom will be obliged to cross Front Avenue daily, which is going to be rather hazardous in view of the vehicular traffic volume along this thoroughfare; moreover, the Journal has in excess of 1,500 callers at its offices daily who also will be subjected to this hazard. The signalization of certain intersections along Front Avenue, he said, appears to be a necessity, particularly at Yamhill, Salmon, and Taylor Streets. He estimated the cost at about $2,000 for each intersection and asked state cooperation on a 50-50 basis. He also pointed out that conduits are already in place, so no extra expense is required on that account.

The State Highway Engineer explained that the conduits were installed in connection with the highway contract for the improvement of this street because it could be done much cheaper at that time and would avoid the necessity to tear up the street later on; however, he said there is nothing contained in the agreement between the city and the state covering the maintenance of state highway routes with respect to the state contributing toward the lighting costs.

Chairman Banfield advised that the Commission is not in a position today to make a decision in the matter, that the project is an expensive one involving several miles of construction, and the Commission of necessity must consult with the State Highway Engineer and the Chief Counsel before taking action. He suggested that the city proceed with the installation of the signals to take care of the Journal situation, and, if later on the Commission finds that it has an obligation with respect to the lighting of this street, then the state will pay its portion of the costs. He concluded the conference by reiterating that the Commission does not now know the extent of its overall responsibility regarding this matter but will give it careful study and will cooperate if it considers the state has an obligation.

Mr. Bowes also brought up for discussion the agreement entered into by the state and the city on August 31, 1944, covering the maintenance and control of city streets over which state highway traffic is routed. He advised that this agreement provides that from time to time, by mutual agreement between the city and the state, other streets may be added to the agreement, and also any other matters which call for special or particular consideration may be considered and amendments made to this agreement. He presented a letter outlining the various things that he had in mind, which included (1) street lighting along the Front Avenue Project, (2) installation of traffic signals as a cooperative project, (3) transfer to the city right of way acquired for Swift Boulevard, (4) reach an understanding with respect to jurisdiction of McLoughlin Boulevard back of the curb lines, and (5)

transfer to the city of right of way acquired by the state for the Swan Island Approach Road. He advised that recently several important matters have developed in connection with the jurisdiction and interpretation of verbal agreements between the city and the state, and suggested that these matters should be put down in writing as an amendment to the above -mentioned agreement of August 31, 1944, so as to avoid misunderstandings. At the Commission's request the Secretary read aloud Mr. Bowes' letter. (See letter dated February 4, 1947, in general files, for details.) The Commission referred the letter to the Engineer and the Chief Counsel to analyze and instructed them to report their recommendation to the Commission at its next meeting.

In this connection Chairman Banfield brought up for discussion the City's resolution designating Jefferson Street and Columbia Street one-way traffic streets between Harbor Drive and S.W. 14th Avenue. He advised that it is true the State Highway Commission agreed to cooperate with the City in this matter, but the City's resolution covering the arrangement is not strictly in conformity with the Commission's understanding. In view of this fact the Commission's Chief Counsel has been instructed to prepare a resolution covering the matter as was agreed when the matter was first discussed. He said that he was bringing the matter up at this time simply to make it clear that Columbia Street is still a city street and is to be maintained by the City as such until it has been formally designated by the State Highway Commission as a state highway route. (The resolution regarding this matter was adopted by the Commission on the following day. See minute entry and resolution ahead.)

The Secretary presented a letter from County Judge F. E. Gilkey, Lincoln County, and a petition signed by numerous citizens of Lincoln County who reside along the Siletz-Nashville County Road wherein the Highway Commission is requested to designate and improve this road as a state highway. The Commission denied the request because of the low priority of the project and lack of funds with which to finance the work.

The Chief Counsel presented a letter from Hon. J. O. Johnson, State Representative, inquiring as to the plans of the Highway Commission with respect to the widening of the Tualatin Valley Highway for four lanes of traffic between Beaverton and Forest Grove. The Engineer advised that, whereas the highway as presently constructed may be somewhat narrow for the volume of traffic which it now carries, the completion of the Sunset Highway in the not distant future, in his estimation, will relieve the situation considerably. He recommended in view thereof that no money be spent for widening this section until the Sunset Highway has been completed and opened for travel, at which time further consideration can be given the need for the widening work which Mr. Johnson requests. He further stated that there are no unobligated funds available for this improvement. The Commission concurred in the viewpoint of the Engineer and ordered that Representative Johnson be so informed.

The Engineer reported that the relocation surveys for the following

sections of state highways have been completed and asked the Commission to approve them as the permanent routes of such highway sections:

Adrian-Homedale Section of the Nyssa-Adrian Secondary Highway, Malheur County;

Umatilla River Dike Section adjacent to the Boardman-Stanfield Highway, Umatilla County.

After study, the Commission approved the relocations as reported and thereupon, by unanimous vote, adopted the following resolutions with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and permanent location of each of the following sections of state highways, to wit:

Adrian-Homedale Section of the Nyssa-Adrian Secondary Highway, Malheur County;

Umatilla River Dike Section adjacent to the Boardman-Stanfield Highway, Umatilla County,

and in connection therewith to prepare maps showing the route and location of said sections of highways and to file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the above-mentioned sections of state highways, together with the maps, which for identification purposes bear the map file Nos. 6B-21-3 and 6B-21-4, and 6B-22-10, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the fourth day of February, 1947.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Warren Northwest, Inc., Contract No. 2738, for grading and paving the South Unit of the Steiwer Hill-Albany Section of the Pacific Highway East in Linn County, requested an extension of time of 360 days, from September 30, 1946, to September 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to noncompletion of certain overflow bridge structures which were being built by another contractor under a separate contract. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct and recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation, not, however, on the basis of the contractor's statement.

Warren Northwest, Inc., Contract No. 2739, for grading and paving the North Unit of the Steiwer Hill-Albany Section of the Pacific Highway East, in Marion County, requested an extension of time of 360 days, from September 30, 1946, to September 30, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delay occasioned by the noncompletion of certain overflow bridges that were being built by another contractor. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

O. C. Yocom Co., Contract No. 2771, for grading and surfacing the Buell and Salt Creek-Dolph Corner Sections of the Dallas-Coast Secondary Highway, in Polk County, requested an extension of time of six months, from October 31, 1946, to June 30, 1947, within which to complete this job. They advised that their progress on this job was delayed because of inclement weather conditions and the severity of early fall rains which did not permit the placing of the bituminous wearing surface as required. They also stated that the Engineer had requested that the oiling work be deferred until suitable weather condition in the spring. The Engineer advised that all of the grading and surfacing work and approximately half of the bituminous macadam construction was completed before the heavy fall rain set in, but due to the fact that oiling work cannot be done successfully when the surface is wet, he ordered such work deferred until next summer. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was

presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously, not, however, on the basis of the contractor's statements.

C. J. Eldon, Contract No. 2773, for trestle bridge construction over McKay Creek on the Wolf Creek (Sunset) Highway, in Washington County, requested an additional extension of time of 151 days, from December 31, 1946, to May 31, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing necessary materials. The Engineer recommended that an additional extension of time of 120 days, up to April 30, 1947, rather than 151 days as requested, be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

Tom Lillebo, Contract No. 2774, for construction of the Fuller and Ojalla Bridges over the Siletz River on the Siletz Secondary Highway, in Lincoln County, requested an extension of time of 242 days, from December 31, 1946, to August 30, 1947, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing delivery of structural and reinforcing steel. The Engineer advised that the reason given for overrunning the specified time limit is correct, and he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation, not, however, on the basis of the contractor's statement.

Adler Construction Company, Contract No. 2791, for grading the Mill Creek-Miller Flat Section of the Warm Springs Highway, in Jefferson and Wasco Counties, requested an additional extension of time of 180 days, from November 30, 1946, to May 30, 1947, within which to complete this job. They attributed their failure to complete the contract within the specified time limit to adverse weather conditions. The Engineer advised that the reason given for overrunning the time limit is substantially correct and, he recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

Strong and Macdonald, Contract No. 2795, for grading and surfacing the Spring Creek Hill Section of The Dalles-California Highway, in Klamath County, requested an extension of time of 151 days, from December 31, 1946, to May 31, 1947, within which to complete this project. They attributed their failure to complete the work within the specified time limit to adverse weather conditions, unsettled labor market, and difficulties in obtaining repair parts for their machinery.

The Engineer advised that progress on this project has been slow because of the inability of the contractor to obtain proper equipment to handle large boulders; however, he has now secured such equipment, and completion of the job will be expedited as weather conditions permit. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statements.

McNutt Bros., Contract No. 2796, for grading the Mazama Junction-Spring Creek Hill Section of The Dalles-California Highway, in Klamath County, requested an extension of time of 151 days, from December 31, 1946, to May 31, 1947, within which to complete this job. They alleged that unfavorable weather conditions interfered with the expeditious handling of the work and was a direct cause of their failure to complete the contract within the specified time. The Engineer advised that the contractor's delay in completing the small amount of work remaining will not cause the state any additional expense for engineering, neither will it affect the plans for surfacing the section. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

R. A. H eintz - Construction, Contract No. 2797, for grading the Spring Creek Hill-Lobert Section of The Dalles-California Highway, in Klamath County, requested an extension of time of 151 days, from December 31, 1946, to May 31, 1947, within which to complete this job. He gave extremely wet weather conditions as the reason for overrunning the time time limit. The Engineer advised that early rains were experienced on this project which materially delayed finishing operations, which are about all that remains to complete the work. He further advised that the contractor has made good progress throughout the season and that the state will not incur any loss by reason of delay. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statement.

Warren Northwest Inc., Contract No. 2799, for grading and paving the Klamath Falls-USRS Canal Section of the Klamath Falls-Lakeview Highway, in Klamath County, requested an extension of time of 196 days, from December 31, 1946, to July 15, 1947, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delay in the award of the contract, waiting for public utilities to complete the readjustment of their facilities, and delays in delivery of cement. The Engineer advised that the contractor and the public utilities concerned both experienced difficulties in securing labor and materials for their respective work, which is the reason that the contract was not completed within the specified time limit. He recommended,

in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statements.

Philpott & Buckingham, Contract No. 2833, for reconstructing the Mill Creek Bridge on the Dallas-Coast Secondary Highway, in Polk County, requested an extension of time of 120 days, from January 31, 1947, to May 31, 1947, within which to complete this project. They attributed their failure to complete the work within the specified time limit to scarcity of adequate labor, difficulties in securing materials, and inclement weather. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote, not, however, on the basis of the contractor's statements.

The Engineer reported the Contract No. 2766 for grading on the Madras-Lamonta Section of the Madras-Prineville Secondary Highway, in Jefferson County, and Contract No. 2847, for landscaping the Ocean Lake Section of the Oregon Coast Highway, in Lincoln County, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2766, with R.A. Heintz - Construction, for grading on the Madras-Lamonta Section of the Madras-Prineville Secondary Highway in Jefferson County; completed August 28, 1946;

Contract No. 2847, with Knight Pearcy, d.b.a. Knight Pearcy Nursery Co., for landscaping on the Ocean Lake Section of the Oregon Coast Highway in Lincoln County; completed December 27, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer reported receipt of a letter from The Pacific Telephone and Telegraph Company advising that the Company has purchased property on the south side of Burnside Street and east of S. W. 9th Avenue, Portland, on which it contemplates construction of a twelve-story building in connection with its expansion program, which improvement will involve an expenditure of several million dollars, and requesting an expression from the State Highway Commission as to its plans for the future widening of Burnside Street, which would affect their building design. The Engineer advised that, in his estimation, there is no occasion for the further widening of Burnside Street, at least from the state highway standpoint, because of the probable future designation of this street west of Broadway as a one-way street for eastbound traffic and the routing of westbound traffic on Couch Street, studies for which already have been made by the City. The further widening of Burnside Street, he said, is a very expensive proposition, and he suggested that the Company be advised to consult with the Portland City Council for its answer. The Commission concurred in the viewpoint of the Engineer and so ordered.

The Commission had under consideration renewal of its agreement with MacWilkins Cole & Weber, the advertising agency which is supervising publicity matters for the Travel and Information Department. The Commission voted unanimously to extend the present arrangement for another year. (An agreement covering the matter was executed by the Commission later in the session.)

In this connection the Engineer brought up for discussion the question of continuing the Highway Department's membership in the National Association of Travel Officials. He advised that the dues are $50 a year and that membership in the Association was authorized by the former Highway Commission upon recommendation of the members of the Advisory Committee on Travel Matters. The Commission by unanimous vote decided to continue its membership in this Association and authorized the payment of the dues for the current year.

The Engineer asked the Commission to confirm telephonic authority given him to spend an additional $17,000 for purchase of buildings in Camp Adair. He advised that about three years ago the Commission budgeted the sum of $200,000 for the construction of buildings with the understanding that before any expenditure was made on this account he would secure the approval of the Commission. He further advised that on November 25, 1946, the Commission authorized an expenditure of $12,000 for the purchase and re-erection of four buildings to be used as maintenance headquarters at Florence, Dexter, Dufur, and Cave Junction and for an equipment storage building at the Salem Shops; also, that on January 20, 1947, telephonic approval for an additional expenditure of $5,000 was authorized by Commissioners Schaupp and Chandler for the purchase and re-erection of two additional buildings at Salem, and that on January 22, 1947, Commission Chandler authorized an additional expenditure of $12,000 to purchase, move, and re-erect three motor repair buildings for maintenance headquarters at Woodburn, Troutdale, and North Bend and for one fire station building at the maintenance headquarters at Warm Springs Junction. He asked the Commission to confirm such telephonic authorizations, totaling $17,000, which brings the total expenditure for such purposes to $29,000. The

Commission approved such expenditure by unanimous vote.

In this connection the Engineer was instructed to send pictures of the re-erected buildings to each member of the Commission for his information.

The Engineer reported receipt of information from the War Assets Corporation that it has for sale a limited stock of steel girder highway spans now stored at Atlanta, Georgia, the spans being 30 feet in length and consisting of four I beams, and, as manufactured, have a roadway width of 12 feet 6 inches. These may be purchased, he said, for the sum of $387.51 per span f.o.b. Atlanta, Georgia, and if obtainable, will effect a saving of $30,000 in the construction of approaches to the Willamette River Bridge at Independence. He also said that additional steel can be used to advantage in the construction of the Stillwell Bridge at Tillamook. He requested authority to purchase 45 spans, which would cost approximately $26,505.67, including freight. The Commission approved the request by unanimous vote.

The Commission had under discussion the adoption of a policy with regard to the painting of parallel parking stalls on state highway routes through cities. The Engineer advised that a number of years ago, as an inducement to the cities to adopt parallel parking ordinances, the Commission agreed to paint parallel parking stalls on highway routes, which is quite a task for the sign crews inasmuch as it is necessary to repaint the lines two or three times a year. A number of the cities, he said, have installed parking meters, which changes the picture somewhat and raises the question whether or not the state should continue the painting of the parking stalls at such places because of the additional work that would be required, it being essential that the parking stalls be well marked when meters are used. He recommended continuation of the present policy in all places where no meters have been installed and that in localities where the city maintains meters the responsibility for painting the parallel parking areas be placed upon the cities, which, he said, can do the work cheaper than it can be done by the state. The Chief Counsel concurred in the recommendation, giving as his thought that it is only right that the cities should perform such function inasmuch as they are securing revenues from the meters. The Commission approved the recommendation unanimously.

The Engineer reported completion of construction of the Ruckles Creek-Middle Bridge Section of the Baker-Homestead Highway, in Baker County, and recommended abandonment of certain fragments of the old right of way and that such portions be allowed to revert to the county for maintenance as a county road or disposed of otherwise as the County sees fit. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chandler:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Baker-Homestead Highway No. 12 known as the Ruckles Creek-Middle Bridge Section in Baker County, the

westerly terminus of which is at Highway Engineer's Station 729+00 of the reconstructed line and the easterly terminus of which is at Highway Engineer's Station 862+34.8 of the reconstructed line; and

WHEREAS, by reason of the relocation of said section of said highway portions or units of the right of way of the highway as formerly located have been eliminated from the boundaries of the new location, some of which eliminated sections or areas are no longer needed for highway or other public purposes, while other portions or sections may be needed and may be retained for public use; and

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The areas of land within the limits of the old right of way and outside the limits of the right of way of the reconstructed highway which lie between Engineer's Station 731+00 and Engineer's Station 744+20 of the reconstructed highway, between Engineer's Station 746+00 and Engineer's Station 773+50 of the reconstructed highway, between Engineer's Station 774+50 of the reconstructed highway and Engineer's Station 778+50 of the reconstructed highway, and between Engineer's Station 778+00 and Engineer's Station 802+00 of the reconstructed highway, and between Engineer's Station 802+00 and Engineer's Station 842+50 of the reconstructed highway, and which areas are shown colored in brown on the map attached hereto, which map is marked "Exhibit A" and by this reference made a part of this resolution, are no longer needed for highway and may not be needed for any other public purpose, and, therefore, all of said areas colored in brown and enumerated above are eliminated from the right of way of said highway, and such title, interest or right which the State has or may have had in said real property is hereby permitted to revert to the County, and shall be under the jurisdiction and control of the County and shall be maintained by the County as a public road pursuant to agreement between the County and the State dated December 27, 1945. *

2. The area shown colored in green on said "Exhibit A" includes right of way acquired for the relocation and reconstruction of the said highway. It is the judgment and finding of the Commission that all of said area is and will be needed for highway right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said "Exhibit A" shall be retained and held by the State and shall not be permitted to revert to the County or become the property of abutting owners. *

3. The boundaries of all real properties acquired for rights of way and the boundaries of all real properties title to which is to be retained by the State shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Baker County a duly certified copy thereof, and shall file with the Clerk of Baker County a like certified copy; and said County Court hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the County shall accept the said abandoned sections of the said old right of way shown colored in brown on the map attached hereto and marked "Exhibit A", and shall assume jurisdiction thereover as a county road or shall vacate any or all of said abandoned sections as may be determined by the County Court, permitting such areas to revert to the owners of the abutting property. *

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 129, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission also had under discussion the disposition of certain sections of the Oregon Coast Highway within the City of Coos Bay which no longer are required for state highway purposes since the highway has been reconstructed at this location, particularly along the Ingersoll Avenue-Johnson Avenue unit and through the Bunker Hill district. The Engineer advised that the City Council has signed an agreement covering the future disposition of such areas and recommended action by the Commission in conformity therewith. The Chief Counsel concurred in the recommendation. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Oregon Coast Highway known as the Ingersoll Avenue-Johnson Avenue Section, and the Bunker Hill Section, in Coos County, the northerly terminus of which is at Highway Engineer's Station 17+39 of the reconstructed line at the intersection of Broadway and Ingersoll Avenue, in the City of Coos Bay, and the southerly terminus of which is at Highway Engineer's Station 89+00 of the reconstructed line

at the intersection of the Oregon Coast Highway and Linton Avenue, in the First Addition to Bay Park in Coos County; and

WHEREAS, by reason of the relocation of said section of said highway, portions or units of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, and are no longer needed for highway purposes.

WHEREAS, it is the purpose of the Highway Commission to take official action and impress upon the Commission's records the disposition to be made of the areas and sections of the right of way of said highway affected by reason of said relocation; and

WHEREAS, the City of Coos Bay and the Highway Commission have entered into an agreement relating to the use and jurisdiction of the abandoned sections, said agreement being dated December 30th, 1946;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That the sections or areas of the old right of way which lie between Highway Engineer's Station 23+25 and Highway Engineer's Station 29+90 of the reconstructed highway, and also between Highway Engineer's Station 30+00 and Highway Engineer's Station 39+20 of the reconstructed highway, and are otherwise shown and identified colored in red on Exhibit A, attached hereto, and by this reference made a part hereof, are hereby abandoned as any part of the right of way of the said State Highway. The Commission hereby surrenders all jurisdiction thereover and hereby consents that jurisdiction over said road shall be assumed and exercised by the City Council of Coos Bay. *

2. That the area shown colored in green on said Exhibit "A" includes right of way acquired for the relocation and reconstruction of the said highway and includes also some parts or areas of the old right of way not now incorporated within the boundaries of the right of way proper. In connection with all the said area colored in green, it is the judgment and finding of the Commission that all of said area is and will be needed for right of way, and likewise for highway construction, improvement, maintenance and other highway purposes and uses. For such uses and purposes, therefore, the Commission does hereby declare and order that possession of and title to all of the land or area shown colored in green on said Exhibit A shall be retained and held by the State, and shall not be permitted to revert to or become the property of abutting owners. *

3. The boundaries of all real properties acquired for rights of way, and the boundaries of all real properties, title to which is to be retained by the State, shall be appropriately and properly marked on the ground by the Engineer with proper monuments, and such boundary monuments shall thereafter be maintained in place.

4. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the City Council of Coos Bay, a duly certified copy thereof, and shall file with the Clerk of Coos County and the Recorder of the City of Coos Bay a like certified copy, and the City Council hereby is respectfully requested to take appropriate official action, by resolution or otherwise, by which the City shall accept the said abandoned sections of the said old right of way shown colored in red on the map attached hereto and marked Exhibit A, and shall assume jurisdiction thereover as city streets.*

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 153, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Engineer presented for the Commission's approval a form of agreement with Malheur County with respect to the abandonment of certain sections of the old right of way of the Nyssa-Adrian Secondary Highway, Malheur County, when this highway has been reconstructed on permanent alignment. He recommended approval and execution of the agreement, which is in conformity with the Commission's policy to provide for the disposition of such fragments of right of way prior to contracting a highway improvement. He exhibited a map showing the sections of right of way under discussion. The Commission approved the recommendation by unanimous vote. (The agreement was signed by the Commission on the following day.)

The Commission had under discussion the combination of two secondary highways in Malheur County in order to simplify the records — Nyssa-Adrian Secondary Highway No. 450 and Homedale Spur Secondary Highway No. 455. The Engineer recalled that this matter came before the Commission at the previous meeting, but action thereon was deferred pending securing of the approval of the Malheur County Court. The approval of the County Court, he said, has been obtained. He recommended appropriate action by the Commission combining these two secondary highways. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, on November 13, 1931, the Commission selected and designated as a secondary highway a county road in Malheur County then under the jurisdiction of the County Court of said County, and on May 17, 1937 by amended resolution the location of said road was changed and

the description of said road now reads as follows:

> Beginning at Nyssa in Malheur County, Oregon; thence southerly via Adrian to a junction with the Homedale Spur Secondary State Highway No. 455 and the Jordan Valley County Road approximately 8.7 miles south of Adrian, a distance of 20.95 miles,

which said county road upon its selection and designation as a secondary state highway was identified in the records of the Highway Commission as the Nyssa-Adrian Secondary State Highway No. 450; and

WHEREAS, on November 13, 1931, the Commission designated as a secondary state highway a county road in Malheur County, which road was under the jurisdiction of the County Court and was defined and described as follows, to wit:

> Beginning at a junction with the Nyssa-Adrian Secondary State Highway No. 450 and the Jordan Valley County Road, approximately 8.70 miles south of Adrian; thence easterly to the Oregon-Idaho state line, a distance of 1.95 miles,

which said county road upon its selection and designation as a secondary highway was thereafter identified in the records of the Highway Commission as the Homedale Spur Secondary State Highway No. 455; and

WHEREAS, by reason of the relocation and contemplated reconstruction of said secondary highways and by reason of the communities which are served by said highways it is the judgment and opinion of the Commission that said highways should be combined and thereafter identified as a secondary highway to be known as the Nyssa-Adrian Secondary Highway No. 450;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting as follows:

1. That the Nyssa-Adrian State Highway No. 450 and the Homedale Spur Secondary State Highway No. 455 shall be and the same hereby are for all purposes combined and shall hereafter be identified and known as the Nyssa-Adrian Secondary State Highway No. 450.

2. That the route, location and description of said Secondary Highway No. 450 shall be and is described as follows:

> Beginning at Nyssa in Malheur County, Oregon; thence southerly via Adrian to a point approximately 8.3 miles south of Adrian; thence easterly to the Oregon-Idaho state line, a distance of 22.47 miles.

3. That this resolution be entered in the minutes and records of the Commission as of the 4th day of February, 1947.

The Commission discussed the claim of Claude F. Williams, Prineville, for damages which he alleges occured to his alfalfa hay crop and field as the result of the blocking of drainage from his field during the construction of the Prineville Grade Separation project. The Engineer advised that during the excavation work in connection with the construction of the east pier of this structure an old timber plank culvert under the old railroad grade was destroyed, and drainage water thereafter accumulated, forming a pond in Mr. Williams' hayfield which resulted in the destruction of about four tons of newly-cut hay and about one acre of growing alfalfa, which Mr. Williams declares is worth the sum of $114. He advised further than no one knew that the culvert was there when the contract was awarded; otherwise, appropriate provision would have been made in the specifications, and the contractor would have been required to protect it. The State Highway Department, he said, is responsible for the damage, and accordingly recommended payment of the claim. The Chief Counsel concurred therein. The Commission approved the recommendation by unanimous vote.

The Commission discussed a resolution from the Disabled American Veterans, Chapter No. 15, requesting insertion of a clause in all state highway contracts giving veterans preference of employment.. The Chief Counsel advised that the Legislature in 1945 enacted a law which requires that war veterans be given preference for appointment and employment in every department and upon all public work in the State of Oregon and of any county, city, town, or municipal corporation, or other political subdivision thereof. This act of the Legislature, he said, indicates that some such consideration be given to war veterans, and he suggested that it would be advisable for the Commission to comply therewith. The Engineer advised that such a clause has been contained in all highway contracts since World War I; however, it does not state that the contractor shall employ disabled veterans. Following discussion the Commission referred the resolution to the Chief Counsel for reply by quoting the law. The Engineer was instructed to bring to the attention of all contractors the clause of the contract which states that war veterans shall be given preference in employment on public work and to ask them to comply therewith insofar as is possible.

A letter was presented from the St. Helens Pulp and Paper Co., St. Helens, Oregon, requesting a three-year extension of its agreement with the State Highway Commission covering its use and operation of a timber trestle over the Lower Columbia River Highway at Mile Post 89.51, Clatsop County. The Engineer advised that the company has been operating a logging railroad over this structure for the past three years without any trouble or complaints. He recommended that the company's request for extension of the agreement be approved provided the company will make repairs as may be necessary to put the structure in a safe and sound condition. The Commission approved the recommendation unanimously.

The Commission had under discussion a request from the City Council of Lebanon, Oregon, for a one-year extension of the arrangement had last year for state maintenance of a log trucking route through their city. The Engineer advised that the previous arrangement, which expired December 31,

1946, provided for improvements that were estimated to cost a total of $8,000, of which amount the state was obligated to pay $6,000 and the city $2,000. He recommended approval of the request if investigation reveals that the amounts are right. Chairman Banfield recalled that the Commission's present policy limits to $2,500 the state's contribution to cities for projects of this kind. It was his thought that the Commission should adhere to such policy, and suggested cooperation with the City of Lebanon on such basis. Commissioners Schaupp and Chandler concurred thereby making the decision unanimous.

The Engineer reported that, in conformity with authority previously granted him by the Commission, he has posted several state highways for reduced weight loads in order to make certain that they will not be damaged during the time that frost is leaving the ground. He asked the Commission to confirm such postings, and thereupon the Commission adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, by the provisions of Section 115-394, O.C.L.A., the Commission is empowered to reduce the maximum load which may move over any state highway or section thereof and may reduce the speed at which traffic may operate over such highways or sections of highways if and when the Commission finds, upon investigation, that such action is necessary in order to preserve said highways or that such action is in the interests of the general public; and

WHEREAS, the following highways and/or sections of highways are state highways and as such are under the jurisdiction and control of the State, to wit:

Alsea Highway No. 27 from Mile Point 7.50 (7.5 miles east of Waldport) to Mile Point 28.08 (Lincoln-Benton County line) in Lincoln County, being the unoiled section of said highway

Alsea-Deadwood Secondary Highway No. 201 from Mile Point 0.00 (Junction with the Siuslaw Highway) to Mile Point 19.45 (Terminus at "old" Paris) in Lane County

Richardson-Eugene Secondary Highway No. 220 from Mile Point 11.94 at Richardson to Mile Point 36.57 (Junction with Territorial Secondary Highway at Elmira) in Lane County

McKenzie Highway No. 15 from Mile Point 12.00 at Walterville to Mile Point 55.00 (Junction with road at Belknap Springs)

Hood River Secondary Highway No. 281 from Mile Point 11.72 (Junction with county road to Dee) to Mile Point 17.80 (Junction with county road at west limits of Parkdale)

AND, WHEREAS, after inspection and study of said highways by the Engineer he has reported to the Commission that the highways above named

and defined are, because of frost and other climatic conditions and effects, in such state of repair and in such condition generally that the use of the same by the movement thereover of trucks carrying a maximum weight of load and vehicle permitted by law will render the same unsafe and in some respects impassable; and

WHEREAS, based on the report of the said Highway Engineer and on his recommendation, it is the opinion and finding of the Commission that the total gross weight of combined load and vehicle using said highways or any of the same should be reduced as hereinafter in this order provided;

NOW, THEREFORE, BE IT AND IT HEREBY IS ORDERED by this Commission, all members being present, as follows:

1. That the Commission does hereby find and declare that the highways or sections of highways above named have been and are being deteriorated by reason of frost and other climatic conditions and therefore in order to preserve and protect the same the maximum gross weight of load and vehicle permitted on said highways and the speed at which such vehicles may move must be reduced as herein provided.

2. That the maximum gross load and the speed of operation of such vehicle and load shall be:

Name of Highway	Maximum Gross Load	Speed
Alsea Highway No. 27 from Mile Point 7.50 (7.5 miles east of Waldport) to Mile Point 28.08 (Lincoln-Benton County line) in Lincoln County, being the unoiled section of said highway	6 tons	Legal
Alsea-Deadwood Secondary Highway No. 201 from Mile Point 0.00 (Junction with the Siuslaw Highway) to Mile Point 19.45 (Terminus at "old" Paris) in Lane County	6 tons	Legal
Richardson-Eugene Secondary Highway No. 220 from Mile Point 11.94 at Richardson to Mile Point 36.57 (Junction with Territorial Secondary Highway at Elmira) in Lane County	6 tons	Legal
McKenzie Highway No. 15 from Mile Point 12.00 at Walterville to Mile Point 55.00 (Junction with road at Belknap Springs)	10 tons	Legal
Hood River Secondary Highway No. 281 from Mile Point 11.72 (Junction with county road to Dee) to Mile Point 17.80 (Junction with county road at west limits of Parkdale)	50% of maximum gross and axle weights allowed by statute	Legal

3. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle.

4. It is further ordered that these rules and regulations shall be in full force and effect from the fourth day of February, 1947, until rescinded, modified or revoked by order of the Highway Commission.

5. It is further ordered that a notice be posted in a conspicuous manner and place at each end of each of the above-named highway sections so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

6. It is further ordered that a certified copy of this order be furnished to the County Court of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

Dated this fourth day of February, 1947.

In this connection the Engineer brought up for discussion the question whether or not log hauling should be permitted on the Mt. Hood Highway this year between Barlow Pass and Cooper Spur. He recommended that such operations be allowed from Mile Post 69.90, near Newton Creek, to Mile Posts 95.74 and 95.82, where the loads leave the highway enroute to the plants of the Hood River Box and Veneer Company and the McNeil Lumber Company, respectively, on the condition that the overall length of the equipment and load shall not exceed 56 feet and, provided further that (1) such hauling shall be carried on only during a period to be specified by the State Highway Engineer (approximately between June 1 and October 1), that (2) between Mile Post 69.90 (Entrance to the highway) and Mile Post 78.43 (Cooper Spur) all loaded logging trucks shall be preceded by a pilot car which shall proceed far enough in advance of the loaded truck to stop all opposing traffic at a location that is suitable for passing; and that (3) between Mile Post 69.90 (Entrance to the highway) and Mile Post 78.43 (Cooper Spur) the speed of all empty and/or loaded logging trucks shall not exceed 15 miles per hour, and that the empty logging trucks shall stay on the right hand side of the yellow traffic line and at no time encroach upon the lane of opposing traffic. He advised that the weight of the loads would be legal and that log hauling would not be permitted until such time as the highway has dried out sufficiently to stand up under the heavy loads. The Commission approved the recommendation by unanimous vote and so ordered.

Messrs. J. S. Burres, Moro, Oregon, and George Kaseberg, Condon, Oregon, stockmen and farmers, came before the Commission at this time and urged

improvements to the Cottonwood Grade Section of the Wasco-Heppner Secondary State Highway. Chairman Banfield advised that there is now contained in the Commission's third year Postwar Construction Program an item of $102,000 for the improvement of a seven-mile section of this road extending easterly from the John Day River, and the Commission expects to place this work under contract during 1948. He assured the gentlemen that the Commission would do the work unless it is deprived of the funds that have been budgeted to finance it. He pointed out that there are many parts of the state highway system that are in a similar state of disrepair that cannot be improved because funds are not available to pay for the work. As a result of considerable discussion the Engineer was authorized and instructed to spend about $2,000 to improve some of the bad places on this grade pending construction of the major project. He was also instructed to report at the next meeting how much it will cost to make the road safe for travel. Mr. Kaseberg urged better maintenance at the east end of the grade. The Engineer advised that he would look into this feature and would have the Maintenance Engineer call upon Mr. Kaseberg in the near future to ascertain just what he has in mind.

The meeting adjourned at 5:30 p.m. to reconvene at 9:00 a.m. the following morning in the Imperial Hotel.

Portland, Oregon
February 5, 1947

The meeting of the State Highway Commission reconvened at 9:00 a.m. in Room 715 (Imperial Room) of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:00 a.m.)
Ben R. Chandler, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Engineer brought to the Commission's attention a news item from the morning Oregonian of January 23, 1947, advising that the Clackamas County Court has ordered a maximum load limit of 15,000 pounds on all county roads in order that they might not be damaged by heavy traffic during the period that frost is leaving the ground. The Commission took no action on such matter.

The Commission discussed matters pertaining to the designation as a state secondary highway of the county road which extends from Estacada to Milwaukie, in Clackamas County, particularly the question of costs. The Engineer was instructed to render a detailed report on such matter. (This matter was discussed further later in the session when Commissioner Schaupp was present. See minute entry ahead.)

A letter was presented from Karl L. Janouch, Forest Supervisor, Rogue River National Forest, advising that the Forest Service plans to sell

timber in the Rogue River National Forest above the Diamond Lake-Crater Lake Highway Junction, the anticipated cut being estimated at between ten million and fifteen million board feet annually, and inquiring whether or not the State Highway Commission has any objections to the truck hauling of the logs over the Diamond Lake Highway and Crater Lake Highway to Prospect and Medford. The Engineer advised that this highway was constructed primarily as a recreational road and that the foundation is not strong enough to carry log-hauling traffic. He recommended, in view thereof, that no log hauling be permitted on this road. The Commission approved the recommendation unanimously. (The U.S. Forest Service advised subsequent to this meeting that other arrangements had been made for the transportation of the logs so that it would not be necessary to truck them over the West Diamond Lake Secondary Highway.)

The Commission had under discussion the advisability of ordering reduced speed limits on certain highways for trucks engaged in log hauling, particularly highways which have narrow and crooked sections where the truck-hauling of logs endangers other traffic. The Engineer recommended adoption of an order designating maximum speeds as follows:

Highway	Section and Mile Post	Maximum Speed
Tiller-Trail	Deadhorse Canyon (M.P. 40.43) to M.P. 41.44	15 Miles-per-hour
Tiller-Trail	Summit West Section (M.P. 23.58 to M.P. 27.92)	15 Miles-per-hour
Elkin-Sutherlin	M.P. 13.44 to M.P. 18.01	25 Miles-per-hour
Elkin-Sutherlin	M.P. 18.01 (Summit of Marvin Hill) to M.P. 22.84 (Road to Cole's Valley)	15 Miles-per-hour
Elkin-Sutherlin	M.P. 22.84 to Sutherlin	25 Miles-per-hour
Siletz Highway	M.P. 5.52 (End of pavement) to M.P. 10.55 (2 miles south of Macks Landing)	20 Miles-per-hour
Siletz Highway	M.P. 12.93 to M.P. 23.88 (Siletz Town)	20 Miles-per-hour
Siletz Highway	M.P. 23.88 (Siletz Town) to M.P. 31.86 (Jct. with Corvallis-Newport Hwy.)	30 Miles-per-hour

The Engineer advised that the State Police Department alleges that it does not have the authority to make arrests for speed violations merely because permits issued by the State Highway Commission contain a reduced speed limit clause; however they do have such an authority when a reduced speed is ordered by the Public Utilities Commissioner. He gave as his thought, in view thereof, if the Commission approves the speed reductions as recommended that it should authorize the Secretary to ask the Public Utilities Commissioner

to include them as restrictions in special carrier permits issued in his office. Following discussion the Commission by unanimous vote approved the reduced speed limits recommended by the Engineer, and ordered that they be forwarded to the Public Utilities Commissioner with the Commission's recommendation that they be adopted in connection with the issuance of special carrier permits.

The Commission discussed a letter from Mr. R. W. Arens, County Commissioner of Hood River County, requesting certain information concerning the plans of the State Highway Commission for the further development of the Columbia River Highway east of Portland. Chairman Banfield gave as his thought that this letter should go unanswered as to details until the Legislature, which is now in session, adjourns and the Commission knows what the status of its finances are to be. Commissioner Chandler concurred.

In this connection the question arose whether or not the Hood River-Mosier Section of this highway could be broken down into comparatively small increments in order to facilitate construction. The Engineer was instructed to look into this feature and to advise the Commission relative thereto.

The Engineer reported a request from the Wagner and Bevier Logging Company for permission to conduct logging operations on private property adjacent to the Albany-Lyons Secondary Highway along Thomas Creek, Linn County. He advised that these operations are to be conducted on a steep hillside above the highway and undoubtedly some of the trees will be felled on the highway and will constitute a hazard to highway traffic, which condition has prompted the company's request. He further stated that quite a number of these trees lean toward the highway, and if they are not felled now while there is an opportunity to secure protection for highway traffic, the probabilities are that they will fall naturally, later on, thereby increasing the hazard; moreover, it is quite likely that rocks and boulders will be dislodged from the cliffs above the highway and these too will constitute a serious traffic hazard which could be minimized were the felling of the trees conducted under proper supervision. He recommended approval of the company's request provided it will comply with certain conditions for public protection as are contained in the proposed agreement which he presented for inspection. The Chief Counsel concurred in the recommendation, advising that he prepared the agreement which contains provisions that will amply protect the Commission and the general public if complied with by the Company. After careful consideration the Commission approved the recommendation by unanimous vote and thereupon signed the agreement.

The Engineer reported that the plans for the proposed bridge across the Willamette River at Independence are completed. He requested authority to present the plans to the U. S. War Department for approval, that being required before a contract for construction of the structure can be awarded. The Commission approved the request by unanimous vote.

The Engineer requested authority to attend, at state expense, a

meeting of the Legislative Subcommittee of the Executive Committee of the American Association of State Highway Officials which is to be held in Washington, D.C. during the first week of March. He advised that this is an important committee which is extremely active in securing increased highway appropriations and it is quite important that he attend since he is the only western member of the committee and will be depended on to look out for the interests of the Western states. The Commission approved the request by unanimous vote subject to further approval by Governor Snell.

The Secretary presented an invoice from the American Association of State Highway Officials covering payment of annual dues in this Association for 1947 amounting to $450. The Commission approved the invoice and ordered it paid.

The Commission had under discussion the setting of a date for its next regular meeting in Portland and decided to hold such meeting on Monday and Tuesday, March 24 and 25, 1947, provided that meets with the pleasure of Commissioner Schaupp. (Commissioner Schaupp expressed his approval later in the session.) The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

The Commission discussed the following items of unfinished business:

1. Sale of concession privileges in Silver Creek Falls State Park: The Chief Counsel reported briefly on this matter earlier in the session. He advised at this time that he would render a complete report at the March meeting of the Commission.

2. Request of Roy A. Gould for permission to maintain a residence building on State Highway Department property adjacent to the Wilsonville-Highway near Glenwood, Washington County: The Chief Counsel advised that, in his opinion, it would be satisfactory to grant Mr. Gould this privilege for a period of five years and that he is now preparing a form of agreement on such basis, the consideration being that upon the expiration of the five-year period the state may purchase the building, if it so desires, for a nominal amount yet to be negotiated. He recommended approval of the arrangement. The Commission approved the recommendation unanimously.

3. Request of Boardman Public Schools for acquisition of a state-owned gravel pit and stockpile site for school purposes: The Engineer advised that he wrote the school district in conformity with instructions from the Commission at the previous meeting, but he has received no reply to date. The Secretary was instructed to delete this item from future agendas.

4. The designation of Jefferson Street and Columbia Street, Portland, as one-way traffic streets: The Chief Counsel read aloud a redraft of a form of resolution covering this matter which he has prepared pursuant to instructions from the Commission at the previous meeting. The Commission approved the form as rewritten and thereupon, by unanimous vote, adopted the resolution as follows:

WHEREAS, the volume and type of traffic which enters and leaves the City of Portland over the Canyon Road is such as to create a severe traffic hazard and traffic congestion; and

WHEREAS, as a means of terminating, or at least minimizing, such unfavorable conditions, it is proposed by the municipal authorities of the City of Portland that two one-way traffic routes be established over which there may move Canyon Road traffic within a specified area; and

WHEREAS, the City has adopted Resolution No. 23106, a copy of which, for appropriate reference, is attached, by which resolution the City has officially established one-way traffic connections, using S.W. Jefferson Street from S.W.Harbor Drive to S.W. Fourteenth Avenue for westbound traffic, and S.W. Columbia Street from S.W. Fourteenth Avenue to S.W. Harbor Drive for eastbound traffic, until plans can be approved and agreements entered into by the City of Portland and the Oregon State Highway Commission for the division of costs on an entire project now under consideration; and (*)

WHEREAS, the Highway Commission is of the opinion that the proposed one-way traffic routes will tend to minimize traffic congestion and traffic hazard until some more permanent arrangement can be developed by the City and the State; and

WHEREAS, the City and the State are jointly engaged in a traffic study for the purpose of developing a scheme and plan of street improvement, coupled with traffic control, which will contribute a measure of relief to the disturbing traffic congestion which now prevails with respect to Canyon Road and its related arteries;

NOW, THEREFORE, be it and it hereby is resolved by the Commission, all members being present and affirmatively voting, as follows:

1. That the one-way traffic arrangement and control provided for by the City in its Resolution No. 23106 be and the same hereby is approved.

2. That, pending further conference between the City officials and the members of the Oregon State Highway Commission, the maintenance of said one-way traffic streets shall remain the obligation of the City.

3. That the Highway Commission does hereby recommend that a further study of traffic conditions with respect to Canyon Road and its points of contact within the corporate limits of the City of Portland be made by the City and the State for the purpose of determining to what extent and in what manner traffic accomodations can be provided which will more adequately serve immediate and future needs.

4. That the State of Oregon, acting by its State Highway Commission, hereby offers to contribute one-half of the cost incident to and involved in the installation of traffic signals, necessary traffic devices and installations, for the purpose of channelizing traffic, for the accomplishment of necessary street widening, and paving and for pavement patching, all of which are a part of contemplated improvement of Columbia Street between Front Avenue and a proposed connection with Jefferson Street near S.W. Eighteenth Street.

5. That this resolution be entered in the minutes and records of the Commission as of February 5, 1947, and a correct copy thereof delivered to Will E. Gibson, Auditor of the City of Portland.

The following is an exact copy of the City of Portland's resolution No. 23106 referred to in the foregoing resolution:

(*) "Resolution No. 23106

WHEREAS, the City Traffic Engineer has prepared plans for a one-way connection between SW Canyon Road and SW Harbor Drive using SW Jefferson Street westbound and SW Columbia Street eastbound, with necessary connections to SW Harbor Drive and Jefferson Street at SW 18th Avenue; and,

WHEREAS, the Oregon State Highway Commission on October 29, 1946, approved the taking over of SW Columbia from SW 18th Avenue to SW Harbor Drive and of SW Jefferson Street from SW 4th Avenue to SW Harbor Drive, and of the operation of SW Jefferson Street from SW Harbor Drive to SW 14th Avenue as a westbound street and SW Columbia Street from SW 14th Avenue to SW Harbor Drive, as an eastbound street, until plans can be approved and and agreements entered into by the City of Portland and the Oregon State Highway Commission for the division of cost on the entire project; and,

WHEREAS, the Council feels that this much needed improvement should be expedited as much as possible in order to relieve congestion which now exists on SW Jefferson Street and provide safe movement of traffic north and south across SW Jefferson Street; now therefore,

BE IT RESOLVED that the Council hereby approves of the operation of SW Jefferson Street as a one-way traffic street westbound from SW Harbor Drive to SW 14th Avenue, and SW Columbia Street as a one-way traffic street eastbound from SW 14th Avenue to SW Harbor Drive.

Adopted by the Council, Nov. 22, 1946

WILL E. GIBSON
AUDITOR OF THE CITY OF PORTLAND

Com'r Bowes
11-15-46

---

5. Request of the City of Canby for traffic control on US99E through Canby: The Engineer advised that his report on the subject is not ready for presentation.

6. Request for parking areas along the Weston-Elgin Secondary Highway for the benefit of winter sports enthusiasts. The Engineer advised that this project is included as an item in the 1947 tentative Minor Betterment Program for the Commission's consideration when that program is discussed.

7. Proposed abandonment of portions of the old right of way of the Pacific Highway (US99) between Wolf Creek and Sexton Mountain, Josephine County: The Engineer recalled that this matter was before the Commission at the previous meeting when he was instructed to ascertain the attitude of the Josephine County Court with respect thereto. Expression, he said, has not been received from the County Court although the Court prior to the construction of this project signed an agreement with the Commission covering the matter. In view of this information the Commission unanimously approved the disposition of the old right of way as planned and by unanimous vote adopted the following resolutions with regard thereto:

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pacific Highway known as the Wolf Creek-Sexton Mountain Section, in Josephine County, and

WHEREAS, by reason of the relocation of said section of highway, portions of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, and

WHEREAS, it is the purpose of the Commission to take official action upon the disposition of the areas and sections of the right of way of said highway as affected by said relocation, and

WHEREAS, Josephine County and the Commission have entered into an agreement under date of April 23, 1946, relating to the use and jurisdiction of the abandoned sections, such contract to be distinguished from a contract under date of June 14, 1944, relating to portions of the Pacific Highway to the south of those covered by the later agreement, and

WHEREAS, the contract for the construction of this relocated section of the Pacific Highway was completed on November 22, 1946, and highway traffic is now routed over such new section,

NOW, THEREFORE, be it and it hereby is resolved by this Commission, as follows:

1. That attached hereto, marked Exhibit A and by this reference made a part hereof as if completely set out herein, is a white print upon which is designated the various units and colors hereinafter referred to. *

2. That the section of the old route referred to as Unit "F", colored in red, and particularly described as:

> Beginning at Highway Engineer's Station 11+00 of the old Pacific Highway in the Northeast quarter of the Southeast quarter of Section 22, Township 33 South, Range 6 West, W.M.; thence southerly along the former route of the Pacific Highway to Highway Engineer's Station 73+70 of the old highway on a line between the Northwest quarter of the Southwest quarter of Section 26 and the Northeast quarter of the Southeast quarter of Section 27, Township 33 South, Range 6 West, W.M., Josephine County, Oregon,

is hereby abandoned as any part of the right of way of the Pacific Highway, but all of said Unit is to remain and be maintained as a county road by Josephine County.

3. That the sections of the old route of the Pacific Highway, identified as Units "G" and "H", colored in brown, and particularly described as follows:

Unit "G"

> Beginning at Highway Engineer's Station 172+50 of the former route of the Pacific Highway on the line between the Southeast and Southwest quarters of the Northeast quarter of Section 35, Township 33 South, Range 6 West, W.M.; thence southerly via the former route of the Pacific Highway to Highway Engineer's Station 196+40 of the former route of the Pacific Highway on the line between the Southeast and Southwest quarters of the Southeast quarter of Section 35, Township 33 South, Range 6 West, W.M.; Josephine County, Oregon,

Unit "H"

> Beginning at Highway Engineer's Station 204+00 of the former route of the Pacific Highway on the line between the Southwest quarter of the Southeast quarter of Section 35, Township 33 South, Range 6 West, W.M., and the Northwest quarter of the Northeast quarter of Section 2, Township 34 South, Range 6 West, W.M.; thence southeasterly via the former route of the Pacific Highway to Highway Engineer's Station 216+29.6 of the former route of the Pacific Highway in the Northeast quarter of the Northeast quarter of Section 2, Township 34 South, Range 6 West, W.M., Josephine County, Oregon,

be and the same hereby are abandoned as parts of said state highway, and shall hereafter be under the jurisdiction and control of Josephine County and may be vacated or kept by the county for such public use as the County Court of that county may determine.

4. That the sections of the old right of way, colored in green on the attached exhibit, shall be retained by the Highway Commission for

highway right of way and other public purposes and uses. *

5. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Josephine County, a duly certified copy thereof, and shall file with the Clerk of Josephine County, one copy.

The County Court of Josephine County is respectfully requested to take appropriate official action, by resolution or otherwise, by which the county shall accept the said abandoned sections of the old right of way of the Pacific Highway.

FOOTNOTE:

* The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 136, under the heading "Abandonment and Retention Resolutions" and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, the Highway Commission has found it necessary and desirable to relocate the section of the Pacific Highway known as the Wolf Creek-Sexton Mountain Section, in Josephine County, and

WHEREAS, by reason of the relocation of said section of highway, portions of the right of way of the highway, as formerly located, have been eliminated from the boundaries of the new location, and

WHEREAS, it is the purpose of the Commission to take official action upon the disposition of the areas and sections of the right of way of said highway as affected by said relocation, and

WHEREAS, Josephine County and the Commission have entered into an agreement under date of June 14, 1944, relating to the use and jurisdiction of the abandoned sections, and

WHEREAS, the contract for the construction of this relocated section of the Pacific Highway was completed on November 22, 1946, and highway traffic is now routed over such new section,

NOW, THEREFORE, be it and it hereby is resolved by this Commission, as follows:

1. That the sections or areas of the old right of way, includ-

ing the connecting road, described as follows, to-wit:

> Old highway from engineer's station 216+29.6 through an equation 260+00 = 912+77 to engineer's station 873+42; and the connection between the northerly end of the reconstructed section over Sexton Mt. and the old or present highway from engineer's station 431+85 to engineer's station 444+30,

are hereby abandoned as any part of the right of way of the Pacific Highway; that all of said abandoned sections of said highway are to remain and be maintained as a county road by Josephine County.

2. This resolution shall be entered in the minutes and records of the Commission, and the Secretary hereby is directed to mail to the County Court of Josephine County, a duly certified copy thereof, and shall file with the Clerk of Josephine County, one copy.

The County Court of Josephine County is respectfully requested to take appropriate official action by resolution, or otherwise, by which the County shall accept the said abandoned section of the old right of way of the Pacific Highway, and shall maintain the same for public purposes.

---

8. Question of designating as a state secondary highway a county road which extends from the Oregon Coast Highway to Devils Punch Bowl State Park, Lincoln County: The Engineer and the Chief Counsel both recommended that this road be placed on the State Secondary Highway System. The Commission approved the recommendation unanimously on the condition that the County Court will formally request such designation in order to satisfy the legal requirements.

9. Adoption of a permanent location for the Columbia River Highway through the City of Hood River: The Commission deferred action on this matter until later.

10. Naming of a bridge in honor of the late C. B. McCullough: Commissioner Chandler reported that he has made some inquiries regarding this matter in the Coos Bay district and the general consensus is that the Coos Bay Bridge on the Oregon Coast Highway should be so named although there are some people who want this bridge named in honor of Captain A. N. Simpson, a pioneer of the district and for whom the state park at the south end of the bridge already has been named. (A resolution was presented from the Coos and Curry Pioneer and Historical Association suggesting that this bridge be named "Simpson Bridge" in honor of this pioneer.) Chairman Banfield gave as his thought that the Commission should have a formal request for the naming of the bridge in honor of Mr. McCullough before it takes definite action on the matter, in view of which the matter was referred back to Mr. Chandler to handle.

11. Settlement with Mr. W. H. Gonyea for right of way needed for the proposed improvement of the Pacific Highway between Judkins Point and Goshen: The Engineer and the Chief Counsel advised that they are not ready to report on this subject.

12. Request for the rerouting of the Wasco-Heppner Secondary Highway through the property of Mr. R. A. Myers a short distance west of Condon: The Engineer advised that this matter is being investigated, but off hand he does not favor any change; however, he is assembling information and will report the matter in detail at the next meeting of the Commission. He pointed out that the Commission received bids on November 26, 1946, for the construction of the highway between Condon and Hay Creek along the proposed alignment through Mr. Myers' property and that a satisfactory bid was received therefore, but award of the contract was deferred pending disposal of this right of way matter. It was the thought of the Commission that it would not be right or fair to hold the contractor to his obligation any longer, and accordingly the Commission, by unanimous vote, rejected all bids received therefor and ordered return of the bid deposits of the respective bidders.

In this connection consideration was given by the Commission to the execution of an agreement with Gilliam County covering the abandonment of the old right of way of this highway which will no longer be of value for state highway purposes if the highway is realigned as planned. The Commission decided not to sign such an agreement at this time because of the uncertainity of the location. The Secretary was instructed to delete this item from the agenda until a definite decision has been reached with respect to the permanent location.

13. Question of re-opening Fifth Street North in the City of Coos Bay in order to permit property owners along this street access to the highway: Commissioner Chandler advised that neither the City Council nor the City Manager are in favor of granting such right of access, in view of which he recommended that the request of the property owners for such privilege be denied. The Commission approved the recommendation unanimously and it was so ordered.

14. Request of Weyerhaeuser Timber Company to construct its logging railroad at grade across the Pacific Highway at Sutherlin. The Engineer advised that he had nothing further to report on this matter except that the company has filed its application with the Public Utilities Commissioner for a hearing on the grade crossing feature. He stated that it is his intention to offer objections to the grade crossing when the matter is discussed. The Commission approved the report.

15. Inquiry from an owner of property along the Oregon Coast Highway south of Newport as to the plans of the Commission for the improvement of the highway at this point: The Chief Counsel advised that, in conformity with instructions from the Commission, he contacted this property owner relative to the acquisition of extra-width right of way along his frontage and was

quoted an exorbitant price for it, so nothing further has been done. It was his thought that this is a matter that could well wait for future developments. The Commission ordered this item deleted from future agendas.

16. Request of Foster and Kleiser Company for permission to maintain a workmen's platform on a four-foot strip of state-owned land in Astoria in connection with the maintenance of an advertising sign: The Chief Counsel advised that, as instructed by the Commission, he has endeavored to secure an expression from the owner of the adjacent property whether or not he would be willing to purchase this four-foot strip and lease it to Foster and Kleiser Company along with his other property; however, this man, who is of Chinese extraction, has not replied to date. The Commission instructed the Chief Counsel to give the Chinese one more chance and to report the results of his efforts at the next meeting.

17. Question of purchasing public liability and property damage insruance covering accidents that occur at the Interstate Bridge: The Commission ordered this item deleted from future agendas until the Chief Counsel is ready to report the outcome of a pending case.

18. Request for improvement of the Fox Hollow Secondary Highway from Eugene south about four miles: The Engineer advised that this project is included in the tentative Minor Betterment Program for consideration by the Commission when that matter is discussed.

19. Proposed rerouting of the Oregon Coast Highway through the town of Seaside: The Chief Counsel advised that there is nothing to report on this subject. The Commission ordered the item deleted from future agendas.

20. The Commission also ordered deleted from future agendas the matter of acquiring right of way for a proposed service road along US99E through the Kellogg Park Housing Project between Portland and Milwaukie.

21. Proposed acquisition of the Cliff House property on the Oregon Coast Highway at Depoe Bay for state park purposes: The Chief Counsel advised that, pursuant to authority previously granted by the Commission, he has begun proceedings to acquire this property by condemnation and that action is now under way. The Commission approved the report.

22. Request of the City of Portland for installation of traffic signals, etc., on McLoughlin Boulevard and on Barbur Boulevard, state highway routes, Portland: The Engineer advised that his report on this subject is not ready but that he will endeavor to prepare it for presentation at the next meeting of the Commission.

Commissioner A. W. Schaupp arrived at this time and entered into the discussions that followed.

The Engineer reported the need to establish a reduced speed limit along South Sixth Street in Klamath Falls, route of the Klamath Falls-Lakeview

Highway, particularly between M.P. 1.55 (at the junction of the Midland Secondary Highway, also being at the south city limits) and M.P. 3.37, which is 0.8 mile east of the USRS Canal crossing. He recommended the establishment of a 35-miles-per-hour speed zone between these points as a safety measure. The Commission approved the recommendation and thereupon adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following:

Name of highway: Klamath Falls-Lakeview (S. 6th Street - Klamath Falls)

Highway number: 20 Route number: ORE. 66

Location of Termini				Established Speed
M.P. 1.55 (Jct. Midland Hwy. City Limits - Klamath Falls	to	M.P. 3.37 (0.8 miles east of USRS Canal)		35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he

hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The request of the City Planning Commission of Klamath Falls for a restudy of the possibility of integrating traffic between connecting arterial highways in Klamath Falls was considered by the Commission. Action on this matter was deferred until a later date pending a report by Commissioner Schaupp and the Engineer.

The Commission resumed discussion of the matter of designating as a state secondary highway certain county roads between Estacada and Milwaukie, in Clackamas County. The Engineer reported on the progress to date in securing equipment needed for highway maintenance, this being one of the factors controlling the placing of these roads on the State Secondary Highway System. He advised that he has not been very successful to date in securing such equipment but believed eventually the equipment will be received. He also reported the estimated cost to maintain and construct this road, advising that, from preliminary investigations, the construction cost will be about $550,000, of which amount the Federal Government, through the Federal Housing Authority, agreed to contribute $275,000. In addition thereto, the state is to pay the cost of making a location survey, which is estimated at $25,000, and is to maintain the road, which is estimated to cost about $50,000, during the first year. In other words, the state is obligated to spend about $350,000 during the first year that it assumes jurisdiction over the road.

There followed a general discussion of the matter, during which Chairman Banfield gave as his thought that the road should be placed on the State Secondary Highway System for future state improvement and maintenance. Commissioners Schaupp and Chandler concurred. The Chief Counsel was thereupon instructed to prepare an appropriate form of agreement between the county and the state covering the matter. The Engineer was authorized and instructed to proceed immediately with the making of necessary surveys so the Commission will be in position to formally designate this road as a state secondary highway at its next meeting. The Commission also ordered that information be obtained from the County Court of Clackamas County regarding the right of way situation and as to how long a time the county will agree to maintain the present road. The Engineer was also authorized to inform Mr. W. H. Lynch, Division Engineer of the Public Roads Administration, that the Commission has approved this project and is now proceeding with the making of necessary surveys. In order that there may be no misunderstanding with regard to the securing of the Federal contribution of $275,000 for construction, the Commission ordered that a written

agreement be had with the Public Roads Administration covering this feature.

Mrs. Eloise Van Slatte and her attorney, Mr. Robert F. Maguire, reappeared before the Commission at this time with regard to land that is needed as right of way for a proposed connection of the Old Oregon Trail (new route between Hermiston and Umatilla) with the Columbia River Highway near Umatilla. The Engineer exhibited a map showing the proposed connection and explained details. Following considerable discussion Chairman Banfield advised that the Commission wishes to discuss this matter privately with the Engineer and the Chief Counsel before making its decision. Mrs. Van Slatte and Mr. Maguire thereupon departed.

In the further discussion of this matter the Engineer advised that from an engineering standpoint it is not feasible to change the plan as suggested by Mr. Maguire and recommended adherence to the present plan without alteration. The Chief Counsel advised that right of way for the Hermiston-Umatilla Project, which is now under contract, has been obtained with the exception of that needed from Mrs. Van Slatte. Commissioner Schaupp expressed the feeling that the Commission must follow the Engineer's recommendation in this matter. Commissioner Chandler pointed out that the contract for the construction of the project has already been awarded and the work is now under way, in view of which it is going to cost a considerable sum of money to make alterations. It was his thought that the Commission has no alternative but to proceed as recommended. Chairman Banfield expressed himself similarly and declared it to be the unanimous decision of the Commission that the project go forward as planned. The Chief Counsel was thereupon authorized and instructed by the Commission to proceed with condemnation proceedings to acquire this property. The following resolution with regard thereto, modifying and amending the resolution that was adopted by the Commission on December 30, 1946, authorizing condemnation of the property, was thereupon adopted by the Commission by unanimous vote:

> WHEREAS, the Commission on the thirtieth day of December, 1946, adopted and entered in the minutes and records of its meeting a resolution by which, among other things, it found and declared it necessary that the State acquire for right of way purposes some real property described in said resolution and authorized the Commission's Chief Counsel to negotiate with the owner of said real property for the acquisition of the same by agreement, and if it was found that such property could not be acquired by agreement then the Chief Counsel was instructed to institute and prosecute a condemnation proceeding; and
>
> WHEREAS, since the adoption of said resolution the owner of said property, to wit: Eloise Van Slatte, and her counsel, Robert F. Maguire, requested and were given an opportunity to appear before the Commission at its regular meeting in Portland on February 4, 1947, to discuss with the Commission matters involved in the acquisition of said property; and

WHEREAS, at said hearing it was requested by counsel for the owner of said land that the route of said highway be changed so as to follow an existing county road or that, if the route could not be changed, then a lesser area of the owner's property be taken; and

WHEREAS, after the said conference and after consideration of all of the matters and things presented and discussed it was the opinion and judgment of the Commission that the best interests of the public would not be served were the route to be changed so as to follow the said county road, and it was further the judgment and opinion of the Commission that the area of land described and sought to be acquired could not in the interests of the public be lessened; and

WHEREAS, since the adoption of said resolution and the description of the real property as given therein, it has been found that said description should be changed in a minor manner;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission that said resolution adopted by the Commission on the thirtieth day of December, 1946, be and the same is modified and amended as follows:

1. That the real property to be acquired for said highway shall be and the same hereby is described as follows:

A parcel of land lying in the southwest quarter (SW¼) of the northwest quarter (NW¼) and the northwest quarter (NW¼) of the southwest quarter (SW¼) of Section 15, Township 5 North, Range 28 East, W.M., Umatilla County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Eloise Van Slatte recorded in Book 151, Page 319, of Umatilla County Record of Deeds; the said parcel being described as follows:

Beginning at a point which is the intersection of the south line of the Columbia River Highway and the west line of Section 15, said point being 50 feet southerly from (when measured at right angles to) the center line of the Columbia River Highway at Engineer's Station 64+40, said point also being 3524 feet north and 8 feet east of the southwest corner of Section 15; thence South 0° 08' East a distance of 0.4 feet to a line which is 50 feet southwesterly from and parallel to the 1946 relocated center line of the Old Oregon Trail; thence parallel to said relocated center line on a 522.96 foot radius curve right (the long chord of which bears South 48° 40' 30" East for 647.23 feet) a distance of 697.87 feet and South 10° 26' 45" East 1808.29 feet to the south line of the northwest quarter of the southwest quarter of Section 15; thence South 88° 51' 45" East along said south line 102.08 feet to a line which is 50 feet northeasterly from and parallel to said relocated center line of the Old Oregon Trail at a point opposite Engineer's Station 30+73.24; thence North 10° 26' 45" West parallel to said relocated center line a distance of 1771.38

feet to a point opposite Station 13+03.86; thence North 79° 33' 15" East approximately 40 feet to the southerly extension of the west line of that tract of land conveyed to Oscar C. Hopkins and Carl Secaur by that certain deed recorded in Book 178, Page 178, of Umatilla County Record of Deeds; thence northerly along said west line and its southerly extension approximately 440 feet to the south line of the Columbia River Highway; thence westerly along said south line of the Columbia River Highway approximately 640 feet to the point of beginning.

The parcel of land to which this description applies contains 6.66 acres.

2. That the right of access to the highway to be built over said above described property shall remain in the abutting owner.

3. That the route selected for said section of highway as the same is disclosed in said original resolution and on the map which is related to said highway be and said route hereby is readopted as the route and location for said highway construction.

4. That except as amended by this amendatory resolution the original resolution shall remain in full force and effect.

5. That this resolution shall be entered in full in the minutes and records of this Commission as of the fifth day of February, 1947.

Reconsideration was given by the Commission to the sale of concession privileges in the Vista House at Crown Point on the Upper Columbia River Highway, being a resumption of the discussion of this matter that began on the first day of this meeting. In reply to the inquiry of Chairman Banfield, the Chief Counsel advised that, in his estimation, the Commission has no alternative but to accept the high bid submitted for this privilege by the Multnomah Falls Gift Shop —— that to do otherwise would be unfair. He further advised that he has contacted Mr. Edwin L. Dimmitt, the present caretaker at this place, regarding his vacation of the premises, and Mr. Dimmitt states that 30 days' notice to vacate would be satisfactory for his purposes. In view of this advise, the Commission voted unanimously to accept the offer of the Multnomah Falls Gift Shop which was received at the previous meeting.

Chairman Banfield brought up for discussion the matter of contracting the construction of the dredge fill sections on the Upper Columbia River Highway. The Engineer advised that suitable equipment to handle this work is scarce, and, in view thereof, the project is of interest to only a limited number of contractors who can handle the work. He further advised that he has discussed the matter with the General Construction Company from a standpoint of doing the work on a force account basis, and this Company at

first stated its willingness to rent equipment to the state for the sum of $1,500 a day, but later withdrew its offer because the dredge that it had available at that time burned, so he is now considering renting a dredge from the City of Portland. Mr. W. H. Lynch, Division Engineer of the Public Roads Administration, was present and stated his willingness to consider performance of the work on such basis, however, gave as his thought that the Commission should readvertise the project for bids at least once more before taking definite action to that end. He suggested that there are one or two contractors in the San Francisco area who might be interested. Following discussion the Commission voted unanimously to readvertise the project for bids and instructed the Engineer to do so at once in order that contractors may have plenty of time to make such investigations as may be required.

Chairman Banfield also brought up for discussion the matter of constructing the approach to the steel bridge on the Front Avenue Project in Portland. The Engineer was instructed to proceed at once in arranging details with the city and the railroad which is involved in order to avoid delays in proceeding with construction when the Commission is ready to contract the work.

The Engineer requested instructions relative to the construction of the landscaping project along Front Avenue, Portland, between Alder Street and Sheridan Street. He advised that this work was scheduled for contracting in March of this year, but because of the shortage of plant materials and supplies needed to construct a watering system it should be postponed. He recommended that the work be deferred for about a year when probabilities are that conditions will be better. Mr. Mark Astrup, Assistant Parks Superintendent, was present and gave further details why the work should be postponed. He recommended, pending construction of the major project, that the Commission authorize the seeding of the area to arrest erosion and to improve the appearance of the premises. He estimated the cost of such temporary work at $700 per acre, or a total of about $3,920. Following discussion the Commission voted unanimously to postpone the project and authorized a minimum expenditure for the planting of grass seed as a temporary expedient.

The Engineer also requested authority to spend an additional sum for extra landscaping work in connection with the Jantzen Beach Underpass Project. Mr. Mark Astrup, Assistant Parks Superintendent, explained the details in connection therewith. He advised that when the contract for the Jantzen Beach Underpass was awarded it was contemplated to landscape only two small traffic islands and provision for such work was made in the contract that was awarded to Edlefsen-Weygandt Co.; however, since that time the state has acquired title to additional areas within the "cloverleaf" which, in their present state, are unsightly. He recommended the regrading of these areas and placement of topsoil covering thereon, which he estimated would cost about $10,000; also, that the Commission authorize an expenditure of about $5,680 for the purchase of 71,000 English ivy plants to be used as a blanket covering for these areas and an additional expenditure of about $5,895 for planting, fertilizers, etc., and for the purchase of other shrubbery that is needed to give interest and utilitarian control of pedestrian traffic. He pointed out that this project is located at the entrance of the Pacific Highway into the State of Oregon from Washington, and, in his estimation, the proposed development is necessary in

order to give highway users a striking and favorable first impression of this state. The grading and topsoil work, he said, should be done now while the present contractor is on the job and before he constructs the pavement called for in his contract; otherwise, the source of the topsoil material will be lost. The Engineer concurred in the recommendation. Following discussion the Commission approved such project by unanimous vote.

The matter of purchasing additional equipment was again brought up for discussion by the Engineer. He advised that he had just received a telephone message that additional Government equipment costing approximately $150,000 is available to the State Highway Department if the Commission wants it. He urged favorable consideration by the Commission because the equipment is badly needed. The Commission by unanimous vote approved the purchase of such equipment, which is to be paid for out of the $153,730 balance remaining unobligated of the total amount of $500,000 heretofore authorized by the Commission for such purposes.

The Engineer presented an offer from Doernbecher Manufacturing Company to purchase 31 trees growing on the right of way of the Oregon Coast Highway where it passes through the Company's timber land near the town of Gardiner, Lane County, there being eight fir trees containing 13,246 board feet and 23 spruce trees containing 110,208 board feet. The Company offers to pay $5.75 per thousand board feet for the fir trees and $5.80 per thousand board feet for the spruce, the minimum figures set by the U.S. Forest Service for nearby National Forest timber. The Engineer recommended acceptance of this offer. The Commission approved the recommendation unanimously.

The Engineer also brought up for discussion log-hauling violations committed by C. R. Staples, Cascadia, and his partner, Huey VanHorn, as reported by the Chief Weighmaster, Mr. L. L. Spaulding. He explained the violations in detail and pointed out that Mr. Staples is one of the operators whose P.U.C. permit was canceled some time ago for other violations but was reinstated upon Mr. Staples' promise thereafter to comply with the requirements. (See letter dated January 30, 1947, from W. W. Stiffler, Assistant Maintenance Engineer, to R. H. Baldock, State Highway Engineer, in general files, for details of the violations.) The Engineer also reported on violations committed by Roland P. Hougham, McMinnville. In the discussion of these matters it appeared to the Commission that the cases against both operators were not clean cut because the weighmasters did not actually weigh the loads and the operators were not contacted by the weighmasters after they first ordered the loads to the scales for weighing purposes. The Commission restated its intention not to cancel the permit of any operator until it has a "sure" case against him.

The Engineer presented an application from the Roseboro Lumber Company, Springfield, to maintain and operate a cable over the McKenzie Highway at Mile Post 35.2 near Nimrod Road Junction as a temporary proposition pending reconstruction of their logging road bridge which was recently destroyed by high water in the McKenzie River. The Engineer estimated that it would take about six weeks to complete the bridge work. The Commission
